Table of Contents **2**

List of Tables **6**

1 Introduction **20**

1.1 Intended Audience 20

2 Alcatel-Lucent 5620 SAM Documentation Set **21**

3 Network Element Compatibility **22**

3.1 Alcatel-Lucent 7750 Service Router 22

Alcatel-Lucent 7750 Service Router Release 9.0 22

Alcatel-Lucent 7750 Service Router Release 8.0 27

Alcatel-Lucent 7750 Service Router Release 7.0 184

Alcatel-Lucent 7750 Service Router Release 6.1 503

Alcatel-Lucent 7750 Service Router Release 6.0 735

Alcatel-Lucent 7750 Service Router Release 5.0 965

Alcatel-Lucent 7750 Service Router Release 4.0 1129

Alcatel-Lucent 7750 Service Router Release 3.0 1153

Alcatel-Lucent 7750 Service Router Release 2.1 1178

Alcatel-Lucent 7750 Service Router Release 2.0 1184

3.2 Alcatel-Lucent 7450 Ethernet Service Switch 1187

Alcatel-Lucent 7450 Ethernet Service Switch Release 9.0 1187

Alcatel-Lucent 7450 Ethernet Service Switch Release 8.0 1191

Alcatel-Lucent 7450 Ethernet Service Switch Release 7.0 1316

Alcatel-Lucent 7450 Ethernet Service Switch Release 6.1 1542

Alcatel-Lucent 7450 Ethernet Service Switch Release 6.0 1687

Alcatel-Lucent 7450 Ethernet Service Switch Release 5.0 1840

Alcatel-Lucent 7450 Ethernet Service Switch Release 4.0 1957

Alcatel-Lucent 7450 Ethernet Service Switch Release 3.0 1978
Alcatel-Lucent 7450 Ethernet Service Switch Release 2.0 1991
Alcatel-Lucent 7450 Ethernet Service Switch Release 1.0 1995
3.3 Alcatel-Lucent 7710 Service Router 1996
Alcatel-Lucent 7710 Service Router Release 9.0 1996
Alcatel-Lucent 7710 Service Router Release 8.0 2001
Alcatel-Lucent 7710 Service Router Release 7.0 2123
Alcatel-Lucent 7710 Service Router Release 6.1 2371
Alcatel-Lucent 7710 Service Router Release 6.0 2575
Alcatel-Lucent 7710 Service Router Release 5.0 2769
Alcatel-Lucent 7710 Service Router Release 3.0 2865
3.4 Alcatel-Lucent 7705 Service Aggregation Router 2878
Alcatel-Lucent 7705 Service Aggregation Router Release 4.0 2878
Alcatel-Lucent 7705 Service Aggregation Router Release 3.0 2879
Alcatel-Lucent 7705 Service Aggregation Router Release 2.1 2885
Alcatel-Lucent 7705 Service Aggregation Router Release 2.0 2886
Alcatel-Lucent 7705 Service Aggregation Router Release 1.1 2887
Alcatel-Lucent 7705 Service Aggregation Router Release 1.0 2888
3.5 Alcatel-Lucent 7210 Service Access Switch 2890
Alcatel-Lucent 7210 Service Access Switch Release 3.0 2890
Alcatel-Lucent 7210 Service Access Switch Release 2.0 2894
Alcatel-Lucent 7210 Service Access Switch Release 1.1 2901
Alcatel-Lucent 7210 Service Access Switch Release 1.0 2904
3.6 Alcatel-Lucent 7250 Service Access Switch 2906
Alcatel-Lucent 7250 Service Access Switch Release 3.0 2906
Alcatel-Lucent 7250 Service Access Switch Release 2.0 2912

Alcatel-Lucent 7250 Service Access Switch Release 1.0 2924

3.7 Alcatel-Lucent 7750 Mobile Gateway 2926

Alcatel-Lucent 7750 Mobile Gateway Release 3.0 2926

Alcatel-Lucent 7750 Mobile Gateway Release 2.0 2927

3.8 Alcatel-Lucent 9471 Mobility Management Entity 2929

Alcatel-Lucent 9471 Mobility Management Entity Release 3.0 2929

Alcatel-Lucent 9471 Mobility Management Entity Release 2.1 2930

3.9 Alcatel-Lucent 5780 Dynamic Services Controller 2931

Alcatel-Lucent 5780 Dynamic Services Controller Release 3.0 2931

Alcatel-Lucent 5780 Dynamic Services Controller Release 2.0 2932

3.10 Alcatel-Lucent 9412 / 9926 eNodeB 2933

Alcatel-Lucent 9412 / 9926 eNodeB Release TLA3.0 2933

Alcatel-Lucent 9412 / 9926 eNodeB Release TLA2.1 2934

Alcatel-Lucent 9412 / 9926 eNodeB Release LA3.0 2935

Alcatel-Lucent 9412 / 9926 eNodeB Release LA2.0 2936

3.11 Telco T5 Compact 2937

Telco T5 Compact Release 6.5.5 2937

Telco T5 Compact Release 6.5.2 2938

Telco T5 Compact Release 6.3.13 2939

Telco T5 Compact Release 6.3.12 2940

Telco T5 Compact Release 6.3.11 2941

Telco T5 Compact Release 5.10.1 2942

3.12 Alcatel-Lucent OmniSwitch 2943

Alcatel-Lucent OmniSwitch Series 6.6.2 2943

Alcatel-Lucent OmniSwitch Series 6.6.1 2944

Alcatel-Lucent OmniSwitch Series 6.4.4 2945

Alcatel-Lucent OmniSwitch Series 6.4.3 2946
Alcatel-Lucent OmniSwitch Series 6.4.2 2947
Alcatel-Lucent OmniSwitch Series 6.3.4 2948
Alcatel-Lucent OmniSwitch Series 6.3.3 2949
Alcatel-Lucent OmniSwitch Series 6.3.2 2950
Alcatel-Lucent OmniSwitch Series 6.3.1 2951
3.13 Alcatel-Lucent 9500 Microwave Packet Radio ANSI Release 2953
Alcatel-Lucent 9500 Microwave Packet Radio ANSI Release 3.0 2953
Alcatel-Lucent 9500 Microwave Packet Radio ANSI Release 2.2 2954
Alcatel-Lucent 9500 Microwave Packet Radio ANSI Release 2.1 2955
Alcatel-Lucent 9500 Microwave Packet Radio ANSI Release 2.0 2956
Alcatel-Lucent 9500 Microwave Packet Radio ANSI Release 1.2 2957
3.14 Alcatel-Lucent 9500 Microwave Packet Radio ETSI Release 2958
Alcatel-Lucent 9500 Microwave Packet Radio ETSI Release 3.0..... 2958
Alcatel-Lucent 9500 Microwave Packet Radio ETSI Release 2.1..... 2959
Alcatel-Lucent 9500 Microwave Packet Radio ETSI Release 1.4..... 2960
Alcatel-Lucent 9500 Microwave Packet Radio ETSI Release 1.3..... 2961
Alcatel-Lucent 9500 Microwave Packet Radio ETSI Release 1.2..... 2962
3.15 Alcatel-Lucent 1830 Photonic Service Switch 2963
Alcatel-Lucent 1830 Photonic Service Switch Release 2.5 2963

1 Introduction

The 5620 SAM Network Element Compatibility Guide describes the compatibility between releases of the Alcatel-Lucent 5620 Service Aware Manager (5620 SAM) and the following network elements:

- 7750 Service Router (7750 SR)
- 7450 Ethernet Service Switch (7450 ESS)
- 7710 Service Router (7710 SR)
- 7705 Service Aggregation Router (7705 SAR)
- 7210 Service Access Switch (7210 SAS)
- 7250 Service Access Switch (7250 SAS)
- 7750 Mobile Gateway (7750 MG)
- 9471 Mobile Management Entity (9471 MME)
- 5870 Dynamic Services Controller (5870 DSC)
- 9412 / 9926 eNodeB
- Telco T5 Compact Service Extension Node
- OmniSwitch 6250 Series
- OmniSwitch 6850 Series
- OmniSwitch 6855 Series
- OmniSwitch 6400 Series
- OmniSwitch 9600 Series
- OmniSwitch 9700 Series
- OmniSwitch 9700E Series
- OmniSwitch 9800 Series
- OmniSwitch 9800E Series
- 9500 Microwave Packet Radio (9500 MPR)
- 1830 Photonic Service Switch (1830 PSS)

This document should be used in conjunction with the relevant 5620 SAM Release Description to determine the set of functionality supported by 5620 SAM.

It is the intent of this document to be published frequently, in order to document the compatibility of 5620 SAM with new product releases. The latest version of this document can be retrieved from Alcatel-Lucent OnLine Customer Support (OLCS) using the following URL:

https://infoproducts.alcatel-lucent.com/aces/cgi-bin/dbaccessproddoc.cgi.edit?entryId=1-0000000002372&doctype=DOC

1.1 Intended Audience

This document is to be used by customers to determine compatibility between network element releases and 5620 SAM releases.

2 Alcatel-Lucent 5620 SAM Documentation Set

Alcatel-Lucent publishes additional documentation describing other aspects of the Alcatel-Lucent 5620 SAM product.

- *5620 SAM Installation and Upgrade Guide* details the procedures necessary to install or upgrade 5620 SAM. This guide also describes procedures for making changes to the configuration of the 5620 SAM deployment, such as adding SAM redundancy.
- *5620 SAM User Guide* contains information about using the client GUI to perform network management functions, including the configurable parameters in the *5620 SAM Parameter Guide* to find definitions, ranges, dependencies, and defaults.
- *5620 SAM Statistics Management Guide* contains information about configuring the 5620 SAM to collect accounting and performance statistics, as well as descriptions of collected statistics.
- *5620 SAM-O OSS Interface Developer Guide* contains information about using the XML OSS interface to create OSS applications, such as alarm monitoring and inventory controls.
- *5620 SAM Troubleshooting Guide* provides information to troubleshoot 5620 SAM-managed networks, services, applications and platforms.
- *5620 SAM Routine Maintenance Procedures Guide* helps develop and schedule regular maintenance activities.
- *5620 SAM System Architecture Guide* contains a high-level view of 5620 SAM communications, configuration, and security functionality.
- *5620 SAM Network Element Compatibility Guide* contains information about which versions of NEs are manageable by what versions of 5620 SAM, including a description of any restrictions or limitations on 5620 SAM's management capabilities.
- *5620 SAM Release Description* provides detailed description of the functionality offered by 5620 SAM.

3 Network Element Compatibility

3.1 Alcatel-Lucent 7750 Service Router

Alcatel-Lucent 7750 Service Router Release 9.0

Table 1: 7750 SR 9.0 R3

5620 SAM Release	Compatibility Statement (7750 SR 9.0 R3)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **DHCP Filter Capability.** 5620 SAM does not support dhcp filters. [609989] **Credit Control IPv6 Filter.** 5620 SAM does not support new range of icmp-code and icmp-type. [609984] **Percentage Based BW in QoS policies.** 5620 SAM does not support Percentage Based Bandwidth in QoS Policies. [609976] **VID Filters.** 5620 SAM does not support VLAN in MAC filter inc. bitmask for ACL and QoS policies . [609969] **Multi-segment PW Routing.** 5620 SAM does not support Multi-Segment Pseudowire Routing (Dynamic MS-Pws). [609964] **Extentions to ATM/ETHERNET Last-mile Aware QoS for BNG**. 5620 SAM does not support Extentions to ATM/ETHERNET Last-mile Aware QoS for Broadband Network Gateway. [609997] **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including “Lanes Not Blocked Locked”, “Alignment Marker Loss of Lock” and “Duplicate Lane Marker”. [601636] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379

5620 SAM Release	Compatibility Statement (7750 SR 9.0 R3)
	Timestamps for OAM. [582495] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288]

Table 2: 7750 SR 9.0 R1 through R2

5620 SAM Release	Compatibility Statement (7750 SR 9.0 R1 through R2)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection

5620 SAM Release	Compatibility Statement (7750 SR 9.0 R1 through R2)
	state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer).

5620 SAM Release	Compatibility Statement (7750 SR 9.0 R1 through R2)
	MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received). 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Alcatel-Lucent 7750 Service Router Release 8.0

Table 3: 7750 SR 8.0 R10[1]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R10)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **PPP LCP Protocol Reject.** 5620 SAM does not support provisioning PPP policy to "reject-disabled-ncp" if ipv6 was not configured". [610833] **Credit Control IPv6 Filter.** 5620 SAM does not support new range of icmp-code and icmp-type. [610781] **CBS Pool Alarm Thresholds.** 5620 SAM does not support provisioning or monitoring of pool alarm thresholds for CBS. [610784] **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts.

[1] Note: 7750 SR 8.0 R8 was never released to the field.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R10)
	[587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288]
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [607054] **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including “Lanes Not Blocked Locked”, “Alignment Marker Loss of Lock” and “Duplicate Lane Marker”. [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R10)
	Additional Chassis Support for Cpipe VLL PW Switching. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R10)
	per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R10)
	SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [607054] **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R10)
	MPLS Exception Messages Rate Limiting for VPRN. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **(PTS 601293) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [601293] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R10)
	APS Multilink Bundle Stateless Switchover. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R10)
	Multicast over RSVP, P2MP, and LSP. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R10)
	synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [607054] **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **(PTS 601293) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [601293] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R10)
	for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R10)
	[572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R10)
	support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [607054] **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **(PTS 601293) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [601293] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R10)
	Lock" and "Duplicate Lane Marker". [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **1-Port 100G and 12-Port 10G Ethernet IMMs.** 5620 SAM does not support the 1-Port 100G and 12-Port 10G Ethernet IMM Cards. **IPv6 Support on IPipe.** 5620 SAM does not support IPv6 for IPipes. **RSVP-TE P2MP I-PMSI.** 5620 SAM does not support RSVP-TE P2MP I-PMSI. **SC-APS Support for MLPPP on Network Ports.** 5620 SAM does not support MLPPP on Network Ports for SC-APS. **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **Ethernet CFM Frame Rate Limiting.** 5620 SAM does not support Ethernet CFM Frame Rate Limiting. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **QinQ Untagged Frames ".0".** 5620 SAM does not support QinQ Untagged Frames (.0) for L2 and L3 Access Interfaces. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **(PTS 587339) IGMP Tunnel Interface Deployment Failure.** 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R10)
	support creation of IGMP Tunnel Interfaces of type RSVP. A deployment failure will occur upon attempted creation. **7750 SR-c4.** 5620 SAM does not support Management of 7750 SR-c4. **OC-768/STM-256C DWDM IMM Card.** 5620 SAM does not support the OC-768/STM-256C DWDM IMM Card. **BITS-OUT Support.** 5620 SAM does not support BITS-OUT support for SFM3/CFM on 7750 SR-7/SR-12/SR-c4. **Full SSM/ESMC Support.** 5620 SAM does not support full SSM/ESMC capability for clock source quality level received via SSM of SDH/SONET/BITS ports or ESMC of synchronous Ethernet ports for system timing reference selection. **Uni-Directional APS Service Parity for SONET/SDH Channelized and Non-Channelized Interfaces.** 5620 SAM does not support uni-directional APS service parity for SONET/SDH channelized and non-channelized interfaces for MDAs/CMAs that previously only supported bi-directional switching mode APS. **G.8032 Ethernet Ring Protocol.** 5620 SAM does not support G.8032 ethernet ring automatic protection switching. **NAT Basic Port Forwarding.** 5620 SAM does not support NAT basic port forwarding. **DIAMETER Credit Control On-line Charging.** 5620 SAM does not support on-line charging wuth DIAMETER Credit Control. **Multicast over PPPoE Sessions.** 5620 SAM does not support multicast of PPPoE sessions. **Remove/Add/Modify Domain Names in RADIUS Authentication.** 5620 SAM does not support add/remove/replace for strings used as domain names in PAP/CHAP authentication. **Multiple RADIUS Authentication Based On Domain Name.** 5620 SAM does not support multiple RADIUS Authentication based on Domain Name (Pre-Authentication in LUDB). **IPoE User Name Option 61/60.** 5620 SAM does not support RADIUS User Name Format: DHCP Option 61/60. **ESM IPv6 Local User Database (LUDB) for IPoE.** 5620 SAM does not support ESM IPv6 Local User Database (LUDB) for IPoE. **ATM Aware QoS for Broadband Network Gateway.** 5620 SAM does not support ATM/ethernet last-mile aware QoS for broadband network gateway. **H-Pol Support for 7750 SR-c12/SR-c4.** 5620 SAM does not support Class-Fair Hierarchical Policing (H-Pol) for 7750 SR-c12/SR-c4. **Queue Parent Weight Override.** 5620 SAM does not support queue parent weight override. **QoS Burst Management.** 5620 SAM does not support QoS Burst Management.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R10)
	Video-ISA with Alcatel-Lucent 5910 VSA SP4 (RET/FCC). 5620 SAM does not support Video-ISA with Alcatel-Lucent 5910 VSA Service Pack 4 (RET/FCC), including dynamic computation of FCC duration and bandwidth, audio re-ordering for FCC. **Video Dual-Stream Selection.** 5620 SAM does not support video dual-stream selection. **Video Quality Monitoring.** 5620 SAM does not support Video Quality Monitoring (VQM). **Multicast Over LDP P2MP LSP.** 5620 SAM does not support multicast over LDP P2MP LSP. **LSP Automatic Bandwidth Adjustment.** 5620 SAM does not support LSP Automatic Bandwidth Adjustment. **Routed VPLS.** 5620 SAM does not support Routed VPLS. **PBB Support for RFC 3107.** 5620 SAM does not support PBB for RFC 3107 (BGP LSP for PBB-VPLS Services). **LDP FEC to BGP Label Route Stitching.** 5620 SAM does not support LDP FEC to BGP label route stitching. **Multi-homing for L3 Services.** 5620 SAM does not support multi-homing for L3 Services (BGP Anycast address support). **SDP-Configurable Tunnel Destination Address.** 5620 SAM does not support SDP-configurable tunnel destination address. **Hashing Enhancements for Consistent Per-Service Forwading .** 5620 SAM does not support hashing enhancements for conistent per-service forwarding. **HSDPA Offload Fallback Over ATM .** 5620 SAM does not support HSDPA offload fallback over ATM. **Subscriber Attribute Override of App-Profile Values .** 5620 SAM does not support subscriber attribute override of app-profile values. **IPipe Divert to AA.** 5620 SAM does not support IPipe divert to Application Assurance. **AA-ISA Large Session Congestion Mitigation.** 5620 SAM does not support AA-ISA Large Session Congestion Mitigation. **Enable ESMC on WAN Ports.** 5620 SAM does not support enabling ESMC for WAN ports. **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. **RADIUS Authentication Policy Down Time.** 5620 SAM does not support RADIUS authentication policy down time. **CoA-Only RADIUS Server.** 5620 SAM does not support CoA-only RADIUS server. **TACACS+ 128-Character Secret Key.** 5620 SAM does not support 128 characters for

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R10)
	the TACACS+ secret key. **LAG LACP System-ID Configuration.** 5620 SAM does not support configuration of the LACP System-ID for LAGs. **BGP Prefix Limit Threshold Percentage and Log-only.** 5620 SAM does not support configuration threshold limit percentage and log-only parameters for BGP peers. **IS-IS Default IPv4 and IPv6 Metric Values.** 5620 SAM does not support IPv4 and IPv6 default metrics for IS-IS interfaces. **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587672] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **Uni-directional APS Support.** 5620 SAM does not support Uni-directional APS. [581463] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R10)
	PIM SSM Default Range Disable. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R10)
	of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R10)
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [607054] **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **(PTS 601293) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [601293] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including “Lanes Not Blocked Locked”, “Alignment Marker Loss of Lock” and “Duplicate Lane Marker”. [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **1-Port 100G and 12-Port 10G Ethernet IMMs.** 5620 SAM does not support the 1-Port 100G and 12-Port 10G Ethernet IMM Cards. **IPv6 Support on IPipe.** 5620 SAM does not support IPv6 for IPipes.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R10)
	RSVP-TE P2MP I-PMSI. 5620 SAM does not support RSVP-TE P2MP I-PMSI. **SC-APS Support for MLPPP on Network Ports.** 5620 SAM does not support MLPPP on Network Ports for SC-APS. **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **Ethernet CFM Frame Rate Limiting.** 5620 SAM does not support Ethernet CFM Frame Rate Limiting. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **QinQ Untagged Frames ".0".** 5620 SAM does not support QinQ Untagged Frames (.0) for L2 and L3 Access Interfaces. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **(PTS 587339) IGMP Tunnel Interface Deployment Failure.** 5620 SAM does not support creation of IGMP Tunnel Interfaces of type RSVP. A deployment failure will occur upon attempted creation. **7750 SR-c4.** 5620 SAM does not support Management of 7750 SR-c4. **OC-768/STM-256C DWDM IMM Card.** 5620 SAM does not support the OC-768/STM-256C DWDM IMM Card. **BITS-OUT Support.** 5620 SAM does not support BITS-OUT support for SFM3/CFM on 7750 SR-7/SR-12/SR-c4. **Full SSM/ESMC Support.** 5620 SAM does not support full SSM/ESMC capability for clock source quality level received via SSM of SDH/SONET/BITS ports or ESMC of synchronous Ethernet ports for system timing reference selection. **Uni-Directional APS Service Parity for SONET/SDH Channelized and Non-Channelized Interfaces.** 5620 SAM does not support uni-directional APS service parity for SONET/SDH channelized and non-channelized interfaces for MDAs/CMAs that previously only supported bi-directional switching mode APS. **G.8032 Ethernet Ring Protocol.** 5620 SAM does not support G.8032 ethernet ring automatic protection switching. **NAT Basic Port Forwarding.** 5620 SAM does not support NAT basic port forwarding. **DIAMETER Credit Control On-line Charging.** 5620 SAM does not support on-line charging wuth DIAMETER Credit Control. **Multicast over PPPoE Sessions.** 5620 SAM does not support multicast of PPPoE sessions.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R10)
	Remove/Add/Modify Domain Names in RADIUS Authentication. 5620 SAM does not support add/remove/replace for strings used as domain names in PAP/CHAP authentication. **Multiple RADIUS Authentication Based On Domain Name.** 5620 SAM does not support multiple RADIUS Authentication based on Domain Name (Pre-Authentication in LUDB). **IPoE User Name Option 61/60.** 5620 SAM does not support RADIUS User Name Format: DHCP Option 61/60. **ESM IPv6 Local User Database (LUDB) for IPoE.** 5620 SAM does not support ESM IPv6 Local User Database (LUDB) for IPoE. **ATM Aware QoS for Broadband Network Gateway.** 5620 SAM does not support ATM/ethernet last-mile aware QoS for broadband network gateway. **H-Pol Support for 7750 SR-c12/SR-c4.** 5620 SAM does not support Class-Fair Hierarchical Policing (H-Pol) for 7750 SR-c12/SR-c4. **Queue Parent Weight Override.** 5620 SAM does not support queue parent weight override. **QoS Burst Management.** 5620 SAM does not support QoS Burst Management. **Video-ISA with Alcatel-Lucent 5910 VSA SP4 (RET/FCC).** 5620 SAM does not support Video-ISA with Alcatel-Lucent 5910 VSA Service Pack 4 (RET/FCC), including dynamic computation of FCC duration and bandwidth, audio re-ordering for FCC. **Video Dual-Stream Selection.** 5620 SAM does not support video dual-stream selection. **Video Quality Monitoring.** 5620 SAM does not support Video Quality Monitoring (VQM). **Multicast Over LDP P2MP LSP.** 5620 SAM does not support multicast over LDP P2MP LSP. **LSP Automatic Bandwidth Adjustment.** 5620 SAM does not support LSP Automatic Bandwidth Adjustment. **Routed VPLS.** 5620 SAM does not support Routed VPLS. **PBB Support for RFC 3107.** 5620 SAM does not support PBB for RFC 3107 (BGP LSP for PBB-VPLS Services). **LDP FEC to BGP Label Route Stitching.** 5620 SAM does not support LDP FEC to BGP label route stitching. **Multi-homing for L3 Services.** 5620 SAM does not support multi-homing for L3 Services (BGP Anycast address support). **SDP-Configurable Tunnel Destination Address.** 5620 SAM does not support SDP-configurable tunnel destination address.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R10)
	Hashing Enhancements for Consistent Per-Service Forwading . 5620 SAM does not support hashing enhancements for conistent per-service forwarding. **HSDPA Offload Fallback Over ATM .** 5620 SAM does not support HSDPA offload fallback over ATM. **Subscriber Attribute Override of App-Profile Values .** 5620 SAM does not support subscriber attribute override of app-profile values. **IPipe Divert to AA.** 5620 SAM does not support IPipe divert to Application Assurance. **AA-ISA Large Session Congestion Mitigation.** 5620 SAM does not support AA-ISA Large Session Congestion Mitigation. **Enable ESMC on WAN Ports.** 5620 SAM does not support enabling ESMC for WAN ports. **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. **RADIUS Authentication Policy Down Time.** 5620 SAM does not support RADIUS authentication policy down time. **CoA-Only RADIUS Server.** 5620 SAM does not support CoA-only RADIUS server. **TACACS+ 128-Character Secret Key.** 5620 SAM does not support 128 characters for the TACACS+ secret key. **LAG LACP System-ID Configuration.** 5620 SAM does not support configuration of the LACP System-ID for LAGs. **BGP Prefix Limit Threshold Percentage and Log-only.** 5620 SAM does not support configuration threshold limit percentage and log-only parameters for BGP peers. **IS-IS Default IPv4 and IPv6 Metric Values.** 5620 SAM does not support IPv4 and IPv6 default metrics for IS-IS interfaces. **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **LAC Tunnel Support for VPRN (L2TP).** 5620 SAM does not support LAC Tunnels for VPRN (L2TP). **LNS Over MPLS LNS.** 5620 SAM does not support LNS Over MPLS LNS. **L2TP Tunnel Switching with ESM.** 5620 SAM does not support L2TP Tunnel Switching with ESM. **LI Activation Enhancements.** 5620 SAM does not support LI Activation Enhancements. **LI for LAC Sessions.** 5620 SAM does not support LI for LAC Sessions. **SLA Override without SLA-Profile Change.** 5620 SAM does not support SLA override without SLA-Profile change.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R10)
	802.1ag MA Association Naming for Y1731 Eth-OAM MEGs. 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587672] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **Uni-directional APS Support.** 5620 SAM does not support Uni-directional APS. [581463] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R10)
	SHCV Timeout and Retries. 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R10)
	ARP on DHCP Response Packets. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 4: 7750 SR 8.0 R9[2]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and

[2] Note: 7750 SR 8.0 R8 was never released to the field.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
	Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
	Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set"

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
	Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [607054] **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including “Lanes Not Blocked Locked”, “Alignment Marker Loss of Lock” and “Duplicate Lane Marker”. [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
	Termination. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
	MMRP IMPM Override. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
	Blackhole Ingress Switch Fabric Multicast Path Type. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [607054] **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **(PTS 601293) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [601293] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
	support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
	System Timing Reference Selection State. 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
	Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [607054]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
	Additional DNS Ping Error Results. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **(PTS 601293) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [601293] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
	IGMP Tunnel Interface Administrative State. 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
	LDP FEC Statistics. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad).

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [607054] **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **(PTS 601293) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [601293] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
	status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **1-Port 100G and 12-Port 10G Ethernet IMMs.** 5620 SAM does not support the 1-Port 100G and 12-Port 10G Ethernet IMM Cards. **IPv6 Support on IPipe.** 5620 SAM does not support IPv6 for IPipes. **RSVP-TE P2MP I-PMSI.** 5620 SAM does not support RSVP-TE P2MP I-PMSI. **SC-APS Support for MLPPP on Network Ports.** 5620 SAM does not support MLPPP on Network Ports for SC-APS. **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **Ethernet CFM Frame Rate Limiting.** 5620 SAM does not support Ethernet CFM Frame Rate Limiting. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **QinQ Untagged Frames ".0".** 5620 SAM does not support QinQ Untagged Frames (.0) for L2 and L3 Access Interfaces. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **(PTS 587339) IGMP Tunnel Interface Deployment Failure.** 5620 SAM does not support creation of IGMP Tunnel Interfaces of type RSVP. A deployment failure will occur upon attempted creation. **7750 SR-c4.** 5620 SAM does not support Management of 7750 SR-c4. **OC-768/STM-256C DWDM IMM Card.** 5620 SAM does not support the OC-768/STM-256C DWDM IMM Card. **BITS-OUT Support.** 5620 SAM does not support BITS-OUT support for SFM3/CFM on 7750 SR-7/SR-12/SR-c4. **Full SSM/ESMC Support.** 5620 SAM does not support full SSM/ESMC capability for clock source quality level received via SSM of SDH/SONET/BITS ports or ESMC of synchronous Ethernet ports for system timing reference selection. **Uni-Directional APS Service Parity for SONET/SDH Channelized and Non-Channelized Interfaces.** 5620 SAM does not support uni-directional APS service

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
	parity for SONET/SDH channelized and non-channelized interfaces for MDAs/CMAs that previously only supported bi-directional switching mode APS. **G.8032 Ethernet Ring Protocol.** 5620 SAM does not support G.8032 ethernet ring automatic protection switching. **NAT Basic Port Forwarding.** 5620 SAM does not support NAT basic port forwarding. **DIAMETER Credit Control On-line Charging.** 5620 SAM does not support on-line charging wuth DIAMETER Credit Control. **Multicast over PPPoE Sessions.** 5620 SAM does not support multicast of PPPoE sessions. **Remove/Add/Modify Domain Names in RADIUS Authentication.** 5620 SAM does not support add/remove/replace for strings used as domain names in PAP/CHAP authentication. **Multiple RADIUS Authentication Based On Domain Name.** 5620 SAM does not support multiple RADIUS Authentication based on Domain Name (Pre-Authentication in LUDB). **IPoE User Name Option 61/60.** 5620 SAM does not support RADIUS User Name Format: DHCP Option 61/60. **ESM IPv6 Local User Database (LUDB) for IPoE.** 5620 SAM does not support ESM IPv6 Local User Database (LUDB) for IPoE. **ATM Aware QoS for Broadband Network Gateway.** 5620 SAM does not support ATM/ethernet last-mile aware QoS for broadband network gateway. **H-Pol Support for 7750 SR-c12/SR-c4.** 5620 SAM does not support Class-Fair Hierarchical Policing (H-Pol) for 7750 SR-c12/SR-c4. **Queue Parent Weight Override.** 5620 SAM does not support queue parent weight override. **QoS Burst Management.** 5620 SAM does not support QoS Burst Management. **Video-ISA with Alcatel-Lucent 5910 VSA SP4 (RET/FCC).** 5620 SAM does not support Video-ISA with Alcatel-Lucent 5910 VSA Service Pack 4 (RET/FCC), including dynamic computation of FCC duration and bandwidth, audio re-ordering for FCC. **Video Dual-Stream Selection.** 5620 SAM does not support video dual-stream selection. **Video Quality Monitoring.** 5620 SAM does not support Video Quality Monitoring (VQM). **Multicast Over LDP P2MP LSP.** 5620 SAM does not support multicast over LDP P2MP LSP. **LSP Automatic Bandwidth Adjustment.** 5620 SAM does not support LSP Automatic Bandwidth Adjustment.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
	Routed VPLS. 5620 SAM does not support Routed VPLS. **PBB Support for RFC 3107.** 5620 SAM does not support PBB for RFC 3107 (BGP LSP for PBB-VPLS Services). **LDP FEC to BGP Label Route Stitching.** 5620 SAM does not support LDP FEC to BGP label route stitching. **Multi-homing for L3 Services.** 5620 SAM does not support multi-homing for L3 Services (BGP Anycast address support). **SDP-Configurable Tunnel Destination Address.** 5620 SAM does not support SDP-configurable tunnel destination address. **Hashing Enhancements for Consistent Per-Service Forwading .** 5620 SAM does not support hashing enhancements for conistent per-service forwarding. **HSDPA Offload Fallback Over ATM .** 5620 SAM does not support HSDPA offload fallback over ATM. **Subscriber Attribute Override of App-Profile Values .** 5620 SAM does not support subscriber attribute override of app-profile values. **IPipe Divert to AA.** 5620 SAM does not support IPipe divert to Application Assurance. **AA-ISA Large Session Congestion Mitigation.** 5620 SAM does not support AA-ISA Large Session Congestion Mitigation. **Enable ESMC on WAN Ports.** 5620 SAM does not support enabling ESMC for WAN ports. **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. **RADIUS Authentication Policy Down Time.** 5620 SAM does not support RADIUS authentication policy down time. **CoA-Only RADIUS Server.** 5620 SAM does not support CoA-only RADIUS server. **TACACS+ 128-Character Secret Key.** 5620 SAM does not support 128 characters for the TACACS+ secret key. **LAG LACP System-ID Configuration.** 5620 SAM does not support configuration of the LACP System-ID for LAGs. **BGP Prefix Limit Threshold Percentage and Log-only.** 5620 SAM does not support configuration threshold limit percentage and log-only parameters for BGP peers. **IS-IS Default IPv4 and IPv6 Metric Values.** 5620 SAM does not support IPv4 and IPv6 default metrics for IS-IS interfaces. **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
	Y1731 Eth-OAM MEGs. [587671] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587672] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **Uni-directional APS Support.** 5620 SAM does not support Uni-directional APS. [581463] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
	Static Route LDP Synchronization. 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
	PIP STP Inside Same MST Region. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [607054] **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
	rate limiting of MPLS exception messagesfor VPRN Services. [607059] **(PTS 601293) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [601293] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **1-Port 100G and 12-Port 10G Ethernet IMMs.** 5620 SAM does not support the 1-Port 100G and 12-Port 10G Ethernet IMM Cards. **IPv6 Support on IPipe.** 5620 SAM does not support IPv6 for IPipes. **RSVP-TE P2MP I-PMSI.** 5620 SAM does not support RSVP-TE P2MP I-PMSI. **SC-APS Support for MLPPP on Network Ports.** 5620 SAM does not support MLPPP on Network Ports for SC-APS. **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **Ethernet CFM Frame Rate Limiting.** 5620 SAM does not support Ethernet CFM Frame Rate Limiting. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
	IPv6 addresses. **QinQ Untagged Frames ".0".** 5620 SAM does not support QinQ Untagged Frames (.0) for L2 and L3 Access Interfaces. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **(PTS 587339) IGMP Tunnel Interface Deployment Failure.** 5620 SAM does not support creation of IGMP Tunnel Interfaces of type RSVP. A deployment failure will occur upon attempted creation. **7750 SR-c4.** 5620 SAM does not support Management of 7750 SR-c4. **OC-768/STM-256C DWDM IMM Card.** 5620 SAM does not support the OC-768/STM-256C DWDM IMM Card. **BITS-OUT Support.** 5620 SAM does not support BITS-OUT support for SFM3/CFM on 7750 SR-7/SR-12/SR-c4. **Full SSM/ESMC Support.** 5620 SAM does not support full SSM/ESMC capability for clock source quality level received via SSM of SDH/SONET/BITS ports or ESMC of synchronous Ethernet ports for system timing reference selection. **Uni-Directional APS Service Parity for SONET/SDH Channelized and Non-Channelized Interfaces.** 5620 SAM does not support uni-directional APS service parity for SONET/SDH channelized and non-channelized interfaces for MDAs/CMAs that previously only supported bi-directional switching mode APS. **G.8032 Ethernet Ring Protocol.** 5620 SAM does not support G.8032 ethernet ring automatic protection switching. **NAT Basic Port Forwarding.** 5620 SAM does not support NAT basic port forwarding. **DIAMETER Credit Control On-line Charging.** 5620 SAM does not support on-line charging wuth DIAMETER Credit Control. **Multicast over PPPoE Sessions.** 5620 SAM does not support multicast of PPPoE sessions. **Remove/Add/Modify Domain Names in RADIUS Authentication.** 5620 SAM does not support add/remove/replace for strings used as domain names in PAP/CHAP authentication. **Multiple RADIUS Authentication Based On Domain Name.** 5620 SAM does not support multiple RADIUS Authentication based on Domain Name (Pre-Authentication in LUDB). **IPoE User Name Option 61/60.** 5620 SAM does not support RADIUS User Name Format: DHCP Option 61/60. **ESM IPv6 Local User Database (LUDB) for IPoE.** 5620 SAM does not support ESM IPv6 Local User Database (LUDB) for IPoE. **ATM Aware QoS for Broadband Network Gateway.** 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
	ATM/ethernet last-mile aware QoS for broadband network gateway. **H-Pol Support for 7750 SR-c12/SR-c4.** 5620 SAM does not support Class-Fair Hierarchical Policing (H-Pol) for 7750 SR-c12/SR-c4. **Queue Parent Weight Override.** 5620 SAM does not support queue parent weight override. **QoS Burst Management.** 5620 SAM does not support QoS Burst Management. **Video-ISA with Alcatel-Lucent 5910 VSA SP4 (RET/FCC).** 5620 SAM does not support Video-ISA with Alcatel-Lucent 5910 VSA Service Pack 4 (RET/FCC), including dynamic computation of FCC duration and bandwidth, audio re-ordering for FCC. **Video Dual-Stream Selection.** 5620 SAM does not support video dual-stream selection. **Video Quality Monitoring.** 5620 SAM does not support Video Quality Monitoring (VQM). **Multicast Over LDP P2MP LSP.** 5620 SAM does not support multicast over LDP P2MP LSP. **LSP Automatic Bandwidth Adjustment.** 5620 SAM does not support LSP Automatic Bandwidth Adjustment. **Routed VPLS.** 5620 SAM does not support Routed VPLS. **PBB Support for RFC 3107.** 5620 SAM does not support PBB for RFC 3107 (BGP LSP for PBB-VPLS Services). **LDP FEC to BGP Label Route Stitching.** 5620 SAM does not support LDP FEC to BGP label route stitching. **Multi-homing for L3 Services.** 5620 SAM does not support multi-homing for L3 Services (BGP Anycast address support). **SDP-Configurable Tunnel Destination Address.** 5620 SAM does not support SDP-configurable tunnel destination address. **Hashing Enhancements for Consistent Per-Service Forwading .** 5620 SAM does not support hashing enhancements for conistent per-service forwarding. **HSDPA Offload Fallback Over ATM .** 5620 SAM does not support HSDPA offload fallback over ATM. **Subscriber Attribute Override of App-Profile Values .** 5620 SAM does not support subscriber attribute override of app-profile values. **IPipe Divert to AA.** 5620 SAM does not support IPipe divert to Application Assurance. **AA-ISA Large Session Congestion Mitigation.** 5620 SAM does not support AA-ISA Large Session Congestion Mitigation. **Enable ESMC on WAN Ports.** 5620 SAM does not support enabling ESMC for WAN

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
	ports. **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. **RADIUS Authentication Policy Down Time.** 5620 SAM does not support RADIUS authentication policy down time. **CoA-Only RADIUS Server.** 5620 SAM does not support CoA-only RADIUS server. **TACACS+ 128-Character Secret Key.** 5620 SAM does not support 128 characters for the TACACS+ secret key. **LAG LACP System-ID Configuration.** 5620 SAM does not support configuration of the LACP System-ID for LAGs. **BGP Prefix Limit Threshold Percentage and Log-only.** 5620 SAM does not support configuration threshold limit percentage and log-only parameters for BGP peers. **IS-IS Default IPv4 and IPv6 Metric Values.** 5620 SAM does not support IPv4 and IPv6 default metrics for IS-IS interfaces. **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **LAC Tunnel Support for VPRN (L2TP).** 5620 SAM does not support LAC Tunnels for VPRN (L2TP). **LNS Over MPLS LNS.** 5620 SAM does not support LNS Over MPLS LNS. **L2TP Tunnel Switching with ESM.** 5620 SAM does not support L2TP Tunnel Switching with ESM. **LI Activation Enhancements.** 5620 SAM does not support LI Activation Enhancements. **LI for LAC Sessions.** 5620 SAM does not support LI for LAC Sessions. **SLA Override without SLA-Profile Change.** 5620 SAM does not support SLA override without SLA-Profile change. **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587672] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
	Tunnel Interface Description. 5620 SAM does not support description for Tunnel Interfaces. [587677] **Uni-directional APS Support.** 5620 SAM does not support Uni-directional APS. [581463] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
	router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R9)
	path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 5: 7750 SR 8.0 R7

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R7)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R7)
	Video Group Per Channel Statistics For Duplicate SSRC. 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R7)
	Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R7)
	New 100 GigE PCS Report Alarms. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R7)
	New PVST Modes for BPDU Translation. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R7)
	of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R7)
5620 SAM 8.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **(PTS 601293) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [601293] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R7)
	Timestamps for OAM. [582495] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R7)
	H-QOS Adjustments based on Video Viewership. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R7)
	Provider Bridge Group Address (802.1ad) MSTP Support. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **(PTS 601293) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [601293] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R7)
	Removal of Chassis Mode D Restriction for PBB MC-LAG. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R7)
	MPLS Static LSP Fast Retry Timer. 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R7)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **(PTS 601293) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [601293] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R7)
	IMPM Round Robin Inactive Records Path Redistribution. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **1-Port 100G and 12-Port 10G Ethernet IMMs.** 5620 SAM does not support the 1-Port 100G and 12-Port 10G Ethernet IMM Cards. **IPv6 Support on IPipe.** 5620 SAM does not support IPv6 for IPipes. **RSVP-TE P2MP I-PMSI.** 5620 SAM does not support RSVP-TE P2MP I-PMSI. **SC-APS Support for MLPPP on Network Ports.** 5620 SAM does not support MLPPP on Network Ports for SC-APS. **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **Ethernet CFM Frame Rate Limiting.** 5620 SAM does not support Ethernet CFM Frame Rate Limiting. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **QinQ Untagged Frames ".0".** 5620 SAM does not support QinQ Untagged Frames (.0) for L2 and L3 Access Interfaces. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **(PTS 587339) IGMP Tunnel Interface Deployment Failure.** 5620 SAM does not support creation of IGMP Tunnel Interfaces of type RSVP. A deployment failure will occur upon attempted creation. **7750 SR-c4.** 5620 SAM does not support Management of 7750 SR-c4. **OC-768/STM-256C DWDM IMM Card.** 5620 SAM does not support the OC-768/STM-

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R7)
	256C DWDM IMM Card. **BITS-OUT Support.** 5620 SAM does not support BITS-OUT support for SFM3/CFM on 7750 SR-7/SR-12/SR-c4. **Full SSM/ESMC Support.** 5620 SAM does not support full SSM/ESMC capability for clock source quality level received via SSM of SDH/SONET/BITS ports or ESMC of synchronous Ethernet ports for system timing reference selection. **Uni-Directional APS Service Parity for SONET/SDH Channelized and Non-Channelized Interfaces.** 5620 SAM does not support uni-directional APS service parity for SONET/SDH channelized and non-channelized interfaces for MDAs/CMAs that previously only supported bi-directional switching mode APS. **G.8032 Ethernet Ring Protocol.** 5620 SAM does not support G.8032 ethernet ring automatic protection switching. **NAT Basic Port Forwarding.** 5620 SAM does not support NAT basic port forwarding. **DIAMETER Credit Control On-line Charging.** 5620 SAM does not support on-line charging wuth DIAMETER Credit Control. **Multicast over PPPoE Sessions.** 5620 SAM does not support multicast of PPPoE sessions. **Remove/Add/Modify Domain Names in RADIUS Authentication.** 5620 SAM does not support add/remove/replace for strings used as domain names in PAP/CHAP authentication. **Multiple RADIUS Authentication Based On Domain Name.** 5620 SAM does not support multiple RADIUS Authentication based on Domain Name (Pre-Authentication in LUDB). **IPoE User Name Option 61/60.** 5620 SAM does not support RADIUS User Name Format: DHCP Option 61/60. **ESM IPv6 Local User Database (LUDB) for IPoE.** 5620 SAM does not support ESM IPv6 Local User Database (LUDB) for IPoE. **ATM Aware QoS for Broadband Network Gateway.** 5620 SAM does not support ATM/ethernet last-mile aware QoS for broadband network gateway. **H-Pol Support for 7750 SR-c12/SR-c4.** 5620 SAM does not support Class-Fair Hierarchical Policing (H-Pol) for 7750 SR-c12/SR-c4. **Queue Parent Weight Override.** 5620 SAM does not support queue parent weight override. **QoS Burst Management.** 5620 SAM does not support QoS Burst Management. **Video-ISA with Alcatel-Lucent 5910 VSA SP4 (RET/FCC).** 5620 SAM does not support Video-ISA with Alcatel-Lucent 5910 VSA Service Pack 4 (RET/FCC), including dynamic computation of FCC duration and bandwidth, audio re-ordering for FCC. **Video Dual-Stream Selection.** 5620 SAM does not support video dual-stream

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R7)
	selection. **Video Quality Monitoring.** 5620 SAM does not support Video Quality Monitoring (VQM). **Multicast Over LDP P2MP LSP.** 5620 SAM does not support multicast over LDP P2MP LSP. **LSP Automatic Bandwidth Adjustment.** 5620 SAM does not support LSP Automatic Bandwidth Adjustment. **Routed VPLS.** 5620 SAM does not support Routed VPLS. **PBB Support for RFC 3107.** 5620 SAM does not support PBB for RFC 3107 (BGP LSP for PBB-VPLS Services). **LDP FEC to BGP Label Route Stitching.** 5620 SAM does not support LDP FEC to BGP label route stitching. **Multi-homing for L3 Services.** 5620 SAM does not support multi-homing for L3 Services (BGP Anycast address support). **SDP-Configurable Tunnel Destination Address.** 5620 SAM does not support SDP-configurable tunnel destination address. **Hashing Enhancements for Consistent Per-Service Forwading .** 5620 SAM does not support hashing enhancements for conistent per-service forwarding. **HSDPA Offload Fallback Over ATM .** 5620 SAM does not support HSDPA offload fallback over ATM. **Subscriber Attribute Override of App-Profile Values .** 5620 SAM does not support subscriber attribute override of app-profile values. **IPipe Divert to AA.** 5620 SAM does not support IPipe divert to Application Assurance. **AA-ISA Large Session Congestion Mitigation.** 5620 SAM does not support AA-ISA Large Session Congestion Mitigation. **Enable ESMC on WAN Ports.** 5620 SAM does not support enabling ESMC for WAN ports. **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. **RADIUS Authentication Policy Down Time.** 5620 SAM does not support RADIUS authentication policy down time. **CoA-Only RADIUS Server.** 5620 SAM does not support CoA-only RADIUS server. **TACACS+ 128-Character Secret Key.** 5620 SAM does not support 128 characters for the TACACS+ secret key. **LAG LACP System-ID Configuration.** 5620 SAM does not support configuration of the LACP System-ID for LAGs.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R7)
	BGP Prefix Limit Threshold Percentage and Log-only. 5620 SAM does not support configuration threshold limit percentage and log-only parameters for BGP peers. **IS-IS Default IPv4 and IPv6 Metric Values.** 5620 SAM does not support IPv4 and IPv6 default metrics for IS-IS interfaces. **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587672] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **Uni-directional APS Support.** 5620 SAM does not support Uni-directional APS. [581463] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R7)
	state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R7)
	not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R7)
	Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **(PTS 601293) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [601293] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **1-Port 100G and 12-Port 10G Ethernet IMMs.** 5620 SAM does not support the 1-Port 100G and 12-Port 10G Ethernet IMM Cards. **IPv6 Support on IPipe.** 5620 SAM does not support IPv6 for IPipes. **RSVP-TE P2MP I-PMSI.** 5620 SAM does not support RSVP-TE P2MP I-PMSI. **SC-APS Support for MLPPP on Network Ports.** 5620 SAM does not support MLPPP on Network Ports for SC-APS. **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **Ethernet CFM Frame Rate Limiting.** 5620 SAM does not support Ethernet CFM Frame Rate Limiting.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R7)
	IPv6 Address /127 Netmask Support. 5620 SAM does not support /127 netmasks for IPv6 addresses. **QinQ Untagged Frames ".0".** 5620 SAM does not support QinQ Untagged Frames (.0) for L2 and L3 Access Interfaces. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **(PTS 587339) IGMP Tunnel Interface Deployment Failure.** 5620 SAM does not support creation of IGMP Tunnel Interfaces of type RSVP. A deployment failure will occur upon attempted creation. **7750 SR-c4.** 5620 SAM does not support Management of 7750 SR-c4. **OC-768/STM-256C DWDM IMM Card.** 5620 SAM does not support the OC-768/STM-256C DWDM IMM Card. **BITS-OUT Support.** 5620 SAM does not support BITS-OUT support for SFM3/CFM on 7750 SR-7/SR-12/SR-c4. **Full SSM/ESMC Support.** 5620 SAM does not support full SSM/ESMC capability for clock source quality level received via SSM of SDH/SONET/BITS ports or ESMC of synchronous Ethernet ports for system timing reference selection. **Uni-Directional APS Service Parity for SONET/SDH Channelized and Non-Channelized Interfaces.** 5620 SAM does not support uni-directional APS service parity for SONET/SDH channelized and non-channelized interfaces for MDAs/CMAs that previously only supported bi-directional switching mode APS. **G.8032 Ethernet Ring Protocol.** 5620 SAM does not support G.8032 ethernet ring automatic protection switching. **NAT Basic Port Forwarding.** 5620 SAM does not support NAT basic port forwarding. **DIAMETER Credit Control On-line Charging.** 5620 SAM does not support on-line charging wuth DIAMETER Credit Control. **Multicast over PPPoE Sessions.** 5620 SAM does not support multicast of PPPoE sessions. **Remove/Add/Modify Domain Names in RADIUS Authentication.** 5620 SAM does not support add/remove/replace for strings used as domain names in PAP/CHAP authentication. **Multiple RADIUS Authentication Based On Domain Name.** 5620 SAM does not support multiple RADIUS Authentication based on Domain Name (Pre-Authentication in LUDB). **IPoE User Name Option 61/60.** 5620 SAM does not support RADIUS User Name Format: DHCP Option 61/60. **ESM IPv6 Local User Database (LUDB) for IPoE.** 5620 SAM does not support ESM IPv6 Local User Database (LUDB) for IPoE.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R7)
	ATM Aware QoS for Broadband Network Gateway. 5620 SAM does not support ATM/ethernet last-mile aware QoS for broadband network gateway. **H-Pol Support for 7750 SR-c12/SR-c4.** 5620 SAM does not support Class-Fair Hierarchical Policing (H-Pol) for 7750 SR-c12/SR-c4. **Queue Parent Weight Override.** 5620 SAM does not support queue parent weight override. **QoS Burst Management.** 5620 SAM does not support QoS Burst Management. **Video-ISA with Alcatel-Lucent 5910 VSA SP4 (RET/FCC).** 5620 SAM does not support Video-ISA with Alcatel-Lucent 5910 VSA Service Pack 4 (RET/FCC), including dynamic computation of FCC duration and bandwidth, audio re-ordering for FCC. **Video Dual-Stream Selection.** 5620 SAM does not support video dual-stream selection. **Video Quality Monitoring.** 5620 SAM does not support Video Quality Monitoring (VQM). **Multicast Over LDP P2MP LSP.** 5620 SAM does not support multicast over LDP P2MP LSP. **LSP Automatic Bandwidth Adjustment.** 5620 SAM does not support LSP Automatic Bandwidth Adjustment. **Routed VPLS.** 5620 SAM does not support Routed VPLS. **PBB Support for RFC 3107.** 5620 SAM does not support PBB for RFC 3107 (BGP LSP for PBB-VPLS Services). **LDP FEC to BGP Label Route Stitching.** 5620 SAM does not support LDP FEC to BGP label route stitching. **Multi-homing for L3 Services.** 5620 SAM does not support multi-homing for L3 Services (BGP Anycast address support). **SDP-Configurable Tunnel Destination Address.** 5620 SAM does not support SDP-configurable tunnel destination address. **Hashing Enhancements for Consistent Per-Service Forwading .** 5620 SAM does not support hashing enhancements for conistent per-service forwarding. **HSDPA Offload Fallback Over ATM .** 5620 SAM does not support HSDPA offload fallback over ATM. **Subscriber Attribute Override of App-Profile Values .** 5620 SAM does not support subscriber attribute override of app-profile values. **IPipe Divert to AA.** 5620 SAM does not support IPipe divert to Application Assurance. **AA-ISA Large Session Congestion Mitigation.** 5620 SAM does not support AA-ISA Large Session Congestion Mitigation.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R7)
	Enable ESMC on WAN Ports. 5620 SAM does not support enabling ESMC for WAN ports. **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. **RADIUS Authentication Policy Down Time.** 5620 SAM does not support RADIUS authentication policy down time. **CoA-Only RADIUS Server.** 5620 SAM does not support CoA-only RADIUS server. **TACACS+ 128-Character Secret Key.** 5620 SAM does not support 128 characters for the TACACS+ secret key. **LAG LACP System-ID Configuration.** 5620 SAM does not support configuration of the LACP System-ID for LAGs. **BGP Prefix Limit Threshold Percentage and Log-only.** 5620 SAM does not support configuration threshold limit percentage and log-only parameters for BGP peers. **IS-IS Default IPv4 and IPv6 Metric Values.** 5620 SAM does not support IPv4 and IPv6 default metrics for IS-IS interfaces. **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **LAC Tunnel Support for VPRN (L2TP).** 5620 SAM does not support LAC Tunnels for VPRN (L2TP). **LNS Over MPLS LNS.** 5620 SAM does not support LNS Over MPLS LNS. **L2TP Tunnel Switching with ESM.** 5620 SAM does not support L2TP Tunnel Switching with ESM. **LI Activation Enhancements.** 5620 SAM does not support LI Activation Enhancements. **LI for LAC Sessions.** 5620 SAM does not support LI for LAC Sessions. **SLA Override without SLA-Profile Change.** 5620 SAM does not support SLA override without SLA-Profile change. **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587672] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R7)
	[587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **Uni-directional APS Support.** 5620 SAM does not support Uni-directional APS. [581463] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R7)
	PIM Instant Prune Echo. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R7)
	the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 6: 7750 SR 8.0 R6

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R6)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution.** 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R6)
	Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R6)
	path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R6)
	lowered chassis mode restrictions for PBB with MC-LAG. [598849] **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R6)
	Static LSPs. [572545] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R6)
	support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R6)
	IPSec IKEv2. 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R6)
	OAM SAA IMCP Ping Forwaring Class. 5620 SAM does not support the configuration of forwarding class. [568282] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R6)
	DHCP Server Failover Support. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 598309) Router Reboot Caused By Service Endpoint Creation.** Creation of a service endpoint using 5620 SAM will result in a router reboot. A fix for this issue will be available as of 5620 SAM 8.0 R6 or 7750/7450/7710 Release 8.0 R7. [598309] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R6)
	Removal of Chassis Mode D Restriction for PBB MC-LAG. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R6)
	MPLS Static LSP Fast Retry Timer. 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R6)
	DHCP Server Failover Support. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 598309) Router Reboot Caused By Service Endpoint Creation.** Creation of a service endpoint using 5620 SAM will result in a router reboot. A fix for this issue will be available as of 5620 SAM 8.0 R6 or 7750/7450/7710 Release 8.0 R7. [598309] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R6)
	Removal of Chassis Mode D Restriction for PBB MC-LAG. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **1-Port 100G and 12-Port 10G Ethernet IMMs.** 5620 SAM does not support the 1-Port 100G and 12-Port 10G Ethernet IMM Cards. **IPv6 Support on IPipe.** 5620 SAM does not support IPv6 for IPipes. **RSVP-TE P2MP I-PMSI.** 5620 SAM does not support RSVP-TE P2MP I-PMSI. **SC-APS Support for MLPPP on Network Ports.** 5620 SAM does not support MLPPP on Network Ports for SC-APS. **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **Ethernet CFM Frame Rate Limiting.** 5620 SAM does not support Ethernet CFM Frame Rate Limiting. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **QinQ Untagged Frames ".0".** 5620 SAM does not support QinQ Untagged Frames (.0) for L2 and L3 Access Interfaces. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **(PTS 587339) IGMP Tunnel Interface Deployment Failure.** 5620 SAM does not support creation of IGMP Tunnel Interfaces of type RSVP. A deployment failure will occur upon attempted creation. **7750 SR-c4.** 5620 SAM does not support Management of 7750 SR-c4. **OC-768/STM-256C DWDM IMM Card.** 5620 SAM does not support the OC-768/STM-256C DWDM IMM Card. **BITS-OUT Support.** 5620 SAM does not support BITS-OUT support for SFM3/CFM on 7750 SR-7/SR-12/SR-c4. **Full SSM/ESMC Support.** 5620 SAM does not support full SSM/ESMC capability for clock source quality level received via SSM of SDH/SONET/BITS ports or ESMC of synchronous Ethernet ports for system timing reference selection. **Uni-Directional APS Service Parity for SONET/SDH Channelized and Non-Channelized Interfaces.** 5620 SAM does not support uni-directional APS service parity for SONET/SDH channelized and non-channelized interfaces for MDAs/CMAs that previously only supported bi-directional switching mode APS. **G.8032 Ethernet Ring Protocol.** 5620 SAM does not support G.8032 ethernet ring automatic protection switching.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R6)
	NAT Basic Port Forwarding. 5620 SAM does not support NAT basic port forwarding. **DIAMETER Credit Control On-line Charging.** 5620 SAM does not support on-line charging wuth DIAMETER Credit Control. **Multicast over PPPoE Sessions.** 5620 SAM does not support multicast of PPPoE sessions. **Remove/Add/Modify Domain Names in RADIUS Authentication.** 5620 SAM does not support add/remove/replace for strings used as domain names in PAP/CHAP authentication. **Multiple RADIUS Authentication Based On Domain Name.** 5620 SAM does not support multiple RADIUS Authentication based on Domain Name (Pre-Authentication in LUDB). **IPoE User Name Option 61/60.** 5620 SAM does not support RADIUS User Name Format: DHCP Option 61/60. **ESM IPv6 Local User Database (LUDB) for IPoE.** 5620 SAM does not support ESM IPv6 Local User Database (LUDB) for IPoE. **ATM Aware QoS for Broadband Network Gateway.** 5620 SAM does not support ATM/ethernet last-mile aware QoS for broadband network gateway. **H-Pol Support for 7750 SR-c12/SR-c4.** 5620 SAM does not support Class-Fair Hierarchical Policing (H-Pol) for 7750 SR-c12/SR-c4. **Queue Parent Weight Override.** 5620 SAM does not support queue parent weight override. **QoS Burst Management.** 5620 SAM does not support QoS Burst Management. **Video-ISA with Alcatel-Lucent 5910 VSA SP4 (RET/FCC).** 5620 SAM does not support Video-ISA with Alcatel-Lucent 5910 VSA Service Pack 4 (RET/FCC), including dynamic computation of FCC duration and bandwidth, audio re-ordering for FCC. **Video Dual-Stream Selection.** 5620 SAM does not support video dual-stream selection. **Video Quality Monitoring.** 5620 SAM does not support Video Quality Monitoring (VQM). **Multicast Over LDP P2MP LSP.** 5620 SAM does not support multicast over LDP P2MP LSP. **LSP Automatic Bandwidth Adjustment.** 5620 SAM does not support LSP Automatic Bandwidth Adjustment. **Routed VPLS.** 5620 SAM does not support Routed VPLS. **PBB Support for RFC 3107.** 5620 SAM does not support PBB for RFC 3107 (BGP LSP for PBB-VPLS Services). **LDP FEC to BGP Label Route Stitching.** 5620 SAM does not support LDP FEC to BGP

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R6)
	label route stitching. **Multi-homing for L3 Services.** 5620 SAM does not support multi-homing for L3 Services (BGP Anycast address support). **SDP-Configurable Tunnel Destination Address.** 5620 SAM does not support SDP-configurable tunnel destination address. **Hashing Enhancements for Consistent Per-Service Forwading .** 5620 SAM does not support hashing enhancements for conistent per-service forwarding. **HSDPA Offload Fallback Over ATM .** 5620 SAM does not support HSDPA offload fallback over ATM. **Subscriber Attribute Override of App-Profile Values .** 5620 SAM does not support subscriber attribute override of app-profile values. **IPipe Divert to AA.** 5620 SAM does not support IPipe divert to Application Assurance. **AA-ISA Large Session Congestion Mitigation.** 5620 SAM does not support AA-ISA Large Session Congestion Mitigation. **Enable ESMC on WAN Ports.** 5620 SAM does not support enabling ESMC for WAN ports. **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. **RADIUS Authentication Policy Down Time.** 5620 SAM does not support RADIUS authentication policy down time. **CoA-Only RADIUS Server.** 5620 SAM does not support CoA-only RADIUS server. **TACACS+ 128-Character Secret Key.** 5620 SAM does not support 128 characters for the TACACS+ secret key. **LAG LACP System-ID Configuration.** 5620 SAM does not support configuration of the LACP System-ID for LAGs. **BGP Prefix Limit Threshold Percentage and Log-only.** 5620 SAM does not support configuration threshold limit percentage and log-only parameters for BGP peers. **IS-IS Default IPv4 and IPv6 Metric Values.** 5620 SAM does not support IPv4 and IPv6 default metrics for IS-IS interfaces. **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587672] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R6)
	administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **Uni-directional APS Support.** 5620 SAM does not support Uni-directional APS. [581463] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R6)
	PIM Instant Prune Echo. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R6)
	the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 598309) Router Reboot Caused By Service Endpoint Creation.** Creation of a service endpoint using 5620 SAM will result in a router reboot. A fix for this issue will be available as of 5620 SAM 8.0 R6 or 7750/7450/7710 Release 8.0 R7. [598309] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R6)
	Hash-label Feature Support in Chassis Mode A/B. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **1-Port 100G and 12-Port 10G Ethernet IMMs.** 5620 SAM does not support the 1-Port 100G and 12-Port 10G Ethernet IMM Cards. **IPv6 Support on IPipe.** 5620 SAM does not support IPv6 for IPipes. **RSVP-TE P2MP I-PMSI.** 5620 SAM does not support RSVP-TE P2MP I-PMSI. **SC-APS Support for MLPPP on Network Ports.** 5620 SAM does not support MLPPP on Network Ports for SC-APS. **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **Ethernet CFM Frame Rate Limiting.** 5620 SAM does not support Ethernet CFM Frame Rate Limiting. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **QinQ Untagged Frames ".0".** 5620 SAM does not support QinQ Untagged Frames (.0) for L2 and L3 Access Interfaces. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **(PTS 587339) IGMP Tunnel Interface Deployment Failure.** 5620 SAM does not support creation of IGMP Tunnel Interfaces of type RSVP. A deployment failure will occur upon attempted creation. **7750 SR-c4.** 5620 SAM does not support Management of 7750 SR-c4. **OC-768/STM-256C DWDM IMM Card.** 5620 SAM does not support the OC-768/STM-256C DWDM IMM Card. **BITS-OUT Support.** 5620 SAM does not support BITS-OUT support for SFM3/CFM on 7750 SR-7/SR-12/SR-c4. **Full SSM/ESMC Support.** 5620 SAM does not support full SSM/ESMC capability for clock source quality level received via SSM of SDH/SONET/BITS ports or ESMC of synchronous Ethernet ports for system timing reference selection. **Uni-Directional APS Service Parity for SONET/SDH Channelized and Non-Channelized Interfaces.** 5620 SAM does not support uni-directional APS service parity for SONET/SDH channelized and non-channelized interfaces for MDAs/CMAs

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R6)
	that previously only supported bi-directional switching mode APS. **G.8032 Ethernet Ring Protocol.** 5620 SAM does not support G.8032 ethernet ring automatic protection switching. **NAT Basic Port Forwarding.** 5620 SAM does not support NAT basic port forwarding. **DIAMETER Credit Control On-line Charging.** 5620 SAM does not support on-line charging wuth DIAMETER Credit Control. **Multicast over PPPoE Sessions.** 5620 SAM does not support multicast of PPPoE sessions. **Remove/Add/Modify Domain Names in RADIUS Authentication.** 5620 SAM does not support add/remove/replace for strings used as domain names in PAP/CHAP authentication. **Multiple RADIUS Authentication Based On Domain Name.** 5620 SAM does not support multiple RADIUS Authentication based on Domain Name (Pre-Authentication in LUDB). **IPoE User Name Option 61/60.** 5620 SAM does not support RADIUS User Name Format: DHCP Option 61/60. **ESM IPv6 Local User Database (LUDB) for IPoE.** 5620 SAM does not support ESM IPv6 Local User Database (LUDB) for IPoE. **ATM Aware QoS for Broadband Network Gateway.** 5620 SAM does not support ATM/ethernet last-mile aware QoS for broadband network gateway. **H-Pol Support for 7750 SR-c12/SR-c4.** 5620 SAM does not support Class-Fair Hierarchical Policing (H-Pol) for 7750 SR-c12/SR-c4. **Queue Parent Weight Override.** 5620 SAM does not support queue parent weight override. **QoS Burst Management.** 5620 SAM does not support QoS Burst Management. **Video-ISA with Alcatel-Lucent 5910 VSA SP4 (RET/FCC).** 5620 SAM does not support Video-ISA with Alcatel-Lucent 5910 VSA Service Pack 4 (RET/FCC), including dynamic computation of FCC duration and bandwidth, audio re-ordering for FCC. **Video Dual-Stream Selection.** 5620 SAM does not support video dual-stream selection. **Video Quality Monitoring.** 5620 SAM does not support Video Quality Monitoring (VQM). **Multicast Over LDP P2MP LSP.** 5620 SAM does not support multicast over LDP P2MP LSP. **LSP Automatic Bandwidth Adjustment.** 5620 SAM does not support LSP Automatic Bandwidth Adjustment. **Routed VPLS.** 5620 SAM does not support Routed VPLS.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R6)
	PBB Support for RFC 3107. 5620 SAM does not support PBB for RFC 3107 (BGP LSP for PBB-VPLS Services). **LDP FEC to BGP Label Route Stitching.** 5620 SAM does not support LDP FEC to BGP label route stitching. **Multi-homing for L3 Services.** 5620 SAM does not support multi-homing for L3 Services (BGP Anycast address support). **SDP-Configurable Tunnel Destination Address.** 5620 SAM does not support SDP-configurable tunnel destination address. **Hashing Enhancements for Consistent Per-Service Forwading .** 5620 SAM does not support hashing enhancements for conistent per-service forwarding. **HSDPA Offload Fallback Over ATM .** 5620 SAM does not support HSDPA offload fallback over ATM. **Subscriber Attribute Override of App-Profile Values .** 5620 SAM does not support subscriber attribute override of app-profile values. **IPipe Divert to AA.** 5620 SAM does not support IPipe divert to Application Assurance. **AA-ISA Large Session Congestion Mitigation.** 5620 SAM does not support AA-ISA Large Session Congestion Mitigation. **Enable ESMC on WAN Ports.** 5620 SAM does not support enabling ESMC for WAN ports. **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. **RADIUS Authentication Policy Down Time.** 5620 SAM does not support RADIUS authentication policy down time. **CoA-Only RADIUS Server.** 5620 SAM does not support CoA-only RADIUS server. **TACACS+ 128-Character Secret Key.** 5620 SAM does not support 128 characters for the TACACS+ secret key. **LAG LACP System-ID Configuration.** 5620 SAM does not support configuration of the LACP System-ID for LAGs. **BGP Prefix Limit Threshold Percentage and Log-only.** 5620 SAM does not support configuration threshold limit percentage and log-only parameters for BGP peers. **IS-IS Default IPv4 and IPv6 Metric Values.** 5620 SAM does not support IPv4 and IPv6 default metrics for IS-IS interfaces. **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **LAC Tunnel Support for VPRN (L2TP).** 5620 SAM does not support LAC Tunnels for VPRN (L2TP).

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R6)
	LNS Over MPLS LNS. 5620 SAM does not support LNS Over MPLS LNS. **L2TP Tunnel Switching with ESM.** 5620 SAM does not support L2TP Tunnel Switching with ESM. **LI Activation Enhancements.** 5620 SAM does not support LI Activation Enhancements. **LI for LAC Sessions.** 5620 SAM does not support LI for LAC Sessions. **SLA Override without SLA-Profile Change.** 5620 SAM does not support SLA override without SLA-Profile change. **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587672] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **Uni-directional APS Support.** 5620 SAM does not support Uni-directional APS. [581463] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R6)
	Video Group Per Channel Statistics For Duplicate SSRC. 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R6)
	LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R6)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms.** 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 7: 7750 SR 8.0 R5

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R5)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R5)
	Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R5)
	failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R5)
	Interfaces. [587677] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R5)
	Routing Policy Statement Entry (from Criteria). 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R5)
	such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **1-Port 100G and 12-Port 10G Ethernet IMMs.** 5620 SAM does not support the 1-Port 100G and 12-Port 10G Ethernet IMM Cards. **IPv6 Support on IPipe.** 5620 SAM does not support IPv6 for IPipes. **RSVP-TE P2MP I-PMSI.** 5620 SAM does not support RSVP-TE P2MP I-PMSI. **SC-APS Support for MLPPP on Network Ports.** 5620 SAM does not support MLPPP on Network Ports for SC-APS. **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **Ethernet CFM Frame Rate Limiting.** 5620 SAM does not support Ethernet CFM Frame Rate Limiting. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **QinQ Untagged Frames ".0".** 5620 SAM does not support QinQ Untagged Frames (.0) for L2 and L3 Access Interfaces. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **(PTS 587339) IGMP Tunnel Interface Deployment Failure.** 5620 SAM does not support creation of IGMP Tunnel Interfaces of type RSVP. A deployment failure will occur upon attempted creation. **7750 SR-c4.** 5620 SAM does not support Management of 7750 SR-c4. **OC-768/STM-256C DWDM IMM Card.** 5620 SAM does not support the OC-768/STM-256C DWDM IMM Card. **BITS-OUT Support.** 5620 SAM does not support BITS-OUT support for SFM3/CFM on 7750 SR-7/SR-12/SR-c4. **Full SSM/ESMC Support.** 5620 SAM does not support full SSM/ESMC capability for clock source quality level received via SSM of SDH/SONET/BITS ports or ESMC of synchronous Ethernet ports for system timing reference selection. **Uni-Directional APS Service Parity for SONET/SDH Channelized and Non-Channelized Interfaces.** 5620 SAM does not support uni-directional APS service parity for SONET/SDH channelized and non-channelized interfaces for MDAs/CMAs that previously only supported bi-directional switching mode APS. **G.8032 Ethernet Ring Protocol.** 5620 SAM does not support G.8032 ethernet ring

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R5)
	automatic protection switching. **NAT Basic Port Forwarding.** 5620 SAM does not support NAT basic port forwarding. **DIAMETER Credit Control On-line Charging.** 5620 SAM does not support on-line charging wuth DIAMETER Credit Control. **Multicast over PPPoE Sessions.** 5620 SAM does not support multicast of PPPoE sessions. **Remove/Add/Modify Domain Names in RADIUS Authentication.** 5620 SAM does not support add/remove/replace for strings used as domain names in PAP/CHAP authentication. **Multiple RADIUS Authentication Based On Domain Name.** 5620 SAM does not support multiple RADIUS Authentication based on Domain Name (Pre-Authentication in LUDB). **IPoE User Name Option 61/60.** 5620 SAM does not support RADIUS User Name Format: DHCP Option 61/60. **ESM IPv6 Local User Database (LUDB) for IPoE.** 5620 SAM does not support ESM IPv6 Local User Database (LUDB) for IPoE. **ATM Aware QoS for Broadband Network Gateway.** 5620 SAM does not support ATM/ethernet last-mile aware QoS for broadband network gateway. **H-Pol Support for 7750 SR-c12/SR-c4.** 5620 SAM does not support Class-Fair Hierarchical Policing (H-Pol) for 7750 SR-c12/SR-c4. **Queue Parent Weight Override.** 5620 SAM does not support queue parent weight override. **QoS Burst Management.** 5620 SAM does not support QoS Burst Management. **Video-ISA with Alcatel-Lucent 5910 VSA SP4 (RET/FCC).** 5620 SAM does not support Video-ISA with Alcatel-Lucent 5910 VSA Service Pack 4 (RET/FCC), including dynamic computation of FCC duration and bandwidth, audio re-ordering for FCC. **Video Dual-Stream Selection.** 5620 SAM does not support video dual-stream selection. **Video Quality Monitoring.** 5620 SAM does not support Video Quality Monitoring (VQM). **Multicast Over LDP P2MP LSP.** 5620 SAM does not support multicast over LDP P2MP LSP. **LSP Automatic Bandwidth Adjustment.** 5620 SAM does not support LSP Automatic Bandwidth Adjustment. **Routed VPLS.** 5620 SAM does not support Routed VPLS. **PBB Support for RFC 3107.** 5620 SAM does not support PBB for RFC 3107 (BGP LSP for PBB-VPLS Services).

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R5)
	LDP FEC to BGP Label Route Stitching. 5620 SAM does not support LDP FEC to BGP label route stitching. **Multi-homing for L3 Services.** 5620 SAM does not support multi-homing for L3 Services (BGP Anycast address support). **SDP-Configurable Tunnel Destination Address.** 5620 SAM does not support SDP-configurable tunnel destination address. **Hashing Enhancements for Consistent Per-Service Forwading .** 5620 SAM does not support hashing enhancements for conistent per-service forwarding. **HSDPA Offload Fallback Over ATM .** 5620 SAM does not support HSDPA offload fallback over ATM. **Subscriber Attribute Override of App-Profile Values .** 5620 SAM does not support subscriber attribute override of app-profile values. **IPipe Divert to AA.** 5620 SAM does not support IPipe divert to Application Assurance. **AA-ISA Large Session Congestion Mitigation.** 5620 SAM does not support AA-ISA Large Session Congestion Mitigation. **Enable ESMC on WAN Ports.** 5620 SAM does not support enabling ESMC for WAN ports. **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. **RADIUS Authentication Policy Down Time.** 5620 SAM does not support RADIUS authentication policy down time. **CoA-Only RADIUS Server.** 5620 SAM does not support CoA-only RADIUS server. **TACACS+ 128-Character Secret Key.** 5620 SAM does not support 128 characters for the TACACS+ secret key. **LAG LACP System-ID Configuration.** 5620 SAM does not support configuration of the LACP System-ID for LAGs. **BGP Prefix Limit Threshold Percentage and Log-only.** 5620 SAM does not support configuration threshold limit percentage and log-only parameters for BGP peers. **IS-IS Default IPv4 and IPv6 Metric Values.** 5620 SAM does not support IPv4 and IPv6 default metrics for IS-IS interfaces. **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587672]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R5)
	IGMP Tunnel Interface Administrative State. 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **Uni-directional APS Support.** 5620 SAM does not support Uni-directional APS. [581463] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE.** 5620 SAM does not support the configuration of ICMP VSE (Vendor specific

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R5)
	extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R5)
	MPLS/RSVP Local Node Maintenance Required Error. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **1-Port 100G and 12-Port 10G Ethernet IMMs.** 5620 SAM does not support the 1-Port 100G and 12-Port 10G Ethernet IMM Cards. **IPv6 Support on IPipe.** 5620 SAM does not support IPv6 for IPipes. **RSVP-TE P2MP I-PMSI.** 5620 SAM does not support RSVP-TE P2MP I-PMSI. **SC-APS Support for MLPPP on Network Ports.** 5620 SAM does not support MLPPP on Network Ports for SC-APS. **IPSec IKEv2.** 5620 SAM does not support IPSec Internet Key Exchange version 2 (IKEv2). **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R5)
	Ethernet CFM Frame Rate Limiting. 5620 SAM does not support Ethernet CFM Frame Rate Limiting. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **QinQ Untagged Frames ".0".** 5620 SAM does not support QinQ Untagged Frames (.0) for L2 and L3 Access Interfaces. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **(PTS 587339) IGMP Tunnel Interface Deployment Failure.** 5620 SAM does not support creation of IGMP Tunnel Interfaces of type RSVP. A deployment failure will occur upon attempted creation. **7750 SR-c4.** 5620 SAM does not support Management of 7750 SR-c4. **OC-768/STM-256C DWDM IMM Card.** 5620 SAM does not support the OC-768/STM-256C DWDM IMM Card. **BITS-OUT Support.** 5620 SAM does not support BITS-OUT support for SFM3/CFM on 7750 SR-7/SR-12/SR-c4. **Full SSM/ESMC Support.** 5620 SAM does not support full SSM/ESMC capability for clock source quality level received via SSM of SDH/SONET/BITS ports or ESMC of synchronous Ethernet ports for system timing reference selection. **Uni-Directional APS Service Parity for SONET/SDH Channelized and Non-Channelized Interfaces.** 5620 SAM does not support uni-directional APS service parity for SONET/SDH channelized and non-channelized interfaces for MDAs/CMAs that previously only supported bi-directional switching mode APS. **G.8032 Ethernet Ring Protocol.** 5620 SAM does not support G.8032 ethernet ring automatic protection switching. **NAT Basic Port Forwarding.** 5620 SAM does not support NAT basic port forwarding. **DIAMETER Credit Control On-line Charging.** 5620 SAM does not support on-line charging wuth DIAMETER Credit Control. **Multicast over PPPoE Sessions.** 5620 SAM does not support multicast of PPPoE sessions. **Remove/Add/Modify Domain Names in RADIUS Authentication.** 5620 SAM does not support add/remove/replace for strings used as domain names in PAP/CHAP authentication. **Multiple RADIUS Authentication Based On Domain Name.** 5620 SAM does not support multiple RADIUS Authentication based on Domain Name (Pre-Authentication in LUDB). **IPoE User Name Option 61/60.** 5620 SAM does not support RADIUS User Name Format: DHCP Option 61/60.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R5)
	ESM IPv6 Local User Database (LUDB) for IPoE. 5620 SAM does not support ESM IPv6 Local User Database (LUDB) for IPoE. **ATM Aware QoS for Broadband Network Gateway.** 5620 SAM does not support ATM/ethernet last-mile aware QoS for broadband network gateway. **H-Pol Support for 7750 SR-c12/SR-c4.** 5620 SAM does not support Class-Fair Hierarchical Policing (H-Pol) for 7750 SR-c12/SR-c4. **Queue Parent Weight Override.** 5620 SAM does not support queue parent weight override. **QoS Burst Management.** 5620 SAM does not support QoS Burst Management. **Video-ISA with Alcatel-Lucent 5910 VSA SP4 (RET/FCC).** 5620 SAM does not support Video-ISA with Alcatel-Lucent 5910 VSA Service Pack 4 (RET/FCC), including dynamic computation of FCC duration and bandwidth, audio re-ordering for FCC. **Video Dual-Stream Selection.** 5620 SAM does not support video dual-stream selection. **Video Quality Monitoring.** 5620 SAM does not support Video Quality Monitoring (VQM). **Multicast Over LDP P2MP LSP.** 5620 SAM does not support multicast over LDP P2MP LSP. **LSP Automatic Bandwidth Adjustment.** 5620 SAM does not support LSP Automatic Bandwidth Adjustment. **Routed VPLS.** 5620 SAM does not support Routed VPLS. **PBB Support for RFC 3107.** 5620 SAM does not support PBB for RFC 3107 (BGP LSP for PBB-VPLS Services). **LDP FEC to BGP Label Route Stitching.** 5620 SAM does not support LDP FEC to BGP label route stitching. **Multi-homing for L3 Services.** 5620 SAM does not support multi-homing for L3 Services (BGP Anycast address support). **SDP-Configurable Tunnel Destination Address.** 5620 SAM does not support SDP-configurable tunnel destination address. **Hashing Enhancements for Consistent Per-Service Forwading .** 5620 SAM does not support hashing enhancements for conistent per-service forwarding. **HSDPA Offload Fallback Over ATM .** 5620 SAM does not support HSDPA offload fallback over ATM. **Subscriber Attribute Override of App-Profile Values .** 5620 SAM does not support subscriber attribute override of app-profile values. **IPipe Divert to AA.** 5620 SAM does not support IPipe divert to Application Assurance.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R5)
	AA-ISA Large Session Congestion Mitigation. 5620 SAM does not support AA-ISA Large Session Congestion Mitigation. **Enable ESMC on WAN Ports.** 5620 SAM does not support enabling ESMC for WAN ports. **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. **RADIUS Authentication Policy Down Time.** 5620 SAM does not support RADIUS authentication policy down time. **CoA-Only RADIUS Server.** 5620 SAM does not support CoA-only RADIUS server. **TACACS+ 128-Character Secret Key.** 5620 SAM does not support 128 characters for the TACACS+ secret key. **LAG LACP System-ID Configuration.** 5620 SAM does not support configuration of the LACP System-ID for LAGs. **BGP Prefix Limit Threshold Percentage and Log-only.** 5620 SAM does not support configuration threshold limit percentage and log-only parameters for BGP peers. **IS-IS Default IPv4 and IPv6 Metric Values.** 5620 SAM does not support IPv4 and IPv6 default metrics for IS-IS interfaces. **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **LAC Tunnel Support for VPRN (L2TP).** 5620 SAM does not support LAC Tunnels for VPRN (L2TP). **LNS Over MPLS LNS.** 5620 SAM does not support LNS Over MPLS LNS. **L2TP Tunnel Switching with ESM.** 5620 SAM does not support L2TP Tunnel Switching with ESM. **LI Activation Enhancements.** 5620 SAM does not support LI Activation Enhancements. **LI for LAC Sessions.** 5620 SAM does not support LI for LAC Sessions. **SLA Override without SLA-Profile Change.** 5620 SAM does not support SLA override without SLA-Profile change. **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587672] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R5)
	switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **Uni-directional APS Support.** 5620 SAM does not support Uni-directional APS. [581463] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R5)
	ICMP-VSE. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R5)
	the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 8: 7750 SR 8.0 R4

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R4)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 592549) IPv6 Standalone PPP-SLAAC or PPP-DHCP6 Mid-Session Change.** A mid-session change on an IPv6 PPP-SLAAC or PPP-DHCP6 ESM subscriber host will result in a deployment failure if the host does not also have IPv4 addressing configured (v4/v6 Dual-stack). **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R4)
	ADI Server Statistics Enhancements. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R4)
	failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 592549) IPv6 Standalone PPP-SLAAC or PPP-DHCP6 Mid-Session Change.** A mid-session change on an IPv6 PPP-SLAAC or PPP-DHCP6 ESM subscriber host will result in a deployment failure if the host does not also have IPv4 addressing configured (v4/v6 Dual-stack). **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R4)
	Card PChip CAM Statistics and Trap. 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R4)
	ARP on DHCP Response Packets. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 592549) IPv6 Standalone PPP-SLAAC or PPP-DHCP6 Mid-Session Change.** A mid-session change on an IPv6 PPP-SLAAC or PPP-DHCP6 ESM subscriber host will result in a deployment failure if the host does not also have IPv4 addressing

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R4)
	configured (v4/v6 Dual-stack). **(PTS 587339) IGMP Tunnel Interface Deployment Failure.** 5620 SAM does not support creation of IGMP Tunnel Interfaces of type RSVP. A deployment failure will occur upon attempted creation. **7750 SR-c4.** 5620 SAM does not support Management of 7750 SR-c4. **OC-768/STM-256C DWDM IMM Card.** 5620 SAM does not support the OC-768/STM-256C DWDM IMM Card. **BITS-OUT Support.** 5620 SAM does not support BITS-OUT support for SFM3/CFM on 7750 SR-7/SR-12/SR-c4. **Full SSM/ESMC Support.** 5620 SAM does not support full SSM/ESMC capability for clock source quality level received via SSM of SDH/SONET/BITS ports or ESMC of synchronous Ethernet ports for system timing reference selection. **Uni-Directional APS Service Parity for SONET/SDH Channelized and Non-Channelized Interfaces.** 5620 SAM does not support uni-directional APS service parity for SONET/SDH channelized and non-channelized interfaces for MDAs/CMAs that previously only supported bi-directional switching mode APS. **G.8032 Ethernet Ring Protocol.** 5620 SAM does not support G.8032 ethernet ring automatic protection switching. **NAT Basic Port Forwarding.** 5620 SAM does not support NAT basic port forwarding. **DIAMETER Credit Control On-line Charging.** 5620 SAM does not support on-line charging wuth DIAMETER Credit Control. **Multicast over PPPoE Sessions.** 5620 SAM does not support multicast of PPPoE sessions. **Remove/Add/Modify Domain Names in RADIUS Authentication.** 5620 SAM does not support add/remove/replace for strings used as domain names in PAP/CHAP authentication. **Multiple RADIUS Authentication Based On Domain Name.** 5620 SAM does not support multiple RADIUS Authentication based on Domain Name (Pre-Authentication in LUDB). **IPoE User Name Option 61/60.** 5620 SAM does not support RADIUS User Name Format: DHCP Option 61/60. **ESM IPv6 Local User Database (LUDB) for IPoE.** 5620 SAM does not support ESM IPv6 Local User Database (LUDB) for IPoE. **ATM Aware QoS for Broadband Network Gateway.** 5620 SAM does not support ATM/ethernet last-mile aware QoS for broadband network gateway. **H-Pol Support for 7750 SR-c12/SR-c4.** 5620 SAM does not support Class-Fair Hierarchical Policing (H-Pol) for 7750 SR-c12/SR-c4. **Queue Parent Weight Override.** 5620 SAM does not support queue parent weight

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R4)
	override. **QoS Burst Management.** 5620 SAM does not support QoS Burst Management. **Video-ISA with Alcatel-Lucent 5910 VSA SP4 (RET/FCC).** 5620 SAM does not support Video-ISA with Alcatel-Lucent 5910 VSA Service Pack 4 (RET/FCC), including dynamic computation of FCC duration and bandwidth, audio re-ordering for FCC. **Video Dual-Stream Selection.** 5620 SAM does not support video dual-stream selection. **Video Quality Monitoring.** 5620 SAM does not support Video Quality Monitoring (VQM). **Multicast Over LDP P2MP LSP.** 5620 SAM does not support multicast over LDP P2MP LSP. **LSP Automatic Bandwidth Adjustment.** 5620 SAM does not support LSP Automatic Bandwidth Adjustment. **Routed VPLS.** 5620 SAM does not support Routed VPLS. **PBB Support for RFC 3107.** 5620 SAM does not support PBB for RFC 3107 (BGP LSP for PBB-VPLS Services). **LDP FEC to BGP Label Route Stitching.** 5620 SAM does not support LDP FEC to BGP label route stitching. **Multi-homing for L3 Services.** 5620 SAM does not support multi-homing for L3 Services (BGP Anycast address support). **SDP-Configurable Tunnel Destination Address.** 5620 SAM does not support SDP-configurable tunnel destination address. **Hashing Enhancements for Consistent Per-Service Forwading .** 5620 SAM does not support hashing enhancements for conistent per-service forwarding. **HSDPA Offload Fallback Over ATM .** 5620 SAM does not support HSDPA offload fallback over ATM. **Subscriber Attribute Override of App-Profile Values .** 5620 SAM does not support subscriber attribute override of app-profile values. **IPipe Divert to AA.** 5620 SAM does not support IPipe divert to Application Assurance. **AA-ISA Large Session Congestion Mitigation.** 5620 SAM does not support AA-ISA Large Session Congestion Mitigation. **Enable ESMC on WAN Ports.** 5620 SAM does not support enabling ESMC for WAN ports. **RADIUS Authentication Policy Down Time.** 5620 SAM does not support RADIUS authentication policy down time. **CoA-Only RADIUS Server.** 5620 SAM does not support CoA-only RADIUS server.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R4)
	TACACS+ 128-Character Secret Key. 5620 SAM does not support 128 characters for the TACACS+ secret key. **LAG LACP System-ID Configuration.** 5620 SAM does not support configuration of the LACP System-ID for LAGs. **BGP Prefix Limit Threshold Percentage and Log-only.** 5620 SAM does not support configuration threshold limit percentage and log-only parameters for BGP peers. **IS-IS Default IPv4 and IPv6 Metric Values.** 5620 SAM does not support IPv4 and IPv6 default metrics for IS-IS interfaces. **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587672] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **Uni-directional APS Support.** 5620 SAM does not support Uni-directional APS. [581463] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R4)
	per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R4)
	Routing Policy Statement Entry (from Criteria). 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R4)
	such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 592549) IPv6 Standalone PPP-SLAAC or PPP-DHCP6 Mid-Session Change.** A mid-session change on an IPv6 PPP-SLAAC or PPP-DHCP6 ESM subscriber host will result in a deployment failure if the host does not also have IPv4 addressing configured (v4/v6 Dual-stack). **(PTS 587339) IGMP Tunnel Interface Deployment Failure.** 5620 SAM does not support creation of IGMP Tunnel Interfaces of type RSVP. A deployment failure will occur upon attempted creation. **7750 SR-c4.** 5620 SAM does not support Management of 7750 SR-c4. **OC-768/STM-256C DWDM IMM Card.** 5620 SAM does not support the OC-768/STM-256C DWDM IMM Card. **BITS-OUT Support.** 5620 SAM does not support BITS-OUT support for SFM3/CFM on 7750 SR-7/SR-12/SR-c4. **Full SSM/ESMC Support.** 5620 SAM does not support full SSM/ESMC capability for clock source quality level received via SSM of SDH/SONET/BITS ports or ESMC of synchronous Ethernet ports for system timing reference selection. **Uni-Directional APS Service Parity for SONET/SDH Channelized and Non-Channelized Interfaces.** 5620 SAM does not support uni-directional APS service parity for SONET/SDH channelized and non-channelized interfaces for MDAs/CMAs that previously only supported bi-directional switching mode APS. **G.8032 Ethernet Ring Protocol.** 5620 SAM does not support G.8032 ethernet ring automatic protection switching. **NAT Basic Port Forwarding.** 5620 SAM does not support NAT basic port forwarding. **DIAMETER Credit Control On-line Charging.** 5620 SAM does not support on-line charging wuth DIAMETER Credit Control. **Multicast over PPPoE Sessions.** 5620 SAM does not support multicast of PPPoE sessions. **Remove/Add/Modify Domain Names in RADIUS Authentication.** 5620 SAM does not support add/remove/replace for strings used as domain names in PAP/CHAP authentication. **Multiple RADIUS Authentication Based On Domain Name.** 5620 SAM does not support multiple RADIUS Authentication based on Domain Name (Pre-Authentication in LUDB). **IPoE User Name Option 61/60.** 5620 SAM does not support RADIUS User Name Format: DHCP Option 61/60. **ESM IPv6 Local User Database (LUDB) for IPoE.** 5620 SAM does not support ESM IPv6 Local User Database (LUDB) for IPoE.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R4)
	ATM Aware QoS for Broadband Network Gateway. 5620 SAM does not support ATM/ethernet last-mile aware QoS for broadband network gateway. **H-Pol Support for 7750 SR-c12/SR-c4.** 5620 SAM does not support Class-Fair Hierarchical Policing (H-Pol) for 7750 SR-c12/SR-c4. **Queue Parent Weight Override.** 5620 SAM does not support queue parent weight override. **QoS Burst Management.** 5620 SAM does not support QoS Burst Management. **Video-ISA with Alcatel-Lucent 5910 VSA SP4 (RET/FCC).** 5620 SAM does not support Video-ISA with Alcatel-Lucent 5910 VSA Service Pack 4 (RET/FCC), including dynamic computation of FCC duration and bandwidth, audio re-ordering for FCC. **Video Dual-Stream Selection.** 5620 SAM does not support video dual-stream selection. **Video Quality Monitoring.** 5620 SAM does not support Video Quality Monitoring (VQM). **Multicast Over LDP P2MP LSP.** 5620 SAM does not support multicast over LDP P2MP LSP. **LSP Automatic Bandwidth Adjustment.** 5620 SAM does not support LSP Automatic Bandwidth Adjustment. **Routed VPLS.** 5620 SAM does not support Routed VPLS. **PBB Support for RFC 3107.** 5620 SAM does not support PBB for RFC 3107 (BGP LSP for PBB-VPLS Services). **LDP FEC to BGP Label Route Stitching.** 5620 SAM does not support LDP FEC to BGP label route stitching. **Multi-homing for L3 Services.** 5620 SAM does not support multi-homing for L3 Services (BGP Anycast address support). **SDP-Configurable Tunnel Destination Address.** 5620 SAM does not support SDP-configurable tunnel destination address. **Hashing Enhancements for Consistent Per-Service Forwading .** 5620 SAM does not support hashing enhancements for conistent per-service forwarding. **HSDPA Offload Fallback Over ATM .** 5620 SAM does not support HSDPA offload fallback over ATM. **Subscriber Attribute Override of App-Profile Values .** 5620 SAM does not support subscriber attribute override of app-profile values. **IPipe Divert to AA.** 5620 SAM does not support IPipe divert to Application Assurance. **AA-ISA Large Session Congestion Mitigation.** 5620 SAM does not support AA-ISA Large Session Congestion Mitigation.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R4)
	Enable ESMC on WAN Ports. 5620 SAM does not support enabling ESMC for WAN ports. **RADIUS Authentication Policy Down Time.** 5620 SAM does not support RADIUS authentication policy down time. **CoA-Only RADIUS Server.** 5620 SAM does not support CoA-only RADIUS server. **TACACS+ 128-Character Secret Key.** 5620 SAM does not support 128 characters for the TACACS+ secret key. **LAG LACP System-ID Configuration.** 5620 SAM does not support configuration of the LACP System-ID for LAGs. **BGP Prefix Limit Threshold Percentage and Log-only.** 5620 SAM does not support configuration threshold limit percentage and log-only parameters for BGP peers. **IS-IS Default IPv4 and IPv6 Metric Values.** 5620 SAM does not support IPv4 and IPv6 default metrics for IS-IS interfaces. **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **LAC Tunnel Support for VPRN (L2TP).** 5620 SAM does not support LAC Tunnels for VPRN (L2TP). **LNS Over MPLS LNS.** 5620 SAM does not support LNS Over MPLS LNS. **L2TP Tunnel Switching with ESM.** 5620 SAM does not support L2TP Tunnel Switching with ESM. **LI Activation Enhancements.** 5620 SAM does not support LI Activation Enhancements. **LI for LAC Sessions.** 5620 SAM does not support LI for LAC Sessions. **SLA Override without SLA-Profile Change.** 5620 SAM does not support SLA override without SLA-Profile change. **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587672] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R4)
	Tunnel Interface Description. 5620 SAM does not support description for Tunnel Interfaces. [587677] **Uni-directional APS Support.** 5620 SAM does not support Uni-directional APS. [581463] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R4)
	router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R4)
	path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 9: 7750 SR 8.0 R3

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R3)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R3)
	Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R3)
	802.3ah OAM Loop Cleared Notification. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R3)
	on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R3)
	the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587672] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R3)
	Uni-directional APS Support. 5620 SAM does not support Uni-directional APS. [581463] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R3)
	MMRP IMPM Override. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R3)
	Blackhole Ingress Switch Fabric Multicast Path Type. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587672] **IGMP Tunnel Interface Administrative State.** 5620 SAM does not support administrative state for IGMP Tunnel Interfaces. [587673] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [587675] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **Uni-directional APS Support.** 5620 SAM does not support Uni-directional APS. [581463] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R3)
	[576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R3)
	PIM ECMP Optional Threshold Usage. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R3)
	OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 10: 7750 SR 8.0 R1 through R2

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R1 through R2)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R1 through R2)
	RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R1 through R2)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R1 through R2)
	Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R1 through R2)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Uni-directional APS Support.** 5620 SAM does not support Uni-directional APS. [581463] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547]

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R1 through R2)
	ICMP-VSE. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R1 through R2)
	the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Uni-directional APS Support.** 5620 SAM does not support Uni-directional APS. [581463] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch,

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R1 through R2)
	configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R1 through R2)
	Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 8.0 R1 through R2)
	support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Alcatel-Lucent 7750 Service Router Release 7.0

Table 11: 7750 SR 7.0 R19

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [608922] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [608929] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set"

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [608922] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [608929] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R6	Network element supported as per 5620 SAM Release Description with the following limitations: **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [608922] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [608929] **(PTS 603378) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [603378] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [608922] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [608929] **(PTS 603378) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [603378] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database.** 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	ARP on DHCP Response Packets. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	Additional DNS Ping Error Results. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [608922] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [608929] **(PTS 603378) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [603378] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database.** 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	Null Endpoint Discriminator ID for MLPPP. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [608922] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	rate limiting of MPLS exception messagesfor VPRN Services. [608929] **(PTS 603378) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [603378] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database.** 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	Null Endpoint Discriminator ID for MLPPP. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [608922] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	rate limiting of MPLS exception messagesfor VPRN Services. [608929] **(PTS 603378) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [603378] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database.** 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	Null Endpoint Discriminator ID for MLPPP. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [608922] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	rate limiting of MPLS exception messagesfor VPRN Services. [608929] **(PTS 603378) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [603378] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database.** 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	APS Multilink Bundle Stateless Switchover. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	Synchronous Ethernet with 10G Ethernet Port in WAN Mode. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [608922] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [608929] **(PTS 603378) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [603378] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database.** 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	(PTS 587683) Obsoleted OAM Test History Tables Parameter. 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	[572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [608922] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [608929] **(PTS 603378) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [603378] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database.** 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	Admin State Rules for Bundle Protection Group. 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Custom Buffer Management for ATM MDA Ports**. 5620 SAM does not support custom buffer management for ATM MDA ports which allows for configuration of the buffer pool size and queue backpressure threshold on ATM ports. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	ADI Server Statistics Enhancements. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	PIP STP Inside Same MST Region. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [608922] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [608929] **(PTS 603378) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [603378] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database.** 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	PPP Initial delay. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	disabling TTL propagation for transit packets in an LDP shortcut. **Custom Buffer Management for ATM MDA Ports**. 5620 SAM does not support custom buffer management for ATM MDA ports which allows for configuration of the buffer pool size and queue backpressure threshold on ATM ports. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **7750 SR-c12**. 5620 SAM does not support the 7750 SR-c12 prior to 5620 SAM 7.0.R4. Discovery of the router using 5620 SAM 7.0.R1 through R3 will not correctly identify and manage all components requiring the router to be unmanaged. **Local/Zoned AD Insert (ADI) Splicer**. 5620 SAM does not support AD Insert (ADI) Splicer. **WRED-Per-Queue**. 5620 SAM does not support WRED-per-Queue which allows per-queue specific WRED capability on IOM3-XP and IMM cards. **eiBGP Load Balancing**. 5620 SAM does not support eiBGP load balancing for VPRN services. **LSR IP Load Balancing**. 5620 SAM does not support LSR IP load balancing. **SLA-Profile Based Egress Remarking**. 5620 SAM does not support 'Egress QoS marking from SAP' for Subscriber Management SLA-Profiles. **5-Port 10G Ethernet XFP IMM**. 5620 SAM does not support the 5-Port 10G Ethernet XFP Integrated Media Module (IMM). **ESM on VSM (CCAG Use Origin SAP)**. 5620 SAM does not support ESM on VSM (CCAG Use Origin SAP) functionality for Group Interfaces on IES and VPRN services.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	Configurable CFM Thresholds. 5620 SAM does not support configurable Ethernet CFM Eth-Test and One-Way-Delay thresholds. **PBB Access Dual Homing**. 5620 SAM does not support PBB Access Dual Homing. **G.8031 Protected Ethernet Tunnels**. 5620 SAM does not support G.8031 Protected Ethernet Tunnels. **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA. **1-Port 10G HS (High Scale) MDA**. 5620 SAM does not support the 1-Port 10G HS (High Scale) MDA. **Video ISA MDA**. 5620 SAM does not support the Video ISA MDA. If a pre-SAM 7.0R4 release manages a 7750 or 7450 router with configured Video Groups containing ISA-Video group members, then invalid LAG entries will appear in SAM. The LAGs will incorrectly appear in the SAM Equipment tree with LAG IDs greater than 200. Furthermore, if the router has VPLS, IES or VPRN services that have configured video interfaces and associated video interface address(es), then invalid L2/L3 access interfaces and addresses will appear for these services. Attempting to modify or delete these LAGs, access interfaces or addresses via SAM will result in failed deployments. **RETransmission Client and Server**. 5620 SAM does not support the Retransmission Client and Server for Video ISA. **Fast Channel Change Server**. 5620 SAM does not support the Fast Channel Change Server. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LAG Support for HS-MDA**. 5620 SAM does not support LAG's for HS-MDA ports. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	Multicast over RSVP, P2MP, and LSP. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **IPv6 PIM ASM**. 5620 SAM does not support IPv6 PIM ASM. **Multicast VPN Evolution with BGP Control Plane**. 5620 SAM does not support Multicast VPN Evolution with BGP Control Plane. **LDP over RSVP without Area-Boundary for IS-IS**. 5620 SAM does not support LDP over RSVP without Area-Boundary for IS-IS. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **OAM (Dying Gasp trap)**. 5620 SAM does not support "Dying gasp Trap" for OAM. **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **IGMP Host-Tracking**. 5620 SAM does not support IGMP Host Tracking on IES and VPRN services, including subscriber interfaces. It is also not supported on VPLS service. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R19)
	Untagged RNCV Support for MC-Ring QinQ SAP. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 12: 7750 SR 7.0 R17 through R18

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution.** 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check.** 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes.** 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number.** 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default".** 5620 SAM does not support the "default" type for Power Supplies. [593086] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover.** 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation.** 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	PIP STP Inside Same MST Region. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	part number. [593083] **Power Supply Type "Default".** 5620 SAM does not support the "default" type for Power Supplies. [593086] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	MMRP IMPM Override. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	Blackhole Ingress Switch Fabric Multicast Path Type. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R6	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 603378) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [603378] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	Multicast over RSVP, P2MP, and LSP. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 603378) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [603378] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database.** 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth.** 5620 SAM does not support display of the PIM

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	802.3ah OAM Loop Cleared Notification. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 603378) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [603378] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database.** 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 603378) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [603378] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	Telnet/SSH TTL Security Check. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database.** 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	PIM ECMP Optional Threshold Usage. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 603378) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [603378] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database.** 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however,

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 603378) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [603378] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database.** 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	ADI Server Statistics Enhancements. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 603378) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [603378] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database.** 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change. Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	PIM SSM Default Range Disable. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	H-QOS Adjustments based on Video Viewership. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	Provider Bridge Group Address (802.1ad) MSTP Support. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 603378) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [603378] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database.** 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Custom Buffer Management for ATM MDA Ports**. 5620 SAM does not support custom buffer management for ATM MDA ports which allows for configuration of the buffer pool size and queue backpressure threshold on ATM ports. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 603378) Deployment Failure For ISA IPSec Group Creation.** Attempted creation of an ISA IPSec Group using 5620 SAM will result in a deployment failure. [603378] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database.** 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	SHCV Timeout and Retries. 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Custom Buffer Management for ATM MDA Ports**. 5620 SAM does not support custom buffer management for ATM MDA ports which allows for configuration of the buffer pool size and queue backpressure threshold on ATM ports. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **7750 SR-c12**. 5620 SAM does not support the 7750 SR-c12 prior to 5620 SAM 7.0.R4. Discovery of the router using 5620 SAM 7.0.R1 through R3 will not correctly identify and manage all components requiring the router to be unmanaged. **Local/Zoned AD Insert (ADI) Splicer**. 5620 SAM does not support AD Insert (ADI) Splicer. **WRED-Per-Queue**. 5620 SAM does not support WRED-per-Queue which allows per-queue specific WRED capability on IOM3-XP and IMM cards. **eiBGP Load Balancing**. 5620 SAM does not support eiBGP load balancing for VPRN services. **LSR IP Load Balancing**. 5620 SAM does not support LSR IP load balancing. **SLA-Profile Based Egress Remarking**. 5620 SAM does not support 'Egress QoS marking from SAP' for Subscriber Management SLA-Profiles.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	5-Port 10G Ethernet XFP IMM. 5620 SAM does not support the 5-Port 10G Ethernet XFP Integrated Media Module (IMM). **ESM on VSM (CCAG Use Origin SAP)**. 5620 SAM does not support ESM on VSM (CCAG Use Origin SAP) functionality for Group Interfaces on IES and VPRN services. **Configurable CFM Thresholds**. 5620 SAM does not support configurable Ethernet CFM Eth-Test and One-Way-Delay thresholds. **PBB Access Dual Homing**. 5620 SAM does not support PBB Access Dual Homing. **G.8031 Protected Ethernet Tunnels**. 5620 SAM does not support G.8031 Protected Ethernet Tunnels. **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA. **1-Port 10G HS (High Scale) MDA**. 5620 SAM does not support the 1-Port 10G HS (High Scale) MDA. **Video ISA MDA**. 5620 SAM does not support the Video ISA MDA. If a pre-SAM 7.0R4 release manages a 7750 or 7450 router with configured Video Groups containing ISA-Video group members, then invalid LAG entries will appear in SAM. The LAGs will incorrectly appear in the SAM Equipment tree with LAG IDs greater than 200. Furthermore, if the router has VPLS, IES or VPRN services that have configured video interfaces and associated video interface address(es), then invalid L2/L3 access interfaces and addresses will appear for these services. Attempting to modify or delete these LAGs, access interfaces or addresses via SAM will result in failed deployments. **RETransmission Client and Server**. 5620 SAM does not support the Retransmission Client and Server for Video ISA. **Fast Channel Change Server**. 5620 SAM does not support the Fast Channel Change Server. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LAG Support for HS-MDA**. 5620 SAM does not support LAG's for HS-MDA ports. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	PING and LSP-TRACE for P2MP, RSVP, and LSP. **IPv6 PIM ASM**. 5620 SAM does not support IPv6 PIM ASM. **Multicast VPN Evolution with BGP Control Plane**. 5620 SAM does not support Multicast VPN Evolution with BGP Control Plane. **LDP over RSVP without Area-Boundary for IS-IS**. 5620 SAM does not support LDP over RSVP without Area-Boundary for IS-IS. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **OAM (Dying Gasp trap**). 5620 SAM does not support "Dying gasp Trap" for OAM. **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **IGMP Host-Tracking**. 5620 SAM does not support IGMP Host Tracking on IES and VPRN services, including subscriber interfaces. It is also not supported on VPLS service. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R17 through R18)
	failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 13: 7750 SR 7.0 R14 through R16

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution.** 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check.** 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes.** 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number.** 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default".** 5620 SAM does not support the "default" type for Power Supplies. [593086] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover.** 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation.** 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	Power Supply Type "Default". 5620 SAM does not support the "default" type for Power Supplies. [593086] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database.** 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	IOM Card Fail-On-Error. 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	ADI Server Statistics Enhancements. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database.** 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	Static Route LDP Synchronization. 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database.** 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	Video Group Per Channel Statistics For Duplicate SSRC. 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	Ethernet Queue Groups. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad).

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database.** 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	APS Multilink Bundle Stateless Switchover. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	PIM Instant Prune Echo. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database.** 5620 SAM does not support Local User

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	Ethernet Port Hold Timer. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	LDP Shortcut TTL Propagation Disabling. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	BGP Remove Private Limited. 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Custom Buffer Management for ATM MDA Ports**. 5620 SAM does not support custom buffer management for ATM MDA ports which allows for configuration of the buffer pool size and queue backpressure threshold on ATM ports. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	7750 SR-c12 PBB MAC Name Support. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	PIP STP Inside Same MST Region. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	Video Group Per Channel Statistics For Duplicate SSRC. 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Custom Buffer Management for ATM MDA Ports**. 5620 SAM does not support custom buffer management for ATM MDA ports which allows for configuration of the buffer pool size and queue backpressure threshold on ATM ports. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **7750 SR-c12**. 5620 SAM does not support the 7750 SR-c12 prior to 5620 SAM 7.0.R4. Discovery of the router using 5620 SAM 7.0.R1 through R3 will not correctly identify and manage all components requiring the router to be unmanaged. **Local/Zoned AD Insert (ADI) Splicer**. 5620 SAM does not support AD Insert (ADI) Splicer. **WRED-Per-Queue**. 5620 SAM does not support WRED-per-Queue which allows per-queue specific WRED capability on IOM3-XP and IMM cards. **eiBGP Load Balancing**. 5620 SAM does not support eiBGP load balancing for VPRN services. **LSR IP Load Balancing**. 5620 SAM does not support LSR IP load balancing. **SLA-Profile Based Egress Remarking**. 5620 SAM does not support 'Egress QoS marking from SAP' for Subscriber Management SLA-Profiles. **5-Port 10G Ethernet XFP IMM**. 5620 SAM does not support the 5-Port 10G Ethernet XFP Integrated Media Module (IMM). **ESM on VSM (CCAG Use Origin SAP)**. 5620 SAM does not support ESM on VSM (CCAG Use Origin SAP) functionality for Group Interfaces on IES and VPRN services. **Configurable CFM Thresholds**. 5620 SAM does not support configurable Ethernet CFM Eth-Test and One-Way-Delay thresholds. **PBB Access Dual Homing**. 5620 SAM does not support PBB Access Dual Homing. **G.8031 Protected Ethernet Tunnels**. 5620 SAM does not support G.8031 Protected Ethernet Tunnels. **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA. **1-Port 10G HS (High Scale) MDA**. 5620 SAM does not support the 1-Port 10G HS (High Scale) MDA. **Video ISA MDA**. 5620 SAM does not support the Video ISA MDA. If a pre-SAM 7.0R4 release manages a 7750 or 7450 router with configured Video Groups containing ISA-Video group members, then invalid LAG entries will appear in SAM. The LAGs will incorrectly appear in the SAM Equipment tree with LAG IDs greater than 200. Furthermore, if the router has VPLS, IES or VPRN services that have configured video interfaces and associated video interface address(es), then invalid L2/L3 access

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	interfaces and addresses will appear for these services. Attempting to modify or delete these LAGs, access interfaces or addresses via SAM will result in failed deployments. **RETransmission Client and Server**. 5620 SAM does not support the Retransmission Client and Server for Video ISA. **Fast Channel Change Server**. 5620 SAM does not support the Fast Channel Change Server. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LAG Support for HS-MDA**. 5620 SAM does not support LAG's for HS-MDA ports. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **IPv6 PIM ASM**. 5620 SAM does not support IPv6 PIM ASM. **Multicast VPN Evolution with BGP Control Plane**. 5620 SAM does not support Multicast VPN Evolution with BGP Control Plane. **LDP over RSVP without Area-Boundary for IS-IS**. 5620 SAM does not support LDP over RSVP without Area-Boundary for IS-IS. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **OAM (Dying Gasp trap**). 5620 SAM does not support "Dying gasp Trap" for OAM. **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **IGMP Host-Tracking**. 5620 SAM does not support IGMP Host Tracking on IES and VPRN services, including subscriber interfaces. It is also not supported on VPLS service. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R14 through R16)
	Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 14: 7750 SR 7.0 R13

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	MPLS Static LSP Fast Retry Timer. 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	Time and Volume Based Accounting. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	PIM SSM Default Range Disable. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	Video Group Per Channel Statistics For Duplicate SSRC. 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	Multicast over RSVP, P2MP, and LSP. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	IOM Card Last Bootup Reason. 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	OAM LSP Ping 'Packet Size Too Big' Response Status. 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	PIP STP Inside Same MST Region. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	Admin State Rules for Bundle Protection Group. 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	Time and Volume Based Accounting. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	IOM Card Last Bootup Reason. 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	tmnxSyncFailureReason. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Custom Buffer Management for ATM MDA Ports**. 5620 SAM does not support custom buffer management for ATM MDA ports which allows for configuration of the buffer pool size and queue backpressure threshold on ATM ports. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	PIM ECMP Optional Threshold Usage. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Custom Buffer Management for ATM MDA Ports**. 5620 SAM does not support custom buffer management for ATM MDA ports which allows for configuration of the buffer pool size and queue backpressure threshold on ATM ports. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **7750 SR-c12**. 5620 SAM does not support the 7750 SR-c12 prior to 5620 SAM 7.0.R4. Discovery of the router using 5620 SAM 7.0.R1 through R3 will not correctly identify and manage all components requiring the router to be unmanaged. **Local/Zoned AD Insert (ADI) Splicer**. 5620 SAM does not support AD Insert (ADI) Splicer. **WRED-Per-Queue**. 5620 SAM does not support WRED-per-Queue which allows per-queue specific WRED capability on IOM3-XP and IMM cards. **eiBGP Load Balancing**. 5620 SAM does not support eiBGP load balancing for VPRN services. **LSR IP Load Balancing**. 5620 SAM does not support LSR IP load balancing. **SLA-Profile Based Egress Remarking**. 5620 SAM does not support 'Egress QoS marking from SAP' for Subscriber Management SLA-Profiles. **5-Port 10G Ethernet XFP IMM**. 5620 SAM does not support the 5-Port 10G Ethernet XFP Integrated Media Module (IMM). **ESM on VSM (CCAG Use Origin SAP)**. 5620 SAM does not support ESM on VSM (CCAG Use Origin SAP) functionality for Group Interfaces on IES and VPRN services. **Configurable CFM Thresholds**. 5620 SAM does not support configurable Ethernet CFM Eth-Test and One-Way-Delay thresholds. **PBB Access Dual Homing**. 5620 SAM does not support PBB Access Dual Homing. **G.8031 Protected Ethernet Tunnels**. 5620 SAM does not support G.8031 Protected Ethernet Tunnels.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	TCP Authentication Null Key. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA. **1-Port 10G HS (High Scale) MDA**. 5620 SAM does not support the 1-Port 10G HS (High Scale) MDA. **Video ISA MDA**. 5620 SAM does not support the Video ISA MDA. If a pre-SAM 7.0R4 release manages a 7750 or 7450 router with configured Video Groups containing ISA-Video group members, then invalid LAG entries will appear in SAM. The LAGs will incorrectly appear in the SAM Equipment tree with LAG IDs greater than 200. Furthermore, if the router has VPLS, IES or VPRN services that have configured video interfaces and associated video interface address(es), then invalid L2/L3 access interfaces and addresses will appear for these services. Attempting to modify or delete these LAGs, access interfaces or addresses via SAM will result in failed deployments. **RETransmission Client and Server**. 5620 SAM does not support the Retransmission Client and Server for Video ISA. **Fast Channel Change Server**. 5620 SAM does not support the Fast Channel Change Server. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LAG Support for HS-MDA**. 5620 SAM does not support LAG's for HS-MDA ports. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **IPv6 PIM ASM**. 5620 SAM does not support IPv6 PIM ASM. **Multicast VPN Evolution with BGP Control Plane**. 5620 SAM does not support Multicast VPN Evolution with BGP Control Plane. **LDP over RSVP without Area-Boundary for IS-IS**. 5620 SAM does not support LDP over RSVP without Area-Boundary for IS-IS. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **OAM (Dying Gasp trap)**. 5620 SAM does not support "Dying gasp Trap" for OAM. **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **IGMP Host-Tracking**. 5620 SAM does not support IGMP Host Tracking on IES and VPRN services, including subscriber interfaces. It is also not supported on VPLS service. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R13)
	Provider Bridge Group Address (802.1ad) MSTP Support. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 15: 7750 SR 7.0 R12

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	MPLS Static LSP Fast Retry Timer. 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	SHCV Timeout and Retries. 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	Null Endpoint Discriminator ID for MLPPP. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	ARP on DHCP Response Packets. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	[588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	Admin State Rules for Bundle Protection Group. 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	Time and Volume Based Accounting. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	H-QOS Adjustments based on Video Viewership. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	Provider Bridge Group Address (802.1ad) MSTP Support. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	PPP Initial delay. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	7750 SR-c12 PBB MAC Name Support. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	IOM Card Fail-On-Error. 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria).

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	MPLS / RSVP (Fast Retry Timer). 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Custom Buffer Management for ATM MDA Ports**. 5620 SAM does not support custom buffer management for ATM MDA ports which allows for configuration of the buffer pool size and queue backpressure threshold on ATM ports. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	SHCV Timeout and Retries. 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Custom Buffer Management for ATM MDA Ports**. 5620 SAM does not support custom buffer management for ATM MDA ports which allows for configuration of the buffer pool size and queue backpressure threshold on ATM ports. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **7750 SR-c12**. 5620 SAM does not support the 7750 SR-c12 prior to 5620 SAM 7.0.R4. Discovery of the router using 5620 SAM 7.0.R1 through R3 will not correctly identify and manage all components requiring the router to be unmanaged. **Local/Zoned AD Insert (ADI) Splicer**. 5620 SAM does not support AD Insert (ADI) Splicer. **WRED-Per-Queue**. 5620 SAM does not support WRED-per-Queue which allows per-queue specific WRED capability on IOM3-XP and IMM cards. **eiBGP Load Balancing**. 5620 SAM does not support eiBGP load balancing for VPRN services. **LSR IP Load Balancing**. 5620 SAM does not support LSR IP load balancing. **SLA-Profile Based Egress Remarking**. 5620 SAM does not support 'Egress QoS marking from SAP' for Subscriber Management SLA-Profiles.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	5-Port 10G Ethernet XFP IMM. 5620 SAM does not support the 5-Port 10G Ethernet XFP Integrated Media Module (IMM). **ESM on VSM (CCAG Use Origin SAP)**. 5620 SAM does not support ESM on VSM (CCAG Use Origin SAP) functionality for Group Interfaces on IES and VPRN services. **Configurable CFM Thresholds**. 5620 SAM does not support configurable Ethernet CFM Eth-Test and One-Way-Delay thresholds. **PBB Access Dual Homing**. 5620 SAM does not support PBB Access Dual Homing. **G.8031 Protected Ethernet Tunnels**. 5620 SAM does not support G.8031 Protected Ethernet Tunnels. **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA. **1-Port 10G HS (High Scale) MDA**. 5620 SAM does not support the 1-Port 10G HS (High Scale) MDA. **Video ISA MDA**. 5620 SAM does not support the Video ISA MDA. If a pre-SAM 7.0R4 release manages a 7750 or 7450 router with configured Video Groups containing ISA-Video group members, then invalid LAG entries will appear in SAM. The LAGs will incorrectly appear in the SAM Equipment tree with LAG IDs greater than 200. Furthermore, if the router has VPLS, IES or VPRN services that have configured video interfaces and associated video interface address(es), then invalid L2/L3 access interfaces and addresses will appear for these services. Attempting to modify or delete these LAGs, access interfaces or addresses via SAM will result in failed deployments. **RETransmission Client and Server**. 5620 SAM does not support the Retransmission Client and Server for Video ISA. **Fast Channel Change Server**. 5620 SAM does not support the Fast Channel Change Server. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LAG Support for HS-MDA**. 5620 SAM does not support LAG's for HS-MDA ports. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	PING and LSP-TRACE for P2MP, RSVP, and LSP. **IPv6 PIM ASM**. 5620 SAM does not support IPv6 PIM ASM. **Multicast VPN Evolution with BGP Control Plane**. 5620 SAM does not support Multicast VPN Evolution with BGP Control Plane. **LDP over RSVP without Area-Boundary for IS-IS**. 5620 SAM does not support LDP over RSVP without Area-Boundary for IS-IS. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **OAM (Dying Gasp trap**). 5620 SAM does not support "Dying gasp Trap" for OAM. **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **IGMP Host-Tracking**. 5620 SAM does not support IGMP Host Tracking on IES and VPRN services, including subscriber interfaces. It is also not supported on VPLS service. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R12)
	failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 16: 7750 SR 7.0 R10 through R11

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	SNMP Trap Target Replay. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	[576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	ARP on DHCP Response Packets. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	ICMP-VSE. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	PIM Instant Prune Echo. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	LDP Shortcut TTL Propagation Disabling. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer).

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received). 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change. Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	PIM SSM Default Range Disable. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	ADI Server Statistics Enhancements. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	failure will occur. [587683] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E).

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	LDP Shortcut TTL Propagation Disabling. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Custom Buffer Management for ATM MDA Ports**. 5620 SAM does not support custom buffer management for ATM MDA ports which allows for configuration of the buffer pool size and queue backpressure threshold on ATM ports. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	Routing Policy Statement Entry (from Criteria). 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	such as start and completion of a recover action after system startup..
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Custom Buffer Management for ATM MDA Ports**. 5620 SAM does not support custom buffer management for ATM MDA ports which allows for configuration of the buffer pool size and queue backpressure threshold on ATM ports. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	ADI Server Statistics Enhancements. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **7750 SR-c12**. 5620 SAM does not support the 7750 SR-c12 prior to 5620 SAM 7.0.R4. Discovery of the router using 5620 SAM 7.0.R1 through R3 will not correctly identify and manage all components requiring the router to be unmanaged. **Local/Zoned AD Insert (ADI) Splicer**. 5620 SAM does not support AD Insert (ADI) Splicer. **WRED-Per-Queue**. 5620 SAM does not support WRED-per-Queue which allows per-queue specific WRED capability on IOM3-XP and IMM cards. **eiBGP Load Balancing**. 5620 SAM does not support eiBGP load balancing for VPRN services. **LSR IP Load Balancing**. 5620 SAM does not support LSR IP load balancing. **SLA-Profile Based Egress Remarking**. 5620 SAM does not support 'Egress QoS marking from SAP' for Subscriber Management SLA-Profiles. **5-Port 10G Ethernet XFP IMM**. 5620 SAM does not support the 5-Port 10G Ethernet XFP Integrated Media Module (IMM). **ESM on VSM (CCAG Use Origin SAP)**. 5620 SAM does not support ESM on VSM (CCAG Use Origin SAP) functionality for Group Interfaces on IES and VPRN services. **Configurable CFM Thresholds**. 5620 SAM does not support configurable Ethernet CFM Eth-Test and One-Way-Delay thresholds. **PBB Access Dual Homing**. 5620 SAM does not support PBB Access Dual Homing. **G.8031 Protected Ethernet Tunnels**. 5620 SAM does not support G.8031 Protected Ethernet Tunnels. **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA. **1-Port 10G HS (High Scale) MDA**. 5620 SAM does not support the 1-Port 10G HS (High Scale) MDA. **Video ISA MDA**. 5620 SAM does not support the Video ISA MDA. If a pre-SAM 7.0R4 release manages a 7750 or 7450 router with configured Video Groups containing ISA-Video group members, then invalid LAG entries will appear in SAM. The LAGs will incorrectly appear in the SAM Equipment tree with LAG IDs greater than 200. Furthermore, if the router has VPLS, IES or VPRN services that have configured video interfaces and associated video interface address(es), then invalid L2/L3 access interfaces and addresses will appear for these services. Attempting to modify or

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	delete these LAGs, access interfaces or addresses via SAM will result in failed deployments. **RETransmission Client and Server**. 5620 SAM does not support the Retransmission Client and Server for Video ISA. **Fast Channel Change Server**. 5620 SAM does not support the Fast Channel Change Server. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LAG Support for HS-MDA**. 5620 SAM does not support LAG's for HS-MDA ports. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **IPv6 PIM ASM**. 5620 SAM does not support IPv6 PIM ASM. **Multicast VPN Evolution with BGP Control Plane**. 5620 SAM does not support Multicast VPN Evolution with BGP Control Plane. **LDP over RSVP without Area-Boundary for IS-IS**. 5620 SAM does not support LDP over RSVP without Area-Boundary for IS-IS. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **OAM (Dying Gasp trap**). 5620 SAM does not support "Dying gasp Trap" for OAM. **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **IGMP Host-Tracking**. 5620 SAM does not support IGMP Host Tracking on IES and VPRN services, including subscriber interfaces. It is also not supported on VPLS service. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R10 through R11)
	Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 17: 7750 SR 7.0 R8 through R9

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R8 through R9)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R8 through R9)
	Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R8 through R9)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R8 through R9)
	ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R8 through R9)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R8 through R9)
	MPLS Static LSP Fast Retry Timer. 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R8 through R9)
	SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R8 through R9)
	for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R8 through R9)
	PIM ECMP Optional Threshold Usage. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R8 through R9)
	OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R8 through R9)
	state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R8 through R9)
	Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R8 through R9)
	support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R8 through R9)
	Static Route LDP Synchronization. 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R8 through R9)
	not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R8 through R9)
	New PVST Modes for BPDU Translation. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R8 through R9)
	Custom Buffer Management for ATM MDA Ports. 5620 SAM does not support custom buffer management for ATM MDA ports which allows for configuration of the buffer pool size and queue backpressure threshold on ATM ports. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria).

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R8 through R9)
	MPLS / RSVP (Fast Retry Timer). 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1	Network element supported as per 5620 SAM Release Description with the following

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R8 through R9)
through R3	limitations: **APS Multilink Bundle Stateless Switchover**. 5620 SAM does not support stateless APS switchover for multilink bundles. [580518] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R8 through R9)
	Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Custom Buffer Management for ATM MDA Ports**. 5620 SAM does not support custom buffer management for ATM MDA ports which allows for configuration of the buffer pool size and queue backpressure threshold on ATM ports. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **7750 SR-c12**. 5620 SAM does not support the 7750 SR-c12 prior to 5620 SAM 7.0.R4. Discovery of the router using 5620 SAM 7.0.R1 through R3 will not correctly identify and manage all components requiring the router to be unmanaged. **Local/Zoned AD Insert (ADI) Splicer**. 5620 SAM does not support AD Insert (ADI) Splicer. **WRED-Per-Queue**. 5620 SAM does not support WRED-per-Queue which allows per-queue specific WRED capability on IOM3-XP and IMM cards. **eiBGP Load Balancing**. 5620 SAM does not support eiBGP load balancing for VPRN services. **LSR IP Load Balancing**. 5620 SAM does not support LSR IP load balancing. **SLA-Profile Based Egress Remarking**. 5620 SAM does not support 'Egress QoS marking from SAP' for Subscriber Management SLA-Profiles. **5-Port 10G Ethernet XFP IMM**. 5620 SAM does not support the 5-Port 10G Ethernet XFP Integrated Media Module (IMM). **ESM on VSM (CCAG Use Origin SAP)**. 5620 SAM does not support ESM on VSM (CCAG Use Origin SAP) functionality for Group Interfaces on IES and VPRN services. **Configurable CFM Thresholds**. 5620 SAM does not support configurable Ethernet CFM Eth-Test and One-Way-Delay thresholds. **PBB Access Dual Homing**. 5620 SAM does not support PBB Access Dual Homing. **G.8031 Protected Ethernet Tunnels**. 5620 SAM does not support G.8031 Protected Ethernet Tunnels.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R8 through R9)
	TCP Authentication Null Key. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA. **1-Port 10G HS (High Scale) MDA**. 5620 SAM does not support the 1-Port 10G HS (High Scale) MDA. **Video ISA MDA**. 5620 SAM does not support the Video ISA MDA. If a pre-SAM 7.0R4 release manages a 7750 or 7450 router with configured Video Groups containing ISA-Video group members, then invalid LAG entries will appear in SAM. The LAGs will incorrectly appear in the SAM Equipment tree with LAG IDs greater than 200. Furthermore, if the router has VPLS, IES or VPRN services that have configured video interfaces and associated video interface address(es), then invalid L2/L3 access interfaces and addresses will appear for these services. Attempting to modify or delete these LAGs, access interfaces or addresses via SAM will result in failed deployments. **RETransmission Client and Server**. 5620 SAM does not support the Retransmission Client and Server for Video ISA. **Fast Channel Change Server**. 5620 SAM does not support the Fast Channel Change Server. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LAG Support for HS-MDA**. 5620 SAM does not support LAG's for HS-MDA ports. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **IPv6 PIM ASM**. 5620 SAM does not support IPv6 PIM ASM. **Multicast VPN Evolution with BGP Control Plane**. 5620 SAM does not support Multicast VPN Evolution with BGP Control Plane. **LDP over RSVP without Area-Boundary for IS-IS**. 5620 SAM does not support LDP over RSVP without Area-Boundary for IS-IS. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R8 through R9)
	of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **OAM (Dying Gasp trap)**. 5620 SAM does not support "Dying gasp Trap" for OAM. **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **IGMP Host-Tracking**. 5620 SAM does not support IGMP Host Tracking on IES and VPRN services, including subscriber interfaces. It is also not supported on VPLS service. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R8 through R9)
	Provider Bridge Group Address (802.1ad) MSTP Support. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 18: 7750 SR 7.0 R7

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R7)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R7)
	Time and Volume Based Accounting. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R7)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R7)
	Time and Volume Based Accounting. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R7)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R7)
	Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R7)
	the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R7)
	[572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets.** 5620 SAM does not support ARP on DHCP response

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R7)
	packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6	Network element supported as per 5620 SAM Release Description with the following

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R7)
through R8	limitations: **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R7)
	forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R7)
	path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R7)
	System Timing Reference Selection State. 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R7)
	tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R7)
	SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R7)
	state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Custom Buffer Management for ATM MDA Ports**. 5620 SAM does not support custom buffer management for ATM MDA ports which allows for configuration of the buffer pool size and queue backpressure threshold on ATM ports. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R7)
	Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R7)
	the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **BGP Remove Private Limited.** 5620 SAM does not support the 'limited' option for the remove-private parameter on the Base and VPRN BGP routing instances, groups and neighbors. [576529] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path**

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R7)
	Address. 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Custom Buffer Management for ATM MDA Ports**. 5620 SAM does not support custom buffer management for ATM MDA ports which allows for configuration of the buffer pool size and queue backpressure threshold on ATM ports. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **7750 SR-c12**. 5620 SAM does not support the 7750 SR-c12 prior to 5620 SAM 7.0.R4. Discovery of the router using 5620 SAM 7.0.R1 through R3 will not correctly identify and manage all components requiring the router to be unmanaged. **Local/Zoned AD Insert (ADI) Splicer**. 5620 SAM does not support AD Insert (ADI) Splicer. **WRED-Per-Queue**. 5620 SAM does not support WRED-per-Queue which allows per-queue specific WRED capability on IOM3-XP and IMM cards. **eiBGP Load Balancing**. 5620 SAM does not support eiBGP load balancing for VPRN

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R7)
	services. **LSR IP Load Balancing**. 5620 SAM does not support LSR IP load balancing. **SLA-Profile Based Egress Remarking**. 5620 SAM does not support 'Egress QoS marking from SAP' for Subscriber Management SLA-Profiles. **5-Port 10G Ethernet XFP IMM**. 5620 SAM does not support the 5-Port 10G Ethernet XFP Integrated Media Module (IMM). **ESM on VSM (CCAG Use Origin SAP)**. 5620 SAM does not support ESM on VSM (CCAG Use Origin SAP) functionality for Group Interfaces on IES and VPRN services. **Configurable CFM Thresholds**. 5620 SAM does not support configurable Ethernet CFM Eth-Test and One-Way-Delay thresholds. **PBB Access Dual Homing**. 5620 SAM does not support PBB Access Dual Homing. **G.8031 Protected Ethernet Tunnels**. 5620 SAM does not support G.8031 Protected Ethernet Tunnels. **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA. **1-Port 10G HS (High Scale) MDA**. 5620 SAM does not support the 1-Port 10G HS (High Scale) MDA. **Video ISA MDA**. 5620 SAM does not support the Video ISA MDA. If a pre-SAM 7.0R4 release manages a 7750 or 7450 router with configured Video Groups containing ISA-Video group members, then invalid LAG entries will appear in SAM. The LAGs will incorrectly appear in the SAM Equipment tree with LAG IDs greater than 200. Furthermore, if the router has VPLS, IES or VPRN services that have configured video interfaces and associated video interface address(es), then invalid L2/L3 access interfaces and addresses will appear for these services. Attempting to modify or delete these LAGs, access interfaces or addresses via SAM will result in failed deployments. **RETransmission Client and Server**. 5620 SAM does not support the Retransmission Client and Server for Video ISA. **Fast Channel Change Server**. 5620 SAM does not support the Fast Channel Change Server. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LAG Support for HS-MDA**. 5620 SAM does not support LAG's for HS-MDA ports. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R7)
	Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **IPv6 PIM ASM**. 5620 SAM does not support IPv6 PIM ASM. **Multicast VPN Evolution with BGP Control Plane**. 5620 SAM does not support Multicast VPN Evolution with BGP Control Plane. **LDP over RSVP without Area-Boundary for IS-IS**. 5620 SAM does not support LDP over RSVP without Area-Boundary for IS-IS. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **OAM (Dying Gasp trap**). 5620 SAM does not support "Dying gasp Trap" for OAM. **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **IGMP Host-Tracking**. 5620 SAM does not support IGMP Host Tracking on IES and VPRN services, including subscriber interfaces. It is also not supported on VPLS service. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R7)
	display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 19: 7750 SR 7.0 R6

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R6)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R6)
	ARP on DHCP Response Packets. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R6)
	BGP-AD for LDP-based VPLS Cisco Interop. 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R6)
	which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R6)
	MPLS Static LSP Fast Retry Timer. 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R6)
	SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R6)
	Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R6)
	ARP on DHCP Response Packets. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R6)
	PIM SSM Default Range Disable. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R6)
	RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R6)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup..
5620 SAM 7.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R6)
	characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R6)
	DHCP Server Failover Support. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup..
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R6)
	Static Route LDP Synchronization. 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Custom Buffer Management for ATM MDA Ports**. 5620 SAM does not support custom buffer management for ATM MDA ports which allows for configuration of the buffer pool size and queue backpressure threshold on ATM ports. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R6)
	LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R6)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES / VPRN L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Custom Buffer Management for ATM MDA Ports**. 5620 SAM does not support custom buffer management for ATM MDA ports which allows for configuration of the buffer pool size and queue backpressure threshold on ATM ports. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282]

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R6)
	7750 SR-c12 PBB MAC Name Support. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **7750 SR-c12**. 5620 SAM does not support the 7750 SR-c12 prior to 5620 SAM 7.0.R4. Discovery of the router using 5620 SAM 7.0.R1 through R3 will not correctly identify and manage all components requiring the router to be unmanaged. **Local/Zoned AD Insert (ADI) Splicer**. 5620 SAM does not support AD Insert (ADI) Splicer. **WRED-Per-Queue**. 5620 SAM does not support WRED-per-Queue which allows per-queue specific WRED capability on IOM3-XP and IMM cards. **eiBGP Load Balancing**. 5620 SAM does not support eiBGP load balancing for VPRN services. **LSR IP Load Balancing**. 5620 SAM does not support LSR IP load balancing. **SLA-Profile Based Egress Remarking**. 5620 SAM does not support 'Egress QoS marking from SAP' for Subscriber Management SLA-Profiles. **5-Port 10G Ethernet XFP IMM**. 5620 SAM does not support the 5-Port 10G Ethernet XFP Integrated Media Module (IMM). **ESM on VSM (CCAG Use Origin SAP)**. 5620 SAM does not support ESM on VSM (CCAG Use Origin SAP) functionality for Group Interfaces on IES and VPRN services. **Configurable CFM Thresholds**. 5620 SAM does not support configurable Ethernet CFM Eth-Test and One-Way-Delay thresholds. **PBB Access Dual Homing**. 5620 SAM does not support PBB Access Dual Homing. **G.8031 Protected Ethernet Tunnels**. 5620 SAM does not support G.8031 Protected Ethernet Tunnels. **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA. **1-Port 10G HS (High Scale) MDA**. 5620 SAM does not support the 1-Port 10G HS

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R6)
	(High Scale) MDA. **Video ISA MDA**. 5620 SAM does not support the Video ISA MDA. If a pre-SAM 7.0R4 release manages a 7750 or 7450 router with configured Video Groups containing ISA-Video group members, then invalid LAG entries will appear in SAM. The LAGs will incorrectly appear in the SAM Equipment tree with LAG IDs greater than 200. Furthermore, if the router has VPLS, IES or VPRN services that have configured video interfaces and associated video interface address(es), then invalid L2/L3 access interfaces and addresses will appear for these services. Attempting to modify or delete these LAGs, access interfaces or addresses via SAM will result in failed deployments. **RETransmission Client and Server**. 5620 SAM does not support the Retransmission Client and Server for Video ISA. **Fast Channel Change Server**. 5620 SAM does not support the Fast Channel Change Server. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LAG Support for HS-MDA**. 5620 SAM does not support LAG's for HS-MDA ports. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **IPv6 PIM ASM**. 5620 SAM does not support IPv6 PIM ASM. **Multicast VPN Evolution with BGP Control Plane**. 5620 SAM does not support Multicast VPN Evolution with BGP Control Plane. **LDP over RSVP without Area-Boundary for IS-IS**. 5620 SAM does not support LDP over RSVP without Area-Boundary for IS-IS. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **OAM (Dying Gasp trap**). 5620 SAM does not support "Dying gasp Trap" for OAM. **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **IGMP Host-Tracking**. 5620 SAM does not support IGMP Host Tracking on IES and VPRN services, including subscriber interfaces. It is also not supported on VPLS service. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R6)
	E1 Channel National Bits. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 20: 7750 SR 7.0 R5

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R5)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R5)
	MPLS/RSVP Local Node Maintenance Required Error. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R5)
	ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R5)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R5)
	Routing Policy Statement Entry (from Criteria). 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R5)
	such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R5)
	not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R5)
	Synchronous Ethernet with 10G Ethernet Port in WAN Mode. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R5)
	SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R5)
	OAM SAA IMCP Ping Forwaring Class. 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R5)
	the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Custom Buffer Management for ATM MDA Ports**. 5620 SAM does not support custom buffer management for ATM MDA ports which allows for configuration of the buffer pool size and queue backpressure threshold on ATM ports. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R5)
	router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R5)
	IGMP Snooping Maximum Number of Sources. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Custom Buffer Management for ATM MDA Ports**. 5620 SAM does not support custom buffer management for ATM MDA ports which allows for configuration of the buffer pool size and queue backpressure threshold on ATM ports.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R5)
	Synchronous Ethernet with 10G Ethernet Port in WAN Mode. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **PIM Instant Prune Echo**. 5620 SAM does not support PIM Instant Prune Echo for router and VPRN PIM Interfaces. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **7750 SR-c12 PBB MAC Name Support**. 5620 SAM does not support PBB MAC Name for the 7750 SR-c12. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths, TDM DS3, E3 and DS1 Channel Groups. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **7750 SR-c12**. 5620 SAM does not support the 7750 SR-c12 prior to 5620 SAM 7.0.R4. Discovery of the router using 5620 SAM 7.0.R1 through R3 will not correctly identify and manage all components requiring the router to be unmanaged. **Local/Zoned AD Insert (ADI) Splicer**. 5620 SAM does not support AD Insert (ADI) Splicer. **WRED-Per-Queue**. 5620 SAM does not support WRED-per-Queue which allows per-queue specific WRED capability on IOM3-XP and IMM cards. **eiBGP Load Balancing**. 5620 SAM does not support eiBGP load balancing for VPRN services. **LSR IP Load Balancing**. 5620 SAM does not support LSR IP load balancing. **SLA-Profile Based Egress Remarking**. 5620 SAM does not support 'Egress QoS marking from SAP' for Subscriber Management SLA-Profiles. **5-Port 10G Ethernet XFP IMM**. 5620 SAM does not support the 5-Port 10G Ethernet XFP Integrated Media Module (IMM). **ESM on VSM (CCAG Use Origin SAP)**. 5620 SAM does not support ESM on VSM (CCAG Use Origin SAP) functionality for Group Interfaces on IES and VPRN services. **Configurable CFM Thresholds**. 5620 SAM does not support configurable Ethernet CFM Eth-Test and One-Way-Delay thresholds. **PBB Access Dual Homing**. 5620 SAM does not support PBB Access Dual Homing. **G.8031 Protected Ethernet Tunnels**. 5620 SAM does not support G.8031 Protected Ethernet Tunnels. **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R5)
	Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA. **1-Port 10G HS (High Scale) MDA**. 5620 SAM does not support the 1-Port 10G HS (High Scale) MDA. **Video ISA MDA**. 5620 SAM does not support the Video ISA MDA. If a pre-SAM 7.0R4 release manages a 7750 or 7450 router with configured Video Groups containing ISA-Video group members, then invalid LAG entries will appear in SAM. The LAGs will incorrectly appear in the SAM Equipment tree with LAG IDs greater than 200. Furthermore, if the router has VPLS, IES or VPRN services that have configured video interfaces and associated video interface address(es), then invalid L2/L3 access interfaces and addresses will appear for these services. Attempting to modify or delete these LAGs, access interfaces or addresses via SAM will result in failed deployments. **RETransmission Client and Server**. 5620 SAM does not support the Retransmission Client and Server for Video ISA. **Fast Channel Change Server**. 5620 SAM does not support the Fast Channel Change Server. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LAG Support for HS-MDA**. 5620 SAM does not support LAG's for HS-MDA ports. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **IPv6 PIM ASM**. 5620 SAM does not support IPv6 PIM ASM. **Multicast VPN Evolution with BGP Control Plane**. 5620 SAM does not support Multicast VPN Evolution with BGP Control Plane. **LDP over RSVP without Area-Boundary for IS-IS**. 5620 SAM does not support LDP over RSVP without Area-Boundary for IS-IS. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **OAM (Dying Gasp trap**). 5620 SAM does not support "Dying gasp Trap" for OAM. **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R5)
	not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **IGMP Host-Tracking**. 5620 SAM does not support IGMP Host Tracking on IES and VPRN services, including subscriber interfaces. It is also not supported on VPLS service. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R5)
	tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 21: 7750 SR 7.0 R4

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R4)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R4)
	support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R4)
	Routing Policy Statement Entry (from Criteria). 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R4)
	such as start and completion of a recover action after system startup.
5620 SAM 7.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R4)
	failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R4)
	Time and Volume Based Accounting. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MPLS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R4)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **7750 SR-c12**. 5620 SAM does not support the 7750 SR-c12 prior to 5620 SAM 7.0.R4. Discovery of the router using 5620 SAM 7.0.R1 through R3 will not correctly identify and manage all components requiring the router to be unmanaged. **Local/Zoned AD Insert (ADI) Splicer**. 5620 SAM does not support AD Insert (ADI) Splicer. **WRED-Per-Queue**. 5620 SAM does not support WRED-per-Queue which allows per-queue specific WRED capability on IOM3-XP and IMM cards. **eiBGP Load Balancing**. 5620 SAM does not support eiBGP load balancing for VPRN services. **LSR IP Load Balancing**. 5620 SAM does not support LSR IP load balancing. **SLA-Profile Based Egress Remarking**. 5620 SAM does not support 'Egress QoS marking from SAP' for Subscriber Management SLA-Profiles. **5-Port 10G Ethernet XFP IMM**. 5620 SAM does not support the 5-Port 10G Ethernet XFP Integrated Media Module (IMM). **ESM on VSM (CCAG Use Origin SAP)**. 5620 SAM does not support ESM on VSM (CCAG Use Origin SAP) functionality for Group Interfaces on IES and VPRN services. **Configurable CFM Thresholds**. 5620 SAM does not support configurable Ethernet CFM Eth-Test and One-Way-Delay thresholds. **PBB Access Dual Homing**. 5620 SAM does not support PBB Access Dual Homing. **G.8031 Protected Ethernet Tunnels**. 5620 SAM does not support G.8031 Protected Ethernet Tunnels. **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **MMRP IMPM Override**. 5620 SAM does not support MMRP override for Ingress Multicast Path Management. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA. **1-Port 10G HS (High Scale) MDA**. 5620 SAM does not support the 1-Port 10G HS (High Scale) MDA. **Video ISA MDA**. 5620 SAM does not support the Video ISA MDA. If a pre-SAM 7.0R4 release manages a 7750 or 7450 router with configured Video Groups containing ISA-Video group members, then invalid LAG entries will appear in SAM. The LAGs will incorrectly appear in the SAM Equipment tree with LAG IDs greater than 200.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R4)
	Furthermore, if the router has VPLS, IES or VPRN services that have configured video interfaces and associated video interface address(es), then invalid L2/L3 access interfaces and addresses will appear for these services. Attempting to modify or delete these LAGs, access interfaces or addresses via SAM will result in failed deployments. **RETransmission Client and Server**. 5620 SAM does not support the Retransmission Client and Server for Video ISA. **Fast Channel Change Server**. 5620 SAM does not support the Fast Channel Change Server. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LAG Support for HS-MDA**. 5620 SAM does not support LAG's for HS-MDA ports. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **IPv6 PIM ASM**. 5620 SAM does not support IPv6 PIM ASM. **Multicast VPN Evolution with BGP Control Plane**. 5620 SAM does not support Multicast VPN Evolution with BGP Control Plane. **LDP over RSVP without Area-Boundary for IS-IS**. 5620 SAM does not support LDP over RSVP without Area-Boundary for IS-IS. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **OAM (Dying Gasp trap**). 5620 SAM does not support "Dying gasp Trap" for OAM. **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **IGMP Host-Tracking**. 5620 SAM does not support IGMP Host Tracking on IES and VPRN services, including subscriber interfaces. It is also not supported on VPLS service. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R4)
	SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 22: 7750 SR 7.0 R3

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R3)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R3)
	802.3ah OAM Loop Cleared Notification. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R3)
	PIP STP Inside Same MST Region. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R3)
	Time and Volume Based Accounting. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R3)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA. **1-Port 10G HS (High Scale) MDA**. 5620 SAM does not support the 1-Port 10G HS (High Scale) MDA. **Video ISA MDA**. 5620 SAM does not support the Video ISA MDA. **RETransmission Client and Server**. 5620 SAM does not support the Retransmission Client and Server for Video ISA. **Fast Channel Change Server**. 5620 SAM does not support the Fast Channel Change Server. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LAG Support for HS-MDA**. 5620 SAM does not support LAG's for HS-MDA ports. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **Multicast over RSVP, P2MP, and LSP**. 5620 SAM does not support Multicast over RSVP, P2MP, and LSP. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **IPv6 PIM ASM**. 5620 SAM does not support IPv6 PIM ASM. **Multicast VPN Evolution with BGP Control Plane**. 5620 SAM does not support Multicast VPN Evolution with BGP Control Plane. **LDP over RSVP without Area-Boundary for IS-IS**. 5620 SAM does not support LDP over RSVP without Area-Boundary for IS-IS. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **OAM (Dying Gasp trap**). 5620 SAM does not support "Dying gasp Trap" for OAM. **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **IGMP Host-Tracking**. 5620 SAM does not support IGMP Host Tracking on IES and VPRN services, including subscriber interfaces. It is also not supported on VPLS service.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R3)
	ARP on DHCP Response Packets. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set"

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R3)
	Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms.** 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 23: 7750 SR 7.0 R1 through R2

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R1 through R2)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1	Network element supported as per 5620 SAM Release Description with the following

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R1 through R2)
through R8	limitations: **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R1 through R2)
	Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs.

5620 SAM Release	Compatibility Statement (7750 SR 7.0 R1 through R2)
	Active ISA Changed Trap for ISA IPSec Groups. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Alcatel-Lucent 7750 Service Router Release 6.1

Table 24: 7750 SR 6.1 R18 through R19

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [596583] **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [596583] **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088]

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	Increased Channel Description Lengths. 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [596583] **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282]

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	ICMP-VSE. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	Provider Bridge Group Address (802.1ad) MSTP Support. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [596583] **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282]

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	tmnxSyncFailureReason. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad).

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [596583] **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282]

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	tmnxSyncFailureReason. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad).

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [596583] **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549]

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	OAM SAA IMCP Ping Forwaring Class. 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [596583] **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	[572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [596583] **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [596583] **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	MSDP Peer Authentication Key Length. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [596583] **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527]

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	Increased Channel Description Lengths. 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	Active ISA Changed Trap for ISA IPSec Groups. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad).

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [596583] **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	[572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [596583] **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MAF and CPM Filter MAC Criteria**. 5620 SAM does not support Management Access Filter (MAF) and CPM Filter MAC criteria. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R18 through R19)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override.** 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm.** 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms.** 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 25: 7750 SR 6.1 R17

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
	MPLS/RSVP Local Node Maintenance Required Error. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
	state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad).

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
	ARP On DHCP Response Packets. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
	support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
	characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
	for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
	access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087]

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
	Power Supply Type "Default". 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
	algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089]

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
	Manufacturing Part Number. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
	packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
	such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance,

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
	BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
	discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
	untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
through R5	**Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
	packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
	SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
	for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
	using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support ‘tmnxDSXClockSyncStateChange’ trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
	Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
	PPP Initial delay. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
	Active ISA Changed Trap for ISA IPSec Groups. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MAF and CPM Filter MAC Criteria**. 5620 SAM does not support Management Access Filter (MAF) and CPM Filter MAC criteria. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R17)
	and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 26: 7750 SR 6.1 R15 through R16

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R15 through R16)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R15 through R16)
	DHCP Server Failover Support. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R15 through R16)
	256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R15 through R16)
through R4	**System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R15 through R16)
	MPLS/RSVP Local Node Maintenance Required Error. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable.** 5620 SAM does not support SSM Default Range

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R15 through R16)
	Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R15 through R16)
	Blackhole Ingress Switch Fabric Multicast Path Type. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282]

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R15 through R16)
	tmnxSyncFailureReason. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad).

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R15 through R16)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R15 through R16)
	ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R15 through R16)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R15 through R16)
	LDP Label Withdrawal Delay. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set"

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R15 through R16)
	Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R15 through R16)
	packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad).

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R15 through R16)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R15 through R16)
	Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support ‘tmnxDSXClockSyncStateChange’ trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R15 through R16)
	failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R15 through R16)
	DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R15 through R16)
	Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R15 through R16)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R15 through R16)
	LDP Label Withdrawal Delay. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R15 through R16)
	path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R15 through R16)
5620 SAM 6.1 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R15 through R16)
	RADIUS Server Access Algorithm. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MAF and CPM Filter MAC Criteria**. 5620 SAM does not support Management Access Filter (MAF) and CPM Filter MAC criteria. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support ‘tmnxDSXClockSyncStateChange’ trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R15 through R16)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 27: 7750 SR 6.1 R14

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R14)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R14)
	DHCP Server Failover Support. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R14)
	256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R14)
through R4	**Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R14)
	path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549]

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R14)
	OAM SAA IMCP Ping Forwaring Class. 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R14)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R14)
	Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R14)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R14)
	RADIUS Server Access Algorithm. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R14)
	for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R14)
	Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R14)
	for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R14)
	Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R14)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R14)
	Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support ‘tmnxDSXClockSyncStateChange’ trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R14)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R14)
	PPP Initial delay. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R14)
	Active ISA Changed Trap for ISA IPSec Groups. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R14)
	OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R14)
	PIM ECMP Optional Threshold Usage. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R14)
	Management PPPoE Policies. **MAF and CPM Filter MAC Criteria**. 5620 SAM does not support Management Access Filter (MAF) and CPM Filter MAC criteria. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R14)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms.** 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 28: 7750 SR 6.1 R13

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R13)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R13)
	SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R13)
	LDP Label Withdrawal Delay. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set”

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R13)
	Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R13)
	256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R13)
5620 SAM 7.0 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R13)
	IGMP Snooping Maximum Number of Sources. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R13)
through R5	limitations: **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R13)
	the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R13)
	[572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R13)
	untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R13)
	configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R13)
	changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R13)
	Ethernet Port Hold Timer. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R13)
	which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R13)
	Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup..
5620 SAM 6.1 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R13)
	Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R13)
	SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R13)
	Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R13)
	Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MAF and CPM Filter MAC Criteria**. 5620 SAM does not support Management Access Filter (MAF) and CPM Filter MAC criteria. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R13)
	support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 29: 7750 SR 6.1 R12

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R12)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R12)
	Blackhole Ingress Switch Fabric Multicast Path Type. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R12)
	Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549]

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R12)
	OAM SAA IMCP Ping Forwaring Class. 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R12)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R12)
	access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R12)
	Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R12)
	failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R12)
	[559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R12)
	Provider Bridge Group Address (802.1ad) MSTP Support. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R12)
	access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R12)
	PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R12)
	packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R12)
	SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R12)
	configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R12)
	the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R12)
	Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R12)
	E1 Channel National Bits. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MAF and CPM Filter MAC Criteria**. 5620 SAM does not support Management Access Filter (MAF) and CPM Filter MAC criteria. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R12)
	Blackhole Ingress Switch Fabric Multicast Path Type. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 30: 7750 SR 6.1 R11

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R11)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R11)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R11)
	support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R11)
	characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R11)
	OAM SAA IMCP Ping Forwaring Class. 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R11)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R11)
	Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R11)
	PIM Group Administrative Bandwidth. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support ‘tmnxDSXClockSyncStateChange’ trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R11)
	CES L2 Interface Jitter Buffer Current Packet Depth. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R11)
	LDP Label Withdrawal Delay. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support ‘tmnxDSXClockSyncStateChange’ trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R11)
	display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R11)
	Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R11)
	Untagged RNCV Support for MC-Ring QinQ SAP. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1	Network element supported as per 5620 SAM Release Description with the following

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R11)
through R2	limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R11)
	the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MAF and CPM Filter MAC Criteria**. 5620 SAM does not support Management Access Filter (MAF) and CPM Filter MAC criteria. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R11)
	(PTS 550484) Subscriber Management SLA Profile Queue Override. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm.** 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms.** 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 31: 7750 SR 6.1 R10

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R10)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R10)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R10)
	support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R10)
	IGMP Snooping Maximum Number of Sources. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R10)
	PIM ECMP Optional Threshold Usage. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R10)
	SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R10)
	MSDP Peer Authentication Key Length. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support ‘tmnxDSXClockSyncStateChange’ trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R10)
	Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R10)
	access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R10)
	and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R10)
	Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R10)
	SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R10)
	LDP Label Withdrawal Delay. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MAF and CPM Filter MAC Criteria**. 5620 SAM does not support Management Access

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R10)
	Filter (MAF) and CPM Filter MAC criteria. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R10)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 32: 7750 SR 6.1 R9

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R9)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad).

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R9)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R9)
	the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R9)
	support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R9)
	E1 Channel National Bits. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup..

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R9)
5620 SAM 6.1 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support ‘tmnxDSXClockSyncStateChange’ trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R9)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490]

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R9)
	ARP On DHCP Response Packets. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support ‘tmnxDSXClockSyncStateChange’ trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R9)
	SNMP Trap Target Replay. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R9)
	RADIUS Server Access Algorithm. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support ‘tmnxDSXClockSyncStateChange’ trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R9)
	DHCP Server Failover Support. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R9)
	BGP Minimum Route Advertisement. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MAF and CPM Filter MAC Criteria**. 5620 SAM does not support Management Access Filter (MAF) and CPM Filter MAC criteria.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R9)
	MPLS/RSVP Local Node Maintenance Required Error. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R9)
	support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 33: 7750 SR 6.1 R7 through R8

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R7 through R8)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R7 through R8)
	tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R7 through R8)
	support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R7 through R8)
	802.3ah OAM Loop Cleared Notification. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R7 through R8)
	CES L2 Interface Jitter Buffer Current Packet Depth. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R7 through R8)
	Active ISA Changed Trap for ISA IPSec Groups. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R7 through R8)
	synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R7 through R8)
	untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R7 through R8)
5620 SAM 6.1 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R7 through R8)
	CES DS1/E1 Clock State Change Trap. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R7 through R8)
	256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MAF and CPM Filter MAC Criteria**. 5620 SAM does not support Management Access Filter (MAF) and CPM Filter MAC criteria. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support ‘tmnxDSXClockSyncStateChange’ trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R7 through R8)
	CES L2 Interface Jitter Buffer Current Packet Depth. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 34: 7750 SR 6.1 R6

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R6)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1	Network element supported as per 5620 SAM Release Description with the following

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R6)
through R8	limitations: **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R6)
	Active ISA Changed Trap for ISA IPSec Groups. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R6)
	PIP STP Inside Same MST Region. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R6)
	Active ISA Changed Trap for ISA IPSec Groups. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R6)
	synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R6)
	failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R6)
	IGMP Snooping Maximum Number of Sources. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support ‘tmnxDSXClockSyncStateChange’ trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R6)
	IOM Card FIB and FIB Next-Hop Statistics. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Active ISA Changed Trap for ISA IPSec Groups**. 5620 SAM does not support the Active ISA Changed trap (tmnxIPsecIsaGrpActiveIsaChgd) for ISA IPSec Groups. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R6)
	XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MAF and CPM Filter MAC Criteria**. 5620 SAM does not support Management Access Filter (MAF) and CPM Filter MAC criteria. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad).

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R6)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 35: 7750 SR 6.1 R5

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R5)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R5)
	the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R5)
	the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R5)
	support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R5)
	and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R5)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R5)
	XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R5)
	synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MAF and CPM Filter MAC Criteria**. 5620 SAM does not support Management Access Filter (MAF) and CPM Filter MAC criteria. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R5)
	failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 36: 7750 SR 6.1 R4

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R4)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R4)
	failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **MPLS/RSVP Local Node Maintenance Required Error.** 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels.** 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support.** 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay.** 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type.** 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification.** 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support.** 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer.** 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R4)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm.** 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms.** 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R4)
5620 SAM 6.1 R3 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R4)
	not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **MAF and CPM Filter MAC Criteria**. 5620 SAM does not support Management Access Filter (MAF) and CPM Filter MAC criteria. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R4)
	support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 37: 7750 SR 6.1 R3

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R3)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R3)
	OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1	Network element supported as per 5620 SAM Release Description with the following

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R3)
through R8	limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 38: 7750 SR 6.1 R1 through R2

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R1 through R2)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R1 through R2)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address.

5620 SAM Release	Compatibility Statement (7750 SR 6.1 R1 through R2)
	Routed Subscriber Host. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Alcatel-Lucent 7750 Service Router Release 6.0

Table 39: 7750 SR 6.0 R18 through R19

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when “send via control plane” is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
	Routed Subscriber Host. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
	SNMP Trap Target Replay. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
	advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
	for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [584359] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
	OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [584359] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
	MSDP Peer Authentication Key Length. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 592021) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [592021] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card ‘Last Bootup Reason’: powerCycle, clearCard, activitySwitch,

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
	configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [584359] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when “send via control plane” is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
	PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 592021) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [592021] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [584359] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
	Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1	Network element supported as per 5620 SAM Release Description with the following

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
through R3	limitations: **(PTS 592021) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [592021] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [584359] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
	CES L2 Interface Jitter Buffer Current Packet Depth. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 592021) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [592021] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [584359] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
	Admin State Rules for Bundle Protection Group. 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation.** 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason.** 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth.** 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage.** 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay.** 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement.** 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control.** 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length.** 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm.** 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region.** 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap.** 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth.** 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels.** 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay.** 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer.** 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type.** 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
	RADIUS Disconnect-Request Statistics. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 592021) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [592021] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [584359] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
	support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
	support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 592021) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [592021] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [584359] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361]

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
	(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address. 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
	changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag ‘Out of Resource’**. 5620 SAM does not support the operational flag ‘Out of Resource’ for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
	profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 592021) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [592021] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [584359] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
	BGP Minimum Route Advertisement. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
	BGP Purge Timer. 5620 SAM does not support BGP Purge Timer. **DHCP Server Operational State**. 5620 SAM does not support DHCP Server operational state. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 592021) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [592021] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [584359] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
	access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
	Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 592021) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [592021] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card ‘Last Bootup Reason’: powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [584359] **System Timing Reference Selection State.** 5620 SAM does not support the selection

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
	state for system timing references. [584361] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
	CES DS1/E1 Clock State Change Trap. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R18 through R19)
	MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 40: 7750 SR 6.0 R17

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R17)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when “send via control plane” is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R17)
	Provider Bridge Group Address (802.1ad) MSTP Support. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R17)
	SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R17)
	[559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch,

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R17)
	configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [584359] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R17)
	BGP Minimum Route Advertisement. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R17)
5620 SAM 6.1 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [584359] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R17)
	CES L2 Interface Jitter Buffer Current Packet Depth. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [584359] **System Timing Reference Selection State.** 5620 SAM does not support the selection

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R17)
	state for system timing references. [584361] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R17)
	which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R17)
through R8	**IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [584359] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R17)
	daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R17)
	Provider Bridge Group Address (802.1ad) MSTP Support. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [584359] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R17)
	LDP Label Withdrawal Delay. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R17)
	Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **DHCP Server Operational State**. 5620 SAM does not support DHCP Server operational state. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set"

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R17)
	Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [584359] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R17)
	support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R17)
	IEEE 802.1ah Provider Backbone Bridges. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [584359] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R17)
	discriminator defined. [572549] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R17)
	support RSVP overhead refresh reduction over bypass tunnels. **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R17)
