	not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 41: 7750 SR 6.0 R16

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R16)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when “send via control plane” is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R16)
	Provider Bridge Group Address (802.1ad) MSTP Support. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R16)
	SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R16)
	ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R16)
	Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R16)
	synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R16)
	support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R16)
	PIM Group Administrative Bandwidth. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R16)
	synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R16)
	changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R16)
	Admin State Rules for Bundle Protection Group. 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation.** 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason.** 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth.** 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage.** 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay.** 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement.** 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control.** 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length.** 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm.** 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure.** 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces.** 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm.** 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances.** 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region.** 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap.** 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R16)
	changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R16)
	configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R16)
	CES L2 Interface Jitter Buffer Current Packet Depth. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag ‘Out of Resource’**. 5620 SAM does not support the operational flag ‘Out of Resource’ for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R16)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R16)
	characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **DHCP Server Operational State**. 5620 SAM does not support DHCP Server operational state. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R16)
	IOM Card FIB and FIB Next-Hop Statistics. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R16)
	(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address. 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R16)
	changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R16)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R16)
	access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R16)
	Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 42: 7750 SR 6.0 R15

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R15)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad).

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R15)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R15)
	802.3ah OAM Loop Cleared Notification. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R15)
	PIP STP Inside Same MST Region. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R15)
	advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R15)
	support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when “send via control plane” is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad).

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R15)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R15)
	display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R15)
	Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R15)
	BGP Purge Timer. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490]

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R15)
	OAM CPE-Ping Probe Interval With Send Control. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R15)
	RADIUS Disconnect-Request Statistics. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R15)
5620 SAM 6.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R15)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **DHCP Server Operational State**. 5620 SAM does not support DHCP Server operational state. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag ‘Out of Resource’**. 5620 SAM does not support the operational flag ‘Out of Resource’ for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R15)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R15)
	interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP,

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R15)
	UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R15)
	MSDP Peer Authentication Key Length. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R15)
	support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools).** 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group.** 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC.** 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges.** 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support.** 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support.** 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces.** 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile.** 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces.** 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer.** 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm.** 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override.** 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm.** 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes.** 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms.** 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs.** 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 43: 7750 SR 6.0 R14

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R14)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad).

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R14)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R14)
	802.3ah OAM Loop Cleared Notification. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R14)
	SNMP Trap Target Replay. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R14)
	[559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup..
5620 SAM 6.1 R4	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R14)
through R8	**PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R14)
	Routed Subscriber Host. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R14)
	SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R14)
	Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R14)
	'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R14)
	TACACS+/RADIUS Template User Profile. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R14)
	SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **DHCP Server Operational State**. 5620 SAM does not support DHCP Server operational state. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R14)
	Routed Subscriber Host. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R14)
	advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R14)
	Routed Subscriber Host. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R14)
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R14)
	Application Assurance. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R14)
	Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 44: 7750 SR 6.0 R13

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R13)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R13)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R13)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R13)
	support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R13)
	OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R13)
	support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R13)
	MSDP Peer Authentication Key Length. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R13)
	Routed Subscriber Host. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R13)
	5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP,

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R13)
	UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R13)
	access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **DHCP Server Operational State**. 5620 SAM does not support DHCP Server operational state. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R13)
	BGP Auto Discovery. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R13)
	BGP Minimum Route Advertisement. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R13)
	PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R13)
	subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R13)
	CES DS1/E1 Clock State Change Trap. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R13)
	MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 45: 7750 SR 6.0 R12

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R12)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R12)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R12)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R12)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R12)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R12)
	Blackhole Ingress Switch Fabric Multicast Path Type. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R12)
	support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R12)
	synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R12)
	display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag ‘Out of Resource’**. 5620 SAM does not support the operational flag ‘Out of Resource’ for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R12)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R12)
	the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **DHCP Server Operational State**. 5620 SAM does not support DHCP Server operational state. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R12)
	Provider Bridge Group Address (802.1ad) MSTP Support. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R12)
	P-chip Memory Parity Error Alarm. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R12)
	Provider Bridge Group Address (802.1ad) MSTP Support. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when “send via control plane” is enabled. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R12)
	(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R12)
	Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 46: 7750 SR 6.0 R11

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R11)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R11)
	MSDP Peer Authentication Key Length. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R11)
	PIP STP Inside Same MST Region. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R11)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R11)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R11)
	support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R11)
	synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R11)
	Ingress/Egress P-chip Error Rate Threshold. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R11)
	Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R11)
	SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **DHCP Server Operational State**. 5620 SAM does not support DHCP Server operational state. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R11)
	synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R11)
	display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R11)
	synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R11)
	support RSVP overhead refresh reduction over bypass tunnels. **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R11)
	not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 47: 7750 SR 6.0 R10

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R10)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R10)
	SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad).

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R10)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set"

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R10)
	Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R10)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R10)
	Provider Bridge Group Address (802.1ad) MSTP Support. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R10)
	Transmit XPL Data Error Rate Threshold. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R10)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **DHCP Server Operational State**. 5620 SAM does not support DHCP Server operational state. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R10)
	RADIUS Disconnect-Request Statistics. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R10)
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R10)
	VLL CAC. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R10)
	PIP STP Inside Same MST Region. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R10)
	profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 48: 7750 SR 6.0 R9

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R9)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R9)
	SNMP Trap Target Replay. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R9)
	the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad).

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R9)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R9)
	CES DS1/E1 Clock State Change Trap. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R9)
	changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag ‘Out of Resource’**. 5620 SAM does not support the operational flag ‘Out of Resource’ for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R9)
	profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **DHCP Server Operational State**. 5620 SAM does not support DHCP Server operational state. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R9)
	Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R9)
	limitations: **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R9)
	IP-MTU Support for IES/VPRN Redundant Interfaces. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R9)
	support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools).** 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group.** 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC.** 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges.** 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support.** 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support.** 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces.** 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile.** 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces.** 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer.** 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm.** 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override.** 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm.** 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes.** 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms.** 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs.** 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 49: 7750 SR 6.0 R7 through R8

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R7 through R8)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 568296) MIB Entry Policy for CEM SAP Statistics**: 5620 SAM does not support MIB Entry Policy for CEM Statistics. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 568296) MIB Entry Policy for CEM SAP Statistics**: 5620 SAM does not support MIB Entry Policy for CEM Statistics.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R7 through R8)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 568296) MIB Entry Policy for CEM SAP Statistics**: 5620 SAM does not support MIB Entry Policy for CEM Statistics. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R7 through R8)
	BGP Purge Timer. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R7 through R8)
	Routed Subscriber Host. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R7 through R8)
	Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R7 through R8)
	Provider Bridge Group Address (802.1ad) MSTP Support. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **DHCP Server Operational State**. 5620 SAM does not support DHCP Server operational state. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R7 through R8)
	Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R7 through R8)
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R7 through R8)
	MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R7 through R8)
	VLL CAC. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 50: 7750 SR 6.0 R6

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R6)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 568296) MIB Entry Policy for CEM SAP Statistics**: 5620 SAM does not support MIB Entry Policy for CEM Statistics. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 568296) MIB Entry Policy for CEM SAP Statistics**: 5620 SAM does not support MIB Entry Policy for CEM Statistics.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R6)
	SNMP Trap Target Replay. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 568296) MIB Entry Policy for CEM SAP Statistics**: 5620 SAM does not support MIB Entry Policy for CEM Statistics. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R6)
	the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R6)
	support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R6)
	support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag ‘Out of Resource’**. 5620 SAM does not support the operational flag ‘Out of Resource’ for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R6)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **DHCP Server Operational State**. 5620 SAM does not support DHCP Server operational state. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R6)
	Routed Subscriber Host. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R6)
	OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R6)
	subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R6)
	synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override.** 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm.** 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes.** 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms.** 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs.** 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 51: 7750 SR 6.0 R5

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R5)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 568296) MIB Entry Policy for CEM SAP Statistics**: 5620 SAM does not support MIB Entry Policy for CEM Statistics. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 568296) MIB Entry Policy for CEM SAP Statistics**: 5620 SAM does not support MIB Entry Policy for CEM Statistics.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R5)
	SNMP Trap Target Replay. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 568296) MIB Entry Policy for CEM SAP Statistics**: 5620 SAM does not support MIB Entry Policy for CEM Statistics. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R5)
	the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R5)
	support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R5)
	support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag ‘Out of Resource’**. 5620 SAM does not support the operational flag ‘Out of Resource’ for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R5)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **DHCP Server Operational State**. 5620 SAM does not support DHCP Server operational state. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R5)
	Routed Subscriber Host. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R5)
	OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R5)
	subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R5)
	synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override.** 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm.** 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes.** 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms.** 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs.** 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 52: 7750 SR 6.0 R4

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R4)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 568296) MIB Entry Policy for CEM SAP Statistics**: 5620 SAM does not support MIB Entry Policy for CEM Statistics. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 568296) MIB Entry Policy for CEM SAP Statistics**: 5620 SAM does not support MIB Entry Policy for CEM Statistics. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set”

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R4)
	Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 568296) MIB Entry Policy for CEM SAP Statistics**: 5620 SAM does not support MIB Entry Policy for CEM Statistics. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R4)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R3 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Service Tunnel Binding Operational Flag ‘Out of Resource’**. 5620 SAM does not support the operational flag ‘Out of Resource’ for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R4)
	Provider Bridge Group Address (802.1ad) MSTP Support. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R4)
	Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R4)
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Application Assurance**. 5620 SAM does not support Application Assurance and the Application Assurance Integrated Services Adapter (AA-ISA). **BGP Auto Discovery**. 5620 SAM does not support BGP Auto Discovery (BGP AD). **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Routed Subscriber Host**. 5620 SAM does not support Routed Subscriber Host. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R4)
	(PTS 550484) Subscriber Management SLA Profile Queue Override. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm.** 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes.** 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms.** 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs.** 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 53: 7750 SR 6.0 R3

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R3)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 568296) MIB Entry Policy for CEM SAP Statistics**: 5620 SAM does not support MIB Entry Policy for CEM Statistics. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 568296) MIB Entry Policy for CEM SAP Statistics**: 5620 SAM does not support MIB Entry Policy for CEM Statistics. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 568296) MIB Entry Policy for CEM SAP Statistics**: 5620 SAM does not support MIB Entry Policy for CEM Statistics. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R3)
	support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set"

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R3)
	Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R3 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools).

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R3)
	Secondary LSP Path Shared Risk Loss Group. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Dynamic Port Buffer Allocation (Named Pools)**. 5620 SAM does not support Dynamic Port Buffer Allocation (Named Pools). **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC.

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R3)
	IEEE 802.1ah Provider Backbone Bridges. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 54: 7750 SR 6.0 R2

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R2)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 568296) MIB Entry Policy for CEM SAP Statistics**: 5620 SAM does not support MIB Entry Policy for CEM Statistics. **(PTS 535281) 5620 SAM NE-Schedulable/NE-Persistent STM Test Removal**. Upon a full re-synchronization, 7750/7450/7710 6.0 R2 routers may not provide MIB entries on a NE Schedulable or NE Persistent STM test, which may result in 5620 SAM removing tests. Recommendation: Perform manual tests by using regular OAM tests invoked from 5620 SAM. 6.0 R3, and later versions of the router resolve the problem as per the Resolved Issues section of the 7750 SR /7450 ESS /7710 SR 6.0.R3 Software Release Notes. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 568296) MIB Entry Policy for CEM SAP Statistics**: 5620 SAM does not support MIB Entry Policy for CEM Statistics. **(PTS 535281) 5620 SAM NE-Schedulable/NE-Persistent STM Test Removal**. Upon a full re-synchronization, 7750/7450/7710 6.0 R2 routers may not provide MIB entries on a NE Schedulable or NE Persistent STM test, which may result in 5620 SAM removing tests. Recommendation: Perform manual tests by using regular OAM tests invoked from 5620 SAM. 6.0 R3, and later versions of the router resolve the problem as per the Resolved Issues section of the 7750 SR /7450 ESS /7710 SR 6.0.R3 Software Release Notes. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 568296) MIB Entry Policy for CEM SAP Statistics**: 5620 SAM does not support MIB Entry Policy for CEM Statistics. **(PTS 535281) 5620 SAM NE-Schedulable/NE-Persistent STM Test Removal**. Upon a full re-synchronization, 7750/7450/7710 6.0 R2 routers may not provide MIB entries on a NE Schedulable or NE Persistent STM test, which may result in 5620 SAM removing tests. Recommendation: Perform manual tests by using regular OAM tests

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R2)
	invoked from 5620 SAM. 6.0 R3, and later versions of the router resolve the problem as per the Resolved Issues section of the 7750 SR /7450 ESS /7710 SR 6.0.R3 Software Release Notes. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 535281) 5620 SAM NE-Schedulable/NE-Persistent STM Test Removal**. Upon a full re-synchronization, 7750/7450/7710 6.0 R2 routers may not provide MIB entries on a NE Schedulable or NE Persistent STM test, which may result in 5620 SAM removing tests. Recommendation: Perform manual tests by using regular OAM tests invoked from 5620 SAM. 6.0 R3, and later versions of the router resolve the problem as per the Resolved Issues section of the 7750 SR /7450 ESS /7710 SR 6.0.R3 Software Release Notes. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 535281) 5620 SAM NE-Schedulable/NE-Persistent STM Test Removal**. Upon a full re-synchronization, 7750/7450/7710 6.0 R2 routers may not provide MIB entries on a NE Schedulable or NE Persistent STM test, which may result in 5620 SAM removing tests. Recommendation: Perform manual tests by using regular OAM tests invoked from 5620 SAM. 6.0 R3, and later versions of the router resolve the problem as per the Resolved Issues section of the 7750 SR /7450 ESS /7710 SR 6.0.R3 Software Release Notes. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R2 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 535281) 5620 SAM NE-Schedulable/NE-Persistent STM Test Removal**. Upon a full re-synchronization, 7750/7450/7710 6.0 R2 routers may not provide MIB entries

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R2)
	on a NE Schedulable or NE Persistent STM test, which may result in 5620 SAM removing tests. Recommendation: Perform manual tests by using regular OAM tests invoked from 5620 SAM. 6.0 R3, and later versions of the router resolve the problem as per the Resolved Issues section of the 7750 SR /7450 ESS /7710 SR 6.0.R3 Software Release Notes. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 535281) 5620 SAM NE-Schedulable/NE-Persistent STM Test Removal**. Upon a full re-synchronization, 7750/7450/7710 6.0 R2 routers may not provide MIB entries on a NE Schedulable or NE Persistent STM test, which may result in 5620 SAM removing tests. Recommendation: Perform manual tests by using regular OAM tests invoked from 5620 SAM. 6.0 R3, and later versions of the router resolve the problem as per the Resolved Issues section of the 7750 SR /7450 ESS /7710 SR 6.0.R3 Software Release Notes. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 55: 7750 SR 6.0 R1

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R1)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 568296) MIB Entry Policy for CEM SAP Statistics**: 5620 SAM does not support MIB Entry Policy for CEM Statistics. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 568296) MIB Entry Policy for CEM SAP Statistics**: 5620 SAM does not support MIB Entry Policy for CEM Statistics. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 568296) MIB Entry Policy for CEM SAP Statistics**: 5620 SAM does not support MIB Entry Policy for CEM Statistics. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1	Network element supported as per 5620 SAM Release Description with the following

5620 SAM Release	Compatibility Statement (7750 SR 6.0 R1)
through R8	limitations: **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R2 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Alcatel-Lucent 7750 Service Router Release 5.0

Table 56: 7750 SR 5.0 R23 through R25

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R23 through R25)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy ‘User Name Format’**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User Name Format’ under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R23 through R25)
	ATM QoS Policy CLP Tagging. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy ‘User Name Format’**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User Name Format’ under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R23 through R25)
	MPLS Instance Down Reason. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R23 through R25)
	Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R23 through R25)
	parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy ‘User Name Format’**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User Name Format’ under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R23 through R25)
	such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R1 through R6	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R23 through R25)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R23 through R25)
	algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode ‘lspFlowControlled (23)’ reason for LSP Path and LSP Crossconnect failure. **Service Tunnel ‘Labels Exhausted’ State Cause**. 5620 SAM does not support the operational state cause “Label Manager has run out of labels” for Service Tunnels. **Subscriber Authentication Policy ‘User Name Format’**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R23 through R25)
	Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R23 through R25)
	parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode ‘lspFlowControlled (23)’ reason for LSP Path and LSP Crossconnect failure. **Service Tunnel ‘Labels Exhausted’ State Cause**. 5620 SAM does not support the operational state cause “Label Manager has run out of labels” for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User Name Format’ under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R23 through R25)
	(E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R23 through R25)
	daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R23 through R25)
	Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R23 through R25)
	Increased Description Field Lengths. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.
5620 SAM 5.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R23 through R25)
	required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R23 through R25)
	support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **Port-based Egress Scheduling Policies**. 5620 SAM does not support Port-based Egress Scheduling Policies. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **Multicast CAC Extended Support for LAGs**. 5620 SAM does not support Multicast CAC extended support for LAGs. **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R23 through R25)
	MSDP Statistics Enhancements. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.
5620 SAM 5.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R23 through R25)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R23 through R25)
	support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **Port-based Egress Scheduling Policies**. 5620 SAM does not support Port-based Egress Scheduling Policies. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **Multicast CAC Extended Support for LAGs**. 5620 SAM does not support Multicast CAC extended support for LAGs. **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.

Table 57: 7750 SR 5.0 R22

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R22)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R22)
	specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R22)
	specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy ‘User Name Format’**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User Name Format’ under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R22)
	Inclusion/Suppression of DN bit for VPRN OSPF Instance. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R22)
	VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R1 through R6	Network element supported as per 5620 SAM Release Description with the following limitations: **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R22)
	Ingress/Egress P-chip Error Rate Threshold. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R22)
	subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39).

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R22)
	Flow Controlled MPLS/LSP Failure State. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R22)
	Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode ‘lspFlowControlled (23)’ reason for LSP Path and LSP Crossconnect failure. **Service Tunnel ‘Labels Exhausted’ State Cause**. 5620 SAM does not support the operational state cause “Label Manager has run out of labels” for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User Name Format’ under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R22)
	GigE Daughtercard Field Replacement Alarms. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R22)
	LAG Port Add Failure Cleared Notification. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R22)
	support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R22)
	of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.
5620 SAM 5.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39).

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R22)
	Flow Controlled MPLS/LSP Failure State. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R22)
	Manual Bypass Tunnels. 5620 SAM does not support Manual Bypass Tunnels. **Port-based Egress Scheduling Policies**. 5620 SAM does not support Port-based Egress Scheduling Policies. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **Multicast CAC Extended Support for LAGs**. 5620 SAM does not support Multicast CAC extended support for LAGs. **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.
5620 SAM 5.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R22)
	P-chip Memory Parity Error Alarm. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode ‘lspFlowControlled (23)’ reason for LSP Path and LSP Crossconnect failure. **Service Tunnel ‘Labels Exhausted’ State Cause**. 5620 SAM does not support the operational state cause “Label Manager has run out of labels” for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User Name Format’ under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R22)
	Ingress VLAN Swapping. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **Port-based Egress Scheduling Policies**. 5620 SAM does not support Port-based Egress Scheduling Policies. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **Multicast CAC Extended Support for LAGs**. 5620 SAM does not support Multicast

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R22)
	CAC extended support for LAGs. **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.

Table 58: 7750 SR 5.0 R21

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R21)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R21)
5620 SAM 6.1 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R21)
5620 SAM 6.1 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy ‘User Name Format’**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User Name Format’ under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R21)
	support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy ‘User Name Format’**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User Name Format’ under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R21)
	MPLS Instance Down Reason. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R1 through R6	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R21)
	Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R21)
	XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R21)
	Inclusion/Suppression of DN bit for VPRN OSPF Instance. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R21)
	flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R21)
	subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode ‘lspFlowControlled (23)’ reason for LSP Path and LSP Crossconnect failure.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R21)
	Service Tunnel 'Labels Exhausted' State Cause. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R21)
	LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.
5620 SAM 5.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R21)
	addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R21)
	ATM QoS Policy CLP Tagging. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **Port-based Egress Scheduling Policies**. 5620 SAM does not support Port-based Egress Scheduling Policies. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **Multicast CAC Extended Support for LAGs**. 5620 SAM does not support Multicast CAC extended support for LAGs. **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R21)
	ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.
5620 SAM 5.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R21)
	test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R21)
	Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **Port-based Egress Scheduling Policies**. 5620 SAM does not support Port-based Egress Scheduling Policies. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **Multicast CAC Extended Support for LAGs**. 5620 SAM does not support Multicast CAC extended support for LAGs. **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.

Table 59: 7750 SR 5.0 R16 through R20

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R16 through R20)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R16 through R20)
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R16 through R20)
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R16 through R20)
	DHCP Relay Subscriber Identification using Option 82 VSOs. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode ‘lspFlowControlled (23)’ reason for LSP Path and LSP Crossconnect failure. **Service Tunnel ‘Labels Exhausted’ State Cause**. 5620 SAM does not support the operational state cause “Label Manager has run out of labels” for Service Tunnels. **Subscriber Authentication Policy ‘User Name Format’**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User Name Format’ under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R16 through R20)
	bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R16 through R20)
	Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R16 through R20)
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R16 through R20)
	compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R16 through R20)
	router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.
5620 SAM 5.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode ‘lspFlowControlled (23)’ reason for LSP Path and LSP Crossconnect failure. **Service Tunnel ‘Labels Exhausted’ State Cause**. 5620 SAM does not support the

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R16 through R20)
	operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **Port-based Egress Scheduling Policies**. 5620 SAM does not support Port-based Egress Scheduling Policies.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R16 through R20)
	LAG Hold Up Timer. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **Multicast CAC Extended Support for LAGs**. 5620 SAM does not support Multicast CAC extended support for LAGs. **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.
5620 SAM 5.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R16 through R20)
	SRRP Instance Master and Backup Traps. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R16 through R20)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **Port-based Egress Scheduling Policies**. 5620 SAM does not support Port-based Egress Scheduling Policies. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **Multicast CAC Extended Support for LAGs**. 5620 SAM does not support Multicast CAC extended support for LAGs. **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R16 through R20)
	Account configuration. **MSDP Statistics Enhancements.** 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.

Table 60: 7750 SR 5.0 R15

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R15)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R15)
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R15)
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R15)
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R15)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode ‘lspFlowControlled (23)’ reason for LSP Path and LSP Crossconnect failure. **Service Tunnel ‘Labels Exhausted’ State Cause**. 5620 SAM does not support the operational state cause “Label Manager has run out of labels” for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User Name Format’ under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R15)
	bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set"

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R15)
	Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R15)
	support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.
5620 SAM 5.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R15)
	flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R15)
	OAM Forwarding Class Specification. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **Port-based Egress Scheduling Policies**. 5620 SAM does not support Port-based Egress Scheduling Policies. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **Multicast CAC Extended Support for LAGs**. 5620 SAM does not support Multicast CAC extended support for LAGs. **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R15)
	statistics.
5620 SAM 5.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R15)
	Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **Port-based Egress Scheduling Policies**. 5620 SAM does not support Port-based Egress Scheduling Policies. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **Multicast CAC Extended Support for LAGs**. 5620 SAM does not support Multicast CAC extended support for LAGs. **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R15)
	Increased Description Field Lengths. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.

Table 61: 7750 SR 5.0 R14

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R14)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R14)
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R14)
through R8	limitations: **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R14)
	Redundant Interface IP MTU. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R14)
	DHCP Relay Subscriber Identification using Option 82 VSOs. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R14)
	Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode ‘lspFlowControlled (23)’ reason for LSP Path and LSP Crossconnect failure. **Service Tunnel ‘Labels Exhausted’ State Cause**. 5620 SAM does not support the operational state cause “Label Manager has run out of labels” for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R14)
	Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R14)
	Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.
5620 SAM 5.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode ‘lspFlowControlled (23)’ reason for LSP Path and LSP Crossconnect failure. **Service Tunnel ‘Labels Exhausted’ State Cause**. 5620 SAM does not support the operational state cause “Label Manager has run out of labels” for Service Tunnels.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R14)
	Subscriber Authentication Policy User Name Format. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **Port-based Egress Scheduling Policies**. 5620 SAM does not support Port-based Egress Scheduling Policies. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R14)
	LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **Multicast CAC Extended Support for LAGs**. 5620 SAM does not support Multicast CAC extended support for LAGs. **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.
5620 SAM 5.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set”

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R14)
	Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R14)
	subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **Port-based Egress Scheduling Policies**. 5620 SAM does not support Port-based Egress Scheduling Policies. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **Multicast CAC Extended Support for LAGs**. 5620 SAM does not support Multicast CAC extended support for LAGs. **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.

Table 62: 7750 SR 5.0 R13

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R13)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R13)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R13)
	Ingress VLAN Translation. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode ‘lspFlowControlled (23)’ reason for LSP Path and LSP Crossconnect failure.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R13)
	Service Tunnel 'Labels Exhausted' State Cause. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R13)
	OAM Test Octet Size Range Changes. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R13)
	tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R13)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.
5620 SAM 5.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R13)
	tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R13)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **Port-based Egress Scheduling Policies**. 5620 SAM does not support Port-based Egress Scheduling Policies. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **Multicast CAC Extended Support for LAGs**. 5620 SAM does not support Multicast CAC extended support for LAGs. **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R13)
	Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.
5620 SAM 5.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R13)
	service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **Port-based Egress Scheduling Policies**. 5620 SAM does not support Port-based Egress Scheduling Policies. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **Multicast CAC Extended Support for LAGs**. 5620 SAM does not support Multicast CAC extended support for LAGs. **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R13)
	LACP Tunneling. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.

Table 63: 7750 SR 5.0 R12

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R12)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R12)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R12)
	Ingress VLAN Translation. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode ‘lspFlowControlled (23)’ reason for LSP Path and LSP Crossconnect failure. **Service Tunnel ‘Labels Exhausted’ State Cause**. 5620 SAM does not support the operational state cause “Label Manager has run out of labels” for Service Tunnels.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R12)
	Subscriber Authentication Policy 'User Name Format'. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R12)
	Service Tunnel 'Labels Exhausted' State Cause. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R12)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP).

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R12)
	DHCP Relay Subscriber Identification using Option 82 VSOs. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.
5620 SAM 5.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R12)
	test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R12)
	Class-based Forwarding over RSVP LSPs. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **Port-based Egress Scheduling Policies**. 5620 SAM does not support Port-based Egress Scheduling Policies. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **Multicast CAC Extended Support for LAGs**. 5620 SAM does not support Multicast CAC extended support for LAGs. **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.
5620 SAM 5.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R12)
	flow-label" (value -1) for CPM Filter IPv6 entries. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP).

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R12)
	DHCP Relay Subscriber Identification using Option 82 VSOs. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **Port-based Egress Scheduling Policies**. 5620 SAM does not support Port-based Egress Scheduling Policies. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **Multicast CAC Extended Support for LAGs**. 5620 SAM does not support Multicast CAC extended support for LAGs. **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.

Table 64: 7750 SR 5.0 R11

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R11)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R11)
	OAM Test Octet Size Range Changes. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R11)
	MPLS Instance Down Reason. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R11)
	Inclusion/Suppression of DN bit for VPRN OSPF Instance. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode ‘lspFlowControlled (23)’ reason for LSP Path and LSP Crossconnect failure. **Service Tunnel ‘Labels Exhausted’ State Cause**. 5620 SAM does not support the operational state cause “Label Manager has run out of labels” for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User Name Format’ under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support “port speed not compatible”, “port duplex not compatible” and “port ingress rate not compatible” alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R11)
	Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode ‘lspFlowControlled (23)’ reason for LSP Path and LSP Crossconnect failure. **Service Tunnel ‘Labels Exhausted’ State Cause**. 5620 SAM does not support the operational state cause “Label Manager has run out of labels” for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User Name Format’ under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support “port speed not compatible”, “port duplex not compatible” and “port ingress rate not compatible” alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R11)
	MD5 Authentication of RSVP Interface. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R11)
	description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.
5620 SAM 5.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R11)
	policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **Port-based Egress Scheduling Policies**. 5620 SAM does not support Port-based Egress Scheduling Policies. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **Multicast CAC Extended Support for LAGs**. 5620 SAM does not support Multicast CAC extended support for LAGs. **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R11)
	ACL IPv6 Filters on F-Pipe L2 Interfaces. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.
5620 SAM 5.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R11)
	Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **Port-based Egress Scheduling Policies**. 5620 SAM does not support Port-based Egress Scheduling Policies. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **Multicast CAC Extended Support for LAGs**. 5620 SAM does not support Multicast CAC extended support for LAGs. **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R11)
	RADIUS Template User Account. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements.** 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.

Table 65: 7750 SR 5.0 R10

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R10)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R10)
	Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R10)
	policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R10)
	specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R10)
	DHCP Relay Subscriber Identification using Option 82 VSOs. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R10)
	such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.
5620 SAM 5.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39).

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R10)
	Flow Controlled MPLS/LSP Failure State. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R10)
	Manual Bypass Tunnels. 5620 SAM does not support Manual Bypass Tunnels. **Port-based Egress Scheduling Policies**. 5620 SAM does not support Port-based Egress Scheduling Policies. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **Multicast CAC Extended Support for LAGs**. 5620 SAM does not support Multicast CAC extended support for LAGs. **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.
5620 SAM 5.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R10)
	Service Tunnel 'Labels Exhausted' State Cause. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy User Name Format**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **Port-based Egress Scheduling Policies**. 5620 SAM does not support Port-based Egress Scheduling Policies.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R10)
	LAG Hold Up Timer. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **Multicast CAC Extended Support for LAGs**. 5620 SAM does not support Multicast CAC extended support for LAGs. **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.

Table 66: 7750 SR 5.0 R8 through R9

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R8 through R9)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R8 through R9)
	MPLS Instance Down Reason. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R8 through R9)
	ACL IPv6 Filters on F-Pipe L2 Interfaces. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R8 through R9)
	GigE Daughtercard Field Replacement Alarms. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R8 through R9)
	policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R8 through R9)
5620 SAM 5.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **Port-based Egress Scheduling Policies**. 5620 SAM does not support Port-based

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R8 through R9)
	Egress Scheduling Policies. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **Multicast CAC Extended Support for LAGs**. 5620 SAM does not support Multicast CAC extended support for LAGs. **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.
5620 SAM 5.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Ingress VLAN Translation**. 5620 SAM does not support Ingress VLAN Translation for VLL (E-PIPE) and VPLS on Dot1Q encapsulated L2 Interfaces and Service Tunnel bindings. **Ingress VLAN Swapping**. 5620 SAM does not support Ingress VLAN Swapping for VLL (E-PIPE) and VPLS on QinQ encapsulated L2 Interfaces and Service Tunnel bindings. **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R8 through R9)
	Daughtercard Field Replacements. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **Port-based Egress Scheduling Policies**. 5620 SAM does not support Port-based Egress Scheduling Policies. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **Multicast CAC Extended Support for LAGs**. 5620 SAM does not support Multicast CAC extended support for LAGs. **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR).

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R8 through R9)
	Network Queue Policy CIR/PIR Adaptation Rules. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.

Table 67: 7750 SR 5.0 R5 through R7

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R5 through R7)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R5 through R7)
	OAM Forwarding Class Specification. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R5 through R7)
	support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support “port speed not compatible”, “port duplex not compatible” and “port ingress rate not compatible” alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R3	Network element supported as per 5620 SAM Release Description with the following

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R5 through R7)
through R4	limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R5 through R7)
	Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.
5620 SAM 5.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support “port speed not compatible”, “port duplex not compatible” and “port ingress rate not compatible” alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R5 through R7)
	specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **Port-based Egress Scheduling Policies**. 5620 SAM does not support Port-based Egress Scheduling Policies. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **Multicast CAC Extended Support for LAGs**. 5620 SAM does not support Multicast CAC extended support for LAGs. **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R5 through R7)
5620 SAM 5.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **Port-based Egress Scheduling Policies**. 5620 SAM does not support Port-based Egress Scheduling Policies. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R5 through R7)
	Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **Multicast CAC Extended Support for LAGs**. 5620 SAM does not support Multicast CAC extended support for LAGs. **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.

Table 68: 7750 SR 5.0 R4

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R4)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R5 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R4)
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.
5620 SAM 5.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R4)
	test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **Port-based Egress Scheduling Policies**. 5620 SAM does not support Port-based Egress Scheduling Policies. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **Multicast CAC Extended Support for LAGs**. 5620 SAM does not support Multicast CAC extended support for LAGs. **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R4)
	statistics.
5620 SAM 5.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **Port-based Egress Scheduling Policies**. 5620 SAM does not support Port-based Egress Scheduling Policies. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **Multicast CAC Extended Support for LAGs**. 5620 SAM does not support Multicast CAC extended support for LAGs. **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R4)
	LACP Tunneling. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.

Table 69: 7750 SR 5.0 R3

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R3)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R3)
	RADIUS Template User Account. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.
5620 SAM 5.0 R2 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R3)
	Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.
5620 SAM 5.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration. **MSDP Statistics Enhancements**. 5620 SAM does not support collection of MSDP source address rejection statistics or peer received unknown and reserved message statistics.

Table 70: 7750 SR 5.0 R1 through R2

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R1 through R2)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). (DTS 59339) **Bundle Protection Groups.** 5620 SAM management of routers that have Bundle Protection Groups configured can result in router instability. This issue is resolved in 7750 Release 5.0 R3. **(PTS 518180) 7750 SR router upgrade to Release 5.0 R1 or R2.** A 7750 Router's configuration may be altered after upgrading from 7750 Release 3.0 or 4.0 to 7750 Release 5.0 R1 or R2 if TDM interfaces are installed. Before attempting to upgrade a 7750 to Release 5.0 R1 or R2 with TDM interfaces, Alcatel-Lucent support should be contacted. This issue is resolved in 7750 Release 5.0 R3.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). (DTS 59339) **Bundle Protection Groups.** 5620 SAM management of routers that have Bundle Protection Groups configured can result in router instability. This issue is resolved in 7750 Release 5.0 R3. **(PTS 518180) 7750 SR router upgrade to Release 5.0 R1 or R2.** A 7750 Router's configuration may be altered after upgrading from 7750 Release 3.0 or 4.0 to 7750 Release 5.0 R1 or R2 if TDM interfaces are installed. Before attempting to upgrade a 7750 to Release 5.0 R1 or R2 with TDM interfaces, Alcatel-Lucent support should be contacted. This issue is resolved in 7750 Release 5.0 R3.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). (DTS 59339) **Bundle Protection Groups.** 5620 SAM management of routers that have Bundle Protection Groups configured can result in router instability. This issue is resolved in 7750 Release 5.0 R3. **(PTS 518180) 7750 SR router upgrade to Release 5.0 R1 or R2.** A 7750 Router's configuration may be altered after upgrading from 7750 Release 3.0 or 4.0 to 7750 Release 5.0 R1 or R2 if TDM interfaces are installed. Before attempting to upgrade a

5620 SAM Release	Compatibility Statement (7750 SR 5.0 R1 through R2)
	7750 to Release 5.0 R1 or R2 with TDM interfaces, Alcatel-Lucent support should be contacted. This issue is resolved in 7750 Release 5.0 R3.
5620 SAM 5.0 R2 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). (DTS 59339) **Bundle Protection Groups.** 5620 SAM management of routers that have Bundle Protection Groups configured can result in router instability. This issue is resolved in 7750 Release 5.0 R3. **(PTS 518180) 7750 SR router upgrade to Release 5.0 R1 or R2.** A 7750 Router's configuration may be altered after upgrading from 7750 Release 3.0 or 4.0 to 7750 Release 5.0 R1 or R2 if TDM interfaces are installed. Before attempting to upgrade a 7750 to Release 5.0 R1 or R2 with TDM interfaces, Alcatel-Lucent support should be contacted. This issue is resolved in 7750 Release 5.0 R3.
5620 SAM 5.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). (DTS 59339) **Bundle Protection Groups.** 5620 SAM management of routers that have Bundle Protection Groups configured can result in router instability. This issue is resolved in 7750 Release 5.0 R3. **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **(PTS 518180) 7750 SR router upgrade to Release 5.0 R1 or R2.** A 7750 Router's configuration may be altered after upgrading from 7750 Release 3.0 or 4.0 to 7750 Release 5.0 R1 or R2 if TDM interfaces are installed. Before attempting to upgrade a 7750 to Release 5.0 R1 or R2 with TDM interfaces, Alcatel-Lucent support should be contacted. This issue is resolved in 7750 Release 5.0 R3.

Alcatel-Lucent 7750 Service Router Release 4.0

Table 71: 7750 SR 4.0 R21

5620 SAM Release	Compatibility Statement (7750 SR 4.0 R21)
5620 SAM 7.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **High-Bandwidth IP Multicast MDA**. 5620 SAM does not support high-bandwidth IP multicast configuration for MDAs. **TACACS+ Template User Account**. 5620 SAM does not support TACACS+ template user account configuration. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding. **MVPLS Enhancements for Managed VLAN lists**. 5620 SAM does not support configuration of the default-sap parameter for managed-vlan-lists under M-VPLS services. In addition, 5620 SAM does not support the value '0' within a managed-vlan-list range.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **High-Bandwidth IP Multicast MDA**. 5620 SAM does not support high-bandwidth IP multicast configuration for MDAs.

5620 SAM Release	Compatibility Statement (7750 SR 4.0 R21)
	TACACS+ Template User Account. 5620 SAM does not support TACACS+ template user account configuration. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding. **MVPLS Enhancements for Managed VLAN lists**. 5620 SAM does not support configuration of the default-sap parameter for managed-vlan-lists under M-VPLS services. In addition, 5620 SAM does not support the value '0' within a managed-vlan-list range.
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **High-Bandwidth IP Multicast MDA**. 5620 SAM does not support high-bandwidth IP multicast configuration for MDAs. **TACACS+ Template User Account**. 5620 SAM does not support TACACS+ template user account configuration. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding. **MVPLS Enhancements for Managed VLAN lists**. 5620 SAM does not support configuration of the default-sap parameter for managed-vlan-lists under M-VPLS services. In addition, 5620 SAM does not support the value '0' within a managed-vlan-list range.
5620 SAM 5.0 R2 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA

5620 SAM Release	Compatibility Statement (7750 SR 4.0 R21)
	Profile. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **High-Bandwidth IP Multicast MDA**. 5620 SAM does not support high-bandwidth IP multicast configuration for MDAs. **TACACS+ Template User Account**. 5620 SAM does not support TACACS+ template user account configuration. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding. **MVPLS Enhancements for Managed VLAN lists**. 5620 SAM does not support configuration of the default-sap parameter for managed-vlan-lists under M-VPLS services. In addition, 5620 SAM does not support the value '0' within a managed-vlan-list range.
5620 SAM 5.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **High-Bandwidth IP Multicast MDA**. 5620 SAM does not support high-bandwidth IP multicast configuration for MDAs. **TACACS+ Template User Account**. 5620 SAM does not support TACACS+ template user account configuration. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.

5620 SAM Release	Compatibility Statement (7750 SR 4.0 R21)
	BGP Peer Tracking. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding. **MVPLS Enhancements for Managed VLAN lists**. 5620 SAM does not support configuration of the default-sap parameter for managed-vlan-lists under M-VPLS services. In addition, 5620 SAM does not support the value '0' within a managed-vlan-list range.
5620 SAM 4.0 R2 through R12	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **High-Bandwidth IP Multicast MDA**. 5620 SAM does not support high-bandwidth IP multicast configuration for MDAs. **TACACS+ Template User Account**. 5620 SAM does not support TACACS+ template user account configuration. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding. **MVPLS Enhancements for Managed VLAN lists**. 5620 SAM does not support configuration of the default-sap parameter for managed-vlan-lists under M-VPLS services. In addition, 5620 SAM does not support the value '0' within a managed-vlan-list range.
5620 SAM 4.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE

5620 SAM Release	Compatibility Statement (7750 SR 4.0 R21)
	Daughtercard Field Replacements. **High-Bandwidth IP Multicast MDA**. 5620 SAM does not support high-bandwidth IP multicast configuration for MDAs. **TACACS+ Template User Account**. 5620 SAM does not support TACACS+ template user account configuration. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **MVPLS Enhancements for Managed VLAN lists**. 5620 SAM does not support configuration of the default-sap parameter for managed-vlan-lists under M-VPLS services. In addition, 5620 SAM does not support the value '0' within a managed-vlan-list range. **(PTS 505742) ISSU and "Configuration File Change" Synchronization Mode**. Performing an In-Service Software Update (ISSU) with Redundant Synchronization Mode set to "Configuration File Change" will not perform a CPM switchover after software download completes. The user must change the Redundant Synchronization Mode to "Boot Environment Change" in order to successfully complete an In-Service Software Update. **(PTS 504885) ACL IPv6 Filter Entry Creation.** 5620 SAM does not support creation of ACL IPv6 filter entries via the ACL IPv6 Filter Policy Manager. The ACL IPv6 filter entry can be created via the 5620 SAM Script Manager using the following example script: configure filter ipv6-filter $ipv6FilterNum$ entry $ipv6FilterEntryNum$ create Where $ipv6FilterNum$ is a variable representing the ACL IPv6 filter policy number, and $ipv6FilterEntryNum$ is a variable representing the ACL IPv6 filter entry number to be created. Modification of existing ACL IPv6 filter entries is fully supported. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding. **(PTS 505396) Dynamic Updates For Residential Subscribers.** Subscriber Management MIB improvements prevent 5620 SAM from properly handing changes to residential subscribers when initiated from the network element. Full resynchronization of the network element is required to capture current Residential Subscriber information.

Table 72: 7750 SR 4.0 R14 through R20

5620 SAM Release	Compatibility Statement (7750 SR 4.0 R14 through R20)
5620 SAM 7.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **High-Bandwidth IP Multicast MDA**. 5620 SAM does not support high-bandwidth IP multicast configuration for MDAs. **TACACS+ Template User Account**. 5620 SAM does not support TACACS+ template user account configuration. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding. **MVPLS Enhancements for Managed VLAN lists**. 5620 SAM does not support configuration of the default-sap parameter for managed-vlan-lists under M-VPLS services. In addition, 5620 SAM does not support the value ‘0’ within a managed-vlan-list range.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **High-Bandwidth IP Multicast MDA**. 5620 SAM does not support high-bandwidth IP multicast configuration for MDAs. **TACACS+ Template User Account**. 5620 SAM does not support TACACS+ template user account configuration. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking.

5620 SAM Release	Compatibility Statement (7750 SR 4.0 R14 through R20)
	VRRP Standby Forwarding. 5620 SAM does not support VRRP Standby Forwarding. **MVPLS Enhancements for Managed VLAN lists**. 5620 SAM does not support configuration of the default-sap parameter for managed-vlan-lists under M-VPLS services. In addition, 5620 SAM does not support the value '0' within a managed-vlan-list range.
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **High-Bandwidth IP Multicast MDA**. 5620 SAM does not support high-bandwidth IP multicast configuration for MDAs. **TACACS+ Template User Account**. 5620 SAM does not support TACACS+ template user account configuration. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding. **MVPLS Enhancements for Managed VLAN lists**. 5620 SAM does not support configuration of the default-sap parameter for managed-vlan-lists under M-VPLS services. In addition, 5620 SAM does not support the value '0' within a managed-vlan-list range.
5620 SAM 5.0 R2 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **High-Bandwidth IP Multicast MDA**. 5620 SAM does not support high-bandwidth IP multicast configuration for MDAs. **TACACS+ Template User Account**. 5620 SAM does not support TACACS+ template user account configuration. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES

5620 SAM Release	Compatibility Statement (7750 SR 4.0 R14 through R20)
	and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding. **MVPLS Enhancements for Managed VLAN lists**. 5620 SAM does not support configuration of the default-sap parameter for managed-vlan-lists under M-VPLS services. In addition, 5620 SAM does not support the value '0' within a managed-vlan-list range.
5620 SAM 5.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **High-Bandwidth IP Multicast MDA**. 5620 SAM does not support high-bandwidth IP multicast configuration for MDAs. **TACACS+ Template User Account**. 5620 SAM does not support TACACS+ template user account configuration. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding. **MVPLS Enhancements for Managed VLAN lists**. 5620 SAM does not support configuration of the default-sap parameter for managed-vlan-lists under M-VPLS services. In addition, 5620 SAM does not support the value '0' within a managed-vlan-list range.
5620 SAM 4.0 R2 through R12	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements.

5620 SAM Release	Compatibility Statement (7750 SR 4.0 R14 through R20)
	High-Bandwidth IP Multicast MDA. 5620 SAM does not support high-bandwidth IP multicast configuration for MDAs. **TACACS+ Template User Account**. 5620 SAM does not support TACACS+ template user account configuration. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding. **MVPLS Enhancements for Managed VLAN lists**. 5620 SAM does not support configuration of the default-sap parameter for managed-vlan-lists under M-VPLS services. In addition, 5620 SAM does not support the value '0' within a managed-vlan-list range.
5620 SAM 4.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **High-Bandwidth IP Multicast MDA**. 5620 SAM does not support high-bandwidth IP multicast configuration for MDAs. **TACACS+ Template User Account**. 5620 SAM does not support TACACS+ template user account configuration. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **MVPLS Enhancements for Managed VLAN lists**. 5620 SAM does not support configuration of the default-sap parameter for managed-vlan-lists under M-VPLS services. In addition, 5620 SAM does not support the value '0' within a managed-vlan-list range. **(PTS 505742) ISSU and "Configuration File Change" Synchronization Mode**. The user must change the Redundant Synchronization Mode to "Boot Environment Change" in order to successfully complete an In-Service Software Update. **(PTS 504885) ACL IPv6 Filter Entry Creation.** 5620 SAM does not support creation of ACL IPv6 filter entries via the ACL IPv6 Filter Policy Manager. The ACL IPv6 filter

5620 SAM Release	Compatibility Statement (7750 SR 4.0 R14 through R20)
	entry can be created via the 5620 SAM Script Manager using the following example script: configure filter ipv6-filter $ipv6FilterNum$ entry $ipv6FilterEntryNum$ create Where $ipv6FilterNum$ is a variable representing the ACL IPv6 filter policy number, and $ipv6FilterEntryNum$ is a variable representing the ACL IPv6 filter entry number to be created. Modification of existing ACL IPv6 filter entries is fully supported. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding. **(PTS 505396) Dynamic Updates For Residential Subscribers.** Subscriber Management MIB improvements prevent 5620 SAM from properly handing changes to residential subscribers when initiated from the network element. Full resynchronization of the network element is required to capture current Residential Subscriber information.

Table 73: 7750 SR 4.0 R7 through R13

5620 SAM Release	Compatibility Statement (7750 SR 4.0 R7 through R13)
5620 SAM 7.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **High-Bandwidth IP Multicast MDA**. 5620 SAM does not support high-bandwidth IP multicast configuration for MDAs. **TACACS+ Template User Account**. 5620 SAM does not support TACACS+ template user account configuration. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding. **MVPLS Enhancements for Managed VLAN lists**. 5620 SAM does not support configuration of the default-sap parameter for managed-vlan-lists under M-VPLS services. In addition, 5620 SAM does not support the value ‘0’ within a managed-vlan-list range.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **High-Bandwidth IP Multicast MDA**. 5620 SAM does not support high-bandwidth IP multicast configuration for MDAs. **TACACS+ Template User Account**. 5620 SAM does not support TACACS+ template user account configuration. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking.

5620 SAM Release	Compatibility Statement (7750 SR 4.0 R7 through R13)
	VRRP Standby Forwarding. 5620 SAM does not support VRRP Standby Forwarding. **MVPLS Enhancements for Managed VLAN lists**. 5620 SAM does not support configuration of the default-sap parameter for managed-vlan-lists under M-VPLS services. In addition, 5620 SAM does not support the value '0' within a managed-vlan-list range.
5620 SAM 5.0 R2 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **High-Bandwidth IP Multicast MDA**. 5620 SAM does not support high-bandwidth IP multicast configuration for MDAs. **TACACS+ Template User Account**. 5620 SAM does not support TACACS+ template user account configuration. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding. **MVPLS Enhancements for Managed VLAN lists**. 5620 SAM does not support configuration of the default-sap parameter for managed-vlan-lists under M-VPLS services. In addition, 5620 SAM does not support the value '0' within a managed-vlan-list range.
5620 SAM 5.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **High-Bandwidth IP Multicast MDA**. 5620 SAM does not support high-bandwidth IP multicast configuration for MDAs. **TACACS+ Template User Account**. 5620 SAM does not support TACACS+ template user account configuration. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.

5620 SAM Release	Compatibility Statement (7750 SR 4.0 R7 through R13)
	BGP Peer Tracking. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding. **MVPLS Enhancements for Managed VLAN lists**. 5620 SAM does not support configuration of the default-sap parameter for managed-vlan-lists under M-VPLS services. In addition, 5620 SAM does not support the value '0' within a managed-vlan-list range.
5620 SAM 4.0 R2 through R12	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **High-Bandwidth IP Multicast MDA**. 5620 SAM does not support high-bandwidth IP multicast configuration for MDAs. **TACACS+ Template User Account**. 5620 SAM does not support TACACS+ template user account configuration. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding. **MVPLS Enhancements for Managed VLAN lists**. 5620 SAM does not support configuration of the default-sap parameter for managed-vlan-lists under M-VPLS services. In addition, 5620 SAM does not support the value '0' within a managed-vlan-list range.
5620 SAM 4.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **High-Bandwidth IP Multicast MDA**. 5620 SAM does not support high-bandwidth IP multicast configuration for MDAs. **TACACS+ Template User Account**. 5620 SAM does not support TACACS+ template user account configuration.

5620 SAM Release	Compatibility Statement (7750 SR 4.0 R7 through R13)
	IES / VPRN Interface IP MTU. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **MVPLS Enhancements for Managed VLAN lists**. 5620 SAM does not support configuration of the default-sap parameter for managed-vlan-lists under M-VPLS services. In addition, 5620 SAM does not support the value '0' within a managed-vlan-list range. **(PTS 505742) ISSU and "Configuration File Change" Synchronization Mode**. Performing an In-Service Software Update (ISSU) with Redundant Synchronization Mode set to "Configuration File Change" will not perform a CPM switchover after software download completes. The user must change the Redundant Synchronization Mode to "Boot Environment Change" in order to successfully complete an In-Service Software Update. **(PTS 504885) ACL IPv6 Filter Entry Creation.** 5620 SAM does not support creation of ACL IPv6 filter entries via the ACL IPv6 Filter Policy Manager. The ACL IPv6 filter entry can be created via the 5620 SAM Script Manager using the following example script: configure filter ipv6-filter $ipv6FilterNum$ entry $ipv6FilterEntryNum$ create Where $ipv6FilterNum$ is a variable representing the ACL IPv6 filter policy number, and $ipv6FilterEntryNum$ is a variable representing the ACL IPv6 filter entry number to be created. Modification of existing ACL IPv6 filter entries is fully supported. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding. **(PTS 505396) Dynamic Updates For Residential Subscribers.** Subscriber Management MIB improvements prevent 5620 SAM from properly handing changes to residential subscribers when initiated from the network element. Full resynchronization of the network element is required to capture current Residential Subscriber information.

Table 74: 7750 SR 4.0 R5 through R6

5620 SAM Release	Compatibility Statement (7750 SR 4.0 R5 through R6)
5620 SAM 7.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding. **MVPLS Enhancements for Managed VLAN lists**. 5620 SAM does not support configuration of the default-sap parameter for managed-vlan-lists under M-VPLS services. In addition, 5620 SAM does not support the value '0' within a managed-vlan-list range.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding. **MVPLS Enhancements for Managed VLAN lists**. 5620 SAM does not support configuration of the default-sap parameter for managed-vlan-lists under M-VPLS services. In addition, 5620 SAM does not support the value '0' within a managed-vlan-list range.
5620 SAM 5.0 R1 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM

5620 SAM Release	Compatibility Statement (7750 SR 4.0 R5 through R6)
	test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding. **MVPLS Enhancements for Managed VLAN lists**. 5620 SAM does not support configuration of the default-sap parameter for managed-vlan-lists under M-VPLS services. In addition, 5620 SAM does not support the value '0' within a managed-vlan-list range.
5620 SAM 4.0 R2 through R12	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding. **MVPLS Enhancements for Managed VLAN lists**. 5620 SAM does not support configuration of the default-sap parameter for managed-vlan-lists under M-VPLS services. In addition, 5620 SAM does not support the value '0' within a managed-vlan-list range.
5620 SAM 4.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **MVPLS Enhancements for Managed VLAN lists**. 5620 SAM does not support configuration of the default-sap parameter for managed-vlan-lists under M-VPLS services. In addition, 5620 SAM does not support the value '0' within a managed-vlan-list range.

5620 SAM Release	Compatibility Statement (7750 SR 4.0 R5 through R6)
	(PTS 505742) ISSU and "Configuration File Change" Synchronization Mode. Performing an In-Service Software Update (ISSU) with Redundant Synchronization Mode set to "Configuration File Change" will not perform a CPM switchover after software download completes. The user must change the Redundant Synchronization Mode to "Boot Environment Change" in order to successfully complete an In-Service Software Update. **(PTS 504885) ACL IPv6 Filter Entry Creation.** 5620 SAM does not support creation of ACL IPv6 filter entries via the ACL IPv6 Filter Policy Manager. The ACL IPv6 filter entry can be created via the 5620 SAM Script Manager using the following example script: configure filter ipv6-filter $ipv6FilterNum$ entry $ipv6FilterEntryNum$ create Where $ipv6FilterNum$ is a variable representing the ACL IPv6 filter policy number, and $ipv6FilterEntryNum$ is a variable representing the ACL IPv6 filter entry number to be created. Modification of existing ACL IPv6 filter entries is fully supported. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding. **(PTS 505396) Dynamic Updates For Residential Subscribers.** Subscriber Management MIB improvements prevent 5620 SAM from properly handing changes to residential subscribers when initiated from the network element. Full resynchronization of the network element is required to capture current Residential Subscriber information.

Table 75: 7750 SR 4.0 R4

5620 SAM Release	Compatibility Statement (7750 SR 4.0 R4)
5620 SAM 7.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding.
5620 SAM 5.0 R1 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking.

5620 SAM Release	Compatibility Statement (7750 SR 4.0 R4)
	VRRP Standby Forwarding. 5620 SAM does not support VRRP Standby Forwarding.
5620 SAM 4.0 R2 through R12	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding.
5620 SAM 4.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **(PTS 505742) ISSU and "Configuration File Change" Synchronization Mode**. Performing an In-Service Software Update (ISSU) with Redundant Synchronization Mode set to "Configuration File Change" will not perform a CPM switchover after software download completes. The user must change the Redundant Synchronization Mode to "Boot Environment Change" in order to successfully complete an In-Service Software Update. **(PTS 504885) ACL IPv6 Filter Entry Creation.** 5620 SAM does not support creation of ACL IPv6 filter entries via the ACL IPv6 Filter Policy Manager. The ACL IPv6 filter entry can be created via the 5620 SAM Script Manager using the following example script: configure filter ipv6-filter $ipv6FilterNum$ entry $ipv6FilterEntryNum$ create Where $ipv6FilterNum$ is a variable representing the ACL IPv6 filter policy number, and $ipv6FilterEntryNum$ is a variable representing the ACL IPv6 filter entry number to be created. Modification of existing ACL IPv6 filter entries is fully supported. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding.

5620 SAM Release	Compatibility Statement (7750 SR 4.0 R4)
	(PTS 505396) Dynamic Updates For Residential Subscribers. Subscriber Management MIB improvements prevent 5620 SAM from properly handing changes to residential subscribers when initiated from the network element. Full resynchronization of the network element is required to capture current Residential Subscriber information.

Table 76: 7750 SR 4.0 R3

5620 SAM Release	Compatibility Statement (7750 SR 4.0 R3)
5620 SAM 7.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding.
5620 SAM 5.0 R1 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding.
5620 SAM 4.0 R2 through R12	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding.
5620 SAM 4.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7750 SR 4.0 R3)
	OAM Test Octet Size Range Changes. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **(PTS 505742) ISSU and "Configuration File Change" Synchronization Mode**. Performing an In-Service Software Update (ISSU) with Redundant Synchronization Mode set to "Configuration File Change" will not perform a CPM switchover after software download completes. The user must change the Redundant Synchronization Mode to "Boot Environment Change" in order to successfully complete an In-Service Software Update. **(PTS 504885) ACL IPv6 Filter Entry Creation.** 5620 SAM does not support creation of ACL IPv6 filter entries via the ACL IPv6 Filter Policy Manager. The ACL IPv6 filter entry can be created via the 5620 SAM Script Manager using the following example script: configure filter ipv6-filter $ipv6FilterNum$ entry $ipv6FilterEntryNum$ create Where $ipv6FilterNum$ is a variable representing the ACL IPv6 filter policy number, and $ipv6FilterEntryNum$ is a variable representing the ACL IPv6 filter entry number to be created. Modification of existing ACL IPv6 filter entries is fully supported. **BGP Peer Tracking**. 5620 SAM does not support BGP Peer Tracking. **VRRP Standby Forwarding**. 5620 SAM does not support VRRP Standby Forwarding. **(PTS 505396) Dynamic Updates For Residential Subscribers.** Subscriber Management MIB improvements prevent 5620 SAM from properly handing changes to residential subscribers when initiated from the network element. Full resynchronization of the network element is required to capture current Residential Subscriber information.

Table 77: 7750 SR 4.0 R1 through R2

5620 SAM Release	Compatibility Statement (7750 SR 4.0 R1 through R2)
5620 SAM 7.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39).
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39).
5620 SAM 5.0 R1 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39).
5620 SAM 4.0 R3 through R12	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39).
5620 SAM 4.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **(PTS 505396) Dynamic Updates For Residential Subscribers.** Subscriber Management MIB improvements prevent 5620 SAM from properly handling changes to residential subscribers when initiated from the network element. Full resynchronization of the network element is required to capture current Residential Subscriber information.
5620 SAM 4.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39).

5620 SAM Release	Compatibility Statement (7750 SR 4.0 R1 through R2)
	(PTS 504290) Statistics Collection For BGP Peers. 5620 SAM does not support collection of bgpPeerEntry statistics if any IPv6z BGP Peer addresses are configured. If addresses of this type are configured on the network element, collection for these objects must be turned off via the 5620 SAM Client by using the following procedure: Required Actions: Open *Administration -> Poller Policies* from the client GUI main menu and navigate to the *Stats MIB Policies* tab. Edit the default statistics policy and navigate to the *MIB Entry Policies* tab. Locate the entries within the table for the 4.0 version of MIB Entry Name *bgpPeerEntry*. Edit each entry within the table and set the *Administrative State* to down. **(PTS 500630) Static Routes With Un-numbered Interfaces**. 5620 SAM does not support the creation of static routes with an un-numbered interface as the next hop. **(PTS 500764) Modification of Dynamic Hosts for Subscriber Management.** 5620 SAM does not support the modification of SLA profiles and subscriber profiles for dynamic hosts.

Alcatel-Lucent 7750 Service Router Release 3.0

Table 78: 7750 SR 3.0 R19 through R20

5620 SAM Release	Compatibility Statement (7750 SR 3.0 R19 through R20)
5620 SAM 6.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **CPM-Queue Statistics**. 5620 SAM does not support CPM-Queue Statistics. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 495339) Support for Additional OSPF Timer Options.** New OSPF timers – lsa-arrival, lsa-general and spf-max-wait – cannot be configured via 5620 SAM. In addition, 5620 SAM does not allow the user to configure values greater than 60000 for spf-second-wait and spf-initial-wait.
5620 SAM 5.0 R2 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support “port speed not compatible”, “port duplex not compatible” and “port ingress rate not compatible” alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **CPM-Queue Statistics**. 5620 SAM does not support CPM-Queue Statistics. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 495339) Support for Additional OSPF Timer Options.** New OSPF timers – lsa-arrival, lsa-general and spf-max-wait – cannot be configured via 5620 SAM. In addition, 5620 SAM does not allow the user to configure values greater than 60000

5620 SAM Release	Compatibility Statement (7750 SR 3.0 R19 through R20)
	for spf-second-wait and spf-initial-wait.
5620 SAM 5.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **CPM-Queue Statistics**. 5620 SAM does not support CPM-Queue Statistics. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 495339) Support for Additional OSPF Timer Options.** New OSPF timers – lsa-arrival, lsa-general and spf-max-wait – cannot be configured via 5620 SAM. In addition, 5620 SAM does not allow the user to configure values greater than 60000 for spf-second-wait and spf-initial-wait.
5620 SAM 4.0 R1 through R12	Network element supported as per 5620 SAM Release Description with the following limitations: **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **CPM-Queue Statistics**. 5620 SAM does not support CPM-Queue Statistics. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 495339) Support for Additional OSPF Timer Options.** New OSPF timers – lsa-arrival, lsa-general and spf-max-wait – cannot be configured via 5620 SAM. In addition, 5620 SAM does not allow the user to configure values greater than 60000 for spf-second-wait and spf-initial-wait.
5620 SAM 3.0 R5 through R10	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7750 SR 3.0 R19 through R20)
	GigE Daughtercard Field Replacement. 5620 SAM does not support GigE Daughtercard Field Replacements. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **(PTS 504594) Accounting Policies**. Accounting policies must be shut down before deletion. **CPM-Queue Statistics**. 5620 SAM does not support CPM-Queue Statistics. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 495339) Support for Additional OSPF Timer Options.** New OSPF timers – lsa-arrival, lsa-general and spf-max-wait – cannot be configured via 5620 SAM. In addition, 5620 SAM does not allow the user to configure values greater than 60000 for spf-second-wait and spf-initial-wait.
5620 SAM 3.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **(PTS 504594) Accounting Policies**. Accounting policies must be shut down before deletion. **CPM-Queue Statistics**. SAM does not support CPM-Queue Statistics. **Configuration of Automatic Protection Switching.** 5620 SAM does not support the configuration of APS parameters. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 495339) Support for Additional OSPF Timer Options.** New OSPF timers – lsa-arrival, lsa-general and spf-max-wait – cannot be configured via 5620 SAM. In addition, 5620 SAM does not allow the user to configure values greater than 60000 for spf-second-wait and spf-initial-wait. **(PTS 493260) MPLS LSP Re-signal Timer**. 5620 SAM should not support the value

5620 SAM Release	Compatibility Statement (7750 SR 3.0 R19 through R20)
	range [1-29] for MPLS re-signal timer. The valid range for this field is [0, 30…10080].
5620 SAM 3.0 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **(PTS 504594) Accounting Policies**. Accounting policies must be shut down before deletion. **CPM-Queue Statistics**. 5620 SAM does not support CPM-Queue Statistics. **Configuration of Automatic Protection Switching.** 5620 SAM does not support the configuration of APS parameters. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 495339) Support for Additional OSPF Timers**. New OSPF timers – lsa-arrival and lsa-general and spf-max-wait – cannot be configured via 5620 SAM. In addition, 5620 SAM does not allow the user to configure values greater than 60000 for spf-second-wait and spf-initial-wait. **(PTS 493285) OSPF Timer Enhancements.** Limited support has been added for the new OSPF routing instance spf-wait command: spf-max-wait is not supported, spf-initial-wait is equivalent to spacing and spf-second-wait is equivalent to holdtime. For spf-second-wait and spf-initial-wait, 5620 SAM will only allow the user to configure a value between [0 .. 60000] – the valid range on the router is [1..100000]. Attempting to configure a value outside the 5620 SAM accepted range will prevent the user from altering other parameters of the OSPF routing instance. **(PTS 493260) MPLS LSP Re-Signal Timer.** 5620 SAM should not support the values range [1-29] for MPLS re-signal timer. The valid range for this field is [0, 30..10080].
5620 SAM 3.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES

5620 SAM Release	Compatibility Statement (7750 SR 3.0 R19 through R20)
	and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **(PTS 504594) Accounting Policies**. Accounting policies must be shut down before deletion. **CPM-Queue Statistics**. 5620 SAM does not support CPM-Queue Statistics. **Configuration of Automatic Protection Switching.** 5620 SAM does not support the configuration or APS parameters. **BERT on Channelized MDAs**. 5620 SAM does not support BERT on channelized MDAs. **LAG on Access Q-in-Q Encapsulation.** 5620 SAM does not support the LAG on Access Q-in-Q feature. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 495339) Support for Additional OSPF Timers**. New OSPF timers – lsa-arrival and lsa-general and spf-max-wait – cannot be configured via 5620 SAM. **(PTS 493285) OSPF Timer Enhancements.** Limited support has been added within 5620 SAM for the new OSPF routing instance spf-wait command: spf-max-wait is not supported, spf-initial-wait is equivalent to spacing and spf-second-wait is equivalent to holdtime. For spf-second-wait and spf-initial-wait, 5620 SAM will only allow the user to configure a value between [0 .. 60000] – the valid range on the router is [1..100000]. Attempting to configure a value outside the 5620 SAM accepted range will prevent the user from altering other parameters of the OSPF routing instance. **(PTS 489277) Graceful Restart Behavior Change.** BGP cannot be enabled on VPRN.

Table 79: 7750 SR 3.0 R15 through R18

5620 SAM Release	Compatibility Statement (7750 SR 3.0 R15 through R18)
5620 SAM 6.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.
5620 SAM 5.0 R2 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **CPM-Queue Statistics**. 5620 SAM does not support CPM-Queue Statistics. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 495339) Support for Additional OSPF Timer Options.** New OSPF timers – lsa-arrival, lsa-general and spf-max-wait – cannot be configured via 5620 SAM. In addition, 5620 SAM does not allow the user to configure values greater than 60000 for spf-second-wait and spf-initial-wait.
5620 SAM 5.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **CPM-Queue Statistics**. 5620 SAM does not support CPM-Queue Statistics. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 495339) Support for Additional OSPF Timer Options.** New OSPF timers – lsa-arrival, lsa-general and spf-max-wait – cannot be configured via 5620 SAM. In addition, 5620 SAM does not allow the user to configure values greater than 60000 for spf-second-wait and spf-initial-wait.

5620 SAM Release	Compatibility Statement (7750 SR 3.0 R15 through R18)
5620 SAM 4.0 R1 through R12	Network element supported as per 5620 SAM Release Description with the following limitations: **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **CPM-Queue Statistics**. 5620 SAM does not support CPM-Queue Statistics. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 495339) Support for Additional OSPF Timer Options.** New OSPF timers – lsa-arrival, lsa-general and spf-max-wait – cannot be configured via 5620 SAM. In addition, 5620 SAM does not allow the user to configure values greater than 60000 for spf-second-wait and spf-initial-wait.
5620 SAM 3.0 R5 through R10	Network element supported as per 5620 SAM Release Description with the following limitations: **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **(PTS 504594) Accounting Policies**. Accounting policies must be shut down before deletion. **CPM-Queue Statistics**. 5620 SAM does not support CPM-Queue Statistics. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 495339) Support for Additional OSPF Timer Options.** New OSPF timers – lsa-arrival, lsa-general and spf-max-wait – cannot be configured via 5620 SAM. In addition, 5620 SAM does not allow the user to configure values greater than 60000 for spf-second-wait and spf-initial-wait.
5620 SAM 3.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE

5620 SAM Release	Compatibility Statement (7750 SR 3.0 R15 through R18)
	Daughtercard Field Replacements. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **(PTS 504594) Accounting Policies**. Accounting policies must be shut down before deletion. **CPM-Queue Statistics**. SAM does not support CPM-Queue Statistics. **Configuration of Automatic Protection Switching.** 5620 SAM does not support the configuration of APS parameters. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 495339) Support for Additional OSPF Timer Options.** New OSPF timers – lsa-arrival, lsa-general and spf-max-wait – cannot be configured via 5620 SAM. In addition, 5620 SAM does not allow the user to configure values greater than 60000 for spf-second-wait and spf-initial-wait. **(PTS 493260) MPLS LSP Re-signal Timer**. 5620 SAM should not support the value range [1-29] for MPLS re-signal timer. The valid range for this field is [0, 30…10080].
5620 SAM 3.0 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello. **(PTS 504594) Accounting Policies**. Accounting policies must be shut down before deletion. **CPM-Queue Statistics**. 5620 SAM does not support CPM-Queue Statistics. **Configuration of Automatic Protection Switching.** 5620 SAM does not support the configuration of APS parameters. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 495339) Support for Additional OSPF Timers.** New OSPF timers – lsa-arrival and lsa-general and spf-max-wait – cannot be configured via 5620 SAM. In addition,

5620 SAM Release	Compatibility Statement (7750 SR 3.0 R15 through R18)
	5620 SAM does not allow the user to configure values greater than 60000 for spf-second-wait and spf-initial-wait. **(PTS 493285) OSPF Timer Enhancements.** Limited support has been added for the new OSPF routing instance spf-wait command: spf-max-wait is not supported, spf-initial-wait is equivalent to spacing and spf-second-wait is equivalent to holdtime. For spf-second-wait and spf-initial-wait, 5620 SAM will only allow the user to configure a value between [0 .. 60000] – the valid range on the router is [1..100000]. Attempting to configure a value outside the 5620 SAM accepted range will prevent the user from altering other parameters of the OSPF routing instance. **(PTS 493260) MPLS LSP Re-Signal Timer.** 5620 SAM should not support the values range [1-29] for MPLS re-signal timer. 5620 SAM 4.0 R1 through R12	Network element supported as per 5620 SAM Release Description with the following limitations: **CPM-Queue Statistics**. 5620 SAM does not support CPM-Queue Statistics. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 495339) Support for Additional OSPF Timer Options.** New OSPF timers – lsa-arrival, lsa-general and spf-max-wait – cannot be configured via 5620 SAM. In addition, 5620 SAM does not allow the user to configure values greater than 60000 for spf-second-wait and spf-initial-wait.
5620 SAM 3.0 R5 through R10	Network element supported as per 5620 SAM Release Description with the following limitations: **CPM-Queue Statistics**. 5620 SAM does not support CPM-Queue Statistics. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 495339) Support for Additional OSPF Timer Options.** New OSPF timers – lsa-arrival, lsa-general and spf-max-wait – cannot be configured via 5620 SAM. In addition, 5620 SAM does not allow the user to configure values greater than 60000

5620 SAM Release	Compatibility Statement (7750 SR 3.0 R7 through R10)
	for spf-second-wait and spf-initial-wait.
5620 SAM 3.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **CPM-Queue Statistics**. SAM does not support CPM-Queue Statistics. **Configuration of Automatic Protection Switching.** 5620 SAM does not support the configuration of APS parameters. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 495339) Support for Additional OSPF Timer Options.** New OSPF timers – lsa-arrival, lsa-general and spf-max-wait – cannot be configured via 5620 SAM. In addition, 5620 SAM does not allow the user to configure values greater than 60000 for spf-second-wait and spf-initial-wait. **(PTS 493260) MPLS LSP Re-signal Timer**. 5620 SAM should not support the value range [1-29] for MPLS re-signal timer. The valid range for this field is [0, 30…10080].
5620 SAM 3.0 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **CPM-Queue Statistics**. 5620 SAM does not support CPM-Queue Statistics. **Configuration of Automatic Protection Switching.** 5620 SAM does not support the configuration of APS parameters. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 495339) Support for Additional OSPF Timers**. New OSPF timers – lsa-arrival and lsa-general and spf-max-wait – cannot be configured via 5620 SAM. In addition, 5620 SAM does not allow the user to configure values greater than 60000 for spf-second-wait and spf-initial-wait. **(PTS 493285) OSPF Timer Enhancements.** Limited support has been added for the new OSPF routing instance spf-wait command: spf-max-wait is not supported, spf-initial-wait is equivalent to spacing and spf-second-wait is equivalent to holdtime. For spf-second-wait and spf-initial-wait, 5620 SAM will only allow the user to configure a value between [0 .. 60000] – the valid range on the router is [1..100000]. Attempting to configure a value outside the 5620 SAM accepted range will prevent the user from altering other parameters of the OSPF routing instance. **(PTS 493260) MPLS LSP Re-Signal Timer.** 5620 SAM should not support the values range [1-29] for MPLS re-signal timer. The valid range for this field is [0, 30..10080].

5620 SAM Release	Compatibility Statement (7750 SR 3.0 R7 through R10)
5620 SAM 3.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **CPM-Queue Statistics**. 5620 SAM does not support CPM-Queue Statistics. **Configuration of Automatic Protection Switching.** 5620 SAM does not support the configuration or APS parameters. **BERT on Channelized MDAs**. 5620 SAM does not support BERT on channelized MDAs. **LAG on Access Q-in-Q Encapsulation.** 5620 SAM does not support the LAG on Access Q-in-Q feature. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 495339) Support for Additional OSPF Timers**. New OSPF timers – lsa-arrival and lsa-general and spf-max-wait – cannot be configured via 5620 SAM. **(PTS 493285) OSPF Timer Enhancements.** Limited support has been added within 5620 SAM for the new OSPF routing instance spf-wait command: spf-max-wait is not supported, spf-initial-wait is equivalent to spacing and spf-second-wait is equivalent to holdtime. For spf-second-wait and spf-initial-wait, 5620 SAM will only allow the user to configure a value between [0 .. 60000] – the valid range on the router is [1..100000]. Attempting to configure a value outside the 5620 SAM accepted range will prevent the user from altering other parameters of the OSPF routing instance. **(PTS 489277) Graceful Restart Behavior Change.** BGP cannot be enabled on VPRN.

Table 83: 7750 SR 3.0 R5 through R6

5620 SAM Release	Compatibility Statement (7750 SR 3.0 R5 through R6)
5620 SAM 6.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.
5620 SAM 5.0 R1 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 495339) Support for Additional OSPF Timer Options.** New OSPF timers – lsa-arrival, lsa-general and spf-max-wait – cannot be configured via 5620 SAM. In addition, 5620 SAM does not allow the user to configure values greater than 60000 for spf-second-wait and spf-initial-wait.
5620 SAM 4.0 R1 through R12	Network element supported as per 5620 SAM Release Description with the following limitations: **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 495339) Support for Additional OSPF Timer Options.** New OSPF timers – lsa-arrival, lsa-general and spf-max-wait – cannot be configured via 5620 SAM. In addition, 5620 SAM does not allow the user to configure values greater than 60000 for spf-second-wait and spf-initial-wait.
5620 SAM 3.0 R5 through R10	Network element supported as per 5620 SAM Release Description with the following limitations: **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 495339) Support for Additional OSPF Timer Options.** New OSPF timers – lsa-arrival, lsa-general and spf-max-wait – cannot be configured via 5620 SAM. In addition, 5620 SAM does not allow the user to configure values greater than 60000 for spf-second-wait and spf-initial-wait.
5620 SAM 3.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Configuration of Automatic Protection Switching.** 5620 SAM does not support the

5620 SAM Release	Compatibility Statement (7750 SR 3.0 R5 through R6)
	configuration of APS parameters. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 495339) Support for Additional OSPF Timer Options.** New OSPF timers – lsa-arrival, lsa-general and spf-max-wait – cannot be configured via 5620 SAM. In addition, 5620 SAM does not allow the user to configure values greater than 60000 for spf-second-wait and spf-initial-wait. **(PTS 493260) MPLS LSP Re-signal Timer**. 5620 SAM should not support the value range [1-29] for MPLS re-signal timer. The valid range for this field is [0, 30…10080].
5620 SAM 3.0 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **Configuration of Automatic Protection Switching.** 5620 SAM does not support the configuration of APS parameters. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 495339) Support for Additional OSPF Timers**. New OSPF timers – lsa-arrival and lsa-general and spf-max-wait – cannot be configured via 5620 SAM. In addition, 5620 SAM does not allow the user to configure values greater than 60000 for spf-second-wait and spf-initial-wait. **(PTS 493285) OSPF Timer Enhancements.** Limited support has been added for the new OSPF routing instance spf-wait command: spf-max-wait is not supported, spf-initial-wait is equivalent to spacing and spf-second-wait is equivalent to holdtime. For spf-second-wait and spf-initial-wait, 5620 SAM will only allow the user to configure a value between [0 .. 60000] – the valid range on the router is [1..100000]. Attempting to configure a value outside the 5620 SAM accepted range will prevent the user from altering other parameters of the OSPF routing instance. **(PTS 493260) MPLS LSP Re-Signal Timer.** 5620 SAM should not support the values range [1-29] for MPLS re-signal timer. The valid range for this field is [0, 30..10080].
5620 SAM 3.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Configuration of Automatic Protection Switching.** 5620 SAM does not support the configuration or APS parameters. **BERT on Channelized MDAs**. 5620 SAM does not support BERT on channelized MDAs. **LAG on Access Q-in-Q Encapsulation.** 5620 SAM does not support the LAG on Access Q-in-Q feature. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route

5620 SAM Release	Compatibility Statement (7750 SR 3.0 R5 through R6)
	Filtering for BGP. **(PTS 495339) Support for Additional OSPF Timers.** New OSPF timers – lsa-arrival and lsa-general and spf-max-wait – cannot be configured via 5620 SAM. **(PTS 493285) OSPF Timer Enhancements.** Limited support has been added within 5620 SAM for the new OSPF routing instance spf-wait command: spf-max-wait is not supported, spf-initial-wait is equivalent to spacing and spf-second-wait is equivalent to holdtime. For spf-second-wait and spf-initial-wait, 5620 SAM will only allow the user to configure a value between [0 .. 60000] – the valid range on the router is [1..100000]. Attempting to configure a value outside the 5620 SAM accepted range will prevent the user from altering other parameters of the OSPF routing instance. **(PTS 489277) Graceful Restart Behavior Change.** BGP cannot be enabled on VPRN.

Table 84: 7750 SR 3.0 R3 through R4

5620 SAM Release	Compatibility Statement (7750 SR 3.0 R3 through R4)
5620 SAM 6.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.
5620 SAM 5.0 R1 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP.
5620 SAM 4.0 R1 through R12	Network element supported as per 5620 SAM Release Description with the following limitations: **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP.
5620 SAM 3.0 R5 through R10	Network element supported as per 5620 SAM Release Description with the following limitations: **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP.
5620 SAM 3.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Configuration of Automatic Protection Switching.** 5620 SAM does not support the configuration of APS parameters. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP.
5620 SAM 3.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Configuration of Automatic Protection Switching.** 5620 SAM does not support the configuration or APS parameters. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on

5620 SAM Release	Compatibility Statement (7750 SR 3.0 R3 through R4)
	channelized MDAs. **LAG on Access Q-in-Q Encapsulation.** 5620 SAM does not support the LAG on Access Q-in-Q feature. **BGP-4 Outbound Route Filtering.** 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 489277) Graceful Restart Behavior Change:** BGP cannot be enabled on VPRN. **(PTS 489144) MPLS LSP Re-signal Timer.** 5620 SAM supports the range [0, 30-10080] for MPLS re-signal timer. 5620 SAM does not support the values [1-29] whereas the node supports the complete value range of [0-10080] for this attribute.

Table 85: 7750 SR 3.0 R1 through R2

5620 SAM Release	Compatibility Statement (7750 SR 3.0 R1 through R2)
5620 SAM 6.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.
5620 SAM 5.0 R1 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP
5620 SAM 4.0 R1 through R12	Network element supported as per 5620 SAM Release Description with the following limitations: **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP
5620 SAM 3.0 R5 through R10	Network element supported as per 5620 SAM Release Description with the following limitations: **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP.
5620 SAM 3.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Configuration of Automatic Protection Switching.** 5620 SAM does not support the configuration or APS parameters. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP.
5620 SAM 3.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Configuration of Automatic Protection Switching.** 5620 SAM does not support the configuration or APS parameters. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on

5620 SAM Release	Compatibility Statement (7750 SR 3.0 R1 through R2)
	channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP.

Alcatel-Lucent 7750 Service Router Release 2.1

Table 86: 7750 SR 2.1 R16 through R18

5620 SAM Release	Compatibility Statement (7750 SR 2.1 R16 through R18)
5620 SAM 5.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.
5620 SAM 4.0 R1 through R12	Network element supported as per 5620 SAM Release Description with the following limitations: **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP.
5620 SAM 3.0 R1 through R10	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 504594) Accounting Policies**. Accounting policies must be shut down before deletion. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP.
5620 SAM 2.1 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 504594) Accounting Policies**. Accounting policies must be shut down before deletion. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP.
5620 SAM 2.1 R2 through R3	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7750 SR 2.1 R16 through R18)
	(PTS 504594) Accounting Policies. Accounting policies must be shut down before deletion. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 472961) Multicast MAC in static-arp.** 5620 SAM does not support configuration of multicast MAC addresses for static-arp entries.
5620 SAM 2.1 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 504594) Accounting Policies**. Accounting policies must be shut down before deletion. **Service Mirroring.** 5620 SAM does not support the Service Mirroring feature. **VPLS MAC Move.** 5620 SAM does not support the MAC Move feature. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 472961) Multicast MAC in static-arp.** 5620 SAM does not support configuration of multicast MAC addresses for static-arp entries.

Table 87: 7750 SR 2.1 R5 through R15

5620 SAM Release	Compatibility Statement (7750 SR 2.1 R5 through R15)
5620 SAM 5.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.
5620 SAM 4.0 R1 through R12	Network element supported as per 5620 SAM Release Description with the following limitations: **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP.
5620 SAM 3.0 R1 through R10	Network element supported as per 5620 SAM Release Description with the following limitations: **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP.
5620 SAM 2.1 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP.
5620 SAM 2.1 R2 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 472961) Multicast MAC in static-arp.** 5620 SAM does not support configuration of multicast MAC addresses for static-arp entries.
5620 SAM 2.1 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Service Mirroring.** 5620 SAM does not support the Service Mirroring feature. **VPLS MAC Move.** 5620 SAM does not support the MAC Move feature.

5620 SAM Release	Compatibility Statement (7750 SR 2.1 R5 through R15)
	BERT on Channelized MDAs. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering.** 5620 SAM does not support Outbound Route Filtering for BGP. **(PTS 472961) Multicast MAC in static-arp.** 5620 SAM does not support configuration of multicast MAC addresses for static-arp entries.

Table 88: 7750 SR 2.1 R4

5620 SAM Release	Compatibility Statement (7750 SR 2.1 R4)
5620 SAM 5.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.
5620 SAM 4.0 R1 through R12	Network element supported as per 5620 SAM Release Description with the following limitations: **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP.
5620 SAM 3.0 R1 through R10	Network element supported as per 5620 SAM Release Description with the following limitations: **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP.
5620 SAM 2.1 R2 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP.
5620 SAM 2.1 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Service Mirroring.** 5620 SAM does not support the Service Mirroring feature. **VPLS MAC Move.** 5620 SAM does not support the MAC Move feature. **BERT on Channelized MDAs**. 5620 SAM does not display information about BERT on channelized MDAs. **BGP-4 Outbound Route Filtering**. 5620 SAM does not support Outbound Route Filtering for BGP.

Table 89: 7750 SR 2.1 R1 through R3

5620 SAM Release	Compatibility Statement (7750 SR 2.1 R4 through R3)
5620 SAM 5.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.
5620 SAM 4.0 R1 through R12	Network element supported as per 5620 SAM Release Description.
5620 SAM 3.0 R1 through R10	Network element supported as per 5620 SAM Release Description.
5620 SAM 2.1 R2 through R5	Network element supported as per 5620 SAM Release Description.
5620 SAM 2.1 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Service Mirroring.** 5620 SAM does not support the Service Mirroring feature. **VPLS MAC Move.** 5620 SAM does not support the MAC Move feature.

Alcatel-Lucent 7750 Service Router Release 2.0

Table 90: 7750 SR 2.0 R13 through R20 [3]

5620 SAM Release	Compatibility Statement (7750 SR 2.0 R13 through R20)
5620 SAM 4.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.
5620 SAM 3.0 R1 through R10	Network element supported as per 5620 SAM Release Description.
5620 SAM 2.1 R1 through R5	Network element supported as per 5620 SAM Release Description.
5620 SAM 2.0 R6	Network element supported as per 5620 SAM Release Description.
5620 SAM 2.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 481065) SR Enhancement to allow zero value for sdpAdminPathMtu**. 5620 SAM does not allow the user to configure a value of 0 for the SDP path-mtu.
5620 SAM 2.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Software Support for E3/E1 TDM channelization.** 5620 SAM does not support the E3/E1 TDM channelization feature. **(PTS 481065) SR Enhancement to allow zero value for sdpAdminPathMtu**. 5620 SAM does not allow the user to configure a value of 0 for the SDP path-mtu.

[3] The 7750 Service Router Release 2.0 R12 was never released to the field

Table 91: 7750 SR 2.0 R10 through R11

5620 SAM Release	Compatibility Statement (7750 SR 2.0 R10 through R11)
5620 SAM 4.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.
5620 SAM 3.0 R1 through R10	Network element supported as per 5620 SAM Release Description.
5620 SAM 2.1 R1 through R5	Network element supported as per 5620 SAM Release Description.
5620 SAM 2.0 R5 through R6	Network element supported as per 5620 SAM Release Description.
5620 SAM 2.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Software Support for E3/E1 TDM channelization.** 5620 SAM does not support the E3/E1 TDM channelization feature.

Table 92: 7750 SR 2.0 R2 through R9

5620 SAM Release	Compatibility Statement (7750 SR 2.0 R2 through R9)
5620 SAM 4.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.
5620 SAM 3.0 R1 through R10	Network element supported as per 5620 SAM Release Description.
5620 SAM 2.1 R1 through R5	Network element supported as per 5620 SAM Release Description.
5620 SAM 2.0 R3 through R6	Network element supported as per 5620 SAM Release Description.
5620 SAM 2.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7750 SR 2.0 R2 through R9)
	H-VPLS. 5620 SAM does not support the H-VPLS feature.
5620 SAM 2.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **IS-IS Support.** 5620 SAM does not support management of the IS-IS protocol. **SONET/SDH Channels.** 5620 SAM does not support management of SONET/SDH channels. **Management of DS3/DS1/DS0 Groups**. 5620 SAM does not support creation, deletion or configuration of DS3, DS1, and DS0 groups.

3.2 Alcatel-Lucent 7450 Ethernet Service Switch

Alcatel-Lucent 7450 Ethernet Service Switch Release 9.0

Table 93: 7450 ESS 9.0 R3

5620 SAM Release	Compatibility Statement (7450 ESS 9.0 R3)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **DHCP Filter Capability.** 5620 SAM does not support dhcp filters. [609989] **Credit Control IPv6 Filter.** 5620 SAM does not support new range of icmp-code and icmp-type. [609984] **Percentage Based BW in QoS policies.** 5620 SAM does not support Percentage Based Bandwidth in QoS Policies. [609976] **VID Filters.** 5620 SAM does not support VLAN in MAC filter inc. bitmask for ACL and QoS policies . [609969] **Multi-segment PW Routing.** 5620 SAM does not support Multi-Segment Pseudowire Routing (Dynamic MS-Pws). [609964] **Extentions to ATM/ETHERNET Last-mile Aware QoS for BNG**. 5620 SAM does not support Extentions to ATM/ETHERNET Last-mile Aware QoS for Broadband Network Gateway. [609997] **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including “Lanes Not Blocked Locked”, “Alignment Marker Loss of Lock” and “Duplicate Lane Marker”. [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel

5620 SAM Release	Compatibility Statement (7450 ESS 9.0 R3)
	Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288]

Table 94: 7450 ESS 9.0 R1 through R2

5620 SAM Release	Compatibility Statement (7450 ESS 9.0 R1 through R2)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379

5620 SAM Release	Compatibility Statement (7450 ESS 9.0 R1 through R2)
	Timestamps for OAM. [582495] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs

5620 SAM Release	Compatibility Statement (7450 ESS 9.0 R1 through R2)
	and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Alcatel-Lucent 7450 Ethernet Service Switch Release 8.0

Table 95: 7450 ESS 8.0 R10[4]

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R10)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **PPP LCP Protocol Reject.** 5620 SAM does not support provisioning PPP policy to "reject-disabled-ncp" if ipv6 was not configured". [610833] **Credit Control IPv6 Filter.** 5620 SAM does not support new range of icmp-code and icmp-type. [610781] **CBS Pool Alarm Thresholds.** 5620 SAM does not support provisioning or monitoring of pool alarm thresholds for CBS. [610784] **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531]

[4] Note: 7450 ESS 8.0 R8 was never released to the field.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R10)
	Video Group Per Channel Statistics For Duplicate SSRC. 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288]
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [607054] **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including “Lanes Not Blocked Locked”, “Alignment Marker Loss of Lock” and “Duplicate Lane Marker”. [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R10)
	Termination. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R10)
	Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975]

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R10)
	IS-IS Timer Enhancements. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [607054] **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including “Lanes Not Blocked Locked”, “Alignment Marker Loss of Lock” and “Duplicate Lane Marker”. [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R10)
	Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R10)
	the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [607054] **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R10)
	and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532]

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R10)
	BGP-AD for LDP-based VPLS Cisco Interop. 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R10)
	802.3ah OAM Loop Cleared Notification. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [607054] **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including “Lanes Not Blocked Locked”, “Alignment Marker Loss of Lock” and “Duplicate Lane Marker”. [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R10)
	status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **1-Port 100G and 12-Port 10G Ethernet IMMs.** 5620 SAM does not support the 1-Port 100G and 12-Port 10G Ethernet IMM Cards. **IPv6 Support on IPipe.** 5620 SAM does not support IPv6 for IPipes. **RSVP-TE P2MP I-PMSI.** 5620 SAM does not support RSVP-TE P2MP I-PMSI. **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **Ethernet CFM Frame Rate Limiting.** 5620 SAM does not support Ethernet CFM Frame Rate Limiting. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **QinQ Untagged Frames ".0".** 5620 SAM does not support QinQ Untagged Frames (.0) for L2 and L3 Access Interfaces. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **(PTS 587339) IGMP Tunnel Interface Deployment Failure.** 5620 SAM does not support creation of IGMP Tunnel Interfaces of type RSVP. A deployment failure will occur upon attempted creation. **OC-768/STM-256C DWDM IMM Card.** 5620 SAM does not support the OC-768/STM-256C DWDM IMM Card. **BITS-OUT Support.** 5620 SAM does not support BITS-OUT support for SFM3 on 7450 ESS-7/ESS-12. **Full SSM/ESMC Support.** 5620 SAM does not support full SSM/ESMC capability for clock source quality level received via SSM of SDH/SONET/BITS ports or ESMC of synchronous Ethernet ports for system timing reference selection. **Uni-Directional APS Service Parity for SONET/SDH Channelized and Non-Channelized Interfaces.** 5620 SAM does not support uni-directional APS service parity for SONET/SDH channelized and non-channelized interfaces for MDAs/CMAs that previously only supported bi-directional switching mode APS. **G.8032 Ethernet Ring Protocol.** 5620 SAM does not support G.8032 ethernet ring automatic protection switching. **NAT Basic Port Forwarding.** 5620 SAM does not support NAT basic port forwarding.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R10)
	DIAMETER Credit Control On-line Charging. 5620 SAM does not support on-line charging wuth DIAMETER Credit Control. **Multicast over PPPoE Sessions.** 5620 SAM does not support multicast of PPPoE sessions. **Remove/Add/Modify Domain Names in RADIUS Authentication.** 5620 SAM does not support add/remove/replace for strings used as domain names in PAP/CHAP authentication. **Multiple RADIUS Authentication Based On Domain Name.** 5620 SAM does not support multiple RADIUS Authentication based on Domain Name (Pre-Authentication in LUDB). **IPoE User Name Option 61/60.** 5620 SAM does not support RADIUS User Name Format: DHCP Option 61/60. **ESM IPv6 Local User Database (LUDB) for IPoE.** 5620 SAM does not support ESM IPv6 Local User Database (LUDB) for IPoE. **ATM Aware QoS for Broadband Network Gateway.** 5620 SAM does not support ATM/ethernet last-mile aware QoS for broadband network gateway. **Queue Parent Weight Override.** 5620 SAM does not support queue parent weight override. **QoS Burst Management.** 5620 SAM does not support QoS Burst Management. **Multicast Over LDP P2MP LSP.** 5620 SAM does not support multicast over LDP P2MP LSP. **LSP Automatic Bandwidth Adjustment.** 5620 SAM does not support LSP Automatic Bandwidth Adjustment. **Routed VPLS.** 5620 SAM does not support Routed VPLS. **PBB Support for RFC 3107.** 5620 SAM does not support PBB for RFC 3107 (BGP LSP for PBB-VPLS Services). **LDP FEC to BGP Label Route Stitching.** 5620 SAM does not support LDP FEC to BGP label route stitching. **Multi-homing for L3 Services.** 5620 SAM does not support multi-homing for L3 Services (BGP Anycast address support). **SDP-Configurable Tunnel Destination Address.** 5620 SAM does not support SDP-configurable tunnel destination address. **Hashing Enhancements for Consistent Per-Service Forwading .** 5620 SAM does not support hashing enhancements for conistent per-service forwarding. **HSDPA Offload Fallback Over ATM .** 5620 SAM does not support HSDPA offload fallback over ATM. **Subscriber Attribute Override of App-Profile Values .** 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R10)
	subscriber attribute override of app-profile values. **IPipe Divert to AA.** 5620 SAM does not support IPipe divert to Application Assurance. **AA-ISA Large Session Congestion Mitigation.** 5620 SAM does not support AA-ISA Large Session Congestion Mitigation. **Enable ESMC on WAN Ports.** 5620 SAM does not support enabling ESMC for WAN ports. **RADIUS Authentication Policy Down Time.** 5620 SAM does not support RADIUS authentication policy down time. **CoA-Only RADIUS Server.** 5620 SAM does not support CoA-only RADIUS server. **TACACS+ 128-Character Secret Key.** 5620 SAM does not support 128 characters for the TACACS+ secret key. **LAG LACP System-ID Configuration.** 5620 SAM does not support configuration of the LACP System-ID for LAGs. **BGP Prefix Limit Threshold Percentage and Log-only.** 5620 SAM does not support configuration threshold limit percentage and log-only parameters for BGP peers. **IS-IS Default IPv4 and IPv6 Metric Values.** 5620 SAM does not support IPv4 and IPv6 default metrics for IS-IS interfaces. **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587672] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R10)
	per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R10)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [607054] **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636]

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R10)
	TDCM Dispersion Sweeping. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **1-Port 100G and 12-Port 10G Ethernet IMMs.** 5620 SAM does not support the 1-Port 100G and 12-Port 10G Ethernet IMM Cards. **IPv6 Support on IPipe.** 5620 SAM does not support IPv6 for IPipes. **RSVP-TE P2MP I-PMSI.** 5620 SAM does not support RSVP-TE P2MP I-PMSI. **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **Ethernet CFM Frame Rate Limiting.** 5620 SAM does not support Ethernet CFM Frame Rate Limiting. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **QinQ Untagged Frames ".0".** 5620 SAM does not support QinQ Untagged Frames (.0) for L2 and L3 Access Interfaces. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **(PTS 587339) IGMP Tunnel Interface Deployment Failure.** 5620 SAM does not support creation of IGMP Tunnel Interfaces of type RSVP. A deployment failure will occur upon attempted creation. **OC-768/STM-256C DWDM IMM Card.** 5620 SAM does not support the OC-768/STM-256C DWDM IMM Card. **BITS-OUT Support.** 5620 SAM does not support BITS-OUT support for SFM3 on 7450

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R10)
	ESS-7/ESS-12. **Full SSM/ESMC Support.** 5620 SAM does not support full SSM/ESMC capability for clock source quality level received via SSM of SDH/SONET/BITS ports or ESMC of synchronous Ethernet ports for system timing reference selection. **Uni-Directional APS Service Parity for SONET/SDH Channelized and Non-Channelized Interfaces.** 5620 SAM does not support uni-directional APS service parity for SONET/SDH channelized and non-channelized interfaces for MDAs/CMAs that previously only supported bi-directional switching mode APS. **G.8032 Ethernet Ring Protocol.** 5620 SAM does not support G.8032 ethernet ring automatic protection switching. **NAT Basic Port Forwarding.** 5620 SAM does not support NAT basic port forwarding. **DIAMETER Credit Control On-line Charging.** 5620 SAM does not support on-line charging wuth DIAMETER Credit Control. **Multicast over PPPoE Sessions.** 5620 SAM does not support multicast of PPPoE sessions. **Remove/Add/Modify Domain Names in RADIUS Authentication.** 5620 SAM does not support add/remove/replace for strings used as domain names in PAP/CHAP authentication. **Multiple RADIUS Authentication Based On Domain Name.** 5620 SAM does not support multiple RADIUS Authentication based on Domain Name (Pre-Authentication in LUDB). **IPoE User Name Option 61/60.** 5620 SAM does not support RADIUS User Name Format: DHCP Option 61/60. **ESM IPv6 Local User Database (LUDB) for IPoE.** 5620 SAM does not support ESM IPv6 Local User Database (LUDB) for IPoE. **ATM Aware QoS for Broadband Network Gateway.** 5620 SAM does not support ATM/ethernet last-mile aware QoS for broadband network gateway. **Queue Parent Weight Override.** 5620 SAM does not support queue parent weight override. **QoS Burst Management.** 5620 SAM does not support QoS Burst Management. **Multicast Over LDP P2MP LSP.** 5620 SAM does not support multicast over LDP P2MP LSP. **LSP Automatic Bandwidth Adjustment.** 5620 SAM does not support LSP Automatic Bandwidth Adjustment. **Routed VPLS.** 5620 SAM does not support Routed VPLS. **PBB Support for RFC 3107.** 5620 SAM does not support PBB for RFC 3107 (BGP LSP for PBB-VPLS Services). **LDP FEC to BGP Label Route Stitching.** 5620 SAM does not support LDP FEC to BGP

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R10)
	label route stitching. **Multi-homing for L3 Services.** 5620 SAM does not support multi-homing for L3 Services (BGP Anycast address support). **SDP-Configurable Tunnel Destination Address.** 5620 SAM does not support SDP-configurable tunnel destination address. **Hashing Enhancements for Consistent Per-Service Forwading .** 5620 SAM does not support hashing enhancements for conistent per-service forwarding. **HSDPA Offload Fallback Over ATM .** 5620 SAM does not support HSDPA offload fallback over ATM. **Subscriber Attribute Override of App-Profile Values .** 5620 SAM does not support subscriber attribute override of app-profile values. **IPipe Divert to AA.** 5620 SAM does not support IPipe divert to Application Assurance. **AA-ISA Large Session Congestion Mitigation.** 5620 SAM does not support AA-ISA Large Session Congestion Mitigation. **Enable ESMC on WAN Ports.** 5620 SAM does not support enabling ESMC for WAN ports. **RADIUS Authentication Policy Down Time.** 5620 SAM does not support RADIUS authentication policy down time. **CoA-Only RADIUS Server.** 5620 SAM does not support CoA-only RADIUS server. **TACACS+ 128-Character Secret Key.** 5620 SAM does not support 128 characters for the TACACS+ secret key. **LAG LACP System-ID Configuration.** 5620 SAM does not support configuration of the LACP System-ID for LAGs. **BGP Prefix Limit Threshold Percentage and Log-only.** 5620 SAM does not support configuration threshold limit percentage and log-only parameters for BGP peers. **IS-IS Default IPv4 and IPv6 Metric Values.** 5620 SAM does not support IPv4 and IPv6 default metrics for IS-IS interfaces. **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **LAC Tunnel Support for VPRN (L2TP).** 5620 SAM does not support LAC Tunnels for VPRN (L2TP). **LNS Over MPLS LNS.** 5620 SAM does not support LNS Over MPLS LNS. **L2TP Tunnel Switching with ESM.** 5620 SAM does not support L2TP Tunnel Switching with ESM. **LI Activation Enhancements.** 5620 SAM does not support LI Activation Enhancements.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R10)
	LI for LAC Sessions. 5620 SAM does not support LI for LAC Sessions. **SLA Override without SLA-Profile Change.** 5620 SAM does not support SLA override without SLA-Profile change. **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587672] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R10)
	indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad).

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R10)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 96: 7450 ESS 8.0 R9[5]

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R9)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including “Lanes Not Blocked Locked”, “Alignment Marker Loss of Lock” and “Duplicate Lane Marker”. [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676]

[5] Note: 7450 ESS 8.0 R8 was never released to the field.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R9)
	Tunnel Interface Description. 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R9)
	MPLS/RSVP Local Node Maintenance Required Error. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [607054] **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636]

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R9)
	TDCM Dispersion Sweeping. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R9)
	on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R9)
	OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [607054] **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including “Lanes Not Blocked Locked”, “Alignment Marker Loss of Lock” and “Duplicate Lane Marker”. [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846]

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R9)
	Hash-label Feature Support in Chassis Mode A/B. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R9)
	LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R9)
5620 SAM 8.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [607054] **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including “Lanes Not Blocked Locked”, “Alignment Marker Loss of Lock” and “Duplicate Lane Marker”. [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R9)
	switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R9)
	IGMP Snooping Maximum Number of Sources. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [607054] **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056]

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R9)
	MPLS Exception Messages Rate Limiting for VPRN. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **1-Port 100G and 12-Port 10G Ethernet IMMs.** 5620 SAM does not support the 1-Port 100G and 12-Port 10G Ethernet IMM Cards. **IPv6 Support on IPipe.** 5620 SAM does not support IPv6 for IPipes. **RSVP-TE P2MP I-PMSI.** 5620 SAM does not support RSVP-TE P2MP I-PMSI. **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **Ethernet CFM Frame Rate Limiting.** 5620 SAM does not support Ethernet CFM Frame Rate Limiting. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **QinQ Untagged Frames ".0".** 5620 SAM does not support QinQ Untagged Frames (.0) for L2 and L3 Access Interfaces. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161]

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R9)
	(PTS 587339) IGMP Tunnel Interface Deployment Failure. 5620 SAM does not support creation of IGMP Tunnel Interfaces of type RSVP. A deployment failure will occur upon attempted creation. **OC-768/STM-256C DWDM IMM Card.** 5620 SAM does not support the OC-768/STM-256C DWDM IMM Card. **BITS-OUT Support.** 5620 SAM does not support BITS-OUT support for SFM3 on 7450 ESS-7/ESS-12. **Full SSM/ESMC Support.** 5620 SAM does not support full SSM/ESMC capability for clock source quality level received via SSM of SDH/SONET/BITS ports or ESMC of synchronous Ethernet ports for system timing reference selection. **Uni-Directional APS Service Parity for SONET/SDH Channelized and Non-Channelized Interfaces.** 5620 SAM does not support uni-directional APS service parity for SONET/SDH channelized and non-channelized interfaces for MDAs/CMAs that previously only supported bi-directional switching mode APS. **G.8032 Ethernet Ring Protocol.** 5620 SAM does not support G.8032 ethernet ring automatic protection switching. **NAT Basic Port Forwarding.** 5620 SAM does not support NAT basic port forwarding. **DIAMETER Credit Control On-line Charging.** 5620 SAM does not support on-line charging wuth DIAMETER Credit Control. **Multicast over PPPoE Sessions.** 5620 SAM does not support multicast of PPPoE sessions. **Remove/Add/Modify Domain Names in RADIUS Authentication.** 5620 SAM does not support add/remove/replace for strings used as domain names in PAP/CHAP authentication. **Multiple RADIUS Authentication Based On Domain Name.** 5620 SAM does not support multiple RADIUS Authentication based on Domain Name (Pre-Authentication in LUDB). **IPoE User Name Option 61/60.** 5620 SAM does not support RADIUS User Name Format: DHCP Option 61/60. **ESM IPv6 Local User Database (LUDB) for IPoE.** 5620 SAM does not support ESM IPv6 Local User Database (LUDB) for IPoE. **ATM Aware QoS for Broadband Network Gateway.** 5620 SAM does not support ATM/ethernet last-mile aware QoS for broadband network gateway. **Queue Parent Weight Override.** 5620 SAM does not support queue parent weight override. **QoS Burst Management.** 5620 SAM does not support QoS Burst Management. **Multicast Over LDP P2MP LSP.** 5620 SAM does not support multicast over LDP P2MP LSP.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R9)
	LSP Automatic Bandwidth Adjustment. 5620 SAM does not support LSP Automatic Bandwidth Adjustment. **Routed VPLS.** 5620 SAM does not support Routed VPLS. **PBB Support for RFC 3107.** 5620 SAM does not support PBB for RFC 3107 (BGP LSP for PBB-VPLS Services). **LDP FEC to BGP Label Route Stitching.** 5620 SAM does not support LDP FEC to BGP label route stitching. **Multi-homing for L3 Services.** 5620 SAM does not support multi-homing for L3 Services (BGP Anycast address support). **SDP-Configurable Tunnel Destination Address.** 5620 SAM does not support SDP-configurable tunnel destination address. **Hashing Enhancements for Consistent Per-Service Forwading .** 5620 SAM does not support hashing enhancements for conistent per-service forwarding. **HSDPA Offload Fallback Over ATM .** 5620 SAM does not support HSDPA offload fallback over ATM. **Subscriber Attribute Override of App-Profile Values .** 5620 SAM does not support subscriber attribute override of app-profile values. **IPipe Divert to AA.** 5620 SAM does not support IPipe divert to Application Assurance. **AA-ISA Large Session Congestion Mitigation.** 5620 SAM does not support AA-ISA Large Session Congestion Mitigation. **Enable ESMC on WAN Ports.** 5620 SAM does not support enabling ESMC for WAN ports. **RADIUS Authentication Policy Down Time.** 5620 SAM does not support RADIUS authentication policy down time. **CoA-Only RADIUS Server.** 5620 SAM does not support CoA-only RADIUS server. **TACACS+ 128-Character Secret Key.** 5620 SAM does not support 128 characters for the TACACS+ secret key. **LAG LACP System-ID Configuration.** 5620 SAM does not support configuration of the LACP System-ID for LAGs. **BGP Prefix Limit Threshold Percentage and Log-only.** 5620 SAM does not support configuration threshold limit percentage and log-only parameters for BGP peers. **IS-IS Default IPv4 and IPv6 Metric Values.** 5620 SAM does not support IPv4 and IPv6 default metrics for IS-IS interfaces. **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R9)
	support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587672] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R9)
	Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R9)
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [607054] **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [607056] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [607059] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **1-Port 100G and 12-Port 10G Ethernet IMMs.** 5620 SAM does not support the 1-Port 100G and 12-Port 10G Ethernet IMM Cards. **IPv6 Support on IPipe.** 5620 SAM does not support IPv6 for IPipes. **RSVP-TE P2MP I-PMSI.** 5620 SAM does not support RSVP-TE P2MP I-PMSI. **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R9)
	Termination. **Ethernet CFM Frame Rate Limiting.** 5620 SAM does not support Ethernet CFM Frame Rate Limiting. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **QinQ Untagged Frames ".0".** 5620 SAM does not support QinQ Untagged Frames (.0) for L2 and L3 Access Interfaces. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **(PTS 587339) IGMP Tunnel Interface Deployment Failure.** 5620 SAM does not support creation of IGMP Tunnel Interfaces of type RSVP. A deployment failure will occur upon attempted creation. **OC-768/STM-256C DWDM IMM Card.** 5620 SAM does not support the OC-768/STM-256C DWDM IMM Card. **BITS-OUT Support.** 5620 SAM does not support BITS-OUT support for SFM3 on 7450 ESS-7/ESS-12. **Full SSM/ESMC Support.** 5620 SAM does not support full SSM/ESMC capability for clock source quality level received via SSM of SDH/SONET/BITS ports or ESMC of synchronous Ethernet ports for system timing reference selection. **Uni-Directional APS Service Parity for SONET/SDH Channelized and Non-Channelized Interfaces.** 5620 SAM does not support uni-directional APS service parity for SONET/SDH channelized and non-channelized interfaces for MDAs/CMAs that previously only supported bi-directional switching mode APS. **G.8032 Ethernet Ring Protocol.** 5620 SAM does not support G.8032 ethernet ring automatic protection switching. **NAT Basic Port Forwarding.** 5620 SAM does not support NAT basic port forwarding. **DIAMETER Credit Control On-line Charging.** 5620 SAM does not support on-line charging wuth DIAMETER Credit Control. **Multicast over PPPoE Sessions.** 5620 SAM does not support multicast of PPPoE sessions. **Remove/Add/Modify Domain Names in RADIUS Authentication.** 5620 SAM does not support add/remove/replace for strings used as domain names in PAP/CHAP authentication. **Multiple RADIUS Authentication Based On Domain Name.** 5620 SAM does not support multiple RADIUS Authentication based on Domain Name (Pre-Authentication in LUDB). **IPoE User Name Option 61/60.** 5620 SAM does not support RADIUS User Name Format: DHCP Option 61/60. **ESM IPv6 Local User Database (LUDB) for IPoE.** 5620 SAM does not support ESM IPv6

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R9)
	Local User Database (LUDB) for IPoE. **ATM Aware QoS for Broadband Network Gateway.** 5620 SAM does not support ATM/ethernet last-mile aware QoS for broadband network gateway. **Queue Parent Weight Override.** 5620 SAM does not support queue parent weight override. **QoS Burst Management.** 5620 SAM does not support QoS Burst Management. **Multicast Over LDP P2MP LSP.** 5620 SAM does not support multicast over LDP P2MP LSP. **LSP Automatic Bandwidth Adjustment.** 5620 SAM does not support LSP Automatic Bandwidth Adjustment. **Routed VPLS.** 5620 SAM does not support Routed VPLS. **PBB Support for RFC 3107.** 5620 SAM does not support PBB for RFC 3107 (BGP LSP for PBB-VPLS Services). **LDP FEC to BGP Label Route Stitching.** 5620 SAM does not support LDP FEC to BGP label route stitching. **Multi-homing for L3 Services.** 5620 SAM does not support multi-homing for L3 Services (BGP Anycast address support). **SDP-Configurable Tunnel Destination Address.** 5620 SAM does not support SDP-configurable tunnel destination address. **Hashing Enhancements for Consistent Per-Service Forwading .** 5620 SAM does not support hashing enhancements for conistent per-service forwarding. **HSDPA Offload Fallback Over ATM .** 5620 SAM does not support HSDPA offload fallback over ATM. **Subscriber Attribute Override of App-Profile Values .** 5620 SAM does not support subscriber attribute override of app-profile values. **IPipe Divert to AA.** 5620 SAM does not support IPipe divert to Application Assurance. **AA-ISA Large Session Congestion Mitigation.** 5620 SAM does not support AA-ISA Large Session Congestion Mitigation. **Enable ESMC on WAN Ports.** 5620 SAM does not support enabling ESMC for WAN ports. **RADIUS Authentication Policy Down Time.** 5620 SAM does not support RADIUS authentication policy down time. **CoA-Only RADIUS Server.** 5620 SAM does not support CoA-only RADIUS server. **TACACS+ 128-Character Secret Key.** 5620 SAM does not support 128 characters for the TACACS+ secret key.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R9)
	LAG LACP System-ID Configuration. 5620 SAM does not support configuration of the LACP System-ID for LAGs. **BGP Prefix Limit Threshold Percentage and Log-only.** 5620 SAM does not support configuration threshold limit percentage and log-only parameters for BGP peers. **IS-IS Default IPv4 and IPv6 Metric Values.** 5620 SAM does not support IPv4 and IPv6 default metrics for IS-IS interfaces. **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **LAC Tunnel Support for VPRN (L2TP).** 5620 SAM does not support LAC Tunnels for VPRN (L2TP). **LNS Over MPLS LNS.** 5620 SAM does not support LNS Over MPLS LNS. **L2TP Tunnel Switching with ESM.** 5620 SAM does not support L2TP Tunnel Switching with ESM. **LI Activation Enhancements.** 5620 SAM does not support LI Activation Enhancements. **LI for LAC Sessions.** 5620 SAM does not support LI for LAC Sessions. **SLA Override without SLA-Profile Change.** 5620 SAM does not support SLA override without SLA-Profile change. **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587672] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531]

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R9)
	Video Group Per Channel Statistics For Duplicate SSRC. 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R9)
	MPLS/RSVP Local Node Maintenance Required Error. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 97: 7450 ESS 8.0 R7

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R7)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545]

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R7)
	ADI Server Statistics Enhancements. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R7)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R7)
	Timestamps for OAM. [582495] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R7)
	and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637]

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R7)
	Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R7)
	on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R7)
	OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including “Lanes Not Blocked Locked”, “Alignment Marker Loss of Lock” and “Duplicate Lane Marker”. [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R7)
	Termination. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R7)
	Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later. [605975]

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R7)
	Configurable Filter Lock for LI. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **1-Port 100G and 12-Port 10G Ethernet IMMs.** 5620 SAM does not support the 1-Port 100G and 12-Port 10G Ethernet IMM Cards. **IPv6 Support on IPipe.** 5620 SAM does not support IPv6 for IPipes. **RSVP-TE P2MP I-PMSI.** 5620 SAM does not support RSVP-TE P2MP I-PMSI. **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **Ethernet CFM Frame Rate Limiting.** 5620 SAM does not support Ethernet CFM Frame Rate Limiting. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **QinQ Untagged Frames ".0".** 5620 SAM does not support QinQ Untagged Frames (.0) for L2 and L3 Access Interfaces. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **(PTS 587339) IGMP Tunnel Interface Deployment Failure.** 5620 SAM does not support creation of IGMP Tunnel Interfaces of type RSVP. A deployment failure will

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R7)
	occur upon attempted creation. **OC-768/STM-256C DWDM IMM Card.** 5620 SAM does not support the OC-768/STM-256C DWDM IMM Card. **BITS-OUT Support.** 5620 SAM does not support BITS-OUT support for SFM3 on 7450 ESS-7/ESS-12. **Full SSM/ESMC Support.** 5620 SAM does not support full SSM/ESMC capability for clock source quality level received via SSM of SDH/SONET/BITS ports or ESMC of synchronous Ethernet ports for system timing reference selection. **Uni-Directional APS Service Parity for SONET/SDH Channelized and Non-Channelized Interfaces.** 5620 SAM does not support uni-directional APS service parity for SONET/SDH channelized and non-channelized interfaces for MDAs/CMAs that previously only supported bi-directional switching mode APS. **G.8032 Ethernet Ring Protocol.** 5620 SAM does not support G.8032 ethernet ring automatic protection switching. **NAT Basic Port Forwarding.** 5620 SAM does not support NAT basic port forwarding. **DIAMETER Credit Control On-line Charging.** 5620 SAM does not support on-line charging wuth DIAMETER Credit Control. **Multicast over PPPoE Sessions.** 5620 SAM does not support multicast of PPPoE sessions. **Remove/Add/Modify Domain Names in RADIUS Authentication.** 5620 SAM does not support add/remove/replace for strings used as domain names in PAP/CHAP authentication. **Multiple RADIUS Authentication Based On Domain Name.** 5620 SAM does not support multiple RADIUS Authentication based on Domain Name (Pre-Authentication in LUDB). **IPoE User Name Option 61/60.** 5620 SAM does not support RADIUS User Name Format: DHCP Option 61/60. **ESM IPv6 Local User Database (LUDB) for IPoE.** 5620 SAM does not support ESM IPv6 Local User Database (LUDB) for IPoE. **ATM Aware QoS for Broadband Network Gateway.** 5620 SAM does not support ATM/ethernet last-mile aware QoS for broadband network gateway. **Queue Parent Weight Override.** 5620 SAM does not support queue parent weight override. **QoS Burst Management.** 5620 SAM does not support QoS Burst Management. **Multicast Over LDP P2MP LSP.** 5620 SAM does not support multicast over LDP P2MP LSP. **LSP Automatic Bandwidth Adjustment.** 5620 SAM does not support LSP Automatic Bandwidth Adjustment.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R7)
	Routed VPLS. 5620 SAM does not support Routed VPLS. **PBB Support for RFC 3107.** 5620 SAM does not support PBB for RFC 3107 (BGP LSP for PBB-VPLS Services). **LDP FEC to BGP Label Route Stitching.** 5620 SAM does not support LDP FEC to BGP label route stitching. **Multi-homing for L3 Services.** 5620 SAM does not support multi-homing for L3 Services (BGP Anycast address support). **SDP-Configurable Tunnel Destination Address.** 5620 SAM does not support SDP-configurable tunnel destination address. **Hashing Enhancements for Consistent Per-Service Forwading .** 5620 SAM does not support hashing enhancements for conistent per-service forwarding. **HSDPA Offload Fallback Over ATM .** 5620 SAM does not support HSDPA offload fallback over ATM. **Subscriber Attribute Override of App-Profile Values .** 5620 SAM does not support subscriber attribute override of app-profile values. **IPipe Divert to AA.** 5620 SAM does not support IPipe divert to Application Assurance. **AA-ISA Large Session Congestion Mitigation.** 5620 SAM does not support AA-ISA Large Session Congestion Mitigation. **Enable ESMC on WAN Ports.** 5620 SAM does not support enabling ESMC for WAN ports. **RADIUS Authentication Policy Down Time.** 5620 SAM does not support RADIUS authentication policy down time. **CoA-Only RADIUS Server.** 5620 SAM does not support CoA-only RADIUS server. **TACACS+ 128-Character Secret Key.** 5620 SAM does not support 128 characters for the TACACS+ secret key. **LAG LACP System-ID Configuration.** 5620 SAM does not support configuration of the LACP System-ID for LAGs. **BGP Prefix Limit Threshold Percentage and Log-only.** 5620 SAM does not support configuration threshold limit percentage and log-only parameters for BGP peers. **IS-IS Default IPv4 and IPv6 Metric Values.** 5620 SAM does not support IPv4 and IPv6 default metrics for IS-IS interfaces. **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671]

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R7)
	IOM Card Fail-On-Error. 5620 SAM does not support fail-on-error for IOM Cards. [587672] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R7)
	of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Confederation/Confederation Member with the same AS number.** 5620 SAM does not support creation of the Confederation and Confederation Member with same Autonomous System number on a SR node running software release 8.0, R7 or later.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R7)
	[605975] **Configurable Filter Lock for LI**. 5620 SAM does not support configurable filter lock for Lawful Intercept (LI). [601635] **New 100 GigE PCS Report Alarms**. 5620 SAM does not support the new 100 GigE PCS report alarms including "Lanes Not Blocked Locked", "Alignment Marker Loss of Lock" and "Duplicate Lane Marker". [601636] **TDCM Dispersion Sweeping**. 5620 SAM does not support Dispersion Sweeping Start and End values for optical tunable dispersion compensation module (TDCM). [601637] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **1-Port 100G and 12-Port 10G Ethernet IMMs.** 5620 SAM does not support the 1-Port 100G and 12-Port 10G Ethernet IMM Cards. **IPv6 Support on IPipe.** 5620 SAM does not support IPv6 for IPipes. **RSVP-TE P2MP I-PMSI.** 5620 SAM does not support RSVP-TE P2MP I-PMSI. **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **Ethernet CFM Frame Rate Limiting.** 5620 SAM does not support Ethernet CFM Frame Rate Limiting. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **QinQ Untagged Frames ".0".** 5620 SAM does not support QinQ Untagged Frames (.0) for L2 and L3 Access Interfaces. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **(PTS 587339) IGMP Tunnel Interface Deployment Failure.** 5620 SAM does not

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R7)
	support creation of IGMP Tunnel Interfaces of type RSVP. A deployment failure will occur upon attempted creation. **OC-768/STM-256C DWDM IMM Card.** 5620 SAM does not support the OC-768/STM-256C DWDM IMM Card. **BITS-OUT Support.** 5620 SAM does not support BITS-OUT support for SFM3 on 7450 ESS-7/ESS-12. **Full SSM/ESMC Support.** 5620 SAM does not support full SSM/ESMC capability for clock source quality level received via SSM of SDH/SONET/BITS ports or ESMC of synchronous Ethernet ports for system timing reference selection. **Uni-Directional APS Service Parity for SONET/SDH Channelized and Non-Channelized Interfaces.** 5620 SAM does not support uni-directional APS service parity for SONET/SDH channelized and non-channelized interfaces for MDAs/CMAs that previously only supported bi-directional switching mode APS. **G.8032 Ethernet Ring Protocol.** 5620 SAM does not support G.8032 ethernet ring automatic protection switching. **NAT Basic Port Forwarding.** 5620 SAM does not support NAT basic port forwarding. **DIAMETER Credit Control On-line Charging.** 5620 SAM does not support on-line charging wuth DIAMETER Credit Control. **Multicast over PPPoE Sessions.** 5620 SAM does not support multicast of PPPoE sessions. **Remove/Add/Modify Domain Names in RADIUS Authentication.** 5620 SAM does not support add/remove/replace for strings used as domain names in PAP/CHAP authentication. **Multiple RADIUS Authentication Based On Domain Name.** 5620 SAM does not support multiple RADIUS Authentication based on Domain Name (Pre-Authentication in LUDB). **IPoE User Name Option 61/60.** 5620 SAM does not support RADIUS User Name Format: DHCP Option 61/60. **ESM IPv6 Local User Database (LUDB) for IPoE.** 5620 SAM does not support ESM IPv6 Local User Database (LUDB) for IPoE. **ATM Aware QoS for Broadband Network Gateway.** 5620 SAM does not support ATM/ethernet last-mile aware QoS for broadband network gateway. **Queue Parent Weight Override.** 5620 SAM does not support queue parent weight override. **QoS Burst Management.** 5620 SAM does not support QoS Burst Management. **Multicast Over LDP P2MP LSP.** 5620 SAM does not support multicast over LDP P2MP LSP. **LSP Automatic Bandwidth Adjustment.** 5620 SAM does not support LSP Automatic

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R7)
	Bandwidth Adjustment. **Routed VPLS.** 5620 SAM does not support Routed VPLS. **PBB Support for RFC 3107.** 5620 SAM does not support PBB for RFC 3107 (BGP LSP for PBB-VPLS Services). **LDP FEC to BGP Label Route Stitching.** 5620 SAM does not support LDP FEC to BGP label route stitching. **Multi-homing for L3 Services.** 5620 SAM does not support multi-homing for L3 Services (BGP Anycast address support). **SDP-Configurable Tunnel Destination Address.** 5620 SAM does not support SDP-configurable tunnel destination address. **Hashing Enhancements for Consistent Per-Service Forwading .** 5620 SAM does not support hashing enhancements for conistent per-service forwarding. **HSDPA Offload Fallback Over ATM .** 5620 SAM does not support HSDPA offload fallback over ATM. **Subscriber Attribute Override of App-Profile Values .** 5620 SAM does not support subscriber attribute override of app-profile values. **IPipe Divert to AA.** 5620 SAM does not support IPipe divert to Application Assurance. **AA-ISA Large Session Congestion Mitigation.** 5620 SAM does not support AA-ISA Large Session Congestion Mitigation. **Enable ESMC on WAN Ports.** 5620 SAM does not support enabling ESMC for WAN ports. **RADIUS Authentication Policy Down Time.** 5620 SAM does not support RADIUS authentication policy down time. **CoA-Only RADIUS Server.** 5620 SAM does not support CoA-only RADIUS server. **TACACS+ 128-Character Secret Key.** 5620 SAM does not support 128 characters for the TACACS+ secret key. **LAG LACP System-ID Configuration.** 5620 SAM does not support configuration of the LACP System-ID for LAGs. **BGP Prefix Limit Threshold Percentage and Log-only.** 5620 SAM does not support configuration threshold limit percentage and log-only parameters for BGP peers. **IS-IS Default IPv4 and IPv6 Metric Values.** 5620 SAM does not support IPv4 and IPv6 default metrics for IS-IS interfaces. **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **LAC Tunnel Support for VPRN (L2TP).** 5620 SAM does not support LAC Tunnels for VPRN (L2TP).

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R7)
	LNS Over MPLS LNS. 5620 SAM does not support LNS Over MPLS LNS. **L2TP Tunnel Switching with ESM.** 5620 SAM does not support L2TP Tunnel Switching with ESM. **LI Activation Enhancements.** 5620 SAM does not support LI Activation Enhancements. **LI for LAC Sessions.** 5620 SAM does not support LI for LAC Sessions. **SLA Override without SLA-Profile Change.** 5620 SAM does not support SLA override without SLA-Profile change. **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587672] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547]

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R7)
	Synchronous Ethernet with 10G Ethernet Port in WAN Mode. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R7)
	Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 98: 7450 ESS 8.0 R6

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R6)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R6)
	Time and Volume Based Accounting. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R7	Network element supported as per 5620 SAM Release Description with the following

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R6)
through R8	limitations: **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543]

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R6)
	SHCV Timeout and Retries. 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R6)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676]

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R6)
	Tunnel Interface Description. 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R6)
	MPLS/RSVP Local Node Maintenance Required Error. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 598309) Router Reboot Caused By Service Endpoint Creation**. Creation of a service endpoint using 5620 SAM will result in a router reboot. A fix for this issue will be available as of 5620 SAM 8.0 R6 or 7750/7450/7710 Release 8.0 R7. [598309] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R6)
	hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R6)
	PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3	Network element supported as per 5620 SAM Release Description with the following

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R6)
through R4	limitations: **(PTS 598309) Router Reboot Caused By Service Endpoint Creation**. Creation of a service endpoint using 5620 SAM will result in a router reboot. A fix for this issue will be available as of 5620 SAM 8.0 R6 or 7750/7450/7710 Release 8.0 R7. [598309] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **1-Port 100G and 12-Port 10G Ethernet IMMs.** 5620 SAM does not support the 1-Port 100G and 12-Port 10G Ethernet IMM Cards. **IPv6 Support on IPipe.** 5620 SAM does not support IPv6 for IPipes. **RSVP-TE P2MP I-PMSI.** 5620 SAM does not support RSVP-TE P2MP I-PMSI. **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **Ethernet CFM Frame Rate Limiting.** 5620 SAM does not support Ethernet CFM Frame Rate Limiting. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **QinQ Untagged Frames ".0".** 5620 SAM does not support QinQ Untagged Frames (.0) for L2 and L3 Access Interfaces. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **(PTS 587339) IGMP Tunnel Interface Deployment Failure.** 5620 SAM does not support creation of IGMP Tunnel Interfaces of type RSVP. A deployment failure will occur upon attempted creation. **OC-768/STM-256C DWDM IMM Card.** 5620 SAM does not support the OC-768/STM-

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R6)
	256C DWDM IMM Card. **BITS-OUT Support.** 5620 SAM does not support BITS-OUT support for SFM3 on 7450 ESS-7/ESS-12. **Full SSM/ESMC Support.** 5620 SAM does not support full SSM/ESMC capability for clock source quality level received via SSM of SDH/SONET/BITS ports or ESMC of synchronous Ethernet ports for system timing reference selection. **Uni-Directional APS Service Parity for SONET/SDH Channelized and Non-Channelized Interfaces.** 5620 SAM does not support uni-directional APS service parity for SONET/SDH channelized and non-channelized interfaces for MDAs/CMAs that previously only supported bi-directional switching mode APS. **G.8032 Ethernet Ring Protocol.** 5620 SAM does not support G.8032 ethernet ring automatic protection switching. **NAT Basic Port Forwarding.** 5620 SAM does not support NAT basic port forwarding. **DIAMETER Credit Control On-line Charging.** 5620 SAM does not support on-line charging wuth DIAMETER Credit Control. **Multicast over PPPoE Sessions.** 5620 SAM does not support multicast of PPPoE sessions. **Remove/Add/Modify Domain Names in RADIUS Authentication.** 5620 SAM does not support add/remove/replace for strings used as domain names in PAP/CHAP authentication. **Multiple RADIUS Authentication Based On Domain Name.** 5620 SAM does not support multiple RADIUS Authentication based on Domain Name (Pre-Authentication in LUDB). **IPoE User Name Option 61/60.** 5620 SAM does not support RADIUS User Name Format: DHCP Option 61/60. **ESM IPv6 Local User Database (LUDB) for IPoE.** 5620 SAM does not support ESM IPv6 Local User Database (LUDB) for IPoE. **ATM Aware QoS for Broadband Network Gateway.** 5620 SAM does not support ATM/ethernet last-mile aware QoS for broadband network gateway. **Queue Parent Weight Override.** 5620 SAM does not support queue parent weight override. **QoS Burst Management.** 5620 SAM does not support QoS Burst Management. **Multicast Over LDP P2MP LSP.** 5620 SAM does not support multicast over LDP P2MP LSP. **LSP Automatic Bandwidth Adjustment.** 5620 SAM does not support LSP Automatic Bandwidth Adjustment. **Routed VPLS.** 5620 SAM does not support Routed VPLS. **PBB Support for RFC 3107.** 5620 SAM does not support PBB for RFC 3107 (BGP LSP

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R6)
	for PBB-VPLS Services). **LDP FEC to BGP Label Route Stitching.** 5620 SAM does not support LDP FEC to BGP label route stitching. **Multi-homing for L3 Services.** 5620 SAM does not support multi-homing for L3 Services (BGP Anycast address support). **SDP-Configurable Tunnel Destination Address.** 5620 SAM does not support SDP-configurable tunnel destination address. **Hashing Enhancements for Consistent Per-Service Forwading .** 5620 SAM does not support hashing enhancements for conistent per-service forwarding. **HSDPA Offload Fallback Over ATM .** 5620 SAM does not support HSDPA offload fallback over ATM. **Subscriber Attribute Override of App-Profile Values .** 5620 SAM does not support subscriber attribute override of app-profile values. **IPipe Divert to AA.** 5620 SAM does not support IPipe divert to Application Assurance. **AA-ISA Large Session Congestion Mitigation.** 5620 SAM does not support AA-ISA Large Session Congestion Mitigation. **Enable ESMC on WAN Ports.** 5620 SAM does not support enabling ESMC for WAN ports. **RADIUS Authentication Policy Down Time.** 5620 SAM does not support RADIUS authentication policy down time. **CoA-Only RADIUS Server.** 5620 SAM does not support CoA-only RADIUS server. **TACACS+ 128-Character Secret Key.** 5620 SAM does not support 128 characters for the TACACS+ secret key. **LAG LACP System-ID Configuration.** 5620 SAM does not support configuration of the LACP System-ID for LAGs. **BGP Prefix Limit Threshold Percentage and Log-only.** 5620 SAM does not support configuration threshold limit percentage and log-only parameters for BGP peers. **IS-IS Default IPv4 and IPv6 Metric Values.** 5620 SAM does not support IPv4 and IPv6 default metrics for IS-IS interfaces. **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587672]

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R6)
	VPN Leaked Route Counts. 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer).

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R6)
	MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received). 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 598309) Router Reboot Caused By Service Endpoint Creation**. Creation of a service endpoint using 5620 SAM will result in a router reboot. A fix for this issue will be available as of 5620 SAM 8.0 R6 or 7750/7450/7710 Release 8.0 R7. [598309] **Soft Reset Support for m1-10gb and m1-10gb-dwdm-tun**. 5620 SAM does not support soft reset for m1-10gb and m1-10gb-dwdm-tun MDAs. [598841]

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R6)
	IMPM Round Robin Inactive Records Path Redistribution. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [598840] **Additional Chassis Support for Cpipe VLL PW Switching**. 5620 SAM does not support cpipe VLL PW switching feature (vc-switching) for 7450 ESS-6, ESS-6v, ESS-1 and 7750 SR-1 chassis types. [598843] **Epipe Endpoint Standby-Signaling-Slave Support**. 5620 SAM does not support standby-signaling-slave for epipe service endpoints. [598845] **Epipe Spoke-SDP PW-Status-Signaling Support**. 5620 SAM does not support pw-status-signaling (label withdrawal) for epipe service spoke-SDPs. [598846] **Hash-label Feature Support in Chassis Mode A/B**. 5620 SAM does not support the hash-label feature in chassis mode A or B. [598847] **VPLS L2 Access Interface Ring-Node Support**. 5620 SAM does not support ring-node for VPLS Service L2 Access Interfaces. [598848] **Removal of Chassis Mode D Restriction for PBB MC-LAG**. 5620 SAM does not support lowered chassis mode restrictions for PBB with MC-LAG. [598849] **1-Port 100G and 12-Port 10G Ethernet IMMs.** 5620 SAM does not support the 1-Port 100G and 12-Port 10G Ethernet IMM Cards. **IPv6 Support on IPipe.** 5620 SAM does not support IPv6 for IPipes. **RSVP-TE P2MP I-PMSI.** 5620 SAM does not support RSVP-TE P2MP I-PMSI. **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **Ethernet CFM Frame Rate Limiting.** 5620 SAM does not support Ethernet CFM Frame Rate Limiting. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **QinQ Untagged Frames ".0".** 5620 SAM does not support QinQ Untagged Frames (.0) for L2 and L3 Access Interfaces. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **(PTS 587339) IGMP Tunnel Interface Deployment Failure.** 5620 SAM does not support creation of IGMP Tunnel Interfaces of type RSVP. A deployment failure will occur upon attempted creation. **OC-768/STM-256C DWDM IMM Card.** 5620 SAM does not support the OC-768/STM-256C DWDM IMM Card. **BITS-OUT Support.** 5620 SAM does not support BITS-OUT support for SFM3 on 7450 ESS-7/ESS-12. **Full SSM/ESMC Support.** 5620 SAM does not support full SSM/ESMC capability for clock source quality level received via SSM of SDH/SONET/BITS ports or ESMC of synchronous Ethernet ports for system timing reference selection.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R6)
	Uni-Directional APS Service Parity for SONET/SDH Channelized and Non-Channelized Interfaces. 5620 SAM does not support uni-directional APS service parity for SONET/SDH channelized and non-channelized interfaces for MDAs/CMAs that previously only supported bi-directional switching mode APS. **G.8032 Ethernet Ring Protocol.** 5620 SAM does not support G.8032 ethernet ring automatic protection switching. **NAT Basic Port Forwarding.** 5620 SAM does not support NAT basic port forwarding. **DIAMETER Credit Control On-line Charging.** 5620 SAM does not support on-line charging wuth DIAMETER Credit Control. **Multicast over PPPoE Sessions.** 5620 SAM does not support multicast of PPPoE sessions. **Remove/Add/Modify Domain Names in RADIUS Authentication.** 5620 SAM does not support add/remove/replace for strings used as domain names in PAP/CHAP authentication. **Multiple RADIUS Authentication Based On Domain Name.** 5620 SAM does not support multiple RADIUS Authentication based on Domain Name (Pre-Authentication in LUDB). **IPoE User Name Option 61/60.** 5620 SAM does not support RADIUS User Name Format: DHCP Option 61/60. **ESM IPv6 Local User Database (LUDB) for IPoE.** 5620 SAM does not support ESM IPv6 Local User Database (LUDB) for IPoE. **ATM Aware QoS for Broadband Network Gateway.** 5620 SAM does not support ATM/ethernet last-mile aware QoS for broadband network gateway. **Queue Parent Weight Override.** 5620 SAM does not support queue parent weight override. **QoS Burst Management.** 5620 SAM does not support QoS Burst Management. **Multicast Over LDP P2MP LSP.** 5620 SAM does not support multicast over LDP P2MP LSP. **LSP Automatic Bandwidth Adjustment.** 5620 SAM does not support LSP Automatic Bandwidth Adjustment. **Routed VPLS.** 5620 SAM does not support Routed VPLS. **PBB Support for RFC 3107.** 5620 SAM does not support PBB for RFC 3107 (BGP LSP for PBB-VPLS Services). **LDP FEC to BGP Label Route Stitching.** 5620 SAM does not support LDP FEC to BGP label route stitching. **Multi-homing for L3 Services.** 5620 SAM does not support multi-homing for L3 Services (BGP Anycast address support).

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R6)
	SDP-Configurable Tunnel Destination Address. 5620 SAM does not support SDP-configurable tunnel destination address. **Hashing Enhancements for Consistent Per-Service Forwading .** 5620 SAM does not support hashing enhancements for conistent per-service forwarding. **HSDPA Offload Fallback Over ATM .** 5620 SAM does not support HSDPA offload fallback over ATM. **Subscriber Attribute Override of App-Profile Values .** 5620 SAM does not support subscriber attribute override of app-profile values. **IPipe Divert to AA.** 5620 SAM does not support IPipe divert to Application Assurance. **AA-ISA Large Session Congestion Mitigation.** 5620 SAM does not support AA-ISA Large Session Congestion Mitigation. **Enable ESMC on WAN Ports.** 5620 SAM does not support enabling ESMC for WAN ports. **RADIUS Authentication Policy Down Time.** 5620 SAM does not support RADIUS authentication policy down time. **CoA-Only RADIUS Server.** 5620 SAM does not support CoA-only RADIUS server. **TACACS+ 128-Character Secret Key.** 5620 SAM does not support 128 characters for the TACACS+ secret key. **LAG LACP System-ID Configuration.** 5620 SAM does not support configuration of the LACP System-ID for LAGs. **BGP Prefix Limit Threshold Percentage and Log-only.** 5620 SAM does not support configuration threshold limit percentage and log-only parameters for BGP peers. **IS-IS Default IPv4 and IPv6 Metric Values.** 5620 SAM does not support IPv4 and IPv6 default metrics for IS-IS interfaces. **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **LAC Tunnel Support for VPRN (L2TP).** 5620 SAM does not support LAC Tunnels for VPRN (L2TP). **LNS Over MPLS LNS.** 5620 SAM does not support LNS Over MPLS LNS. **L2TP Tunnel Switching with ESM.** 5620 SAM does not support L2TP Tunnel Switching with ESM. **LI Activation Enhancements.** 5620 SAM does not support LI Activation Enhancements. **LI for LAC Sessions.** 5620 SAM does not support LI for LAC Sessions. **SLA Override without SLA-Profile Change.** 5620 SAM does not support SLA override

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R6)
	without SLA-Profile change. **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587672] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R6)
	tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R6)
	synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms.** 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 99: 7450 ESS 8.0 R5

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R5)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R5)
	of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R5)
	IPv6 Address /127 Netmask Support. 5620 SAM does not support /127 netmasks for IPv6 addresses. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer).

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R5)
	MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received). 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **1-Port 100G and 12-Port 10G Ethernet IMMs.** 5620 SAM does not support the 1-Port 100G and 12-Port 10G Ethernet IMM Cards. **IPv6 Support on IPipe.** 5620 SAM does not support IPv6 for IPipes. **RSVP-TE P2MP I-PMSI.** 5620 SAM does not support RSVP-TE P2MP I-PMSI.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R5)
	IP/GRE Tunnel Termination. 5620 SAM does not support IP/GRE Tunnel Termination. **Ethernet CFM Frame Rate Limiting.** 5620 SAM does not support Ethernet CFM Frame Rate Limiting. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **QinQ Untagged Frames ".0".** 5620 SAM does not support QinQ Untagged Frames (.0) for L2 and L3 Access Interfaces. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **(PTS 587339) IGMP Tunnel Interface Deployment Failure.** 5620 SAM does not support creation of IGMP Tunnel Interfaces of type RSVP. A deployment failure will occur upon attempted creation. **OC-768/STM-256C DWDM IMM Card.** 5620 SAM does not support the OC-768/STM-256C DWDM IMM Card. **BITS-OUT Support.** 5620 SAM does not support BITS-OUT support for SFM3 on 7450 ESS-7/ESS-12. **Full SSM/ESMC Support.** 5620 SAM does not support full SSM/ESMC capability for clock source quality level received via SSM of SDH/SONET/BITS ports or ESMC of synchronous Ethernet ports for system timing reference selection. **Uni-Directional APS Service Parity for SONET/SDH Channelized and Non-Channelized Interfaces.** 5620 SAM does not support uni-directional APS service parity for SONET/SDH channelized and non-channelized interfaces for MDAs/CMAs that previously only supported bi-directional switching mode APS. **G.8032 Ethernet Ring Protocol.** 5620 SAM does not support G.8032 ethernet ring automatic protection switching. **NAT Basic Port Forwarding.** 5620 SAM does not support NAT basic port forwarding. **DIAMETER Credit Control On-line Charging.** 5620 SAM does not support on-line charging wuth DIAMETER Credit Control. **Multicast over PPPoE Sessions.** 5620 SAM does not support multicast of PPPoE sessions. **Remove/Add/Modify Domain Names in RADIUS Authentication.** 5620 SAM does not support add/remove/replace for strings used as domain names in PAP/CHAP authentication. **Multiple RADIUS Authentication Based On Domain Name.** 5620 SAM does not support multiple RADIUS Authentication based on Domain Name (Pre-Authentication in LUDB). **IPoE User Name Option 61/60.** 5620 SAM does not support RADIUS User Name Format: DHCP Option 61/60.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R5)
	ESM IPv6 Local User Database (LUDB) for IPoE. 5620 SAM does not support ESM IPv6 Local User Database (LUDB) for IPoE. **ATM Aware QoS for Broadband Network Gateway.** 5620 SAM does not support ATM/ethernet last-mile aware QoS for broadband network gateway. **Queue Parent Weight Override.** 5620 SAM does not support queue parent weight override. **QoS Burst Management.** 5620 SAM does not support QoS Burst Management. **Multicast Over LDP P2MP LSP.** 5620 SAM does not support multicast over LDP P2MP LSP. **LSP Automatic Bandwidth Adjustment.** 5620 SAM does not support LSP Automatic Bandwidth Adjustment. **Routed VPLS.** 5620 SAM does not support Routed VPLS. **PBB Support for RFC 3107.** 5620 SAM does not support PBB for RFC 3107 (BGP LSP for PBB-VPLS Services). **LDP FEC to BGP Label Route Stitching.** 5620 SAM does not support LDP FEC to BGP label route stitching. **Multi-homing for L3 Services.** 5620 SAM does not support multi-homing for L3 Services (BGP Anycast address support). **SDP-Configurable Tunnel Destination Address.** 5620 SAM does not support SDP-configurable tunnel destination address. **Hashing Enhancements for Consistent Per-Service Forwading .** 5620 SAM does not support hashing enhancements for conistent per-service forwarding. **HSDPA Offload Fallback Over ATM .** 5620 SAM does not support HSDPA offload fallback over ATM. **Subscriber Attribute Override of App-Profile Values .** 5620 SAM does not support subscriber attribute override of app-profile values. **IPipe Divert to AA.** 5620 SAM does not support IPipe divert to Application Assurance. **AA-ISA Large Session Congestion Mitigation.** 5620 SAM does not support AA-ISA Large Session Congestion Mitigation. **Enable ESMC on WAN Ports.** 5620 SAM does not support enabling ESMC for WAN ports. **RADIUS Authentication Policy Down Time.** 5620 SAM does not support RADIUS authentication policy down time. **CoA-Only RADIUS Server.** 5620 SAM does not support CoA-only RADIUS server. **TACACS+ 128-Character Secret Key.** 5620 SAM does not support 128 characters for

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R5)
	the TACACS+ secret key. **LAG LACP System-ID Configuration.** 5620 SAM does not support configuration of the LACP System-ID for LAGs. **BGP Prefix Limit Threshold Percentage and Log-only.** 5620 SAM does not support configuration threshold limit percentage and log-only parameters for BGP peers. **IS-IS Default IPv4 and IPv6 Metric Values.** 5620 SAM does not support IPv4 and IPv6 default metrics for IS-IS interfaces. **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587672] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R5)
	forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R5)
	support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **1-Port 100G and 12-Port 10G Ethernet IMMs.** 5620 SAM does not support the 1-Port 100G and 12-Port 10G Ethernet IMM Cards. **IPv6 Support on IPipe.** 5620 SAM does not support IPv6 for IPipes. **RSVP-TE P2MP I-PMSI.** 5620 SAM does not support RSVP-TE P2MP I-PMSI. **IP/GRE Tunnel Termination.** 5620 SAM does not support IP/GRE Tunnel Termination. **Ethernet CFM Frame Rate Limiting.** 5620 SAM does not support Ethernet CFM Frame Rate Limiting. **IPv6 Address /127 Netmask Support.** 5620 SAM does not support /127 netmasks for IPv6 addresses. **QinQ Untagged Frames ".0".** 5620 SAM does not support QinQ Untagged Frames (.0) for L2 and L3 Access Interfaces. **GARP for Outer VLAN Access Interfaces.** 5620 SAM does not GARP after SRRP switchover on outer VLAN Access Interfaces. [576161] **(PTS 587339) IGMP Tunnel Interface Deployment Failure.** 5620 SAM does not support creation of IGMP Tunnel Interfaces of type RSVP. A deployment failure will occur upon attempted creation. **OC-768/STM-256C DWDM IMM Card.** 5620 SAM does not support the OC-768/STM-256C DWDM IMM Card. **BITS-OUT Support.** 5620 SAM does not support BITS-OUT support for SFM3 on 7450 ESS-7/ESS-12. **Full SSM/ESMC Support.** 5620 SAM does not support full SSM/ESMC capability for clock source quality level received via SSM of SDH/SONET/BITS ports or ESMC of synchronous Ethernet ports for system timing reference selection. **Uni-Directional APS Service Parity for SONET/SDH Channelized and Non-Channelized Interfaces.** 5620 SAM does not support uni-directional APS service parity for SONET/SDH channelized and non-channelized interfaces for MDAs/CMAs that previously only supported bi-directional switching mode APS.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R5)
	G.8032 Ethernet Ring Protocol. 5620 SAM does not support G.8032 ethernet ring automatic protection switching. **NAT Basic Port Forwarding.** 5620 SAM does not support NAT basic port forwarding. **DIAMETER Credit Control On-line Charging.** 5620 SAM does not support on-line charging wuth DIAMETER Credit Control. **Multicast over PPPoE Sessions.** 5620 SAM does not support multicast of PPPoE sessions. **Remove/Add/Modify Domain Names in RADIUS Authentication.** 5620 SAM does not support add/remove/replace for strings used as domain names in PAP/CHAP authentication. **Multiple RADIUS Authentication Based On Domain Name.** 5620 SAM does not support multiple RADIUS Authentication based on Domain Name (Pre-Authentication in LUDB). **IPoE User Name Option 61/60.** 5620 SAM does not support RADIUS User Name Format: DHCP Option 61/60. **ESM IPv6 Local User Database (LUDB) for IPoE.** 5620 SAM does not support ESM IPv6 Local User Database (LUDB) for IPoE. **ATM Aware QoS for Broadband Network Gateway.** 5620 SAM does not support ATM/ethernet last-mile aware QoS for broadband network gateway. **Queue Parent Weight Override.** 5620 SAM does not support queue parent weight override. **QoS Burst Management.** 5620 SAM does not support QoS Burst Management. **Multicast Over LDP P2MP LSP.** 5620 SAM does not support multicast over LDP P2MP LSP. **LSP Automatic Bandwidth Adjustment.** 5620 SAM does not support LSP Automatic Bandwidth Adjustment. **Routed VPLS.** 5620 SAM does not support Routed VPLS. **PBB Support for RFC 3107.** 5620 SAM does not support PBB for RFC 3107 (BGP LSP for PBB-VPLS Services). **LDP FEC to BGP Label Route Stitching.** 5620 SAM does not support LDP FEC to BGP label route stitching. **Multi-homing for L3 Services.** 5620 SAM does not support multi-homing for L3 Services (BGP Anycast address support). **SDP-Configurable Tunnel Destination Address.** 5620 SAM does not support SDP-configurable tunnel destination address. **Hashing Enhancements for Consistent Per-Service Forwading .** 5620 SAM does not

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R5)
	support hashing enhancements for conistent per-service forwarding. **HSDPA Offload Fallback Over ATM .** 5620 SAM does not support HSDPA offload fallback over ATM. **Subscriber Attribute Override of App-Profile Values .** 5620 SAM does not support subscriber attribute override of app-profile values. **IPipe Divert to AA.** 5620 SAM does not support IPipe divert to Application Assurance. **AA-ISA Large Session Congestion Mitigation.** 5620 SAM does not support AA-ISA Large Session Congestion Mitigation. **Enable ESMC on WAN Ports.** 5620 SAM does not support enabling ESMC for WAN ports. **RADIUS Authentication Policy Down Time.** 5620 SAM does not support RADIUS authentication policy down time. **CoA-Only RADIUS Server.** 5620 SAM does not support CoA-only RADIUS server. **TACACS+ 128-Character Secret Key.** 5620 SAM does not support 128 characters for the TACACS+ secret key. **LAG LACP System-ID Configuration.** 5620 SAM does not support configuration of the LACP System-ID for LAGs. **BGP Prefix Limit Threshold Percentage and Log-only.** 5620 SAM does not support configuration threshold limit percentage and log-only parameters for BGP peers. **IS-IS Default IPv4 and IPv6 Metric Values.** 5620 SAM does not support IPv4 and IPv6 default metrics for IS-IS interfaces. **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **LAC Tunnel Support for VPRN (L2TP).** 5620 SAM does not support LAC Tunnels for VPRN (L2TP). **LNS Over MPLS LNS.** 5620 SAM does not support LNS Over MPLS LNS. **L2TP Tunnel Switching with ESM.** 5620 SAM does not support L2TP Tunnel Switching with ESM. **LI Activation Enhancements.** 5620 SAM does not support LI Activation Enhancements. **LI for LAC Sessions.** 5620 SAM does not support LI for LAC Sessions. **SLA Override without SLA-Profile Change.** 5620 SAM does not support SLA override without SLA-Profile change. **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671]

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R5)
	IOM Card Fail-On-Error. 5620 SAM does not support fail-on-error for IOM Cards. [587672] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R5)
	LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 100: 7450 ESS 8.0 R4

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R4)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 592549) IPv6 Standalone PPP-SLAAC or PPP-DHCP6 Mid-Session Change.** A mid-session change on an IPv6 PPP-SLAAC or PPP-DHCP6 ESM subscriber host will result in a deployment failure if the host does not also have IPv4 addressing configured (v4/v6 Dual-stack). **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R4)
	Routing Policy Statement Entry (from Criteria). 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 592549) IPv6 Standalone PPP-SLAAC or PPP-DHCP6 Mid-Session Change.** A

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R4)
	mid-session change on an IPv6 PPP-SLAAC or PPP-DHCP6 ESM subscriber host will result in a deployment failure if the host does not also have IPv4 addressing configured (v4/v6 Dual-stack). **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R4)
	ARP on DHCP Response Packets. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 592549) IPv6 Standalone PPP-SLAAC or PPP-DHCP6 Mid-Session Change.** A mid-session change on an IPv6 PPP-SLAAC or PPP-DHCP6 ESM subscriber host will result in a deployment failure if the host does not also have IPv4 addressing configured (v4/v6 Dual-stack). **(PTS 587339) IGMP Tunnel Interface Deployment Failure.** 5620 SAM does not support creation of IGMP Tunnel Interfaces of type RSVP. A deployment failure will occur upon attempted creation.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R4)
	OC-768/STM-256C DWDM IMM Card. 5620 SAM does not support the OC-768/STM-256C DWDM IMM Card. **BITS-OUT Support.** 5620 SAM does not support BITS-OUT support for SFM3 on 7450 ESS-7/ESS-12. **Full SSM/ESMC Support.** 5620 SAM does not support full SSM/ESMC capability for clock source quality level received via SSM of SDH/SONET/BITS ports or ESMC of synchronous Ethernet ports for system timing reference selection. **Uni-Directional APS Service Parity for SONET/SDH Channelized and Non-Channelized Interfaces.** 5620 SAM does not support uni-directional APS service parity for SONET/SDH channelized and non-channelized interfaces for MDAs/CMAs that previously only supported bi-directional switching mode APS. **G.8032 Ethernet Ring Protocol.** 5620 SAM does not support G.8032 ethernet ring automatic protection switching. **NAT Basic Port Forwarding.** 5620 SAM does not support NAT basic port forwarding. **DIAMETER Credit Control On-line Charging.** 5620 SAM does not support on-line charging wuth DIAMETER Credit Control. **Multicast over PPPoE Sessions.** 5620 SAM does not support multicast of PPPoE sessions. **Remove/Add/Modify Domain Names in RADIUS Authentication.** 5620 SAM does not support add/remove/replace for strings used as domain names in PAP/CHAP authentication. **Multiple RADIUS Authentication Based On Domain Name.** 5620 SAM does not support multiple RADIUS Authentication based on Domain Name (Pre-Authentication in LUDB). **IPoE User Name Option 61/60.** 5620 SAM does not support RADIUS User Name Format: DHCP Option 61/60. **ESM IPv6 Local User Database (LUDB) for IPoE.** 5620 SAM does not support ESM IPv6 Local User Database (LUDB) for IPoE. **ATM Aware QoS for Broadband Network Gateway.** 5620 SAM does not support ATM/ethernet last-mile aware QoS for broadband network gateway. **Queue Parent Weight Override.** 5620 SAM does not support queue parent weight override. **QoS Burst Management.** 5620 SAM does not support QoS Burst Management. **Multicast Over LDP P2MP LSP.** 5620 SAM does not support multicast over LDP P2MP LSP. **LSP Automatic Bandwidth Adjustment.** 5620 SAM does not support LSP Automatic Bandwidth Adjustment. **Routed VPLS.** 5620 SAM does not support Routed VPLS.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R4)
	PBB Support for RFC 3107. 5620 SAM does not support PBB for RFC 3107 (BGP LSP for PBB-VPLS Services). **LDP FEC to BGP Label Route Stitching.** 5620 SAM does not support LDP FEC to BGP label route stitching. **Multi-homing for L3 Services.** 5620 SAM does not support multi-homing for L3 Services (BGP Anycast address support). **SDP-Configurable Tunnel Destination Address.** 5620 SAM does not support SDP-configurable tunnel destination address. **Hashing Enhancements for Consistent Per-Service Forwading .** 5620 SAM does not support hashing enhancements for conistent per-service forwarding. **HSDPA Offload Fallback Over ATM .** 5620 SAM does not support HSDPA offload fallback over ATM. **Subscriber Attribute Override of App-Profile Values .** 5620 SAM does not support subscriber attribute override of app-profile values. **IPipe Divert to AA.** 5620 SAM does not support IPipe divert to Application Assurance. **AA-ISA Large Session Congestion Mitigation.** 5620 SAM does not support AA-ISA Large Session Congestion Mitigation. **Enable ESMC on WAN Ports.** 5620 SAM does not support enabling ESMC for WAN ports. **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. **RADIUS Authentication Policy Down Time.** 5620 SAM does not support RADIUS authentication policy down time. **CoA-Only RADIUS Server.** 5620 SAM does not support CoA-only RADIUS server. **TACACS+ 128-Character Secret Key.** 5620 SAM does not support 128 characters for the TACACS+ secret key. **LAG LACP System-ID Configuration.** 5620 SAM does not support configuration of the LACP System-ID for LAGs. **BGP Prefix Limit Threshold Percentage and Log-only.** 5620 SAM does not support configuration threshold limit percentage and log-only parameters for BGP peers. **IS-IS Default IPv4 and IPv6 Metric Values.** 5620 SAM does not support IPv4 and IPv6 default metrics for IS-IS interfaces. **RFC 4379 Timestamp for OAM/SAA.** 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671]

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R4)
	IOM Card Fail-On-Error. 5620 SAM does not support fail-on-error for IOM Cards. [587672] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R4)
	of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 592549) IPv6 Standalone PPP-SLAAC or PPP-DHCP6 Mid-Session Change.** A mid-session change on an IPv6 PPP-SLAAC or PPP-DHCP6 ESM subscriber host will result in a deployment failure if the host does not also have IPv4 addressing

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R4)
	configured (v4/v6 Dual-stack). **(PTS 587339) IGMP Tunnel Interface Deployment Failure.** 5620 SAM does not support creation of IGMP Tunnel Interfaces of type RSVP. A deployment failure will occur upon attempted creation. **OC-768/STM-256C DWDM IMM Card.** 5620 SAM does not support the OC-768/STM-256C DWDM IMM Card. **BITS-OUT Support.** 5620 SAM does not support BITS-OUT support for SFM3 on 7450 ESS-7/ESS-12. **Full SSM/ESMC Support.** 5620 SAM does not support full SSM/ESMC capability for clock source quality level received via SSM of SDH/SONET/BITS ports or ESMC of synchronous Ethernet ports for system timing reference selection. **Uni-Directional APS Service Parity for SONET/SDH Channelized and Non-Channelized Interfaces.** 5620 SAM does not support uni-directional APS service parity for SONET/SDH channelized and non-channelized interfaces for MDAs/CMAs that previously only supported bi-directional switching mode APS. **G.8032 Ethernet Ring Protocol.** 5620 SAM does not support G.8032 ethernet ring automatic protection switching. **NAT Basic Port Forwarding.** 5620 SAM does not support NAT basic port forwarding. **DIAMETER Credit Control On-line Charging.** 5620 SAM does not support on-line charging wuth DIAMETER Credit Control. **Multicast over PPPoE Sessions.** 5620 SAM does not support multicast of PPPoE sessions. **Remove/Add/Modify Domain Names in RADIUS Authentication.** 5620 SAM does not support add/remove/replace for strings used as domain names in PAP/CHAP authentication. **Multiple RADIUS Authentication Based On Domain Name.** 5620 SAM does not support multiple RADIUS Authentication based on Domain Name (Pre-Authentication in LUDB). **IPoE User Name Option 61/60.** 5620 SAM does not support RADIUS User Name Format: DHCP Option 61/60. **ESM IPv6 Local User Database (LUDB) for IPoE.** 5620 SAM does not support ESM IPv6 Local User Database (LUDB) for IPoE. **ATM Aware QoS for Broadband Network Gateway.** 5620 SAM does not support ATM/ethernet last-mile aware QoS for broadband network gateway. **Queue Parent Weight Override.** 5620 SAM does not support queue parent weight override. **QoS Burst Management.** 5620 SAM does not support QoS Burst Management. **Multicast Over LDP P2MP LSP.** 5620 SAM does not support multicast over LDP P2MP

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R4)
	LSP. **LSP Automatic Bandwidth Adjustment.** 5620 SAM does not support LSP Automatic Bandwidth Adjustment. **Routed VPLS.** 5620 SAM does not support Routed VPLS. **PBB Support for RFC 3107.** 5620 SAM does not support PBB for RFC 3107 (BGP LSP for PBB-VPLS Services). **LDP FEC to BGP Label Route Stitching.** 5620 SAM does not support LDP FEC to BGP label route stitching. **Multi-homing for L3 Services.** 5620 SAM does not support multi-homing for L3 Services (BGP Anycast address support). **SDP-Configurable Tunnel Destination Address.** 5620 SAM does not support SDP-configurable tunnel destination address. **Hashing Enhancements for Consistent Per-Service Forwading .** 5620 SAM does not support hashing enhancements for conistent per-service forwarding. **HSDPA Offload Fallback Over ATM .** 5620 SAM does not support HSDPA offload fallback over ATM. **Subscriber Attribute Override of App-Profile Values .** 5620 SAM does not support subscriber attribute override of app-profile values. **IPipe Divert to AA.** 5620 SAM does not support IPipe divert to Application Assurance. **AA-ISA Large Session Congestion Mitigation.** 5620 SAM does not support AA-ISA Large Session Congestion Mitigation. **Enable ESMC on WAN Ports.** 5620 SAM does not support enabling ESMC for WAN ports. **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. **RADIUS Authentication Policy Down Time.** 5620 SAM does not support RADIUS authentication policy down time. **CoA-Only RADIUS Server.** 5620 SAM does not support CoA-only RADIUS server. **TACACS+ 128-Character Secret Key.** 5620 SAM does not support 128 characters for the TACACS+ secret key. **LAG LACP System-ID Configuration.** 5620 SAM does not support configuration of the LACP System-ID for LAGs. **BGP Prefix Limit Threshold Percentage and Log-only.** 5620 SAM does not support configuration threshold limit percentage and log-only parameters for BGP peers. **IS-IS Default IPv4 and IPv6 Metric Values.** 5620 SAM does not support IPv4 and IPv6 default metrics for IS-IS interfaces.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R4)
	RFC 4379 Timestamp for OAM/SAA. 5620 SAM does not support RFC 4379 Timestamps for OAM. [582495] **LAC Tunnel Support for VPRN (L2TP).** 5620 SAM does not support LAC Tunnels for VPRN (L2TP). **LNS Over MPLS LNS.** 5620 SAM does not support LNS Over MPLS LNS. **L2TP Tunnel Switching with ESM.** 5620 SAM does not support L2TP Tunnel Switching with ESM. **LI Activation Enhancements.** 5620 SAM does not support LI Activation Enhancements. **LI for LAC Sessions.** 5620 SAM does not support LI for LAC Sessions. **SLA Override without SLA-Profile Change.** 5620 SAM does not support SLA override without SLA-Profile change. **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587672] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544]

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R4)
	MPLS Static LSP Fast Retry Timer. 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R4)
	Blackhole Ingress Switch Fabric Multicast Path Type. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 101: 7450 ESS 8.0 R3

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R3)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R3)
	ARP on DHCP Response Packets. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519]

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R3)
	Card PChip CAM Statistics and Trap. 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R3)
	support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587672] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R3)
	per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R3)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **802.1ag MA Association Naming for Y1731 Eth-OAM MEGs.** 5620 SAM does not support 802.1ag MA Association name formats of type integer, string, vid, vpn-id for Y1731 Eth-OAM MEGs. [587671] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587672] **VPN Leaked Route Counts.** 5620 SAM does not support VPN Leaked Route Counts. [587676] **Tunnel Interface Description.** 5620 SAM does not support description for Tunnel Interfaces. [587677] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch,

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R3)
	configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R3)
	PIP STP Inside Same MST Region. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 102: 7450 ESS 8.0 R1 through R2

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R1 through R2)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R1 through R2)
	PIP STP Inside Same MST Region. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543]

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R1 through R2)
	SHCV Timeout and Retries. 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R1 through R2)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups.

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R1 through R2)
	LDP FEC Statistics. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R1 through R2)
	support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume

5620 SAM Release	Compatibility Statement (7450 ESS 8.0 R1 through R2)
	Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Alcatel-Lucent 7450 Ethernet Service Switch Release 7.0

Table 103: ESS 7.0 R19

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [608922] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [608929] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
	System Timing Reference Selection State. 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
	Blackhole Ingress Switch Fabric Multicast Path Type. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [608922] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [608929] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
	delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
	packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [608922] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [608929] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
	support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
	Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
	RADIUS Disconnect-Request Statistics. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [608922] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [608929] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
	In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
	ADI Server Statistics Enhancements. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [608922] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [608929] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
	[587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
	LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
5620 SAM 7.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [608922] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [608929] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
	failure will occur. [587683] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
	Time and Volume Based Accounting. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R5	Network element supported as per 5620 SAM Release Description with the following

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
	limitations: **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [608922] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [608929] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
	New PVST Modes for BPDU Translation. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
	Ethernet Queue Groups. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
	synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [608922] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [608929] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
	OAM LSP Ping 'Packet Size Too Big' Response Status. 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
	ICMP-VSE. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
	SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **Additional DNS Ping Error Results**. 5620 SAM does not support the additional DNS Ping error results of FORMERR, SERVFAIL, NOTIMP, REFUSED and unexpected response. [608922] **MPLS Exception Messages Rate Limiting for VPRN**. 5620 SAM does not support global rate limiting of MPLS exception messagesfor VPRN Services. [608929] **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
	AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change. Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
	Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Video ISA MDA**. 5620 SAM does not support the Video ISA MDA. If a pre-SAM 7.0R4 release manages a 7750 or 7450 router with configured Video Groups containing ISA-Video group members, then invalid LAG entries will appear in SAM. The LAGs will incorrectly appear in the SAM Equipment tree with LAG IDs greater than 200. Furthermore, if the router has VPLS, IES or VPRN services that have configured video interfaces and associated video interface address(es), then invalid L2/L3 access interfaces and addresses will appear for these services. Attempting to modify or delete these LAGs, access interfaces or addresses via SAM will result in failed deployments. **Fast Channel Change Server**. 5620 SAM does not support the Fast Channel Change Server. **RETransmission Client and Server**. 5620 SAM does not support the Retransmission Client and Server for Video ISA. **LSR IP Load Balancing**. 5620 SAM does not support LSR IP load balancing. **SLA-Profile Based Egress Remarking**. 5620 SAM does not support 'Egress QoS marking from SAP' for Subscriber Management SLA-Profiles. **ESM on VSM (CCAG Use Origin SAP)**. 5620 SAM does not support ESM on VSM (CCAG Use Origin SAP) functionality for Group Interfaces on IES services. **Configurable CFM Thresholds**. 5620 SAM does not support configurable Ethernet CFM Eth-Test and One-Way-Delay thresholds. **PBB Access Dual Homing**. 5620 SAM does not support PBB Access Dual Homing. **G.8031 Protected Ethernet Tunnels**. 5620 SAM does not support G.8031 Protected Ethernet Tunnels.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
	TCP Authentication Null Key. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA. **1-Port 10G HS (High Scale) MDA**. 5620 SAM does not support the 1-Port 10G HS (High Scale) MDA. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LAG Support for HS-MDA**. 5620 SAM does not support LAG's for HS-MDA ports. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **LDP over RSVP without Area-Boundary for IS-IS**. 5620 SAM does not support LDP over RSVP without Area-Boundary for IS-IS. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **OAM (Dying Gasp trap**). 5620 SAM does not support "Dying gasp Trap" for OAM. **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **IGMP Host-Tracking**. 5620 SAM does not support IGMP Host Tracking on IES services, including subscriber interfaces. It is also not supported on VPLS service. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R19)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 104: 7450 ESS 7.0 R17 through R18

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R17 through R18)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R17 through R18)
	SHCV Timeout and Retries. 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R17 through R18)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R17 through R18)
	Card PChip CAM Statistics and Trap. 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R17 through R18)
	support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R17 through R18)
	In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R17 through R18)
	PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1	Network element supported as per 5620 SAM Release Description with the following

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R17 through R18)
through R2	limitations: **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R17 through R18)
	System Timing Reference Selection State. 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R17 through R18)
	which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R17 through R18)
	(PTS 588751) ESM Local User Database. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R17 through R18)
	Static Route LDP Synchronization. 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R17 through R18)
	Blackhole Ingress Switch Fabric Multicast Path Type. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R17 through R18)
	metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R17 through R18)
	OAM SAA IMCP Ping Forwaring Class. 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R17 through R18)
	Provider Bridge Group Address (802.1ad) MSTP Support. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R17 through R18)
	OAM LSP Ping 'Packet Size Too Big' Response Status. 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R17 through R18)
	Long Channel Descriptions. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R17 through R18)
	support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R17 through R18)
	the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE.** 5620 SAM does not support the configuration of ICMP VSE (Vendor specific

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R17 through R18)
	extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R17 through R18)
	Blackhole Ingress Switch Fabric Multicast Path Type. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **IS-IS Timer Enhancements**. 5620 SAM does not support the increased range values of [1..9] for SPF Second Wait under an IS-IS Routing Instance. [603707] **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R17 through R18)
	metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E).

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R17 through R18)
	LDP Shortcut TTL Propagation Disabling. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Video ISA MDA**. 5620 SAM does not support the Video ISA MDA. If a pre-SAM 7.0R4 release manages a 7750 or 7450 router with configured Video Groups containing ISA-Video group members, then invalid LAG entries will appear in SAM. The LAGs will incorrectly appear in the SAM Equipment tree with LAG IDs greater than 200. Furthermore, if the router has VPLS, IES or VPRN services that have configured video interfaces and associated video interface address(es), then invalid L2/L3 access interfaces and addresses will appear for these services. Attempting to modify or delete these LAGs, access interfaces or addresses via SAM will result in failed deployments. **Fast Channel Change Server**. 5620 SAM does not support the Fast Channel Change Server. **RETransmission Client and Server**. 5620 SAM does not support the Retransmission Client and Server for Video ISA. **LSR IP Load Balancing**. 5620 SAM does not support LSR IP load balancing. **SLA-Profile Based Egress Remarking**. 5620 SAM does not support 'Egress QoS marking from SAP' for Subscriber Management SLA-Profiles. **ESM on VSM (CCAG Use Origin SAP)**. 5620 SAM does not support ESM on VSM (CCAG Use Origin SAP) functionality for Group Interfaces on IES services. **Configurable CFM Thresholds**. 5620 SAM does not support configurable Ethernet CFM Eth-Test and One-Way-Delay thresholds. **PBB Access Dual Homing**. 5620 SAM does not support PBB Access Dual Homing. **G.8031 Protected Ethernet Tunnels**. 5620 SAM does not support G.8031 Protected Ethernet Tunnels. **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R17 through R18)
	1-Port 10G HS (High Scale) MDA. 5620 SAM does not support the 1-Port 10G HS (High Scale) MDA. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LAG Support for HS-MDA**. 5620 SAM does not support LAG's for HS-MDA ports. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **LDP over RSVP without Area-Boundary for IS-IS**. 5620 SAM does not support LDP over RSVP without Area-Boundary for IS-IS. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **OAM (Dying Gasp trap**). 5620 SAM does not support "Dying gasp Trap" for OAM. **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **IGMP Host-Tracking**. 5620 SAM does not support IGMP Host Tracking on IES services, including subscriber interfaces. It is also not supported on VPLS service. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R17 through R18)
	the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 105: 7450 ESS 7.0 R14 through R16

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R14 through R16)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R14 through R16)
	SHCV Timeout and Retries. 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R14 through R16)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R14 through R16)
	[576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay.** 5620 SAM does not support the replay parameter for a

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R14 through R16)
	SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however,

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R14 through R16)
	the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R14 through R16)
	of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R14 through R16)
	Telnet/SSH TTL Security Check. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R14 through R16)
	on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R14 through R16)
	support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R14 through R16)
	release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R14 through R16)
	tmnxSyncFailureReason. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R14 through R16)
	support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R14 through R16)
	create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R14 through R16)
	PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R14 through R16)
5620 SAM 7.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R14 through R16)
	IOM Card Last Bootup Reason. 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R14 through R16)
	Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R14 through R16)
	IMPM Round Robin Inactive Records Path Redistribution. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R14 through R16)
	[576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R14 through R16)
	down-when-looped broadcast address for ethernet ports. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R14 through R16)
	synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [597216] **Telnet/SSH TTL Security Check**. 5620 SAM does not support TTL Security check for Telnet and SSH. [597217] **System Memory Usage Statistics in Kilobytes**. 5620 SAM does not support kilobyte measured values of system memory usage/allocation/available. [597218] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R14 through R16)
	Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R14 through R16)
	Video ISA MDA. 5620 SAM does not support the Video ISA MDA. If a pre-SAM 7.0R4 release manages a 7750 or 7450 router with configured Video Groups containing ISA-Video group members, then invalid LAG entries will appear in SAM. The LAGs will incorrectly appear in the SAM Equipment tree with LAG IDs greater than 200. Furthermore, if the router has VPLS, IES or VPRN services that have configured video interfaces and associated video interface address(es), then invalid L2/L3 access interfaces and addresses will appear for these services. Attempting to modify or delete these LAGs, access interfaces or addresses via SAM will result in failed deployments. **Fast Channel Change Server**. 5620 SAM does not support the Fast Channel Change Server. **RETransmission Client and Server**. 5620 SAM does not support the Retransmission Client and Server for Video ISA. **LSR IP Load Balancing**. 5620 SAM does not support LSR IP load balancing. **SLA-Profile Based Egress Remarking**. 5620 SAM does not support 'Egress QoS marking from SAP' for Subscriber Management SLA-Profiles. **ESM on VSM (CCAG Use Origin SAP)**. 5620 SAM does not support ESM on VSM (CCAG Use Origin SAP) functionality for Group Interfaces on IES services. **Configurable CFM Thresholds**. 5620 SAM does not support configurable Ethernet CFM Eth-Test and One-Way-Delay thresholds. **PBB Access Dual Homing**. 5620 SAM does not support PBB Access Dual Homing. **G.8031 Protected Ethernet Tunnels**. 5620 SAM does not support G.8031 Protected Ethernet Tunnels. **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA. **1-Port 10G HS (High Scale) MDA**. 5620 SAM does not support the 1-Port 10G HS (High Scale) MDA. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LAG Support for HS-MDA**. 5620 SAM does not support LAG's for HS-MDA ports. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **LDP over RSVP without Area-Boundary for IS-IS**. 5620 SAM does not support LDP over RSVP without Area-Boundary for IS-IS. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria).

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R14 through R16)
	MLPS / RSVP (Fast Retry Timer). 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **OAM (Dying Gasp trap)**. 5620 SAM does not support "Dying gasp Trap" for OAM. **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **IGMP Host-Tracking**. 5620 SAM does not support IGMP Host Tracking on IES services, including subscriber interfaces. It is also not supported on VPLS service. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 106: 7450 ESS 7.0 R13

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R13)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R13)
	tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R13)
	synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R13)
	Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R13)
	tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R13)
	on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R13)
	Blackhole Ingress Switch Fabric Multicast Path Type. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R13)
	the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria).

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R13)
	MLPS / RSVP (Fast Retry Timer). 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R13)
	Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R13)
	Static Route LDP Synchronization. 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R13)
	Blackhole Ingress Switch Fabric Multicast Path Type. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R13)
	IOM Card Fail-On-Error. 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R13)
	Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R13)
	tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R13)
	IOM Card Last Bootup Reason. 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R13)
	Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R13)
	Manufacturing Part Number. 5620 SAM does not support the chassis manufacturing part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R13)
	per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R13)
	Routing Policy Statement Entry (from Criteria). 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R13)
	part number. [593083] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593086] **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path**

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R13)
	Address. 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Video ISA MDA**. 5620 SAM does not support the Video ISA MDA. If a pre-SAM 7.0R4 release manages a 7750 or 7450 router with configured Video Groups containing ISA-Video group members, then invalid LAG entries will appear in SAM. The LAGs will incorrectly appear in the SAM Equipment tree with LAG IDs greater than 200. Furthermore, if the router has VPLS, IES or VPRN services that have configured video interfaces and associated video interface address(es), then invalid L2/L3 access interfaces and addresses will appear for these services. Attempting to modify or delete these LAGs, access interfaces or addresses via SAM will result in failed deployments. **Fast Channel Change Server**. 5620 SAM does not support the Fast Channel Change Server. **RETransmission Client and Server**. 5620 SAM does not support the Retransmission Client and Server for Video ISA. **LSR IP Load Balancing**. 5620 SAM does not support LSR IP load balancing. **SLA-Profile Based Egress Remarking**. 5620 SAM does not support 'Egress QoS marking from SAP' for Subscriber Management SLA-Profiles.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R13)
	ESM on VSM (CCAG Use Origin SAP). 5620 SAM does not support ESM on VSM (CCAG Use Origin SAP) functionality for Group Interfaces on IES services. **Configurable CFM Thresholds.** 5620 SAM does not support configurable Ethernet CFM Eth-Test and One-Way-Delay thresholds. **PBB Access Dual Homing.** 5620 SAM does not support PBB Access Dual Homing. **G.8031 Protected Ethernet Tunnels.** 5620 SAM does not support G.8031 Protected Ethernet Tunnels. **TCP Authentication Null Key.** 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address.** 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **1-Port 10G DWDM Tunable MDA.** 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA. **1-Port 10G HS (High Scale) MDA.** 5620 SAM does not support the 1-Port 10G HS (High Scale) MDA. **H-QOS Adjustments based on Video Viewership.** 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups.** 5620 SAM does not support Ethernet Queue Groups. **LAG Support for HS-MDA.** 5620 SAM does not support LAG's for HS-MDA ports. **LDP FEC Statistics.** 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP.** 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **LDP over RSVP without Area-Boundary for IS-IS.** 5620 SAM does not support LDP over RSVP without Area-Boundary for IS-IS. **Time and Volume Based Accounting.** 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **OAM (Dying Gasp trap).** 5620 SAM does not support "Dying gasp Trap" for OAM. **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **IGMP Host-Tracking.** 5620 SAM does not support IGMP Host Tracking on IES services, including subscriber interfaces. It is also not supported on VPLS service. **ARP on DHCP Response Packets.** 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources.** 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region.** 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R13)
	the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 107: 7450 ESS 7.0 R12

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R12)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R12)
	LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R12)
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R12)
	Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R12)
	(PTS 588751) ESM Local User Database. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R12)
	ADI Server Statistics Enhancements. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R12)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R12)
	on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R12)
	support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R12)
	the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R12)
	Time and Volume Based Accounting. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6	Network element supported as per 5620 SAM Release Description with the following

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R12)
	limitations: **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R12)
	SHCV Timeout and Retries. 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R12)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R12)
	OAM LSP Ping 'Packet Size Too Big' Response Status. 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R12)
	Long Channel Descriptions. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R12)
	support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R12)
	[576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R12)
	down-when-looped broadcast address for ethernet ports. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R12)
	synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 588751) ESM Local User Database**. 5620 SAM does not support Local User Database for Enhanced Subscriber Management (Residential Subscriber). This issue should be resolved as of the 7750 / 7450 / 7710 7.0.R13 maintenance release. [588751] **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R12)
	per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Video ISA MDA**. 5620 SAM does not support the Video ISA MDA. If a pre-SAM 7.0R4 release manages a 7750 or 7450 router with configured Video Groups containing ISA-Video group members, then invalid LAG entries will appear in SAM. The LAGs will incorrectly appear in the SAM Equipment tree with LAG IDs greater than 200. Furthermore, if the router has VPLS, IES or VPRN services that have configured video interfaces and associated video interface address(es), then invalid L2/L3 access interfaces and addresses will appear for these services. Attempting to modify or delete these LAGs, access interfaces or addresses via SAM will result in failed deployments. **Fast Channel Change Server**. 5620 SAM does not support the Fast Channel Change Server. **RETransmission Client and Server**. 5620 SAM does not support the Retransmission

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R12)
	Client and Server for Video ISA. **LSR IP Load Balancing**. 5620 SAM does not support LSR IP load balancing. **SLA-Profile Based Egress Remarking**. 5620 SAM does not support 'Egress QoS marking from SAP' for Subscriber Management SLA-Profiles. **ESM on VSM (CCAG Use Origin SAP)**. 5620 SAM does not support ESM on VSM (CCAG Use Origin SAP) functionality for Group Interfaces on IES services. **Configurable CFM Thresholds**. 5620 SAM does not support configurable Ethernet CFM Eth-Test and One-Way-Delay thresholds. **PBB Access Dual Homing**. 5620 SAM does not support PBB Access Dual Homing. **G.8031 Protected Ethernet Tunnels**. 5620 SAM does not support G.8031 Protected Ethernet Tunnels. **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA. **1-Port 10G HS (High Scale) MDA**. 5620 SAM does not support the 1-Port 10G HS (High Scale) MDA. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LAG Support for HS-MDA**. 5620 SAM does not support LAG's for HS-MDA ports. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **LDP over RSVP without Area-Boundary for IS-IS**. 5620 SAM does not support LDP over RSVP without Area-Boundary for IS-IS. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **OAM (Dying Gasp trap**). 5620 SAM does not support "Dying gasp Trap" for OAM. **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **IGMP Host-Tracking**. 5620 SAM does not support IGMP Host Tracking on IES services, including subscriber interfaces. It is also not supported on VPLS service. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R12)
	Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 108: 7450 ESS 7.0 R10 through R11

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R10 through R11)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R10 through R11)
	LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R10 through R11)
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R10 through R11)
	Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R10 through R11)
	AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change. Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R10 through R11)
	Ethernet Queue Groups. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R10 through R11)
	synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R10 through R11)
	MPLS Static LSP Fast Retry Timer. 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R10 through R11)
	Blackhole Ingress Switch Fabric Multicast Path Type. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R10 through R11)
	IOM Card Last Bootup Reason. 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R10 through R11)
	not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R10 through R11)
	subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R10 through R11)
	extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R10 through R11)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R10 through R11)
	System Timing Reference Selection State. 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria).

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R10 through R11)
	MLPS / RSVP (Fast Retry Timer). 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R10 through R11)
	Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R10 through R11)
	Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R10 through R11)
	and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **AA ESM Subscriber Accounting ESM Subscriber Statistics Behaviour Change.** Node Release 7.0R10 introduces a change in behavior affecting Application Assurance ESM Subscriber accounting statistics. This change may affect the integrity of Application Assurance ESM subscriber statistics in some situations. In previous releases, a dynamic subscriber removal (such as a modem release) would delete previous AA subscriber counter values for that accounting interval. In node release 7.0R10, AA statistics will preserve aa-sub record values when an ESM subscriber gets deleted or goes away. This improves record value accuracy for usage metering where subscriber renewal must not affect the metering values, however, the AA accounting record content solution depends on appropriate SAM statistics support for this enhancement. Non AA subscribers, non ESM AA subscribers and AA-sub-study (special study) records

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R10 through R11)
	are not affected by this change. [587678] **IOM Card Fail-On-Error.** 5620 SAM does not support fail-on-error for IOM Cards. [587680] **OAM LSP Ping 'Packet Size Too Big' Response Status.** 5620 SAM does not support the "Packet Size Too Big" reponse status for OAM LSP Ping Tests. [587682] **(PTS 587683) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [587683] **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R10 through R11)
	ICMP-VSE. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Video ISA MDA**. 5620 SAM does not support the Video ISA MDA. If a pre-SAM 7.0R4 release manages a 7750 or 7450 router with configured Video Groups containing ISA-Video group members, then invalid LAG entries will appear in SAM. The LAGs will incorrectly appear in the SAM Equipment tree with LAG IDs greater than 200. Furthermore, if the router has VPLS, IES or VPRN services that have configured video interfaces and associated video interface address(es), then invalid L2/L3 access interfaces and addresses will appear for these services. Attempting to modify or delete these LAGs, access interfaces or addresses via SAM will result in failed deployments. **Fast Channel Change Server**. 5620 SAM does not support the Fast Channel Change Server. **RETransmission Client and Server**. 5620 SAM does not support the Retransmission Client and Server for Video ISA. **LSR IP Load Balancing**. 5620 SAM does not support LSR IP load balancing. **SLA-Profile Based Egress Remarking**. 5620 SAM does not support 'Egress QoS marking from SAP' for Subscriber Management SLA-Profiles. **ESM on VSM (CCAG Use Origin SAP)**. 5620 SAM does not support ESM on VSM (CCAG Use Origin SAP) functionality for Group Interfaces on IES services. **Configurable CFM Thresholds**. 5620 SAM does not support configurable Ethernet CFM Eth-Test and One-Way-Delay thresholds. **PBB Access Dual Homing**. 5620 SAM does not support PBB Access Dual Homing. **G.8031 Protected Ethernet Tunnels**. 5620 SAM does not support G.8031 Protected Ethernet Tunnels. **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA. **1-Port 10G HS (High Scale) MDA**. 5620 SAM does not support the 1-Port 10G HS (High Scale) MDA. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R10 through R11)
	Ethernet Queue Groups. 5620 SAM does not support Ethernet Queue Groups. **LAG Support for HS-MDA**. 5620 SAM does not support LAG's for HS-MDA ports. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **LDP over RSVP without Area-Boundary for IS-IS**. 5620 SAM does not support LDP over RSVP without Area-Boundary for IS-IS. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **OAM (Dying Gasp trap)**. 5620 SAM does not support "Dying gasp Trap" for OAM. **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **IGMP Host-Tracking**. 5620 SAM does not support IGMP Host Tracking on IES services, including subscriber interfaces. It is also not supported on VPLS service. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R10 through R11)
	OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 109: 7450 ESS 7.0 R8 through R9

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R8 through R9)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R8 through R9)
	PIP STP Inside Same MST Region. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R8 through R9)
	SHCV Timeout and Retries. 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R8 through R9)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R8 through R9)
	LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R8 through R9)
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R8 through R9)
	of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R8 through R9)
	Card PChip CAM Statistics and Trap. 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria).

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R8 through R9)
	MLPS / RSVP (Fast Retry Timer). 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R8 through R9)
	Card PChip CAM Statistics and Trap. 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R8 through R9)
	LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R8 through R9)
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R8 through R9)
	characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R8 through R9)
	OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **New PVST Modes for BPDU Translation**. 5620 SAM does not support new PVST modes 'auto-rw' and 'pvst-rw' BPDU Translation for VPLS service L2 Access Interfaces and Spoke-SDPs. [580519] **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R8 through R9)
	Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Video ISA MDA**. 5620 SAM does not support the Video ISA MDA. If a pre-SAM 7.0R4 release manages a 7750 or 7450 router with configured Video Groups containing ISA-Video group members, then invalid LAG entries will appear in SAM. The LAGs will incorrectly appear in the SAM Equipment tree with LAG IDs greater than 200. Furthermore, if the router has VPLS, IES or VPRN services that have configured video interfaces and associated video interface address(es), then invalid L2/L3 access interfaces and addresses will appear for these services. Attempting to modify or delete these LAGs, access interfaces or addresses via SAM will result in failed deployments. **Fast Channel Change Server**. 5620 SAM does not support the Fast Channel Change Server. **RETransmission Client and Server**. 5620 SAM does not support the Retransmission Client and Server for Video ISA. **LSR IP Load Balancing**. 5620 SAM does not support LSR IP load balancing. **SLA-Profile Based Egress Remarking**. 5620 SAM does not support 'Egress QoS marking from SAP' for Subscriber Management SLA-Profiles. **ESM on VSM (CCAG Use Origin SAP)**. 5620 SAM does not support ESM on VSM (CCAG Use Origin SAP) functionality for Group Interfaces on IES services. **Configurable CFM Thresholds**. 5620 SAM does not support configurable Ethernet CFM Eth-Test and One-Way-Delay thresholds. **PBB Access Dual Homing**. 5620 SAM does not support PBB Access Dual Homing. **G.8031 Protected Ethernet Tunnels**. 5620 SAM does not support G.8031 Protected Ethernet Tunnels. **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R8 through R9)
	1-Port 10G HS (High Scale) MDA. 5620 SAM does not support the 1-Port 10G HS (High Scale) MDA. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LAG Support for HS-MDA**. 5620 SAM does not support LAG's for HS-MDA ports. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **LDP over RSVP without Area-Boundary for IS-IS**. 5620 SAM does not support LDP over RSVP without Area-Boundary for IS-IS. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **OAM (Dying Gasp trap**). 5620 SAM does not support "Dying gasp Trap" for OAM. **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **IGMP Host-Tracking**. 5620 SAM does not support IGMP Host Tracking on IES services, including subscriber interfaces. It is also not supported on VPLS service. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R8 through R9)
	the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 110: 7450 ESS 7.0 R7

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R7)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R7)
	the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R7)
	ADI Server Statistics Enhancements. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R7)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria).

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R7)
	MLPS / RSVP (Fast Retry Timer). 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R7)
	[576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R7)
	ARP on DHCP Response Packets. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R7)
	state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R7)
	and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R7)
	Ethernet Port Hold Timer. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R7)
	packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R7)
	Video Group Per Channel Statistics For Duplicate SSRC. 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R7)
	Time and Volume Based Accounting. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1	Network element supported as per 5620 SAM Release Description with the following

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R7)
through R3	limitations: **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [576531] **Video Group Per Channel Statistics For Duplicate SSRC.** 5620 SAM does not support per channel statistics for duplicate synchronization source (SSRC). [576532] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R7)
	Video ISA MDA. 5620 SAM does not support the Video ISA MDA. If a pre-SAM 7.0R4 release manages a 7750 or 7450 router with configured Video Groups containing ISA-Video group members, then invalid LAG entries will appear in SAM. The LAGs will incorrectly appear in the SAM Equipment tree with LAG IDs greater than 200. Furthermore, if the router has VPLS, IES or VPRN services that have configured video interfaces and associated video interface address(es), then invalid L2/L3 access interfaces and addresses will appear for these services. Attempting to modify or delete these LAGs, access interfaces or addresses via SAM will result in failed deployments. **Fast Channel Change Server**. 5620 SAM does not support the Fast Channel Change Server. **RETransmission Client and Server**. 5620 SAM does not support the Retransmission Client and Server for Video ISA. **LSR IP Load Balancing**. 5620 SAM does not support LSR IP load balancing. **SLA-Profile Based Egress Remarking**. 5620 SAM does not support 'Egress QoS marking from SAP' for Subscriber Management SLA-Profiles. **ESM on VSM (CCAG Use Origin SAP)**. 5620 SAM does not support ESM on VSM (CCAG Use Origin SAP) functionality for Group Interfaces on IES services. **Configurable CFM Thresholds**. 5620 SAM does not support configurable Ethernet CFM Eth-Test and One-Way-Delay thresholds. **PBB Access Dual Homing**. 5620 SAM does not support PBB Access Dual Homing. **G.8031 Protected Ethernet Tunnels**. 5620 SAM does not support G.8031 Protected Ethernet Tunnels. **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA. **1-Port 10G HS (High Scale) MDA**. 5620 SAM does not support the 1-Port 10G HS (High Scale) MDA. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LAG Support for HS-MDA**. 5620 SAM does not support LAG's for HS-MDA ports. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **LDP over RSVP without Area-Boundary for IS-IS**. 5620 SAM does not support LDP over RSVP without Area-Boundary for IS-IS. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria).

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R7)
	MLPS / RSVP (Fast Retry Timer). 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **OAM (Dying Gasp trap)**. 5620 SAM does not support "Dying gasp Trap" for OAM. **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **IGMP Host-Tracking**. 5620 SAM does not support IGMP Host Tracking on IES services, including subscriber interfaces. It is also not supported on VPLS service. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 111: 7450 ESS 7.0 R6

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R6)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R6)
	SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R6)
	not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545]

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R6)
	Static Route LDP Synchronization. 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R6)
	OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria).

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R6)
	MLPS / RSVP (Fast Retry Timer). 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R6)
	on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R6)
	path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R6)
	support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R6)
	RADIUS Disconnect-Request Statistics. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R6)
	indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R6)
	Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **BGP-AD for LDP-based VPLS Cisco Interop.** 5620 SAM does not support Cisco Interop on BGP Neighbors and LDP Peers for use in BGP-AD for LDP-based VPLS. [572543] **SHCV Timeout and Retries.** 5620 SAM does not support Subscriber Host Connectivity Verification (SHCV) Timeout and Retry configuration for VPLS service sites and L2 Access Interfaces, and IES L3 Access Interfaces and Group Interfaces. [572544] **MPLS Static LSP Fast Retry Timer.** 5620 SAM does not support Fast Retry Timer for Static LSPs. [572545] **Static Route LDP Synchronization.** 5620 SAM does not support LDP Synchronization for Static Routes. [572547] **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R6)
	Long Channel Descriptions. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Video ISA MDA**. 5620 SAM does not support the Video ISA MDA. If a pre-SAM 7.0R4 release manages a 7750 or 7450 router with configured Video Groups containing ISA-Video group members, then invalid LAG entries will appear in SAM. The LAGs will incorrectly appear in the SAM Equipment tree with LAG IDs greater than 200. Furthermore, if the router has VPLS, IES or VPRN services that have configured video interfaces and associated video interface address(es), then invalid L2/L3 access interfaces and addresses will appear for these services. Attempting to modify or delete these LAGs, access interfaces or addresses via SAM will result in failed deployments. **Fast Channel Change Server**. 5620 SAM does not support the Fast Channel Change Server. **RETransmission Client and Server**. 5620 SAM does not support the Retransmission Client and Server for Video ISA. **LSR IP Load Balancing**. 5620 SAM does not support LSR IP load balancing. **SLA-Profile Based Egress Remarking**. 5620 SAM does not support 'Egress QoS marking from SAP' for Subscriber Management SLA-Profiles. **ESM on VSM (CCAG Use Origin SAP)**. 5620 SAM does not support ESM on VSM (CCAG Use Origin SAP) functionality for Group Interfaces on IES services. **Configurable CFM Thresholds**. 5620 SAM does not support configurable Ethernet CFM Eth-Test and One-Way-Delay thresholds. **PBB Access Dual Homing**. 5620 SAM does not support PBB Access Dual Homing. **G.8031 Protected Ethernet Tunnels**. 5620 SAM does not support G.8031 Protected Ethernet Tunnels. **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA. **1-Port 10G HS (High Scale) MDA**. 5620 SAM does not support the 1-Port 10G HS (High Scale) MDA. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LAG Support for HS-MDA**. 5620 SAM does not support LAG's for HS-MDA ports. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R6)
	LDP over RSVP without Area-Boundary for IS-IS. 5620 SAM does not support LDP over RSVP without Area-Boundary for IS-IS. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **OAM (Dying Gasp trap**). 5620 SAM does not support "Dying gasp Trap" for OAM. **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **IGMP Host-Tracking**. 5620 SAM does not support IGMP Host Tracking on IES services, including subscriber interfaces. It is also not supported on VPLS service. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R6)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms.** 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 112: 7450 ESS 7.0 R5

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R5)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R5)
	OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R5)
	support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R5)
	ARP on DHCP Response Packets. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R5)
	indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad).

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R5)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R5)
	the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R5)
	Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R5)
	tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer).

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R5)
	MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received). 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **Multi-Service Integrated Services Adapter**. 5620 SAM does not support the Multi-Service Integrated Services Adapter (MS-ISA, MS-ISA-E). **LDP Shortcut TTL Propagation Disabling**. 5620 SAM does not support the option for disabling TTL propagation for transit packets in an LDP shortcut. **Synchronous Ethernet with 10G Ethernet Port in WAN Mode**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R5)
	support Synchronous Ethernet with WAN Mode on 10G Ethernet ports. [568280] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **Long Channel Descriptions**. 5620 SAM does not support long descriptions (160 characters) for SONET/SDH Paths. A maximum of 80 character descriptions are currently supported. **ADI Server Statistics Enhancements**. 5620 SAM does not support the AD Insert Statistics enhancements for tmnxVdoSGAdiMinPort, tmnxVdoSGAdiMaxPort and tmnxVdoSGAdiChlName. [568288] **Video ISA MDA**. 5620 SAM does not support the Video ISA MDA. If a pre-SAM 7.0R4 release manages a 7750 or 7450 router with configured Video Groups containing ISA-Video group members, then invalid LAG entries will appear in SAM. The LAGs will incorrectly appear in the SAM Equipment tree with LAG IDs greater than 200. Furthermore, if the router has VPLS, IES or VPRN services that have configured video interfaces and associated video interface address(es), then invalid L2/L3 access interfaces and addresses will appear for these services. Attempting to modify or delete these LAGs, access interfaces or addresses via SAM will result in failed deployments. **Fast Channel Change Server**. 5620 SAM does not support the Fast Channel Change Server. **RETransmission Client and Server**. 5620 SAM does not support the Retransmission Client and Server for Video ISA. **LSR IP Load Balancing**. 5620 SAM does not support LSR IP load balancing. **SLA-Profile Based Egress Remarking**. 5620 SAM does not support 'Egress QoS marking from SAP' for Subscriber Management SLA-Profiles. **ESM on VSM (CCAG Use Origin SAP)**. 5620 SAM does not support ESM on VSM (CCAG Use Origin SAP) functionality for Group Interfaces on IES services. **Configurable CFM Thresholds**. 5620 SAM does not support configurable Ethernet CFM Eth-Test and One-Way-Delay thresholds. **PBB Access Dual Homing**. 5620 SAM does not support PBB Access Dual Homing. **G.8031 Protected Ethernet Tunnels**. 5620 SAM does not support G.8031 Protected Ethernet Tunnels. **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA. **1-Port 10G HS (High Scale) MDA**. 5620 SAM does not support the 1-Port 10G HS (High Scale) MDA. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R5)
	Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LAG Support for HS-MDA**. 5620 SAM does not support LAG's for HS-MDA ports. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **LDP over RSVP without Area-Boundary for IS-IS**. 5620 SAM does not support LDP over RSVP without Area-Boundary for IS-IS. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **OAM (Dying Gasp trap**). 5620 SAM does not support "Dying gasp Trap" for OAM. **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **IGMP Host-Tracking**. 5620 SAM does not support IGMP Host Tracking on IES services, including subscriber interfaces. It is also not supported on VPLS service. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R5)
	802.3ah OAM Loop Cleared Notification. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 113: 7450 ESS 7.0 R4

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R4)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R4)
	support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R4)
	RADIUS Disconnect-Request Statistics. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R4)
	support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R4)
	IGMP Snooping Maximum Number of Sources. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **Video ISA MDA**. 5620 SAM does not support the Video ISA MDA. If a pre-SAM 7.0R4 release manages a 7750 or 7450 router with configured Video Groups containing ISA-Video group members, then invalid LAG entries will appear in SAM. The LAGs will incorrectly appear in the SAM Equipment tree with LAG IDs greater than 200. Furthermore, if the router has VPLS, IES or VPRN services that have configured video interfaces and associated video interface address(es), then invalid L2/L3 access interfaces and addresses will appear for these services. Attempting to modify or delete these LAGs, access interfaces or addresses via SAM will result in failed deployments. **Fast Channel Change Server**. 5620 SAM does not support the Fast Channel Change Server.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R4)
	RETransmission Client and Server. 5620 SAM does not support the Retransmission Client and Server for Video ISA. **LSR IP Load Balancing**. 5620 SAM does not support LSR IP load balancing. **SLA-Profile Based Egress Remarking**. 5620 SAM does not support 'Egress QoS marking from SAP' for Subscriber Management SLA-Profiles. **ESM on VSM (CCAG Use Origin SAP)**. 5620 SAM does not support ESM on VSM (CCAG Use Origin SAP) functionality for Group Interfaces on IES services. **Configurable CFM Thresholds**. 5620 SAM does not support configurable Ethernet CFM Eth-Test and One-Way-Delay thresholds. **PBB Access Dual Homing**. 5620 SAM does not support PBB Access Dual Homing. **G.8031 Protected Ethernet Tunnels**. 5620 SAM does not support G.8031 Protected Ethernet Tunnels. **TCP Authentication Null Key**. 5620 SAM does not support null keys for TCP authentication keychains. **Ethernet Port Down-When-Looped Broadcast Address**. 5620 SAM does not support down-when-looped broadcast address for ethernet ports. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA. **1-Port 10G HS (High Scale) MDA**. 5620 SAM does not support the 1-Port 10G HS (High Scale) MDA. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LAG Support for HS-MDA**. 5620 SAM does not support LAG's for HS-MDA ports. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **LDP over RSVP without Area-Boundary for IS-IS**. 5620 SAM does not support LDP over RSVP without Area-Boundary for IS-IS. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **OAM (Dying Gasp trap**). 5620 SAM does not support "Dying gasp Trap" for OAM. **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **IGMP Host-Tracking**. 5620 SAM does not support IGMP Host Tracking on IES services, including subscriber interfaces. It is also not supported on VPLS service. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R4)
	IGMP Snooping Maximum Number of Sources. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 114: 7450 ESS 7.0 R3

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R3)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R3)
	support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R3)
	Blackhole Ingress Switch Fabric Multicast Path Type. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R3)
	the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **1-Port 10G DWDM Tunable MDA**. 5620 SAM does not support the 1-Port 10G DWDM Tunable MDA. **1-Port 10G HS (High Scale) MDA**. 5620 SAM does not support the 1-Port 10G HS (High Scale) MDA. **H-QOS Adjustments based on Video Viewership**. 5620 SAM does not support H-QOS Adjustments based on Video Viewership. **Ethernet Queue Groups**. 5620 SAM does not support Ethernet Queue Groups. **LAG Support for HS-MDA**. 5620 SAM does not support LAG's for HS-MDA ports. **LDP FEC Statistics**. 5620 SAM does not support LAG's for HS-MDA's LDP FEC Statistics. **LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP**. 5620 SAM does not support LSP-PING and LSP-TRACE for P2MP, RSVP, and LSP.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R3)
	LDP over RSVP without Area-Boundary for IS-IS. 5620 SAM does not support LDP over RSVP without Area-Boundary for IS-IS. **Time and Volume Based Accounting**. 5620 SAM does not support Time and Volume Based Accounting. **Routing Policy Statement Entry (from Criteria).** 5620 SAM does not support a value of "no-tag" on the Routing Policy Statement Entry (from Criteria). **MLPS / RSVP (Fast Retry Timer).** 5620 SAM does not support MLPS / RSVP (Fast Retry Timer). **OAM (Dying Gasp trap**). 5620 SAM does not support "Dying gasp Trap" for OAM. **MVPN BGP Trap (Inconsistent Auto-Discovery Route is Received).** 5620 SAM does not support 'vRtrPimNgInvalidMdtDefJoin' trap notifications on MVPN BGP. **IGMP Host-Tracking**. 5620 SAM does not support IGMP Host Tracking on IES services, including subscriber interfaces. It is also not supported on VPLS service. **ARP on DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R3)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms.** 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 115: 7450 ESS 7.0 R1 through R2

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R1 through R2)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs.

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R1 through R2)
	PIP STP Inside Same MST Region. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R1 through R2)
	which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in

5620 SAM Release	Compatibility Statement (7450 ESS 7.0 R1 through R2)
	the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Alcatel-Lucent 7450 Ethernet Service Switch Release 6.1

Table 116: 7450 ESS 6.1 R18 through R19

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R18 through R19)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [596583] **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R18 through R19)
	SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [596583] **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R18 through R19)
	algorithm which determines the method used (round robin, direct) for RADIUS server access. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [596583] **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087]

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R18 through R19)
	Power Supply Type "Default". 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management.

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R18 through R19)
	802.3ah OAM Loop Cleared Notification. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [596583] **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures.

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R18 through R19)
	LDP Label Withdrawal Delay. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R18 through R19)
	support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [596583] **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings.

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R18 through R19)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [596583] **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R18 through R19)
	description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R18 through R19)
	support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [596583] **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282]

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R18 through R19)
	tmnxSyncFailureReason. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup..
5620 SAM 7.0 R1	Network element supported as per 5620 SAM Release Description with the following

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R18 through R19)
through R3	limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [596583] **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R18 through R19)
	SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [596583] **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R18 through R19)
	Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target.

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R18 through R19)
	Blackhole Ingress Switch Fabric Multicast Path Type. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [596583] **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths.

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R18 through R19)
	Card PChip CAM Statistics and Trap. 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels.

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R18 through R19)
	SNMP Trap Target Replay. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **IMPM Round Robin Inactive Records Path Redistribution**. 5620 SAM does not support Round Robin Inactive Records path redistribution for Ingress Multicast Path Management. [596583] **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527]

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R18 through R19)
	Increased Channel Description Lengths. 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MAF and CPM Filter MAC Criteria**. 5620 SAM does not support Management Access Filter (MAF) and CPM Filter MAC criteria. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings.

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R18 through R19)
	Untagged RNCV Support for MC-Ring QinQ SAP. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 117: 7450 ESS 6.1 R17

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R17)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type.

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R17)
	RADIUS Disconnect-Request Statistics. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R17)
	which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526]

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R17)
	Ethernet Port Hold Timer. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R17)
	synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R17)
	the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R17)
	SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R17)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R17)
	access. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367]

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R17)
	(PTS 584368) Obsoleted OAM Test History Tables Parameter. 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels.

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R17)
	SNMP Trap Target Replay. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup..
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526]

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R17)
	Ethernet Port Hold Timer. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad).

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R17)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R17)
	Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R17)
	Power Supplies. [593088] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R17)
	daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Default Accounting Policy Log Interval**. 5620 SAM does not support default interval for accounting policies. [593089] **Manufacturing Part Number**. 5620 SAM does not support the chassis manufacturing part number. [593087] **Power Supply Type "Default"**. 5620 SAM does not support the "default" type for Power Supplies. [593088]

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R17)
	System Timing Reference Selection State. 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards.

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R17)
	PIP STP Inside Same MST Region. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MAF and CPM Filter MAC Criteria**. 5620 SAM does not support Management Access Filter (MAF) and CPM Filter MAC criteria. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 118: 7450 ESS 6.1 R15 through R16

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R15 through R16)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R15 through R16)
	support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type.

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R15 through R16)
	RADIUS Disconnect-Request Statistics. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R15 through R16)
	SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526]

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R15 through R16)
	Ethernet Port Hold Timer. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R15 through R16)
	synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R15 through R16)
	support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value "blackhole" for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **IOM Card Last Bootup Reason.** 5620 SAM does not support the following new values for an IOM Card 'Last Bootup Reason': powerCycle, clearCard, activitySwitch, configChange, runtimeFail, bootFail, unexpected, issuTimeout, reinserted. [576527] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths. **Card PChip CAM Statistics and Trap.** 5620 SAM does not support IOM, IMM and SF/CPM Card PChip content addressable memory (CAM) event statisitics and trap. [576526] **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282]

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R15 through R16)
	tmnxSyncFailureReason. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES L3 Access Interfaces. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Blackhole Ingress Switch Fabric Multicast Path Type**. 5620 SAM does not support the value “blackhole” for Ingress Switch Fabric Multicast Path Type. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following

5620 SAM Release	Compatibility Statement (7450 ESS 6.1 R15 through R16)
