	Card PChip Cam Event. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R15 through R16)
	SNMP Trap Target Replay. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R15 through R16)
	extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R15 through R16)
	Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R15 through R16)
	PIM Group Administrative Bandwidth. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R15 through R16)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R15 through R16)
	indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R15 through R16)
	OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R15 through R16)
	extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R15 through R16)
	Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R15 through R16)
	PIM Group Administrative Bandwidth. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R15 through R16)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537]

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R15 through R16)
	PIM SSM Default Range Disable. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R15 through R16)
	PIP STP Inside Same MST Region. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R15 through R16)
	such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R15 through R16)
	RADIUS Server Access Algorithm. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R15 through R16)
	RADIUS Disconnect-Request Statistics. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539]

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R15 through R16)
	Admin State Rules for Bundle Protection Group. 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R15 through R16)
	P-chip Memory Parity Error Alarm. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R15 through R16)
	tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584367] **(PTS 584368) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [584368] **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R15 through R16)
	BGP Minimum Route Advertisement. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MAF MAC Criteria**. 5620 SAM does not support Management Access Filter (MAF) MAC

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R15 through R16)
	criteria. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 204: 7710 SR 6.1 R14

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R14)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R14)
	PIP STP Inside Same MST Region. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537]

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R14)
	Admin State Rules for Bundle Protection Group. 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R14)
	Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R14)
	PIM ECMP Optional Threshold Usage. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R14)
	support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R14)
	packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R14)
	synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R14)
	characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R14)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R14)
	Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set"

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R14)
	Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R14)
	Null Endpoint Discriminator ID for MLPPP. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R14)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R14)
	Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R14)
	untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R14)
	Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R14)
	of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R14)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Increased Channel Description Lengths.** 5620 SAM does not support increased description field lengths of [81..160] characters for SONET Paths, TDM DS3, E3 and DS0 Channel Groups. **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R14)
	BGP Minimum Route Advertisement. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MAF MAC Criteria**. 5620 SAM does not support Management Access Filter (MAF) MAC

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R14)
	criteria. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 205: 7710 SR 6.1 R13

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R13)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R13)
	MPLS/RSVP Local Node Maintenance Required Error. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R13)
	PIM ECMP Optional Threshold Usage. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R13)
	support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R13)
	MSDP Peer Authentication Key Length. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R13)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R13)
	Null Endpoint Discriminator ID for MLPPP. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R13)
5620 SAM 7.0 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R13)
	Multicast Path Management Channel Support. 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R13)
	Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R13)
	Multicast Info Policies Support. 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R13)
	Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R13)
	Multicast Info Policies Support. 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R13)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R13)
	E1 Channel National Bits. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R13)
	OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management. **Card PChip Cam Event**. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R13)
	[559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R13)
	Untagged RNCV Support for MC-Ring QinQ SAP. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **PPP Initial delay**. 5620 SAM does not support PPP initial delay configuration on PPPoE Policies for Subscriber Management.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R13)
	Card PChip Cam Event. 5620 SAM does not support the Card PChip Cam Event trap. **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R13)
	instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MAF MAC Criteria**. 5620 SAM does not support Management Access Filter (MAF) MAC criteria. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R13)
	802.3ah OAM Loop Cleared Notification. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 206: 7710 SR 6.1 R12

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R12)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R12)
	support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R12)
	RADIUS Server Access Algorithm. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R12)
	support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R12)
	Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R12)
5620 SAM 7.0 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R12)
	of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R12)
	[572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R12)
	path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using ‘Any LSP’ Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a ‘Target Type’ of ‘Any LSP’ with a non-0.0.0.0 ‘Destination Path Address’ defined. A deployment failure will result upon test deployment.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R12)
	PIM Group Administrative Bandwidth. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R12)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using ‘Any LSP’ Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a ‘Target Type’ of ‘Any LSP’ with a non-0.0.0.0 ‘Destination Path Address’ defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R12)
	ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support ‘tmnxDSXClockSyncStateChange’ trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R12)
	display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R12)
	state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R12)
	Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R12)
5620 SAM 6.1 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R12)
	of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R12)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Ethernet Port Hold Timer**. 5620 SAM does not support the increased Ethernet port hold timer range for values [51..900]. [572537] **PIM SSM Default Range Disable**. 5620 SAM does not support SSM Default Range Disable for PIM routing protocol in the base routing instance and VPRN services. [572539] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R12)
	LDP Label Withdrawal Delay. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R12)
	Management PPPoE Policies. **MAF MAC Criteria**. 5620 SAM does not support Management Access Filter (MAF) MAC criteria. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R12)
	such as start and completion of a recover action after system startup.

Table 207: 7710 SR 6.1 R11

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R11)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R11)
	SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support**. 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R11)
	instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R11)
	PIM Group Administrative Bandwidth. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R11)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM SAA IMCP Ping Forwaring Class.** 5620 SAM does not support the configuration of forwarding class. [568282] **ICMP-VSE**. 5620 SAM does not support the configuration of ICMP VSE (Vendor specific extension). [568282] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R11)
	of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R11)
	Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R11)
	SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R11)
	Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R11)
	Provider Bridge Group Address (802.1ad) MSTP Support. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R11)
	SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad).

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R11)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R11)
	SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R11)
	and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R11)
	(PTS 550389) OAM ICMP Trace Test Deployment Failure. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MAF MAC Criteria**. 5620 SAM does not support Management Access Filter (MAF) MAC criteria. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support ‘tmnxDSXClockSyncStateChange’ trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R11)
	DHCP Server Failover Support. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 208: 7710 SR 6.1 R10

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R10)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R10)
	SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support**. 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R10)
	instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R10)
	ARP On DHCP Response Packets. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R10)
	tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R10)
	for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R10)
	LDP Label Withdrawal Delay. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support ‘tmnxDSXClockSyncStateChange’ trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R10)
	display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R10)
	[559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support ‘tmnxDSXClockSyncStateChange’ trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R10)
	support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R10)
	packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R10)
	CES DS1/E1 Clock State Change Trap. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R10)
	Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R10)
	MAF MAC Criteria. 5620 SAM does not support Management Access Filter (MAF) MAC criteria. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 209: 7710 SR 6.1 R9

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R9)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R9)
	802.3ah OAM Loop Cleared Notification. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R9)
	MPLS/RSVP Local Node Maintenance Required Error. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R9)
	IGMP Snooping Maximum Number of Sources. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R9)
	Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R9)
	SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R9)
	SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R9)
	synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R9)
	which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R9)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R9)
	daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R9)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **ARP On DHCP Response Packets**. 5620 SAM does not support ARP on DHCP response packets for IES and VPRN L3 Access Interfaces. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R9)
	Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MAF MAC Criteria**. 5620 SAM does not support Management Access Filter (MAF) MAC criteria. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R9)
	tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 210: 7710 SR 6.1 R7 through R8

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R7 through R8)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad).

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R7 through R8)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R7 through R8)
	RADIUS Disconnect-Request Statistics. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R7 through R8)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R7 through R8)
	instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R6	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R7 through R8)
through R8	**MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support ‘tmnxDSXClockSyncStateChange’ trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R7 through R8)
	RADIUS Disconnect-Request Statistics. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R7 through R8)
	Multicast Info Policies Support. 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R7 through R8)
	(PTS 550484) Subscriber Management SLA Profile Queue Override. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R7 through R8)
	the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R7 through R8)
	support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **Null Endpoint Discriminator ID for MLPPP**. 5620 SAM does not support Null Endpoint Discriminator ID for MLPPP Multilink Bundles. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MAF MAC Criteria**. 5620 SAM does not support Management Access Filter (MAF) MAC criteria.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R7 through R8)
	MPLS/RSVP Local Node Maintenance Required Error. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 211: 7710 SR 6.1 R6

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R6)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R6)
	support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R6)
	such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R6)
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R6)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R6)
	802.3ah OAM Loop Cleared Notification. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R6)
	Untagged RNCV Support for MC-Ring QinQ SAP. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R3	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R6)
	Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support ‘tmnxDSXClockSyncStateChange’ trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R6)
	and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **E1 Channel National Bits**. 5620 SAM does not support National Bits for E1 Channels using G.704 or G.704 no-CRC Framing under ASAP daughter cards. **IGMP Snooping Maximum Number of Sources**. 5620 SAM does not support Maximum Number of Sources for IGMP Snooping on VPLS service L2 Access Interfaces, Mesh SDPs and Spoke SDPs. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R6)
	daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MAF MAC Criteria**. 5620 SAM does not support Management Access Filter (MAF) MAC criteria. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R6)
	not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 212: 7710 SR 6.1 R5

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R5)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R5)
	which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R5)
	support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R5)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support ‘tmnxDSXClockSyncStateChange’ trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R5)
	CES L2 Interface Jitter Buffer Current Packet Depth. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R5)
	MPLS/RSVP Local Node Maintenance Required Error. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R3	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R5)
	(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad).

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R5)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup..
5620 SAM 6.1 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 549206) Muti-Chassis APS for ATM VLL VC-Type ATM-VPC**. 5620 SAM does not support multi-chassis APS for use with ATM VLLs of vc-type ATM-PVC. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **PPPoE Policy PPP Authentication Protocol**. 5620 SAM does not support PPP Authentication Protocol (ppp-authentication {pap|chap|pref-chap}) for Subscriber Management PPPoE Policies. **MAF MAC Criteria**. 5620 SAM does not support Management Access Filter (MAF) MAC criteria. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R5)
	CES L2 Interface Jitter Buffer Current Packet Depth. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 213: 7710 SR 6.1 R4

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R4)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R4)
	failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the “Local Node Maintenance Required” error sub-code for MPLS/RSVP LSP path and path bindings. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R4)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R4)
5620 SAM 6.1 R3 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R4)
5620 SAM 6.1 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **MAF MAC Criteria**. 5620 SAM does not support Management Access Filter (MAF) MAC criteria. **MPLS/RSVP Local Node Maintenance Required Error**. 5620 SAM does not support the "Local Node Maintenance Required" error sub-code for MPLS/RSVP LSP path and path bindings. **Untagged RNCV Support for MC-Ring QinQ SAP**. 5620 SAM does not support untagged RNCV for MC-Ring on a QinQ SAP. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R4)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 214: 7710 SR 6.1 R3

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R3)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R3)
	OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1	Network element supported as per 5620 SAM Release Description with the following

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R3)
through R8	limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **DHCP Server Failover Support**. 5620 SAM does not support local DHCP server failover using the Multi-Chassis Sync framework. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Table 215: 7710 SR 6.1 R1 through R2

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R1 through R2)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file.

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R1 through R2)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad).

5620 SAM Release	Compatibility Statement (7710 SR 6.1 R1 through R2)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

Alcatel-Lucent 7710 Service Router Release 6.0

Table 216: 7710 SR 6.0 R18 through R19

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R18 through R19)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when “send via control plane” is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R18 through R19)
	RADIUS Disconnect-Request Statistics. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R18 through R19)
	characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R18 through R19)
	PIM Group Administrative Bandwidth. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R18 through R19)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R18 through R19)
	access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 592021) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [592021] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R18 through R19)
	indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R18 through R19)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 592021) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [592021] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R18 through R19)
	Multicast Info Policies Support. 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 592021) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [592021] **System Timing Reference Selection State.** 5620 SAM does not support the selection

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R18 through R19)
	state for system timing references. [584361] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R18 through R19)
	support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 592021) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [592021] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R18 through R19)
	PIM Group Administrative Bandwidth. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R18 through R19)
	802.3ah OAM Loop Cleared Notification. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 592021) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [592021] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R18 through R19)
	Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R18 through R19)
	BGP Purge Timer. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R3 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 592021) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [592021] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R18 through R19)
	PIM ECMP Optional Threshold Usage. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R18 through R19)
	support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **DHCP Server Operational State**. 5620 SAM does not support DHCP Server operational state. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R18 through R19)
	Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 592021) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [592021] **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R18 through R19)
	for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R18 through R19)
	VLL CAC. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 592021) Obsoleted OAM Test History Tables Parameter.** 5620 SAM cannot create new OAM tests due to the obsoletion of MIB entries for Ping and Traceroute history tables (tmnxOamPingCtlMaxRows, tmnxOamTrCtlMaxRows), a deployment failure will occur. [592021]

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R18 through R19)
	System Timing Reference Selection State. 5620 SAM does not support the selection state for system timing references. [584361] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances.**

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R18 through R19)
	5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R18 through R19)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override.** 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm.** 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes.** 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms.** 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs.** 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 217: 7710 SR 6.0 R17

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R17)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when “send via control plane” is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R17)
	Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R17)
	RADIUS Server Access Algorithm. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R17)
	PIM Group Administrative Bandwidth. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R17)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R17)
	access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **(PTS 571173) LSP Ping using ‘Any LSP’ Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a ‘Target Type’ of ‘Any LSP’ with a non-0.0.0.0 ‘Destination Path Address’ defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R17)
	indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R17)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R17)
	256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **(PTS 571173) LSP Ping using ‘Any LSP’ Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a ‘Target Type’ of ‘Any LSP’ with a non-0.0.0.0 ‘Destination Path Address’ defined. A deployment failure will result upon test deployment.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R17)
	Admin State Rules for Bundle Protection Group. 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation.** 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason.** 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth.** 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage.** 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay.** 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement.** 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control.** 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length.** 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm.** 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region.** 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap.** 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth.** 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels.** 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay.** 5620 SAM does not support the replay parameter for a

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R17)
	SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R17)
	Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R17)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R3 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **(PTS 571173) LSP Ping using ‘Any LSP’ Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a ‘Target Type’ of ‘Any LSP’ with a non-0.0.0.0 ‘Destination Path Address’ defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R17)
	PIM Group Administrative Bandwidth. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R17)
	display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **DHCP Server Operational State**. 5620 SAM does not support DHCP Server operational state. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R17)
	(PTS 550484) Subscriber Management SLA Profile Queue Override. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R17)
	256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R17)
	Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **System Timing Reference Selection State.** 5620 SAM does not support the selection state for system timing references. [584361] **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R17)
	Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R17)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R17)
	VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 218: 7710 SR 6.0 R16

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R16)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when “send via control plane” is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R16)
	Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R16)
	RADIUS Server Access Algorithm. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R16)
	ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R16)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R16)
	support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R16)
	BGP Minimum Route Advertisement. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R16)
	support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R16)
	display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R16)
	LDP Label Withdrawal Delay. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R16)
	Provider Bridge Group Address (802.1ad) MSTP Support. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R16)
	instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R16)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R3 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R16)
	Multicast Path Management Channel Support. 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R16)
	DHCP Server Operational State. 5620 SAM does not support DHCP Server operational state. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R16)
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances.**

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R16)
	5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R16)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 571173) LSP Ping using 'Any LSP' Target Type with Destination Path Address.** 5620 SAM does not support deployment of LSP Ping tests which have been configured for a 'Target Type' of 'Any LSP' with a non-0.0.0.0 'Destination Path Address' defined. A deployment failure will result upon test deployment. **Admin State Rules for Bundle Protection Group.** 5620 SAM does not support admin state changes for a Bundle Protection Group that does not have a endpoint-discriminator defined. [572549] **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R16)
	MSDP Peer Authentication Key Length. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R16)
	IEEE 802.1ah Provider Backbone Bridges. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 219: 7710 SR 6.0 R15

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R15)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R15)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R15)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R15)
	ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R15)
	support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when “send via control plane” is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R15)
	support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R15)
	which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R15)
	advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R15)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 570001) MLD Multicast Group and SSM Translation**. 5620 SAM does not support creation/deletion/modification of MLD Multicast Groups and SSM Translations for the MLD routing instance and MLD interfaces. **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R15)
	(PTS 550389) OAM ICMP Trace Test Deployment Failure. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R15)
	Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R3 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R15)
	Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **DHCP Server Operational State**. 5620 SAM does not support DHCP Server operational state. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R15)
	Provider Bridge Group Address (802.1ad) MSTP Support. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **tmnxSyncFailureReason**. 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490]

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R15)
	OAM CPE-Ping Probe Interval With Send Control. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R15)
	successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'.** 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Secondary LSP Path Shared Risk Loss Group.** 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC.** 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges.** 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support.** 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support.** 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces.** 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile.** 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces.** 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer.** 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm.** 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override.** 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm.** 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms.** 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs.** 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **tmnxSyncFailureReason.** 5620 SAM does not support tmnxSyncFailureReason indicating the reason for CPM configuration and boot-env synchronization failures. **PIM Group Administrative Bandwidth.** 5620 SAM does not support display of the PIM

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R15)
	Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R15)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R15)
	VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 220: 7710 SR 6.0 R14

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R14)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R14)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R14)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when “send via control plane” is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R14)
	for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R14)
	BGP Minimum Route Advertisement. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set"

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R14)
	Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R14)
	SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when “send via control plane” is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R14)
	instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R14)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R3 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R14)
	(PTS 550389) OAM ICMP Trace Test Deployment Failure. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **DHCP Server Operational State**. 5620 SAM does not support DHCP Server operational state. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R14)
	support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth**. 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage**. 5620 SAM does not support display of the PIM ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490]

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R14)
	OAM CPE-Ping Probe Interval With Send Control. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R14)
	successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'.** 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Secondary LSP Path Shared Risk Loss Group.** 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC.** 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges.** 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support.** 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support.** 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces.** 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile.** 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces.** 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer.** 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm.** 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override.** 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm.** 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms.** 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs.** 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Group Administrative Bandwidth.** 5620 SAM does not support display of the PIM Group administrative bandwidth. **PIM ECMP Optional Threshold Usage.** 5620 SAM does not support display of the PIM

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R14)
	ECMP optional threshold usage. **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R14)
	Static Route to RSVP-TE. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R14)
	such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 221: 7710 SR 6.0 R13

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R13)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad).

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R13)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R13)
	Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R13)
	support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when “send via control plane” is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R13)
	algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance,

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R13)
	BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R13)
	tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R13)
	daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R3 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R13)
	Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R13)
	Ingress/Egress P-chip Error Rate Threshold. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **DHCP Server Operational State**. 5620 SAM does not support DHCP Server operational state. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R13)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when “send via control plane” is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R13)
	CES DS1/E1 Clock State Change Trap. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R13)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R13)
	daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R13)
	tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 222: 7710 SR 6.0 R12

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R12)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R12)
	tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R12)
	support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R12)
	802.3ah OAM Loop Cleared Notification. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R12)
	access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when “send via control plane” is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R12)
	for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R12)
	support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R12)
	display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R3 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when “send via control plane” is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R12)
	for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **DHCP Server Operational State**. 5620 SAM does not support DHCP Server operational state. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R12)
	Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R12)
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R12)
	RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R12)
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **BGP Minimum Route Advertisement**. 5620 SAM does not support the the min route-advertisement value of 1. This restriction is applicable to the BGP routing instance, BGP Peer Group and the BGP Peer on the base routing instance and VPRN services. [559490] **OAM CPE-Ping Probe Interval With Send Control**. 5620 SAM does not support cpe-ping with a probe interval less than 5 when "send via control plane" is enabled. **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R12)
	Static Route to RSVP-TE. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R12)
	such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 223: 7710 SR 6.0 R11

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R11)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R11)
	such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R11)
through R8	limitations: **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **Multicast Path Management Channel Support.** 5620 SAM provides read-only support

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R11)
	of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Multicast Path Management Channel Support.** 5620 SAM provides read-only support

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R11)
	of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R11)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R11)
	SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R3 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R11)
	SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **DHCP Server Operational State**. 5620 SAM does not support DHCP Server operational state. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R11)
	Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R11)
	(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R11)
	TACACS+/RADIUS Template User Profile. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Multicast Path Management Channel Support.** 5620 SAM provides read-only support of multicast path management channels for 7710 SR VPRN services and routing instances. **Multicast Info Policies Support.** 5620 SAM does not support Multicast Info Policies for 7710 SR VPRN services and routing instances. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 550389) OAM ICMP Trace Test Deployment Failure**. 5620 SAM does not support OAM ICMP Trace test desployment which results in a deployment failure. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R11)
	Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R11)
	MC-Ring Debounce Timer. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 224: 7710 SR 6.0 R10

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R10)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R10)
	the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R10)
	SNMP Trap Target Replay. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R10)
	support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R10)
	(PTS 550484) Subscriber Management SLA Profile Queue Override. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R10)
	Provider Bridge Group Address (802.1ad) MSTP Support. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R3 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R10)
	Ingress/Egress P-chip Error Rate Threshold. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **DHCP Server Operational State**. 5620 SAM does not support DHCP Server operational state. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R10)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R10)
	IEEE 802.1ah Provider Backbone Bridges. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **PIP STP Inside Same MST Region**. 5620 SAM does not support tlsPipStpInsideRegion

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R10)
	which indicates whether the network connected to a PIP (Provider Internal Port) is in the same MST region. **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R10)
	(PTS 550484) Subscriber Management SLA Profile Queue Override. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm.** 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes.** 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms.** 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs.** 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 225: 7710 SR 6.0 R9

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R9)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R9)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R9)
	CES L2 Interface Jitter Buffer Current Packet Depth. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support ‘tmnxDSXClockSyncStateChange’ trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R9)
	IOM Card FIB and FIB Next-Hop Statistics. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R3 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **DHCP Server Operational State**. 5620 SAM does not support DHCP Server operational state.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R9)
	RADIUS Disconnect-Request Statistics. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R9)
	'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set"

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R9)
	Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive or differential clock recovery. **CES L2 Interface Jitter Buffer Current Packet Depth**. 5620 SAM does not support display of the jitter buffer current packet depth for a CES L2 Interface. **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R9)
	IP-MTU Support for IES/VPRN Redundant Interfaces. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 226: 7710 SR 6.0 R7 through R8

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R7 through R8)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R7 through R8)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R7 through R8)
	RSVP Overhead Refresh Reduction Over Bypass Tunnels. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R3 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R7 through R8)
	BGP Purge Timer. 5620 SAM does not support BGP Purge Timer. **DHCP Server Operational State**. 5620 SAM does not support DHCP Server operational state. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R7 through R8)
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R7 through R8)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **RSVP Overhead Refresh Reduction Over Bypass Tunnels**. 5620 SAM does not support RSVP overhead refresh reduction over bypass tunnels. **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R7 through R8)
	tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 227: 7710 SR 6.0 R6

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R6)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R6)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R6)
	and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R3 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **DHCP Server Operational State**. 5620 SAM does not support DHCP Server operational state. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R6)
	support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R6)
	Secondary LSP Path Shared Risk Loss Group. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R6)
	successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'.** 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Secondary LSP Path Shared Risk Loss Group.** 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC.** 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges.** 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support.** 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support.** 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces.** 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile.** 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces.** 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer.** 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm.** 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override.** 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm.** 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes.** 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms.** 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs.** 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 228: 7710 SR 6.0 R5

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R5)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R5)
	tmnxCpmCardSyncFileNotPresent Alarm. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R5)
	and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R3 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SNMP Trap Target Replay**. 5620 SAM does not support the replay parameter for a SNMP trap-target. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **BGP Purge Timer**. 5620 SAM does not support BGP Purge Timer. **DHCP Server Operational State**. 5620 SAM does not support DHCP Server operational state. **RADIUS Disconnect-Request Statistics**. 5620 SAM does not support RADIUS Disconnect-Request Statistics for Subscriber Management. **IOM Card FIB and FIB Next-Hop Statistics**. 5620 SAM does not support the active and available number of FIB and FIB next-hop entries for an IOM Card. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R5)
	support the operational flag 'Out of Resource' for Service Tunnel Bindings. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R5)
	Secondary LSP Path Shared Risk Loss Group. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R5)
	successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag 'Out of Resource'.** 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Secondary LSP Path Shared Risk Loss Group.** 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC.** 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges.** 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support.** 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support.** 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces.** 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile.** 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces.** 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer.** 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm.** 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override.** 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm.** 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes.** 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms.** 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs.** 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 229: 7710 SR 6.0 R4

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R4)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R4)
	PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R3 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Service Tunnel Binding Operational Flag 'Out of Resource'**. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R4)
	VLL CAC. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths. **Service Tunnel Binding Operational Flag ‘Out of Resource’**. 5620 SAM does not support the operational flag ‘Out of Resource’ for Service Tunnel Bindings. **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R4)
	Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Static Route to RSVP-TE**. 5620 SAM does not support forwarding IP traffic into an RSVP-TE LSP for static routes. **802.3ah OAM Loop Cleared Notification**. 5620 SAM does not support the 802.3ah OAM loop cleared notification indicating when the port is no longer receiving 802.3ah PDUs with a matching source MAC address. **Latest Successful LSP Path MBB and MBB Type**. 5620 SAM does not support latest successful MBB and MBB type for LSP paths.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R4)
	Service Tunnel Binding Operational Flag 'Out of Resource'. 5620 SAM does not support the operational flag 'Out of Resource' for Service Tunnel Bindings. **Secondary LSP Path Shared Risk Loss Group.** 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC.** 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges.** 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support.** 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support.** 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces.** 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile.** 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces.** 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer.** 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm.** 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override.** 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm.** 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes.** 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms.** 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs.** 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 230: 7710 SR 6.0 R3

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R3)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set"

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R3)
	Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R3 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R3)
	synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R3)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Secondary LSP Path Shared Risk Loss Group**. 5620 SAM does not support Shared Risk Loss Group (SRLG) for secondary LSP paths. **VLL CAC**. 5620 SAM does not support VLL CAC. **IEEE 802.1ah Provider Backbone Bridges**. 5620 SAM does not support IEEE 802.1ah Provider Backbone Bridges (PBB). **L2PT Protocol Support**. 5620 SAM does not support L2PT protocols CDP, DTP, PAGP, UDLD and VTP for VPLS / I-VPLS services. **Provider Bridge Group Address (802.1ad) MSTP Support**. 5620 SAM does not support MSTP for Provider Bridge Group Address (802.1ad). **MSTP Support for QinQ L2/L3 Interfaces**. 5620 SAM does not support MSTP for QinQ L2/L3 Interfaces. **TACACS+/RADIUS Template User Profile**. 5620 SAM does not support default user profile for TACACS+/RADIUS template user. **IP-MTU Support for IES/VPRN Redundant Interfaces**. 5620 SAM does not support IP-MTU for IES/VPRN redundant interfaces. **MC-Ring Debounce Timer**. 5620 SAM does not support Debounce Timer for MC-Ring. **tmnxCpmCardSyncFileNotPresent Alarm**. 5620 SAM does not support the tmnxCpmCardSyncFileNotPresent alarm indicating that the redundancy file synchronization failed to locate an optional file. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R3)
	DHCP Relay Subscriber Identification using Option 82 VSOs. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 231: 7710 SR 6.0 R2

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R2)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 535281) 5620 SAM NE-Schedulable/NE-Persistent STM Test Removal**. Upon a full re-synchronization, 7750/7450/7710 6.0 R2 routers may not provide MIB entries on a NE Schedulable or NE Persistent STM test, which may result in 5620 SAM removing tests. Recommendation: Perform manual tests by using regular OAM tests invoked from 5620 SAM. 6.0 R3, and later versions of the router resolve the problem as per the Resolved Issues section of the 7750 SR /7450 ESS /7710 SR 6.0.R3 Software Release Notes. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 535281) 5620 SAM NE-Schedulable/NE-Persistent STM Test Removal**. Upon a full re-synchronization, 7750/7450/7710 6.0 R2 routers may not provide MIB entries on a NE Schedulable or NE Persistent STM test, which may result in 5620 SAM removing tests. Recommendation: Perform manual tests by using regular OAM tests invoked from 5620 SAM. 6.0 R3, and later versions of the router resolve the problem as per the Resolved Issues section of the 7750 SR /7450 ESS /7710 SR 6.0.R3 Software Release Notes. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 535281) 5620 SAM NE-Schedulable/NE-Persistent STM Test Removal**. Upon a full re-synchronization, 7750/7450/7710 6.0 R2 routers may not provide MIB entries on a NE Schedulable or NE Persistent STM test, which may result in 5620 SAM removing tests. Recommendation: Perform manual tests by using regular OAM tests invoked from 5620 SAM. 6.0 R3, and later versions of the router resolve the problem as per the Resolved Issues section of the 7750 SR /7450 ESS /7710 SR 6.0.R3 Software Release Notes. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R2)
	such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 535281) 5620 SAM NE-Schedulable/NE-Persistent STM Test Removal**. Upon a full re-synchronization, 7750/7450/7710 6.0 R2 routers may not provide MIB entries on a NE Schedulable or NE Persistent STM test, which may result in 5620 SAM removing tests. Recommendation: Perform manual tests by using regular OAM tests invoked from 5620 SAM. 6.0 R3, and later versions of the router resolve the problem as per the Resolved Issues section of the 7750 SR /7450 ESS /7710 SR 6.0.R3 Software Release Notes. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R2 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 535281) 5620 SAM NE-Schedulable/NE-Persistent STM Test Removal**. Upon a full re-synchronization, 7750/7450/7710 6.0 R2 routers may not provide MIB entries on a NE Schedulable or NE Persistent STM test, which may result in 5620 SAM removing tests. Recommendation: Perform manual tests by using regular OAM tests invoked from 5620 SAM. 6.0 R3, and later versions of the router resolve the problem as per the Resolved Issues section of the 7750 SR /7450 ESS /7710 SR 6.0.R3 Software Release Notes. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 535281) 5620 SAM NE-Schedulable/NE-Persistent STM Test Removal**. Upon a full re-synchronization, 7750/7450/7710 6.0 R2 routers may not provide MIB entries on a NE Schedulable or NE Persistent STM test, which may result in 5620 SAM

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R2)
	removing tests. Recommendation: Perform manual tests by using regular OAM tests invoked from 5620 SAM. 6.0 R3, and later versions of the router resolve the problem as per the Resolved Issues section of the 7750 SR /7450 ESS /7710 SR 6.0.R3 Software Release Notes. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Table 232: 7710 SR 6.0 R1

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R1)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.
5620 SAM 6.0 R2 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile.

5620 SAM Release	Compatibility Statement (7710 SR 6.0 R1)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.
5620 SAM 6.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

Alcatel-Lucent 7710 Service Router Release 5.0

Table 233: 7710 SR 5.0 R23 through R25

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R23 through R25)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy ‘User Name Format’**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User Name Format’ under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R23 through R25)
	OAM Forwarding Class Specification. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy ‘User Name Format’**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User Name Format’ under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R23 through R25)
	OAM Forwarding Class Specification. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy ‘User Name Format’**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User Name Format’ under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R23 through R25)
	Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R23 through R25)
	not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R1 through R6	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R23 through R25)
	P-chip Memory Parity Error Alarm. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy ‘User Name Format’**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User Name Format’ under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R23 through R25)
	support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R23 through R25)
	Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R23 through R25)
	RADIUS Server Access Algorithm. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode ‘lspFlowControlled (23)’ reason for LSP Path and LSP Crossconnect failure. **Service Tunnel ‘Labels Exhausted’ State Cause**. 5620 SAM does not support the operational state cause “Label Manager has run out of labels” for Service Tunnels.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R23 through R25)
	Subscriber Authentication Policy 'User Name Format'. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **LDP Label Withdrawal Delay**. 5620 SAM does not support configuration of LDP Label Withdrawal Delay. **MSDP Peer Authentication Key Length**. 5620 SAM does not support the maximum 256 character length for MSDP Peer Authentication Key and is limited to 255 characters. **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R23 through R25)
	interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode ‘lspFlowControlled (23)’ reason for LSP Path and LSP Crossconnect failure. **Service Tunnel ‘Labels Exhausted’ State Cause**. 5620 SAM does not support the operational state cause “Label Manager has run out of labels” for Service Tunnels. **Subscriber Authentication Policy ‘User Name Format’**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User Name Format’ under Subscriber Authentication Policies. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support “port speed not compatible”, “port duplex not compatible” and “port ingress rate not compatible” alarms for GigE Daughtercard Field Replacements of a Rev. B

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R23 through R25)
	Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R23 through R25)
	Increased Description Field Lengths. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.
5620 SAM 5.0 R1 through R2	Network element not supported. 5620 SAM does not support management of this router version.

Table 234: 7710 SR 5.0 R22

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R22)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R4	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R22)
through R8	**RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R22)
	interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy ‘User Name Format’**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User Name Format’ under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R22)
5620 SAM 6.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy ‘User Name Format’**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User Name Format’ under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R22)
	support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R1 through R6	Network element supported as per 5620 SAM Release Description with the following limitations: **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R22)
	VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R22)
	LAG Port Add Failure Cleared Notification. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R22)
	subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39).

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R22)
	Flow Controlled MPLS/LSP Failure State. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **RADIUS Server Access Algorithm**. 5620 SAM does not support RADIUS server access algorithm which determines the method used (round robin, direct) for RADIUS server access. **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R22)
	Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode ‘lspFlowControlled (23)’ reason for LSP Path and LSP Crossconnect failure. **Service Tunnel ‘Labels Exhausted’ State Cause**. 5620 SAM does not support the operational state cause “Label Manager has run out of labels” for Service Tunnels. **Subscriber Authentication Policy ‘User Name Format’**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User Name Format’ under Subscriber Authentication Policies. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support “port speed not compatible”, “port duplex not compatible” and “port ingress rate not compatible” alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R22)
	MPLS Instance Down Reason. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R22)
	LACP Tunneling. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.
5620 SAM 5.0 R1 through R2	Network element not supported. 5620 SAM does not support management of this router version.

Table 235: 7710 SR 5.0 R21

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R21)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R21)
	Redundant Interface IP MTU. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R1 through R3	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R21)
	addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R21)
	Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R1 through R6	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R21)
	SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy ‘User Name Format’**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User Name Format’ under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R21)
	specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39).

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R21)
	Flow Controlled MPLS/LSP Failure State. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R21)
	Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R21)
	such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 547867) VRRP Configuration Failure for Router / IES / VPRN Interfaces**. 5620 SAM does not support configuration of VRRP parameters for router interfaces, IES interfaces and VPRN interfaces. **P-chip Memory Parity Error Alarm**. 5620 SAM does not support P-chip memory parity error alarm (tmnxEqCardPChipMemoryEvent) for cards and daughtercards. **Transmit XPL Error, P-chip FCS Error and P-chip Memory Parity Error Occurances**. 5620 SAM does not support the number of occurances and last occurance of Transmit XPL errors, P-chip FCS errors and P-chip memory parity errors for cards and daughtercards. **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R21)
	test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R21)
	LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.
5620 SAM 5.0 R1 through R2	Network element not supported. 5620 SAM does not support management of this router version.

Table 236: 7710 SR 5.0 R16 through R20

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R16 through R20)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R1	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R16 through R20)
through R8	**LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R16 through R20)
	exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R16 through R20)
	exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R16 through R20)
	specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode ‘lspFlowControlled (23)’ reason for LSP Path and LSP Crossconnect failure. **Service Tunnel ‘Labels Exhausted’ State Cause**. 5620 SAM does not support the operational state cause “Label Manager has run out of labels” for Service Tunnels. **Subscriber Authentication Policy ‘User Name Format’**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User Name Format’ under Subscriber Authentication Policies. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support “port

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R16 through R20)
	speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Ingress/Egress P-chip Error Rate Threshold**. 5620 SAM does not support Ingress/Egress P-chip Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **Transmit XPL Data Error Rate Threshold**. 5620 SAM does not support Transmit XPL Data Error Rate for Cards and Daughtercards, including threshold exceeded alarms. **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R16 through R20)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R16 through R20)
	Manual Bypass Tunnels. 5620 SAM does not support Manual Bypass Tunnels. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.
5620 SAM 5.0 R1 through R2	Network element not supported. 5620 SAM does not support management of this router version.

Table 237: 7710 SR 5.0 R15

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R15)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R1	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R15)
through R8	**LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R15)
	addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R15)
	addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R15)
	of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R15)
	Subscriber Management Persistence Event Report Alarms. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **LAG Port Add Failure Cleared Notification**. 5620 SAM does not support the tLagPortAddFailureCleared notification indicating that the condition preventing addition of a port to a LAG has been resolved. **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode ‘lspFlowControlled (23)’ reason for LSP Path and LSP Crossconnect failure. **Service Tunnel ‘Labels Exhausted’ State Cause**. 5620 SAM does not support the operational state cause “Label Manager has run out of labels” for Service Tunnels. **Subscriber Authentication Policy ‘User Name Format’**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User Name Format’ under Subscriber Authentication Policies. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support “port speed not compatible”, “port duplex not compatible” and “port ingress rate not

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R15)
	compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R15)
	router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.
5620 SAM 5.0 R1 through R2	Network element not supported. 5620 SAM does not support management of this router version.

Table 238: 7710 SR 5.0 R14

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R14)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R1	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R14)
through R8	**Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39).

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R14)
	Subscriber Authentication Policy 'User Name Format'. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R14)
	Service Tunnel 'Labels Exhausted' State Cause. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39).

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R14)
	Flow Controlled MPLS/LSP Failure State. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Redundant Interface IP MTU**. 5620 SAM does not support configuration of IP MTU for IES and VPRN Service Redundant Interfaces. **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R14)
	tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R14)
	Subscriber Routed Redundancy Protocol. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.
5620 SAM 5.0 R1 through R2	Network element not supported. 5620 SAM does not support management of this router version.

Table 239: 7710 SR 5.0 R13

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R13)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39).

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R13)
	Subscriber Authentication Policy 'User Name Format'. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason.** 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance.** 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging.** 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms.** 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification.** 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces.** 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550484) Subscriber Management SLA Profile Queue Override.** 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm.** 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes.** 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'.** 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason.** 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance.** 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging.** 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms.** 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R13)
	OAM Forwarding Class Specification. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R13)
	OAM Forwarding Class Specification. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R13)
	policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP Instance Master and Backup Traps**. 5620 SAM does not support the tmnxSrrpTrapNewMaster and tmnxSrrpBecameBackup traps. Manual resync may be required to update the SRRP Instance state. **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of “no flow-label” (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the “System IP Not Set” Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode ‘lspFlowControlled (23)’ reason for LSP Path and LSP Crossconnect failure. **Service Tunnel ‘Labels Exhausted’ State Cause**. 5620 SAM does not support the operational state cause “Label Manager has run out of labels” for Service Tunnels. **Subscriber Authentication Policy ‘User Name Format’**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for ‘User Name Format’ under Subscriber Authentication Policies. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support “port speed not compatible”, “port duplex not compatible” and “port ingress rate not compatible” alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R13)
	MPLS Instance Down Reason. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R13)
	LACP Tunneling. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.
5620 SAM 5.0 R1 through R2	Network element not supported. 5620 SAM does not support management of this router version.

Table 240: 7710 SR 5.0 R12

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R12)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39).

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R12)
	Subscriber Authentication Policy 'User Name Format'. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason.** 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance.** 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging.** 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms.** 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification.** 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces.** 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 550484) Subscriber Management SLA Profile Queue Override.** 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm.** 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes.** 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'.** 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason.** 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance.** 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging.** 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms.** 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R12)
	OAM Forwarding Class Specification. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R12)
	DHCP Relay Subscriber Identification using Option 82 VSOs. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R12)
	specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **CPM Filter IPv6 Entry Flow Label**. 5620 SAM does not support configuration of "no flow-label" (value -1) for CPM Filter IPv6 entries. **(PTS 550484) Subscriber Management SLA Profile Queue Override**. 5620 SAM does not support override of a policed queue used in a Subscriber Management SLA Profile. **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R12)
	Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R12)
5620 SAM 5.0 R1 through R2	Network element not supported. 5620 SAM does not support management of this router version.

Table 241: 7710 SR 5.0 R11

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R11)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R11)
	MPLS Instance Down Reason. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R11)
	ACL IPv6 Filters on F-Pipe L2 Interfaces. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations:

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R11)
	SRRP System IP Not Set Alarm. 5620 SAM does not support the "System IP Not Set" Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **SRRP System IP Not Set Alarm**. 5620 SAM does not support the "System IP Not Set"

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R11)
	Alarm for SRRP. **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R11)
	Manual Bypass Tunnels. 5620 SAM does not support Manual Bypass Tunnels. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.
5620 SAM 5.0 R1 through R2	Network element not supported. 5620 SAM does not support management of this router version.

Table 242: 7710 SR 5.0 R10

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R10)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R10)
	service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R10)
	test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39).

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R10)
	Flow Controlled MPLS/LSP Failure State. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Flow Controlled MPLS/LSP Failure State**. 5620 SAM does not support the TmnxMplsLspFailCode 'lspFlowControlled (23)' reason for LSP Path and LSP

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R10)
	Crossconnect failure. **Service Tunnel 'Labels Exhausted' State Cause**. 5620 SAM does not support the operational state cause "Label Manager has run out of labels" for Service Tunnels. **Subscriber Authentication Policy 'User Name Format'**. 5620 SAM does not support the ASCII-Converted Circuit-ID or ASCII-Converted Both (Tuple) settings for 'User Name Format' under Subscriber Authentication Policies. **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R10)
	Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.
5620 SAM 5.0 R1 through R2	Network element not supported. 5620 SAM does not support management of this router version.

Table 243: 7710 SR 5.0 R5 through R9

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R5 through R9)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R5 through R9)
	OAM Forwarding Class Specification. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R5 through R9)
	support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support “port speed not compatible”, “port duplex not compatible” and “port ingress rate not compatible” alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39).

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R5 through R9)
	GigE Daughtercard Field Replacement Alarms. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **MD5 Authentication of RSVP Interface**. 5620 SAM does not support MD5 Authentication of RSVP Interfaces. **MPLS Instance Down Reason**. 5620 SAM does not support Down Reason for a MPLS Instance that is operationally down. **Inclusion/Suppression of DN bit for VPRN OSPF Instance**. 5620 SAM does not support inclusion/suppression of the DN bit for the OSPF instance under a VPRN service. **ATM QoS Policy CLP Tagging**. 5620 SAM does not support CLP Tagging for ATM QoS policies used by IES or VPRN ATM-based L3 Interfaces. **Transport Tunnel Unstable Operating Flag**. 5620 SAM does not support the Transport Tunnel Unstable operating flag on Service Tunnels. **Subscriber Management Persistence Event Report Alarms**. 5620 SAM does not support the Subscriber Manager Persistence Event Report alarms indicating events such as start and completion of a recover action after system startup. **OAM Forwarding Class Specification**. 5620 SAM does not support forwarding class specification for mac-ping, mac-trace, cpe-ping, vprn-ping and vprn-trace. **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R5 through R9)
	Interface Delay Timers. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.
5620 SAM 5.0 R1 through R2	Network element not supported. 5620 SAM does not support management of this router version.

Table 244: 7710 SR 5.0 R4

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R4)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R5 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R4)
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Subscriber Routed Redundancy Protocol**. 5620 SAM does not support Subscriber Routed Redundancy Protocol (SRRP). **DHCP Relay Subscriber Identification using Option 82 VSOs**. 5620 SAM does not support DHCP Relay Subscriber Identification using Option 82 VSOs on VPRN subscriber interfaces. **Class-based Forwarding over RSVP LSPs**. 5620 SAM does not support Class-based Forwarding over RSVP LSPs. **Manual Bypass Tunnels**. 5620 SAM does not support Manual Bypass Tunnels. **LAG Hold Up Timer**. 5620 SAM does not support configuration of Hold Up Timer on LAG Primary Member. **Unnumbered IP Interfaces on IES/VPRN**. 5620 SAM does not support Unnumbered IP Interfaces for IES and VPRN services. **QinQ Encapsulated SAP Support for Efficient EMR**. 5620 SAM does not support QinQ Encapsulation on SAPs with Efficient Egress Multicast Replication (EMR). **MCS Extension to Maintain MVR State**. 5620 SAM does not support the Multi-Chassis Synchronization (MCS) extension to maintain the state for Multicast VPLS Registration (MVR). **Network Queue Policy CIR/PIR Adaptation Rules**. 5620 SAM does not support configuration of CIR/PIR Adaptation Rules on Network Queue Policies. **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R4)
5620 SAM 5.0 R1 through R2	Network element not supported. 5620 SAM does not support management of this router version.

Table 245: 7710 SR 5.0 R3

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R3)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R3)
	router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R5 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces.
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM Test Octet Size Range Changes**. 5620 SAM does not support the increased OAM test octet size range values for MFIB ping (values 1-39), VPRN ping (values 1-39) and VPRN trace (values 1-39). **Interface Delay Timers**. 5620 SAM does not support delay timer configuration for router and VPRN interfaces. **Increased Description Field Lengths**. 5620 SAM does not support increased description field lengths for Ports, LAGs, router interfaces, IES interfaces and VPRN interfaces. **LACP Tunneling**. 5620 SAM does not support LACP Tunnel configuration for ethernet ports. **ACL IPv6 Filters on F-Pipe L2 Interfaces**. 5620 SAM does not support configuration of ACL IPv6 Filters on F-Pipe L2 Interfaces. **RADIUS Template User Account**. 5620 SAM does not support RADIUS Template User Account configuration.

5620 SAM Release	Compatibility Statement (7710 SR 5.0 R3)
5620 SAM 5.0 R1 through R2	Network element not supported. 5620 SAM does not support management of this router version.

Alcatel-Lucent 7710 Service Router Release 3.0

Table 246: 7710 SR 3.0 R13 through R15

5620 SAM Release	Compatibility Statement (7710 SR 3.0 R13 through R15)
5620 SAM 7.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **TDM DS3/E3/DS0 Channel Network Accounting Policy and Collect-Stats**. 5620 SAM does not support Accounting Policy or Collect-Stats parameters for TDM DS3/E3/DS0 Channels. **TDM DS3/E3/DS0 Channel MTU**. 5620 SAM does not support MTU values in the range [4475..9208] for TDM DS3/E3/DS0 channels. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **TDM DS3/E3/DS0 Channel Network Accounting Policy and Collect-Stats**. 5620 SAM does not support Accounting Policy or Collect-Stats parameters for TDM DS3/E3/DS0 Channels. **TDM DS3/E3/DS0 Channel MTU**. 5620 SAM does not support MTU values in the range [4475..9208] for TDM DS3/E3/DS0 channels. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.
5620 SAM 5.0 R6 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **TDM DS3/E3/DS0 Channel Network Accounting Policy and Collect-Stats**. 5620 SAM does not support Accounting Policy or Collect-Stats parameters for TDM DS3/E3/DS0 Channels. **TDM DS3/E3/DS0 Channel MTU**. 5620 SAM does not support MTU values in the range [4475..9208] for TDM DS3/E3/DS0 channels. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.

5620 SAM Release	Compatibility Statement (7710 SR 3.0 R13 through R15)
5620 SAM 5.0 R2 through R5	Network element supported as per 5620 SAM Release Description with the following limitations: **GigE Daughtercard Field Replacement Alarms**. 5620 SAM does not support "port speed not compatible", "port duplex not compatible" and "port ingress rate not compatible" alarms for GigE Daughtercard Field Replacements of a Rev. B Daughtercard with a non-Rev. B Daughtercard. **TDM DS3/E3/DS0 Channel Network Accounting Policy and Collect-Stats**. 5620 SAM does not support Accounting Policy or Collect-Stats parameters for TDM DS3/E3/DS0 Channels. **TDM DS3/E3/DS0 Channel MTU**. 5620 SAM does not support MTU values in the range [4475..9208] for TDM DS3/E3/DS0 channels. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.
5620 SAM 5.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **TDM DS3/E3/DS0 Channel Network Accounting Policy and Collect-Stats**. 5620 SAM does not support Accounting Policy or Collect-Stats parameters for TDM DS3/E3/DS0 Channels. **TDM DS3/E3/DS0 Channel MTU**. 5620 SAM does not support MTU values in the range [4475..9208] for TDM DS3/E3/DS0 channels. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.
5620 SAM 4.0 R3 through R12	Network element supported as per 5620 SAM Release Description with the following limitations: **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **TDM DS3/E3/DS0 Channel Network Accounting Policy and Collect-Stats**. 5620 SAM does not support Accounting Policy or Collect-Stats parameters for TDM DS3/E3/DS0 Channels. **TDM DS3/E3/DS0 Channel MTU**. 5620 SAM does not support MTU values in the range [4475..9208] for TDM DS3/E3/DS0 channels. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.....

5620 SAM Release	Compatibility Statement (7710 SR 3.0 R13 through R15)
5620 SAM 4.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **TDM DS3/E3/DS0 Channel Network Accounting Policy and Collect-Stats**. 5620 SAM does not support Accounting Policy or Collect-Stats parameters for TDM DS3/E3/DS0 Channels. **TDM DS3/E3/DS0 Channel MTU**. 5620 SAM does not support MTU values in the range [4475..9208] for TDM DS3/E3/DS0 channels. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello..... **(PTS 503779) OAM Test Execution**: 5620 SAM does not support the SDP ping or LSP ping operations.

Table 247: 7710 SR 3.0 R9 through R12

5620 SAM Release	Compatibility Statement (7710 SR 3.0 R9 through R12)
5620 SAM 7.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **TDM DS3/E3/DS0 Channel Network Accounting Policy and Collect-Stats**. 5620 SAM does not support Accounting Policy or Collect-Stats parameters for TDM DS3/E3/DS0 Channels. **TDM DS3/E3/DS0 Channel MTU**. 5620 SAM does not support MTU values in the range [4475..9208] for TDM DS3/E3/DS0 channels. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **TDM DS3/E3/DS0 Channel Network Accounting Policy and Collect-Stats**. 5620 SAM does not support Accounting Policy or Collect-Stats parameters for TDM DS3/E3/DS0 Channels. **TDM DS3/E3/DS0 Channel MTU**. 5620 SAM does not support MTU values in the range [4475..9208] for TDM DS3/E3/DS0 channels. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.
5620 SAM 5.0 R2 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **TDM DS3/E3/DS0 Channel Network Accounting Policy and Collect-Stats**. 5620 SAM does not support Accounting Policy or Collect-Stats parameters for TDM DS3/E3/DS0 Channels. **TDM DS3/E3/DS0 Channel MTU**. 5620 SAM does not support MTU values in the range [4475..9208] for TDM DS3/E3/DS0 channels. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.

5620 SAM Release	Compatibility Statement (7710 SR 3.0 R9 through R12)
5620 SAM 5.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **TDM DS3/E3/DS0 Channel Network Accounting Policy and Collect-Stats**. 5620 SAM does not support Accounting Policy or Collect-Stats parameters for TDM DS3/E3/DS0 Channels. **TDM DS3/E3/DS0 Channel MTU**. 5620 SAM does not support MTU values in the range [4475..9208] for TDM DS3/E3/DS0 channels. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.
5620 SAM 4.0 R3 through R12	Network element supported as per 5620 SAM Release Description with the following limitations: **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **TDM DS3/E3/DS0 Channel Network Accounting Policy and Collect-Stats**. 5620 SAM does not support Accounting Policy or Collect-Stats parameters for TDM DS3/E3/DS0 Channels. **TDM DS3/E3/DS0 Channel MTU**. 5620 SAM does not support MTU values in the range [4475..9208] for TDM DS3/E3/DS0 channels. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.....
5620 SAM 4.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **GigE Daughtercard Field Replacement**. 5620 SAM does not support GigE Daughtercard Field Replacements. **TDM DS3/E3/DS0 Channel Network Accounting Policy and Collect-Stats**. 5620 SAM does not support Accounting Policy or Collect-Stats parameters for TDM DS3/E3/DS0 Channels. **TDM DS3/E3/DS0 Channel MTU**. 5620 SAM does not support MTU values in the range [4475..9208] for TDM DS3/E3/DS0 channels. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello..... **(PTS 503779) OAM Test Execution**: 5620 SAM does not support the SDP ping or LSP

5620 SAM Release	Compatibility Statement (7710 SR 3.0 R9 through R12)
	ping operations.

Table 248: 7710 SR 3.0 R8

5620 SAM Release	Compatibility Statement (7710 SR 3.0 R8)
5620 SAM 7.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **TDM DS3/E3/DS0 Channel Network Accounting Policy and Collect-Stats**. 5620 SAM does not support Accounting Policy or Collect-Stats parameters for TDM DS3/E3/DS0 Channels. **TDM DS3/E3/DS0 Channel MTU**. 5620 SAM does not support MTU values in the range [4475..9208] for TDM DS3/E3/DS0 channels. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **TDM DS3/E3/DS0 Channel Network Accounting Policy and Collect-Stats**. 5620 SAM does not support Accounting Policy or Collect-Stats parameters for TDM DS3/E3/DS0 Channels. **TDM DS3/E3/DS0 Channel MTU**. 5620 SAM does not support MTU values in the range [4475..9208] for TDM DS3/E3/DS0 channels. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.
5620 SAM 5.0 R1 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **TDM DS3/E3/DS0 Channel Network Accounting Policy and Collect-Stats**. 5620 SAM does not support Accounting Policy or Collect-Stats parameters for TDM DS3/E3/DS0 Channels. **TDM DS3/E3/DS0 Channel MTU**. 5620 SAM does not support MTU values in the range [4475..9208] for TDM DS3/E3/DS0 channels. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.

5620 SAM Release	Compatibility Statement (7710 SR 3.0 R8)
5620 SAM 4.0 R3 through R12	Network element supported as per 5620 SAM Release Description with the following limitations: **TDM DS3/E3/DS0 Channel Network Accounting Policy and Collect-Stats**. 5620 SAM does not support Accounting Policy or Collect-Stats parameters for TDM DS3/E3/DS0 Channels. **TDM DS3/E3/DS0 Channel MTU**. 5620 SAM does not support MTU values in the range [4475..9208] for TDM DS3/E3/DS0 channels. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.....
5620 SAM 4.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **TDM DS3/E3/DS0 Channel Network Accounting Policy and Collect-Stats**. 5620 SAM does not support Accounting Policy or Collect-Stats parameters for TDM DS3/E3/DS0 Channels. **TDM DS3/E3/DS0 Channel MTU**. 5620 SAM does not support MTU values in the range [4475..9208] for TDM DS3/E3/DS0 channels. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello..... **(PTS 503779) OAM Test Execution**: 5620 SAM does not support the SDP ping or LSP ping operations.

Table 249: 7710 SR 3.0 R7

5620 SAM Release	Compatibility Statement (7710 SR 3.0 R7)
5620 SAM 7.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **TDM DS3/E3/DS0 Channel MTU**. 5620 SAM does not support MTU values in the range [4475..9208] for TDM DS3/E3/DS0 channels. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **TDM DS3/E3/DS0 Channel MTU**. 5620 SAM does not support MTU values in the range [4475..9208] for TDM DS3/E3/DS0 channels. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.
5620 SAM 5.0 R1 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **TDM DS3/E3/DS0 Channel MTU**. 5620 SAM does not support MTU values in the range [4475..9208] for TDM DS3/E3/DS0 channels. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.
5620 SAM 4.0 R3 through R12	Network element supported as per 5620 SAM Release Description with the following limitations: **TDM DS3/E3/DS0 Channel MTU**. 5620 SAM does not support MTU values in the range [4475..9208] for TDM DS3/E3/DS0 channels. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.

5620 SAM Release	Compatibility Statement (7710 SR 3.0 R7)
5620 SAM 4.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **TDM DS3/E3/DS0 Channel MTU**. 5620 SAM does not support MTU values in the range [4475..9208] for TDM DS3/E3/DS0 channels. **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello..... **(PTS 503779) OAM Test Execution**: 5620 SAM does not support the SDP ping or LSP ping operations.

Table 250: 7710 SR 3.0 R6

5620 SAM Release	Compatibility Statement (7710 SR 3.0 R6)
5620 SAM 7.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.
5620 SAM 5.0 R1 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.
5620 SAM 4.0 R3 through R12	Network element supported as per 5620 SAM Release Description with the following limitations: **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.....
5620 SAM 4.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **IES / VPRN Interface IP MTU**. 5620 SAM does not support IP MTU configuration on IES and VPRN Interfaces. **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello..... **(PTS 503779) OAM Test Execution**: 5620 SAM does not support the SDP ping or LSP ping operations.

Table 251: 7710 SR 3.0 R5 [3]

5620 SAM Release	Compatibility Statement (7710 SR 3.0 R5)
5620 SAM 7.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.
5620 SAM 5.0 R1 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.
5620 SAM 4.0 R3 through R12	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello.....
5620 SAM 4.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **PIM Three-Way-Hello**. 5620 SAM does not support PIM Three-Way-Hello..... **(PTS 503779) OAM Test Execution**: 5620 SAM does not support the SDP ping or LSP ping operations.

[9] The 7710 Service Router Release 3.0 R4 was never released to the field

Table 252: 7710 SR 3.0 R2 through R3

5620 SAM Release	Compatibility Statement (7710 SR 3.0 R2 through R3)
5620 SAM 7.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 5.0 R1 through R11	Network element supported as per 5620 SAM Release Description.
5620 SAM 4.0 R3 through R12	Network element supported as per 5620 SAM Release Description.
5620 SAM 4.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 503779) OAM Test Execution**: 5620 SAM does not support the SDP ping or LSP ping operations.

Table 253: 7710 SR 3.0 R1

5620 SAM Release	Compatibility Statement (7710 SR 3.0 R1)
5620 SAM 4.0 R1 and above	Network element not supported. 5620 SAM does not support management of this router version.

3.4 Alcatel-Lucent 7705 Service Aggregation Router

Alcatel-Lucent 7705 Service Aggregation Router Release 4.0

Table 254: 7705 SAR 4.0 R1 through R2

5620 SAM Release	Compatibility Statement (7705 SAR 4.0 R1 through R2)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Static-route LDP Sync.** 5620 SAM does not support static-route LDP Sync.

Alcatel-Lucent 7705 Service Aggregation Router Release 3.0

Table 255: 7705 SAR 3.0 R3 through R4

5620 SAM Release	Compatibility Statement (7705 SAR 3.0 R3 through R4)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Static-route LDP Sync.** 5620 SAM does not support static-route LDP Sync.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Static-route LDP Sync.** 5620 SAM does not support static-route LDP Sync.
5620 SAM 8.0.R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **X21 Port Type.** 5620 SAM does not support X21 port type. **RS232 Channel Enhancements.** 5620 SAM does not support the RS232 channel enhancements. **Auxiliary Alarm Card.** 5620 SAM does not support the Auxiliary Alarm Card. **Timing Reference Quality Level.** 5620 SAM does not support Timing Reference Quality Levels. **Y1731 Dual-Ended Loss Test.** 5620 SAM does not support the Y1731 Dual-Ended Loss Test. **Static-route LDP Sync.** 5620 SAM does not support static-route LDP Sync.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **X21 Port Type.** 5620 SAM does not support X21 port type. **RS232 Channel Enhancements.** 5620 SAM does not support the RS232 channel enhancements. **Auxiliary Alarm Card.** 5620 SAM does not support the Auxiliary Alarm Card. **16 IPCP Bundle Support per 16 Port DS1/E1 ASAP Daughtercard.** 5620 SAM does not support 16 IPCP bundles per 16 port DS1/E1 ASAP Daughtercard. **APS Support for 4 Port OC3/STM1 Daughtercard.** 5620 SAM does not support APS for the 4 port OC3/STM1 Daughtercard. **6 Port E&M Daughtercard.** 5620 SAM does not support the 6 port E&M Daughtercard. **IES Services.** 5620 SAM does not support IES services. **CEM for the 2 Port Channelized OC3/STM1 Daughter Card.** 5620 SAM does not

5620 SAM Release	Compatibility Statement (7705 SAR 3.0 R3 through R4)
	support CEM for the 2 Port Channelized OC3/STM1 Daughter Card. **OneToOne LSP Fast Reroute.** 5620 SAM does not support the OneToOne type of LSP fast reroute. **Timing Reference Quality Level.** 5620 SAM does not support Timing Reference Quality Levels. **Y1731 Dual-Ended Loss Test.** 5620 SAM does not support the Y1731 Dual-Ended Loss Test. **Y1731 MEP LBR Performance Statistics.** 5620 SAM does not support Y1731 MEP LBR Performance Statistics. **Network Port Control Packet Performance Statistics.** 5620 SAM does not support Network Port Control Packet Performance Statistics. **Static-route LDP Sync.** 5620 SAM does not support static-route LDP Sync.

Table 256: 7705 SAR 3.0 R2

5620 SAM Release	Compatibility Statement (7705 SAR 3.0 R2)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Auxiliary Alarm Card.** 5620 SAM does not support the Auxiliary Alarm Card. **Y1731 Dual-Ended Loss Test.** 5620 SAM does not support the Y1731 Dual-Ended Loss Test. **Static-route LDP Sync.** 5620 SAM does not support static-route LDP Sync.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Auxiliary Alarm Card.** 5620 SAM does not support the Auxiliary Alarm Card. **Y1731 Dual-Ended Loss Test.** 5620 SAM does not support the Y1731 Dual-Ended Loss Test. **Static-route LDP Sync.** 5620 SAM does not support static-route LDP Sync.
5620 SAM 8.0.R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Auxiliary Alarm Card.** 5620 SAM does not support the Auxiliary Alarm Card. **Timing Reference Quality Level.** 5620 SAM does not support Timing Reference Quality Levels. **Y1731 Dual-Ended Loss Test.** 5620 SAM does not support the Y1731 Dual-Ended Loss Test. **Static-route LDP Sync.** 5620 SAM does not support static-route LDP Sync.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Auxiliary Alarm Card.** 5620 SAM does not support the Auxiliary Alarm Card. **16 IPCP Bundle Support per 16 Port DS1/E1 ASAP Daughtercard.** 5620 SAM does not support 16 IPCP bundles per 16 port DS1/E1 ASAP Daughtercard. **APS Support for 4 Port OC3/STM1 Daughtercard.** 5620 SAM does not support APS for the 4 port OC3/STM1 Daughtercard. **6 Port E&M Daughtercard.** 5620 SAM does not support the 6 port E&M Daughtercard. **IES Services.** 5620 SAM does not support IES services. **CEM for the 2 Port Channelized OC3/STM1 Daughter Card.** 5620 SAM does not support CEM for the 2 Port Channelized OC3/STM1 Daughter Card.

5620 SAM Release	Compatibility Statement (7705 SAR 3.0 R2)
	OneToOne LSP Fast Reroute. 5620 SAM does not support the OneToOne type of LSP fast reroute. **Timing Reference Quality Level.** 5620 SAM does not support Timing Reference Quality Levels. **Y1731 Dual-Ended Loss Test.** 5620 SAM does not support the Y1731 Dual-Ended Loss Test. **Y1731 MEP LBR Performance Statistics.** 5620 SAM does not support Y1731 MEP LBR Performance Statistics. **Network Port Control Packet Performance Statistics.** 5620 SAM does not support Network Port Control Packet Performance Statistics. **Static-route LDP Sync.** 5620 SAM does not support static-route LDP Sync.

Table 257: 7705 SAR 3.0 R1

5620 SAM Release	Compatibility Statement (7705 SAR 3.0 R1)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **IES Services.** 5620 SAM does not support IES services. **Y1731 Dual-Ended Loss Test.** 5620 SAM does not support the Y1731 Dual-Ended Loss Test. **Static-route LDP Sync.** 5620 SAM does not support static-route LDP Sync.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **IES Services.** 5620 SAM does not support IES services. **Y1731 Dual-Ended Loss Test.** 5620 SAM does not support the Y1731 Dual-Ended Loss Test. **Static-route LDP Sync.** 5620 SAM does not support static-route LDP Sync.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **IES Services.** 5620 SAM does not support IES services. **Timing Reference Quality Level.** 5620 SAM does not support Timing Reference Quality Levels. **Y1731 Dual-Ended Loss Test.** 5620 SAM does not support the Y1731 Dual-Ended Loss Test. **Static-route LDP Sync.** 5620 SAM does not support static-route LDP Sync.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **IES Services.** 5620 SAM does not support IES services. **CEM for the 2 Port Channelized OC3/STM1 Daughter Card.** 5620 SAM does not support CEM for the 2 Port Channelized OC3/STM1 Daughter Card. **OneToOne LSP Fast Reroute.** 5620 SAM does not support the OneToOne type of LSP fast reroute. **Timing Reference Quality Level.** 5620 SAM does not support Timing Reference Quality Levels. **Y1731 Dual-Ended Loss Test.** 5620 SAM does not support the Y1731 Dual-Ended Loss Test.

5620 SAM Release	Compatibility Statement (7705 SAR 3.0 R1)
	Y1731 MEP LBR Performance Statistics. 5620 SAM does not support Y1731 MEP LBR Performance Statistics. **Network Port Control Packet Performance Statistics.** 5620 SAM does not support Network Port Control Packet Performance Statistics. **Static-route LDP Sync.** 5620 SAM does not support static-route LDP Sync.

Alcatel-Lucent 7705 Service Aggregation Router Release 2.1

Table 258: 7705 SAR 2.1 R3 through R4

5620 SAM Release	Compatibility Statement (7705 SAR 2.1 R3 through R4)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **Static-route LDP Sync.** 5620 SAM does not support static-route LDP Sync.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Static-route LDP Sync.** 5620 SAM does not support static-route LDP Sync.
5620 SAM 7.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Static-route LDP Sync**. 5620 SAM does not support static-route LDP Sync. **Active / Standby mode for PW redundancy**. 5620 SAM does not support Active / Standby mode for PW redundancy.

Table 259: 7705 SAR 2.1 R1 through R2

5620 SAM Release	Compatibility Statement (7705 SAR 2.1 R1 through R2)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R5 through R8	Network element supported as per 5620 SAM Release Description.

Alcatel-Lucent 7705 Service Aggregation Router Release 2.0

Table 260: 7705 SAR 2.0 R3 through R5

5620 SAM Release	Compatibility Statement (7705 SAR 2.0 R3 through R5)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R2 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **RSVP-TE MD5 Authentication**. 5620 SAM does not support MD5 Authentication for RSVP-TE Interfaces. **T1 CAS / RBS**. 5620 SAM does not support T1 CAS / Robbed Bit Signaling (RBS). If this functionality were to be enabled from the node while being managed by 5620 SAM 7.0 R1, this could cause management issues for this node. This functionality is fully supported as of 5620 SAM 7.0 R2.

Table 261: 7705 SAR 2.0 R1 through R2

5620 SAM Release	Compatibility Statement (7705 SAR 2.0 R1 through R2)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description.

Alcatel-Lucent 7705 Service Aggregation Router Release 1.1

Table 262: 7705 SAR 1.1 R2 through R4

5620 SAM Release	Compatibility Statement (7705 SAR 1.1 R2 through R4)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.1 R3 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **CES DS1/E1 Clock State Change Trap**. 5620 SAM does not support 'tmnxDSXClockSyncStateChange' trap notifications for CES DS1/E1 clock state changes when set to adaptive clock recovery.

Table 263: 7705 SAR 1.1 R1

5620 SAM Release	Compatibility Statement (7705 SAR 1.1 R1)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.1 R3 through R8	Network element supported as per 5620 SAM Release Description.

Alcatel-Lucent 7705 Service Aggregation Router Release 1.0

Table 264: 7705 SAR 1.0 R6 through R7

5620 SAM Release	Compatibility Statement (7705 SAR 1.0 R6 through R7)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 568296) MIB Entry Policy for CEM SAP Statistics**: 5620 SAM does not support MIB Entry Policy for CEM Statistics.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.1 R3 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.1 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 544955) ISSU Upgrade**: 5620 SAM does not support ISSU upgrade from 7705 SAR 1.0 R5 to 1.0 R6 or later.

Table 265: 7705 SAR 1.0 R3 through R5

5620 SAM Release	Compatibility Statement (7705 SAR 1.0 R3 through R5)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 568296) MIB Entry Policy for CEM SAP Statistics**: 5620 SAM does not support MIB Entry Policy for CEM Statistics.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description.

Table 266: 7705 SAR 1.0 R1 through R2

5620 SAM Release	Compatibility Statement (7705 SAR 1.0 R1 through R2)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R4 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 568296) MIB Entry Policy for CEM SAP Statistics**: 5620 SAM does not support MIB Entry Policy for CEM Statistics.
5620 SAM 7.0 R1 through R3	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.0 R2 through R8	Network element supported as per 5620 SAM Release Description.

3.5 Alcatel-Lucent 7210 Service Access Switch

Alcatel-Lucent 7210 Service Access Switch Release 3.0

Table 267: 7210 SAS-D 3.0R4

5620 SAM Release	Compatibility Statement (7210 SAS-D 3.0 R4)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 608890) Access Ingress.** 5620 SAM does not support Addition of Meter with meter mode other than trtcm1 fails for 7210 Sap Ingress Local policy. **(PTS 608905) Backup/Restore.** 5620 SAM does not support Backup/Restore with "CLI Config Save details" enabled in the Backup/Restore policy.

Table 268: 7210 SAS-E 3.0 R1 through R4

5620 SAM Release	Compatibility Statement (7210 SAS-E 3.0 R1 through R4)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description.

Table 269: 7210 SAS-M 3.0 R2 through R4

5620 SAM Release	Compatibility Statement (7210 SAS-M 3.0 R2 through R4)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 601407) L2uplink Support.** 5620 SAM does not support management of SAS-M nodes with Access uplink mode enabled.

Table 270: 7210 SAS-M 3.0 R1

5620 SAM Release	Compatibility Statement (7210 SAS-M 3.0 R1)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 601407) L2uplink Support.** 5620 SAM does not support management of SAS-M nodes with Access uplink mode enabled.
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 601407) L2uplink Support.** 5620 SAM does not support management of SAS-M nodes with Access uplink mode enabled.

Table 271: 7210 SAS-M 24F2XFP 3.0 R2 through R4

5620 SAM Release	Compatibility Statement (7210 SAS-M 24F2XFP 3.0 R2 through R4)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 601407) L2uplink Support.** 5620 SAM does not support management of SAS-M nodes with Access uplink mode enabled.

Table 272: 7210 SAS-M 24F2XFP 3.0 R1

5620 SAM Release	Compatibility Statement (7210 SAS-M 24F2XFP 3.0 R1)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 601407) L2uplink Support.** 5620 SAM does not support management of SAS-M nodes with Access uplink mode enabled.
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 601407) L2uplink Support.** 5620 SAM does not support management of SAS-M nodes with Access uplink mode enabled.

Table 273: 7210 SAS-M 24F2XFP ETR 3.0 R3 through R4

5620 SAM Release	Compatibility Statement (7210 SAS-M 24F2XFP ETR 3.0 R3 through R4)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 601407) L2uplink Support.** 5620 SAM does not support management of SAS-M nodes with Access uplink mode enabled. **(PTS 606710) H-Metering block Access Interface.** 5620 SAM does not support the modification of H-Metering Related params from CLI as it blocks Access Interface modification from SAM.

Table 274: 7210 SAS-M 24F2XFP ETR 3.0 R2

5620 SAM Release	Compatibility Statement (7210 SAS-M 24F2XFP ETR 3.0 R2)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 605445) Incorrect Discovery.** SAS-M 242XFP ETR 3.0 R2 will be incorrectly discovered as SAS-M 242XFP.
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 605445) Incorrect Discovery.** SAS-M 242XFP ETR 3.0 R2 will be incorrectly discovered as SAS-M 242XFP. **(PTS 601407) L2uplink Support.** 5620 SAM does not support management of SAS-M nodes with Access uplink mode enabled.

Table 275: 7210 SAS-M 24F2XFP ETR 3.0 R1

5620 SAM Release	Compatibility Statement (7210 SAS-M 24F2XFP ETR 3.0 R1)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 601407) L2uplink Support.** 5620 SAM does not support management of SAS-M nodes with Access uplink mode enabled.

5620 SAM Release	Compatibility Statement (7210 SAS-M 24F2XFP ETR 3.0 R1)
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 601407) L2uplink Support.** 5620 SAM does not support management of SAS-M nodes with Access uplink mode enabled.

Table 276: 7210 SAS-X 3.0 R1 through R4

5620 SAM Release	Compatibility Statement (7210 SAS-X 3.0 R1 through R4)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 608905) Backup/Restore.** 5620 SAM does not support Backup/Restore with "CLI Config Save details" enabled in the Backup/Restore policy.
5620 SAM 8.0 R7 through R8	Network element supported with the following limitations: **(PTS 606710) H-Metering block Access Interface.** 5620 SAM does not support the modification of H-Metering Related params from CLI as it blocks Access Interface modification from SAM. **(PTS 608905) Backup/Restore.** 5620 SAM does not support Backup/Restore with "CLI Config Save details" enabled in the Backup/Restore policy. **(PTS 598458) Out-of-band Management.** 5620 SAM does not support Out-of-Band management feature.

Alcatel-Lucent 7210 Service Access Switch Release 2.0

Table 277: 7210 SAS-E 2.0 R5 through R8

5620 SAM Release	Compatibility Statement (7210 SAS-E 2.0 R5 through R8)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R3 through R8	Network element supported as per 5620 SAM Release Description.

Table 278: 7210 SAS-M 2.0 R5 through R8

5620 SAM Release	Compatibility Statement (7210 SAS-M 2.0 R5 through R8)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 598375) LDP Protocol.** 5620 SAM does not support enabling LDP protocol for SAS-M. A deployment failure will result upon the deployment.

Table 279: 7210 SAS-M 24F2XFP 2.0 R5 through R8

5620 SAM Release	Compatibility Statement (7210 SAS-M 24F2XFP 2.0 R5 through R8)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 598375) LDP Protocol.** 5620 SAM does not support enabling LDP protocol for SAS-M. A deployment failure will result upon the deployment.

Table 280: 7210 SAS-M 24F2XFP ETR 2.0 R8

5620 SAM Release	Compatibility Statement (7210 SAS-M 24F2XFP ETR 2.0 R8)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 598375) LDP Protocol.** 5620 SAM does not support enabling LDP protocol for SAS-M. A deployment failure will result upon the deployment.

Table 281: 7210 SAS-M 24F2XFP ETR 2.0 R7

5620 SAM Release	Compatibility Statement (7210 SAS-M 24F2XFP ETR 2.0 R7)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 605445) Incorrect Discovery.** SAS-M 242XFP ETR 2.0 R7 will be incorrectly discovered as SAS-M 242XFP.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 605445) Incorrect Discovery.** SAS-M 242XFP ETR 2.0 R7 will be incorrectly discovered as SAS-M 242XFP.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 605445) Incorrect Discovery.** SAS-M 242XFP ETR 2.0 R7 will be incorrectly discovered as SAS-M 242XFP. **(PTS 598375) LDP Protocol.** 5620 SAM does not support enabling LDP protocol for SAS-M. A deployment failure will result upon the deployment.

Table 282: 7210 SAS-M 24F2XFP ETR 2.0 R5 through R6

5620 SAM Release	Compatibility Statement (7210 SAS-M 24F2XFP ETR 2.0 R5 through R6)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 598375) LDP Protocol.** 5620 SAM does not support enabling LDP protocol for SAS-M. A deployment failure will result upon the deployment.

Table 283: 7210 SAS-X 2.0 R6 through R8

5620 SAM Release	Compatibility Statement (7210 SAS-M 24F2XFP 2.0 R6 through R8)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 608905) Backup/Restore.** 5620 SAM does not support Backup/Restore with “CLI Config Save details” enabled in the Backup/Restore policy.
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 608905) Backup/Restore.** 5620 SAM does not support Backup/Restore with “CLI Config Save details” enabled in the Backup/Restore policy. **(PTS 598458) Out-of-band Management.** 5620 SAM does not support Out-of-Band management feature.
5620 SAM 8.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 608905) Backup/Restore.** 5620 SAM does not support Backup/Restore with “CLI Config Save details” enabled in the Backup/Restore policy. **(PTS 596870) Synch-E.** 5620 SAM does not support Synch-E feature. **(PTS 595954) Combined Network Egress Policy.** 5620 SAM does not support assignment of Combined Network Egress Accounting policies to ports. **(PTS 598458) Out-of-band Management.** 5620 SAM does not support Out-of-Band management feature.

5620 SAM Release	Compatibility Statement (7210 SAS-M 24F2XFP 2.0 R6 through R8)
	(PTS 598689) H-Metering. 5620 SAM does not support H-Metering feature.
5620 SAM 8.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 608905) Backup/Restore.** 5620 SAM does not support Backup/Restore with "CLI Config Save details" enabled in the Backup/Restore policy. **(PTS 598360) SAP Creation.** 5620 SAM does not support creation of SAP for all services. **MVPLS/VPLS/VLL Services.** 5620 SAM does not support creation of MVPLS/VPLS/VLL services, a deployment failure will result. **(PTS 596870) Synch-E.** 5620 SAM does not support Synch-E feature. **(PTS 595954) Combined Network Egress Policy.** 5620 SAM does not support assignment of Combined Network Egress Accounting policies to ports. **(PTS 598458) Out-of-band Management.** 5620 SAM does not support Out-of-Band management feature.

Table 284: 7210 SAS-X 2.0 R5

5620 SAM Release	Compatibility Statement (7210 SAS-M 24F2XFP 2.0 R5)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 598458) Out-of-band Management.** 5620 SAM does not support Out-of-Band management feature. **(PTS 598689) H-Metering.** 5620 SAM does not support H-Metering feature.
5620 SAM 8.0 R6	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 596870) Synch-E.** 5620 SAM does not support Synch-E feature. **(PTS 595954) Combined Network Egress Policy.** 5620 SAM does not support assignment of Combined Network Egress Accounting policies to ports. **(PTS 598458) Out-of-band Management.** 5620 SAM does not support Out-of-Band management feature. **(PTS 598689) H-Metering.** 5620 SAM does not support H-Metering feature.

5620 SAM Release	Compatibility Statement (7210 SAS-M 24F2XFP 2.0 R5)
5620 SAM 8.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 598360) SAP Creation.** 5620 SAM does not support creation of SAP for all services. **MVPLS/VPLS/VLL Services.** 5620 SAM does not support creation of MVPLS/VPLS/VLL services, a deployment failure will result. **(PTS 596870) Synch-E.** 5620 SAM does not support Synch-E feature. **(PTS 595954) Combined Network Egress Policy.** 5620 SAM does not support assignment of Combined Network Egress Accounting policies to ports. **(PTS 598458) Out-of-band Management.** 5620 SAM does not support Out-of-Band management feature.

Table 285: 7210 SAS-E / SAS-M 2.0 R2 through R4

5620 SAM Release	Compatibility Statement (7210 SAS-E / SAS-M 2.0 R2 through R4)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description. 7210 SAS E / SAS M 2.0 R2 and later node loads are supported with feature parity of 2.0 R1.

Table 286: 7210 SAS-M 24F2XFP 2.0 R2 through R4

5620 SAM Release	Compatibility Statement (7210 SAS-M 24F2XFP 2.0 R2 through R4)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description.

5620 SAM Release	Compatibility Statement (7210 SAS-M 24F2XFP 2.0 R2 through R4)
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description. 7210 SAS 24F2XFP 2.0 R2 and later node loads are supported with feature parity of 2.0 R1.

Table 287: 7210 SAS-M 24F2XFP ETR 2.0 R2 through R4

5620 SAM Release	Compatibility Statement (7210 SAS-M 24F2XFP ETR 2.0 R2 through R4)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description. 7210 SAS 24F2XFP ETR 2.0 R2 and later node loads are supported with feature parity of 2.0 R1.

Table 288: 7210 SAS-E / SAS-M 2.0 R1

5620 SAM Release	Compatibility Statement (7210 SAS-E / SAS-M 2.0 R1)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R3 through R8	Network element supported as per 5620 SAM Release Description.

Table 289: 7210 SAS-M 24F2XFP 2.0 R1

5620 SAM Release	Compatibility Statement (7210 SAS-M 24F2XFP 2.0 R1)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R3 through R8	Network element supported as per 5620 SAM Release Description.

Table 290: 7210 SAS-M 24F2XFP ETR 2.0 R1

5620 SAM Release	Compatibility Statement (7210 SAS-M 24F2XFP ETR 2.0 R1)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R3 through R8	Network element supported as per 5620 SAM Release Description.

Alcatel-Lucent 7210 Service Access Switch Release 1.1

Table 291: 7210 SAS-E 1.1 R7 through R12

5620 SAM Release	Compatibility Statement (7210 SAS-E 1.1 R7 through R12)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R3 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 601397) ServiceIngressOctets Accounting Policy for SAP.** 5620 SAM does not support deployment of the ServiceIngressOctets Accounting Record binding to SAP of all services. A deployment failure will result.
5620 SAM 7.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 601397) ServiceIngressOctets Accounting Policy for SAP.** 5620 SAM does not support deployment of the ServiceIngressOctets Accounting Record binding to SAP of all services. A deployment failure will result. **(PTS 571333) Access Ingress Policy with MAC Entry.** 5620 SAM does not support deployment of the MAC match criteria entry for 7210 Access Ingresss policies. A deployment failure will result upon the deployment.

Table 292: 7210 SAS-E 1.1 R4 through R6

5620 SAM Release	Compatibility Statement (7210 SAS-E 1.1 R4 through R6)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 571333) Access Ingress Policy with MAC Entry.** 5620 SAM does not support deployment of the MAC match criteria entry for 7210 Access Ingresss policies. A deployment failure will result upon the deployment.

Table 293: 7210 SAS-M 1.1 R4 through R12

5620 SAM Release	Compatibility Statement (7210 SAS-M 1.1 R4 through R12)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R6 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 571333) Access Ingress Policy with MAC Entry.** 5620 SAM does not support deployment of the MAC match criteria entry for 7210 Access Ingresss policies. A deployment failure will result upon the deployment.
5620 SAM 7.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **Network Policies.** 5620 SAM does not support Network Policies. **(PTS 571333) Access Ingress Policy with MAC Entry.** 5620 SAM does not support deployment of the MAC match criteria entry for 7210 Access Ingresss policies. A deployment failure will result upon the deployment.

Table 294: 7210 SAS-M 24F2XFP 1.1 R6 through R12

5620 SAM Release	Compatibility Statement (7210 SAS-M 24F2XFP 1.1 R6 through R12)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.

Table 295: 7210 SAS-M 24F2XFP ETR 1.1 R8 through R12

5620 SAM Release	Compatibility Statement (7210 SAS-M 24F2XFP ETR 1.1 R8 through R11)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R3 through R8	Network element supported as per 5620 SAM Release Description.

Table 296: 7210 SAS-E 1.1 R3

5620 SAM Release	Compatibility Statement (7210 SAS-E 1.1 R3)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R5 through R8	Network element supported as per 5620 SAM Release Description.

Table 297: 7210 SAS-M 1.1 R3

5620 SAM Release	Compatibility Statement (7210 SAS-M 1.1 R3)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R6 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R5	Network element supported as per 5620 SAM Release Description with the following limitations: **Network Policies.** 5620 SAM does not support Network Policies.

Alcatel-Lucent 7210 Service Access Switch Release 1.0

Table 298: 7210 SAS-E 1.0 R5 through R6

5620 SAM Release	Compatibility Statement (7210 SAS-E 1.0 R5 through R6)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R5 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Egress Rate Limiting and Frame Based Accounting**. 5620 SAM does not support Egress Rate Limiting and Frame Based Accounting.
5620 SAM 7.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Egress Rate Limiting and Frame Based Accounting**. 5620 SAM does not support Egress Rate Limiting and Frame Based Accounting. **IGMP Snooping**. 5620 SAM does not support IGMP Snooping.

Table 299: 7210 SAS-E 1.0 R4

5620 SAM Release	Compatibility Statement (7210 SAS-E 1.0 R4)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R3 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **IGMP Snooping**. 5620 SAM does not support IGMP Snooping.

Table 300: 7210 SAS-E 1.0 R3

5620 SAM Release	Compatibility Statement (7210 SAS-E 1.0 R3)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description.

3.6 Alcatel-Lucent 7250 Service Access Switch

Alcatel-Lucent 7250 Service Access Switch Release 3.0

Table 301: 7250 SAS 3.0 R9 (ESA Chassis Mode)

5620 SAM Release	Compatibility Statement (7250 SAS 3.0 R9 (ESA Chassis Mode))
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **SFP 3HE00869 Support.** 5620 SAM does not support SFP 3HE00869.

Table 302: 7250 SAS 3.0 R9 (ES Chassis Mode)

Table 317: 7250 SAS 2.0 R11 through R13 (ES Chassis Mode)

5620 SAM Release	Compatibility Statement (7250 SAS 2.0 R11 through R13 (ES Chassis Mode))
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **sdpOperStatus Mappings**. The following mapping discrepancies in sdpOperStatus will exist between CLI and 5620 SAM: • 7250 CLI “Idle” will map to “Tunnel Not Ready” in 5620 SAM 7250 CLI “Established|Backup” will map to “MTU Mismatch” in 5620 SAM
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **sdpOperStatus Mappings**. The following mapping discrepancies in sdpOperStatus will exist between CLI and 5620 SAM: • 7250 CLI “Idle” will map to “Tunnel Not Ready” in 5620 SAM • 7250 CLI “Established|Backup” will map to “MTU Mismatch” in 5620 SAM
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **sdpOperStatus Mappings**. The following mapping discrepancies in sdpOperStatus will exist between CLI and 5620 SAM: • 7250 CLI “Idle” will map to “Tunnel Not Ready” in 5620 SAM • 7250 CLI “Established|Backup” will map to “MTU Mismatch” in 5620 SAM
5620 SAM 6.1 R3 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **sdpOperStatus Mappings**. The following mapping discrepancies in sdpOperStatus will exist between CLI and 5620 SAM: • 7250 CLI “Idle” will map to “Tunnel Not Ready” in 5620 SAM • 7250 CLI “Established|Backup” will map to “MTU Mismatch” in 5620 SAM

Table 318: 7250 SAS 2.0 R11 through R13 (STD Chassis Mode)

5620 SAM Release	Compatibility Statement (7250 SAS 2.0 R11 through R13 (STD Chassis Mode))
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.1 R3 through R8	Network element supported as per 5620 SAM Release Description.

Table 319: 7250 SAS 2.0 R10 (ES Chassis Mode)

5620 SAM Release	Compatibility Statement (7250 SAS 2.0 R10 (ES Chassis Mode))
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **sdpOperStatus Mappings**. The following mapping discrepancies in sdpOperStatus will exist between CLI and 5620 SAM: • 7250 CLI "Idle" will map to "Tunnel Not Ready" in 5620 SAM 7250 CLI "Established|Backup" will map to "MTU Mismatch" in 5620 SAM
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **sdpOperStatus Mappings**. The following mapping discrepancies in sdpOperStatus will exist between CLI and 5620 SAM: • 7250 CLI "Idle" will map to "Tunnel Not Ready" in 5620 SAM • 7250 CLI "Established|Backup" will map to "MTU Mismatch" in 5620 SAM
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **sdpOperStatus Mappings**. The following mapping discrepancies in sdpOperStatus will exist between CLI and 5620 SAM: • 7250 CLI "Idle" will map to "Tunnel Not Ready" in 5620 SAM • 7250 CLI "Established|Backup" will map to "MTU Mismatch" in 5620 SAM
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **sdpOperStatus Mappings**. The following mapping discrepancies in sdpOperStatus will exist between CLI and 5620 SAM: • 7250 CLI "Idle" will map to "Tunnel Not Ready" in 5620 SAM • 7250 CLI "Established|Backup" will map to "MTU Mismatch" in 5620 SAM
5620 SAM 6.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **sdpOperStatus Mappings**. The following mapping discrepancies in sdpOperStatus will exist between CLI and 5620 SAM: • 7250 CLI "Idle" will map to "Tunnel Not Ready" in 5620 SAM • 7250 CLI "Established|Backup" will map to "MTU Mismatch" in 5620 SAM

Table 320: 7250 SAS 2.0 R10 (STD Chassis Mode)

5620 SAM Release	Compatibility Statement (7250 SAS 2.0 R10 (STD Chassis Mode))
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.0 R5 through R8	Network element supported as per 5620 SAM Release Description.

Table 321: 7250 SAS 2.0 R9 (ES Chassis Mode)

5620 SAM Release	Compatibility Statement (7250 SAS 2.0 R9 (ES Chassis Mode))
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **sdpOperStatus Mappings**. The following mapping discrepancies in sdpOperStatus will exist between CLI and 5620 SAM: • 7250 CLI "Idle" will map to "Tunnel Not Ready" in 5620 SAM 7250 CLI "Established|Backup" will map to "MTU Mismatch" in 5620 SAM
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **sdpOperStatus Mappings**. The following mapping discrepancies in sdpOperStatus will exist between CLI and 5620 SAM: • 7250 CLI "Idle" will map to "Tunnel Not Ready" in 5620 SAM • 7250 CLI "Established|Backup" will map to "MTU Mismatch" in 5620 SAM
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **sdpOperStatus Mappings**. The following mapping discrepancies in sdpOperStatus will exist between CLI and 5620 SAM: • 7250 CLI "Idle" will map to "Tunnel Not Ready" in 5620 SAM • 7250 CLI "Established|Backup" will map to "MTU Mismatch" in 5620 SAM
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **sdpOperStatus Mappings**. The following mapping discrepancies in sdpOperStatus will exist between CLI and 5620 SAM: • 7250 CLI "Idle" will map to "Tunnel Not Ready" in 5620 SAM • 7250 CLI "Established|Backup" will map to "MTU Mismatch" in 5620 SAM
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **sdpOperStatus Mappings**. The following mapping discrepancies in sdpOperStatus will exist between CLI and 5620 SAM: • 7250 CLI "Idle" will map to "Tunnel Not Ready" in 5620 SAM • 7250 CLI "Established|Backup" will map to "MTU Mismatch" in 5620 SAM

5620 SAM Release	Compatibility Statement (7250 SAS 2.0 R9 (ES Chassis Mode))
5620 SAM 5.0 R5 through R11	Network element supported as per 5620 SAM Release Description with the following limitations: **sdpOperStatus Mappings**. The following mapping discrepancies in sdpOperStatus will exist between CLI and 5620 SAM: • 7250 CLI "Idle" will map to "Tunnel Not Ready" in 5620 SAM • 7250 CLI "Established|Backup" will map to "MTU Mismatch" in 5620 SAM

Table 322: 7250 SAS 2.0 R9 (STD Chassis Mode)

5620 SAM Release	Compatibility Statement (7250 SAS 2.0 R9 (STD Chassis Mode))
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 5.0 R5 through R11	Network element supported as per 5620 SAM Release Description.

Table 323: 7250 SAS 2.0 R8.1 (ES Chassis Mode)

5620 SAM Release	Compatibility Statement (7250 SAS 2.0 R8.1 (ES Chassis Mode))
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 5.0 R5 through R11	Network element supported as per 5620 SAM Release Description.

Table 324: 7250 SAS 2.0 R8.1 (STD Chassis Mode)

5620 SAM Release	Compatibility Statement (7250 SAS 2.0 R8.1 (STD Chassis Mode))
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 5.0 R5 through R11	Network element supported as per 5620 SAM Release Description.

Table 325: 7250 SAS 2.0 R8 (ES Chassis Mode)

5620 SAM Release	Compatibility Statement (7250 SAS 2.0 R8 (ES Chassis Mode))
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 5.0 R5 through R11	Network element supported as per 5620 SAM Release Description.

Table 326: 7250 SAS 2.0 R8 (STD Chassis Mode)

5620 SAM Release	Compatibility Statement (7250 SAS 2.0 R8 (STD Chassis Mode))
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 5.0 R5 through R11	Network element supported as per 5620 SAM Release Description.

Table 327: 7250 SAS 2.0 R7.1 (ES Chassis Mode)

5620 SAM Release	Compatibility Statement (7250 SAS 2.0 R7.1 (ES Chassis Mode))
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 5.0 R5 through R11	Network element supported as per 5620 SAM Release Description.

Table 328: 7250 SAS 2.0 R7.1 (STD Chassis Mode)

5620 SAM Release	Compatibility Statement (7250 SAS 2.0 R7.1 (STD Chassis Mode))
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 5.0 R5 through R11	Network element supported as per 5620 SAM Release Description.

Table 329: 7250 SAS 2.0 R5.2 (ES Chassis Mode)

5620 SAM Release	Compatibility Statement (7250 SAS 2.0 R5.2 (ES Chassis Mode))
5620 SAM 6.1 R1 and above	Network element not supported.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 5.0 R5 through R11	Network element supported as per 5620 SAM Release Description.

Table 330: 7250 SAS 2.0 R5.2 (STD Chassis Mode)

5620 SAM Release	Compatibility Statement (7250 SAS 2.0 R5.2 (STD Chassis Mode))
5620 SAM 6.1 R1 and above	Network element not supported.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description.

5620 SAM Release	Compatibility Statement (7250 SAS 2.0 R5.2 (STD Chassis Mode))
5620 SAM 5.0 R5 through R11	Network element supported as per 5620 SAM Release Description.

Table 331: 7250 SAS 2.0 R5.1 (ES Chassis Mode)

5620 SAM Release	Compatibility Statement (7250 SAS 2.0 R5.1 (ES Chassis Mode))
5620 SAM 5.0 R5 and above	Network element not supported.
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description.
5620 SAM 5.0 R1 through R2	**7250 Enhanced Services (ES) Chassis Support.** 5620 SAM supports the ES chassis of the 7250 SAS 2.0 at a 1.0 level of functionality.

Table 332: 7250 SAS 2.0 R5.1 (STD Chassis Mode)

5620 SAM Release	Compatibility Statement (7250 SAS 2.0 R5.1 (STD Chassis Mode))
5620 SAM 5.0 R5 and above	Network element not supported.
5620 SAM 5.0 R3 through R4	Network element supported as per 5620 SAM Release Description.
5620 SAM 5.0 R1 through R2	**7250 Enhanced Services (STD) Chassis Support.** 5620 SAM supports the STD chassis of the 7250 SAS 2.0 at a 1.0 level of functionality.

Table 333: 7250 SAS 2.0 R5 (ES Chassis Mode)

5620 SAM Release	Compatibility Statement (7250 SAS 2.0 R5 (ES Chassis Mode))
5620 SAM 5.0 R3 and above	Network element not supported.
5620 SAM 5.0 R1 through R2	**7250 Enhanced Services (ES) Chassis Support.** 5620 SAM supports the ES chassis of the 7250 SAS 2.0 at a 1.0 level of functionality.

Table 334: 7250 SAS 2.0 R5 (STD Chassis Mode)

5620 SAM Release	Compatibility Statement (7250 SAS 2.0 R5 (STD Chassis Mode))
5620 SAM 5.0 R3 and above	Network element not supported.
5620 SAM 5.0 R1 through R2	**7250 Enhanced Services (STD) Chassis Support.** 5620 SAM supports the STD chassis of the 7250 SAS 2.0 at a 1.0 level of functionality.

Table 335: 7250 SAS 2.0 R1 (ES Chassis Mode)

5620 SAM Release	Compatibility Statement (7250 SAS 2.0 R1 (ES Chassis Mode))
5620 SAM 5.0 R1 and above	Network element not supported.
5620 SAM 4.0 R6 through R12	**7250 Enhanced Services (ES) Chassis Support.** 5620 SAM supports the ES chassis of the 7250 SAS 2.0 at a 1.0 level of functionality.

Table 336: 7250 SAS 2.0 R3 (STD Chassis Mode)

5620 SAM Release	Compatibility Statement (7250 SAS 2.0 R3 (STD Chassis Mode))
5620 SAM 5.0 R1 and above	Network element not supported.
5620 SAM 4.0 R7 through R12	**7250 Enhanced Services (STD) Chassis Support.** 5620 SAM supports the STD chassis of the 7250 SAS 2.0 at a 1.0 level of functionality.

Alcatel-Lucent 7250 Service Access Switch Release 1.0

Table 337: 7250 SAS 1.0 R8

5620 SAM Release	Compatibility Statement (7250 SAS 1.0 R8)
5620 SAM 6.1 R1 and above	Network element not supported.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 5.0 R1 through R11	Network element supported as per 5620 SAM Release Description.
5620 SAM 4.0 R1 through R12	Network element supported as per 5620 SAM Release Description.

Table 338: 7250 SAS 1.0 R7

5620 SAM Release	Compatibility Statement (7250 SAS 1.0 R7)
5620 SAM 6.1 R1 and above	Network element not supported.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 5.0 R1 through R11	Network element supported as per 5620 SAM Release Description.
5620 SAM 4.0 R1 through R12	Network element supported as per 5620 SAM Release Description.
5620 SAM 3.0 R7 through R10	Network element supported as per 5620 SAM Release Description.

Table 339: 7250 SAS 1.0 R6.1

5620 SAM Release	Compatibility Statement (7250 SAS 1.0 R6.1)
5620 SAM 4.0 R1 and above	Network element not supported.
5620 SAM 3.0 R6 through R10	Network element supported as per 5620 SAM Release Description.

Table 340: 7250 SAS 1.0 R5

5620 SAM Release	Compatibility Statement (7250 SAS 1.0 R5)
5620 SAM 3.0 R6 and above	Network element not supported.
5620 SAM 3.0 R5	Network element supported as per 5620 SAM Release Description.

Table 341: 7250 SAS 1.0 R3 [4]

5620 SAM Release	Compatibility Statement (7250 SAS 1.0 R3)
5620 SAM 3.0 R5 and above	Network element not supported.
5620 SAM 3.0 R3 through R4	Network element supported as per 5620 SAM Release Description.

[4] The 7250 SAS Release 1.0 R3 load is not suitable for live deployments.

3.7 Alcatel-Lucent 7750 Mobile Gateway

Alcatel-Lucent 7750 Mobile Gateway Release 3.0

Table 342: 7750 MG 3.0 R2

5620 SAM Release	Compatibility Statement (7750 MG 3.0 R2)
5620 SAM 9.0 R1	7750 MG 3.0 R2 (P-GW) Network element supported as per 5620 SAM Release Description with the following limitations: **7750 MG 3.0 R2 (P-GW) Support.** P-GW 7750 MG 3.0 R2 nodes are supported by 5620 SAM, but only at a 7750 MG 2.0 R14 level of functionality. 7750 MG 3.0 R2 (S-GW) Network element supported as per 5620 SAM Release Description with the following limitations: **LI Target Entries.** 5620 SAM does not support the automatic update of LI Target Entries when the LI Intercept Target Entries are removed using CLI. A manual resync of the LI Target Entries is required. **Ga Peer.** 5620 SAM does not support Ga Peers or Paths on SGW and PGW.

Table 343: 7750 MG 3.0 R1

5620 SAM Release	Compatibility Statement (7750 MG 3.0 R1)
5620 SAM 9.0 R1	7750 MG 3.0 R1 (P-GW) Network element supported as per 5620 SAM Release Description with the following limitations: **7750 MG 3.0 R1 (P-GW) Support.** P-GW 7750 MG 3.0 R1 nodes are supported by 5620 SAM, but only at a 7750 MG 2.0 R14 level of functionality. 7750 MG 3.0 R1 (S-GW) Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 602392) Serving Gateway LTE User Statistics.** 7750 MG 3.0 R1 does not support LTE User Statistics when configured as a Serving Gateway. 5620 SAM will not collect LTE User Statistics for this node version having this configuration. This issue is planned to be resolved in 7750 MG 3.0 R2. **LI Target Entries.** 5620 SAM does not support the automatic update of LI Target Entries when the LI Intercept Target Entries are added or removed using CLI. A manual resync of the LI Target Entries is required.

Alcatel-Lucent 7750 Mobile Gateway Release 2.0

Table 344: 7750 MG 2.0 R18

5620 SAM Release	Compatibility Statement (7750 MG 2.0 R18)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **LI for Mobile.** 5620 SAM does not support LI for Mobile feature for 7750 MG 2.0.
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description.

Table 345: 7750 MG 2.0 R16 through R17

5620 SAM Release	Compatibility Statement (7750 MG 2.0 R16 through R17)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **LI for Mobile.** 5620 SAM does not support LI for Mobile feature for 7750 MG 2.0. **KPI/KCI Accounting Policy.** SAM does not support the distribution of the kpi/kci type accounting policy to a 7750 MG 2.0R16 or R17 Network Element when no location is configured on the associated file policy. The 7750 MG 2.0 R16 and R17, forces the user to set the "Location" field on the file policy to a non-default value before associating file policy to the accounting policy. Workaround: Set the Location field on the file policy before associating it to the accounting policy.
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **KPI/KCI Accounting Policy.** SAM does not support the distribution of the kpi/kci type accounting policy to a 7750 MG 2.0R16 or R17 Network Element when no location is configured on the associated file policy. The 7750 MG 2.0 R16 and R17, forces the user to set the "Location" field on the file policy to a non-default value before associating file policy to the accounting policy. Workaround: Set the Location field on the file policy before associating it to the accounting policy.

Table 346: 7750 MG 2.0 R14 through R15

5620 SAM Release	Compatibility Statement (7750 MG 2.0 R14 through R15)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **LI for Mobile.** 5620 SAM does not support LI for Mobile feature for 7750 MG 2.0.
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description.

Table 347: 7750 MG 2.0 R8

5620 SAM Release	Compatibility Statement (7750 MG 2.0 R8)
5620 SAM 8.0 R7 and above	Network element not supported.
5620 SAM 8.0 R5 through R6	Network element supported as per 5620 SAM Release Description.

Table 348: 7750 MG 2.0 R1 through R4

5620 SAM Release	Compatibility Statement (7750 MG 2.0 R1 through R4)
5620 SAM 8.0 R5 and above	Network element not supported.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description.

3.8 Alcatel-Lucent 9471 Mobility Management Entity

Alcatel-Lucent 9471 Mobility Management Entity Release 3.0

Table 349: 9471 MME LM3.0 (R22.30.02)

5620 SAM Release	Compatibility Statement (9471 MME LM 2.1 (R22.30.02))
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description.

Alcatel-Lucent 9471 Mobility Management Entity Release 2.1

Table 350: 9471 MME LM2.1 (R21.70.07.02)

5620 SAM Release	Compatibility Statement (9471 MME LM2.1 (R21.70.07.02))
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R3 through R8	Network element supported as per 5620 SAM Release Description.

3.9 Alcatel-Lucent 5780 Dynamic Services Controller

Alcatel-Lucent 5780 Dynamic Services Controller Release 3.0

Table 351: 5780 DSC 3.0 R1

5620 SAM Release	Compatibility Statement (5780 DSC DSC 3.0 R1)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.

Alcatel-Lucent 5780 Dynamic Services Controller Release 2.0

Table 352: 5780 DSC 2.0 R1 through R2

5620 SAM Release	Compatibility Statement (5780 DSC DSC 2.0 R1 through R2)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R3 through R8	Network element supported as per 5620 SAM Release Description.

3.10 Alcatel-Lucent 9412 / 9926 eNodeB

Alcatel-Lucent 9412 / 9926 eNodeB Release TLA3.0

Table 353: 9412 / 9926 eNodeB TLA 3.0 / TLA3.0.2 MIB Ed.03p07, MIM 8.3.1

5620 SAM Release	Compatibility Statement (9412 / 9926 eNodeB TLA3.0 / TLA3.0.2 MIB Ed.03p07, MIM 8.3.1)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.

Alcatel-Lucent 9412 / 9926 eNodeB Release TLA2.1

Table 354: 9412 / 9926 eNodeB TLA2.1 MIB Ed.02p06, MIM 6.4.1

5620 SAM Release	Compatibility Statement (9412 / 9926 eNodeB TLA2.1 MIB Ed.02p06, MIM 6.4.1)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.

Alcatel-Lucent 9412 / 9926 eNodeB Release LA3.0

Table 355: 9412 / 9926 eNodeB LA3.0.0 / LA3.0.1 / LA3.0.2 MIB Ed.03p06.1, MIM 7.5.1

5620 SAM Release	Compatibility Statement (9412 / 9926 eNodeB LA3.0.0 / LA3.0.1 / LA3.0.2 MIB Ed.03p06.1, MIM 7.5.1)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R6 through R8	Network element supported as per 5620 SAM Release Description.

Alcatel-Lucent 9412 / 9926 eNodeB Release LA2.0

Table 356: 9412 / 9926 eNodeB LA2.0.2 MIB Ed.02p05, MIM 5.3.8

5620 SAM Release	Compatibility Statement (9412 / 9926 eNodeB LA2.0.2 MIB Ed.02p05, MIM 5.3.8)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description.

3.11 Telco T5 Compact

Telco T5 Compact Release 6.5.5

Table 357: Telco 6.5.5

5620 SAM Release	Compatibility Statement (Telco 6.5.5)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 5.0 R5 through R11	Network element supported as per 5620 SAM Release Description.

Telco T5 Compact Release 6.5.2

Table 358: Telco 6.5.2

5620 SAM Release	Compatibility Statement (Telco 6.5.2)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 5.0 R5 through R11	Network element supported as per 5620 SAM Release Description.

Telco T5 Compact Release 6.3.13

Table 359: Telco 6.3.13

5620 SAM Release	Compatibility Statement (Telco 6.3.13)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 5.0 R1 through R11	Network element supported as per 5620 SAM Release Description.
5620 SAM 4.0 R1 through R12	Network element supported as per 5620 SAM Release Description.
5620 SAM 3.0 R7 through R10	Network element supported as per 5620 SAM Release Description.

Telco T5 Compact Release 6.3.12

Table 360: Telco 6.3.12

5620 SAM Release	Compatibility Statement (Telco 6.3.12)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 5.0 R1 through R11	Network element supported as per 5620 SAM Release Description.
5620 SAM 4.0 R1 through R12	Network element supported as per 5620 SAM Release Description.
5620 SAM 3.0 R7 through R10	Network element supported as per 5620 SAM Release Description.

Telco T5 Compact Release 6.3.11

Table 361: Telco 6.3.11

5620 SAM Release	Compatibility Statement (Telco 6.3.11)
5620 SAM 3.0 R7 and above	Network element not supported.
5620 SAM 3.0 R4 through R6	Network element supported as per 5620 SAM Release Description.

Table 362: Telco 6.3.2

5620 SAM Release	Compatibility Statement (Telco 6.3.2)
5620 SAM 3.0 R4 and above	Network element not supported.
5620 SAM 3.0 R1 through R3	Network element supported as per 5620 SAM Release Description.

Telco T5 Compact Release 5.10.1

Table 363: Telco 5.10.1

5620 SAM Release	Compatibility Statement (Telco 5.10.1)
5620 SAM 3.0 R1 and above	Network element not supported.
5620 SAM 2.1 R1 through R5	Network element supported as per 5620 SAM Release Description.

3.12 Alcatel-Lucent OmniSwitch

Alcatel-Lucent OmniSwitch Series 6.6.2

Table 364: OmniSwitch 6250 Series 6.6.2.259 R01 [6250]

5620 SAM Release	Compatibility Statement (OmniSwitch Series 6.6.2.259 R01 [6250])
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **FPGA Upgrade**. 5620 SAM does not support FPGA Upgrade for 6.6.2 nodes due to a limitation on the node.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **FPGA Upgrade**. 5620 SAM does not support FPGA Upgrade for 6.6.2 nodes due to a limitation on the node.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **OAM**. 5620 SAM does not support OAM for 6.6.2 nodes. **FPGA Upgrade**. 5620 SAM does not support FPGA Upgrade for 6.6.2 nodes. **(PTS 584852) Deployment Failure with QoS Condition 802.1p Layer 2**. QoS Condition with 802.1p Layer 2 filtering criteria enabled results in a deployment failure. Work-around: create the entry via the router and resync into 5620 SAM.

Alcatel-Lucent OmniSwitch Series 6.6.1

Table 365: OmniSwitch 6250 Series 6.6.1.791 R01 [6250]

5620 SAM Release	Compatibility Statement (OmniSwitch Series 6.6.1. 791 R01 [6250])
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.

Alcatel-Lucent OmniSwitch Series 6.4.4

Table 366: OmniSwitch Series 6.4.4 R01 [6850 / 6850E / 6400 / 6855 / 6855U24X / 9700E / 9800E]

5620 SAM Release	Compatibility Statement (OmniSwitch Series 6.4.4.R01 GA Release [6850 / 6850E/ 6400 / 6855 / 6855U24X / 9700E / 9800E])
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **(PTS 609292) Routing Instance Deployment Failure.** 5620 SAM does not support creation of more than 8 VRFs (routing instances) on 6855U24X node.

Alcatel-Lucent OmniSwitch Series 6.4.3

Table 367: OmniSwitch Series 6.4.3.717 R01 [6850 / 6400 / 6855[6855U24x] / 9600 / 9700 / 9800 / 9700E / 9800E]

5620 SAM Release	Compatibility Statement (OmniSwitch Series 6.4.3.717 R01 [6850 / 6400 / 6855[6855U24x] / 9600 / 9700 / 9800 / 9700E / 9800E])
5620 SAM 9.0 R1	Network elements supported as per 5620 SAM Release Description.
5620 SAM 8.0 R5 through R8	Network elements supported as per 5620 SAM Release Description.

Alcatel-Lucent OmniSwitch Series 6.4.2

Table 368: OmniSwitch Series 6.4.2.968 R01 [6850 / 6400 / 6855 / 9600 / 9700 / 9800 / 9700E / 9800E]

5620 SAM Release	Compatibility Statement (OmniSwitch Series 6.4.2.968 R01 [6850 / 6400 / 6855 / 9600 / 9700 / 9800 / 9700E / 9800E])
5620 SAM 9.0 R1	Network elements supported as per 5620 SAM Release Description.
5620 SAM 8.0 R3 through R8	Network elements supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R2	Only 9700E and 9800E Omniswitch Series 6.4.2 are supported as per 5620 SAM Release Description.

Alcatel-Lucent OmniSwitch Series 6.3.4

Table 369: OmniSwitch Series 6.3.4.621 R01 [6850 / 6400 / 6855 / 9600 / 9700 / 9800]

5620 SAM Release	Compatibility Statement (OmniSwitch Series 6.3.4.621 R01 [6850 / 6400 / 6855 / 9600 / 9700 / 9800])
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: 5620 SAM only support 9600/9700/9800 as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R5 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Link Aggregation Groups.** 5620 SAM does not support Link Aggregation Groups (LAGs).

Table 370: OmniSwitch Series 6.3.4 R01 [6850 / 6400 / 6855 / 9600 / 9700 / 9800]

5620 SAM Release	Compatibility Statement (OmniSwitch Series 6.3.4 R01 [6850 / 6400 / 6855 / 9600 / 9700 / 9800])
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: 5620 SAM only support 9600/9700/9800 as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R5 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Link Aggregation Groups.** 5620 SAM does not support Link Aggregation Groups (LAGs).

Alcatel-Lucent OmniSwitch Series 6.3.3

Table 371: OmniSwitch Series 6.3.3.305 R01 [6400]

5620 SAM Release	Compatibility Statement (OmniSwitch Series 6.3.3.305 R01 [6400])
5620 SAM 8.0 R5 and above	Network element not supported.
5620 SAM 8.0 R1 through R4	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Link Aggregation Groups.** 5620 SAM does not support Link Aggregation Groups (LAGs).
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description.

Table 372: OmniSwitch Series 6.3.3 R01 [6400]

5620 SAM Release	Compatibility Statement (OmniSwitch Series 6.3.3 R01 [6400])
5620 SAM 8.0 R3 and above	Network element not supported.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Link Aggregation Groups.** 5620 SAM does not support Link Aggregation Groups (LAGs).
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description.

Alcatel-Lucent OmniSwitch Series 6.3.2

Table 373: OmniSwitch Series 6.3.2 R01 [6855]

5620 SAM Release	Compatibility Statement (OmniSwitch Series 6.3.2 R01 [6855])
5620 SAM 8.0 R5 and above	Network element not supported.
5620 SAM 8.0 R1 through R4	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Link Aggregation Groups**. 5620 SAM does not support Link Aggregation Groups (LAGs).
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description.

Alcatel-Lucent OmniSwitch Series 6.3.1

Table 374: OmniSwitch Series 6.3.1.1176 R01 [6850]

5620 SAM Release	Compatibility Statement (OmniSwitch Series 6.3.1.1176 R01 [6850])
5620 SAM 8.0 R5 and above	Network element not supported.
5620 SAM 8.0 R1 through R4	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R3 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R1 through R2	Network element supported as per 5620 SAM Release Description with the following limitations: **Link Aggregation Groups**. 5620 SAM does not support Link Aggregation Groups (LAGs).
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description.

Table 375: OmniSwitch Series 6.3.1.1176 R01 [9600 / 9700 / 9800]

5620 SAM Release	Compatibility Statement (OmniSwitch Series 6.3.1.1176 R01 [9600 / 9700 / 9800])
5620 SAM 8.0 R5 and above	Network element not supported.
5620 SAM 8.0 R1 through R4	Network elements supported as per 5620 SAM Release Description.
5620 SAM 7.0 R3 through R8	Network elements supported as per 5620 SAM Release Description.
5620 SAM 7.0 R1 through R2	Network elements supported with the following limitations: **Link Aggregation Groups**. 5620 SAM does not support Link Aggregation Groups (LAGs).

Table 376: OmniSwitch Series 6.3.1.1085 R01 [6850]

5620 SAM Release	Compatibility Statement (OmniSwitch Series 6.3.1.1085 R01 [6850])
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description.

Table 377: OmniSwitch Series 6.3.1 R01 [6850]

5620 SAM Release	Compatibility Statement (OmniSwitch Series 6.3.1 R01 [6850])
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.1 R1 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 6.0 R1 through R8	Network element supported as per 5620 SAM Release Description.

Table 378: OmniSwitch Series 6.3.1 R01 [9600 / 9700 / 9800]

5620 SAM Release	Compatibility Statement (OmniSwitch Series 6.3.1 R01 [9600 / 9700 / 9800])
5620 SAM 8.0 R5 and above	Network element not supported.
5620 SAM 8.0 R1 through R4	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R1 through R8	Network element supported as per 5620 SAM Release Description.

3.13 Alcatel-Lucent 9500 Microwave Packet Radio ANSI Release

Alcatel-Lucent 9500 Microwave Packet Radio ANSI Release 3.0

Table 379: 9500 MPR ANSI 3.0

5620 SAM Release	Compatibility Statement (9500 MPR ANSI 3.0)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **N x(1+0).** 5620 SAM does not support multiple radio links between two network elements.

Alcatel-Lucent 9500 Microwave Packet Radio ANSI Release 2.2

Table 380: 9500 MPR ANSI 2.2.1

5620 SAM Release	Compatibility Statement (9500 MPR ANSI 2.2.1)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description.

Table 381: 9500 MPR ANSI 2.2.0

5620 SAM Release	Compatibility Statement (9500 MPR ANSI 2.2.0)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Service Discovery**. Discovery of services will discover only one service at a time if Management IP address and System IP address are different.

Alcatel-Lucent 9500 Microwave Packet Radio ANSI Release 2.1

Table 382: 9500 MPR ANSI 2.1

5620 SAM Release	Compatibility Statement (9500 MPR ANSI 2.1)
5620 SAM 8.0 R7 and above	Network element not supported.
5620 SAM 8.0 R5 through R6	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Service Discovery**. Discovery of services will discover only one service at a time if Management IP address and System IP address are different.

Alcatel-Lucent 9500 Microwave Packet Radio ANSI Release 2.0

Table 383: 9500 MPR ANSI 2.0.1

5620 SAM Release	Compatibility Statement (9500 MPR ANSI 2.0.1)
5620 SAM 8.0 R7 and above	Network element not supported.
5620 SAM 8.0 R5 through R6	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Service Discovery**. Discovery of services will discover only one service at a time if Management IP address and System IP address are different.

Table 384: 9500 MPR ANSI 2.0

5620 SAM Release	Compatibility Statement (9500 MPR ANSI 2.0)
5620 SAM 8.0 R7 and above	Network element not supported.
5620 SAM 8.0 R5 through R6	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Service Discovery**. Discovery of services will discover only one service at a time if Management IP address and System IP address are different.
5620 SAM 7.0 R5 through R8	Network element supported as per 5620 SAM Release Description with the following limitations: **Service Discovery**. Discovery of services will discover only one service at a time if Management IP address and System IP address are different.

Alcatel-Lucent 9500 Microwave Packet Radio ANSI Release 1.2

Table 385: 9500 MPR ANSI 1.2

5620 SAM Release	Compatibility Statement (9500 MPR ANSI 1.2)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description.

3.14 Alcatel-Lucent 9500 Microwave Packet Radio ETSI Release

Alcatel-Lucent 9500 Microwave Packet Radio ETSI Release 3.0

Table 386: 9500 MPR ETSI 3.0

5620 SAM Release	Compatibility Statement (9500 MPR ETSI 3.0)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description with the following limitations: **N x(1+0).** 5620 SAM does not support multiple radio links between two network elements.

Alcatel-Lucent 9500 Microwave Packet Radio ETSI Release 2.1

Table 387: 9500 MPR ETSI 2.1

5620 SAM Release	Compatibility Statement (9500 MPR ETSI 2.1)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description.

Alcatel-Lucent 9500 Microwave Packet Radio ETSI Release 1.4

Table 388: 9500 MPR ETSI 1.4

5620 SAM Release	Compatibility Statement (9500 MPR ETSI 1.4)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Service Discovery**. Discovery of services will discover only one service at a time if Management IP address and System IP address are different.

Alcatel-Lucent 9500 Microwave Packet Radio ETSI Release 1.3

Table 389: 9500 MPR ETSI 1.3.0 and 1.3.1

5620 SAM Release	Compatibility Statement (9500 MPR ETSI 1.3.0 and 1.3.1)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R5 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R1 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Service Discovery**. Discovery of services will discover only one service at a time if Management IP address and System IP address are different.

Alcatel-Lucent 9500 Microwave Packet Radio ETSI Release 1.2

Table 390: 9500 MPR ETSI 1.2.1 and 1.2.2

5620 SAM Release	Compatibility Statement (9500 MPR ETSI 1.2.1 and 1.2.2)
5620 SAM 8.0 R3 and above	Network element not supported.
5620 SAM 8.0 R1 through R2	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R5 through R8	Network element supported as per 5620 SAM Release Description.
5620 SAM 7.0 R3 through R4	Network element supported as per 5620 SAM Release Description with the following limitations: **Admission Control**. 5620 SAM does not support Admission Control. **TDM Statistics**. 5620 SAM does not support TDM Statistics.

Table 391: 9500 MPR ETSI 1.2.0

5620 SAM Release	Compatibility Statement (9500 MPR ETSI 1.2.0)
5620 SAM 8.0 R1 and above	Network element not supported.
5620 SAM 7.0 R3 through R8	Network element supported as per 5620 SAM Release Description.

3.15 Alcatel-Lucent 1830 Photonic Service Switch

Alcatel-Lucent 1830 Photonic Service Switch Release 2.5

Table 392: 1830 PSS-32 Release 2.5.0 / 2.5.1

5620 SAM Release	Compatibility Statement (1830 PSS-32 Release 2.5.0 / 2.5.1)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description.

Table 393: 1830 PSS-16 Release 2.5.0 / 2.5.1

5620 SAM Release	Compatibility Statement (1830 PSS-16 Release 2.5.0 / 2.5.1)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description.

Table 394: 1830 PSS-1 GBEH Release 2.5.0

5620 SAM Release	Compatibility Statement (1830 PSS-1 GBEH Release 2.5.0)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description.

Alcatel-Lucent 1830 Photonic Service Switch Release 1.5

Table 395: 1830 PSS-1 MD4H Release 1.5.0

5620 SAM Release	Compatibility Statement (1830 PSS-1 MD4H Release 1.5.0)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description.

Alcatel-Lucent 1830 Photonic Service Switch Release 1.0

Table 396: 1830 PSS-1 AHP Release 1.0

5620 SAM Release	Compatibility Statement (1830 PSS-1 AHP Release 1.0)
5620 SAM 9.0 R1	Network element supported as per 5620 SAM Release Description.
5620 SAM 8.0 R7 through R8	Network element supported as per 5620 SAM Release Description.

4 Document release history

The following table lists the 5620 *SAM Network Element Compatibility Guide* release history.

Document version	Issue date	Description of changes
1.0	February 8, 2006	Initial issue
1.1	February 22, 2006	General – Added document history table
		General – Document updated for 5620 SAM 3.0 R5
		Section 2.2.2 – Created new table to describe compatibility issues with 7450 ESS 2.0 R10
1.2	March 2, 2006	Section 2.1.1 – Created new table to describe compatibility issues with 7750 SR 3.0 R7
		Section 2.2.1 – Updated table to include 7450 ESS 3.0 R7
1.3	April 6, 2006	General – Document updated for 5620 SAM 3.0 R6
		General – Document updated for 7750 SR 3.0 R8 and 7450 ESS 3.0 R8
		Section 2.1.2 – Updated table to include 7750 SR 2.1 R13 and 7750 SR 2.1 R14
		Section 2.3.1 – New table to indicate compatibility with 7250 SAS 1.0 R6.1.
1.4	May 10,2006	General – Document updated for 5620 SAM 3.0 R7
		General – Document updated for 7750 SR 3.0 R9 and 7450 ESS 3.0 R9
		Section 2.1.2 – Updated table to include 7750 SR 2.1 R15
		Section 2.4.1 – Created new table to describe compatibility issues with Telco 6.3.12
1.5	June 28, 2006	General – Document updated to new template format
		General – Document updated for 5620 SAM 4.0 R1
		General – Document updated for 7750 SR 4.0 R1/R2 and 7450 ESS 4.0 R1/R2
		General – Document updated for 7710 SR 3.0 R1 through R3
		General – Document updated for 7750 SR 3.0 R11 and 7450 ESS 3.0 R11
		General – Document updated for 7750 SR 3.0 R10 and 7450 ESS 3.0 R10
		General – Document updated for 7750 SR 2.1 R16
		General – Document updated for 7250 1.0 R7

Document version	Issue date	Description of changes
1.6	July 6, 2006	General – Document updated for 7750 SR 4.0 R3 and 7450 ESS 4.0 R3
1.7	July 19, 2006	General – Document updated for 5620 SAM 3.0 R8
		General – Document updated for Telco 6.3.13
1.8	July 26, 2006	General – Document updated for 5620 SAM 4.0 R2
1.9	August 3, 2006	General – Document updated for 7750 SR 4.0 R4 and 7450 ESS 4.0 R4
		General – Document updated for 7750 SR 3.0 R12 and 7450 ESS 3.0 R12
1.10	August 9, 2006	General – Document updated for 7710 SR 3.0 R5
1.11	August 25, 2006	General – Document updated for 7750 SR 3.0 R13 and 7450 ESS 3.0 R13
		General – Document updated for 7750 SR 2.1 R17
		General – Document updated for 7710 SR 3.0 R6
	August 30, 2006	General – Document updated for 7750 SR 4.0 R5 and 7450 ESS 4.0 R5
		General – Document updated for 5620 SAM 4.0 R3
1.12	September 19, 2006	General – Document updated for 5620 SAM 3.0.R9
1.13	September 27, 2006	General – Document updated for 5620 SAM 4.0 R4
		General – Document updated for 7750 SR 3.0 R14 and 7450 ESS 3.0 R14
		General – Document updated for 7750 SR 4.0 R6 and 7450 ESS 4.0 R6
		General – Document updated for 7710 SR 3.0 R7
1.14	October 25, 2006	General – Document updated for 5620 SAM 4.0.R5
1.15	November 6, 2006	General – Document updated for 7750 SR 3.0 R15 and 7450 ESS 3.0 R15
		General – Document updated for 7750 SR 4.0 R7 and 7450 ESS 4.0 R7
		General – Document updated for 7710 SR 3.0 R8
		General – Document updated for 7750 SR 2.1 R18

Document version	Issue date	Description of changes
1.16	December 1, 2006	General – Document updated for 5620 SAM 3.0 R10
		General – Document updated for 5620 SAM 4.0 R6
		General – Document updated for 7750 SR 3.0 R16 and 7450 ESS 3.0 R16
		General – Document updated for 7710 SR 3.0 R9
		General – Document updated for 7250 SAS 2.0 R1
1.17	December 7, 2006	General – Document updated for 7750 SR 4.0 R8 and 7450 ESS 4.0 R8
1.18	December 15, 2006	General – Document updated for 7750 SR 4.0 R9 and 7450 ESS 4.0 R9
1.19	January 25, 2007	General – Document updated for 5620 SAM 4.0 R7
		General – Document updated for 7710 SR 3.0 R10
1.20	February 13, 2007	General – Document updated for 7750 SR 3.0 R17 and 7450 ESS 3.0 R17
		General – Document updated for 7750 SR 4.0 R10 and 7450 ESS 4.0 R10
1.21	February 27, 2007	General – Document updated for 5620 SAM 4.0 R8
		General – Document updated for 7710 SR 3.0 R11
		General – Document updated for 7750 SR 4.0 R11 and 7450 ESS 4.0 R11
1.22	March 14, 2007	General – Document updated for 5620 SAM 4.0 R9
		General – Document updated to reflect correct versions of 7250 support
1.23	April 18, 2007	General – Document updated for 5620 SAM 5.0 R1
		General – Document updated for 7750 SR 5.0 R2 and 7450 ESS 5.0 R2
		General – Document updated for 7750 SR 5.0 R1 and 7450 ESS 5.0 R1
		General – Document updated for 7750 SR 4.0 R12 and 7450 ESS 4.0 R12
		General – Document updated for 7750 SR 3.0 R18 and 7450 ESS 3.0 R18
		General – Document updated for 7250 SAS 1.0 R8

Document version	Issue date	Description of changes
1.24	May 22, 2007	General – Document updated for 5620 SAM 5.0 R2
		General – Document updated for 7750 SR 5.0 R3 and 7450 ESS 5.0 R3
		General – Document updated for 7710 SR 5.0 R3
		General – Document updated for 7750 SR 4.0 R13 and 7450 ESS 4.0 R13
		General – Document updated for 7710 SR 3.0 R12
		General – Document updated for 7250 SAS 2.0 R5
1.25	May 30, 2007	General – Document updated for 5620 SAM 4.0 R10
1.26	June 27, 2007	General – Document updated for 5620 SAM 5.0 R3
		General – Document updated for 5620 SAM 4.0 R11
		General – Document updated for 7750 SR 5.0 R4 and 7450 ESS 5.0 R4
		General – Document updated for 7750 SR 4.0 R14 and 7450 ESS 4.0 R14
		General – Document updated for 7750 SR 3.0 R19 and 7450 ESS 3.0 R19
		General – Document updated for 7710 SR 5.0 R4
		General – Document updated for 7250 SAS 2.0 R5.1
1.27	July 9, 2007	General – Document updated for 7750 SR 5.0 R5 and 7450 ESS 5.0 R5
		General – Document updated for 7710 SR 5.0 R5
1.28	July 20, 2007	General – Document updated for 5620 SAM 5.0 R4
		General – Document updated for 7710 SR 3.0 R13
1.29	August 17, 2007	General – Document updated for 5620 SAM 5.0 R5
		General – Document updated for 7750 SR 5.0 R6 and 7450 ESS 5.0 R6
		General – Document updated for 7710 SR 5.0 R6
		General – Document updated for 7710 SR 3.0 R14
		General – Document updated for 7250 SAS 2.0 R5.2
		General – Document updated for Telco 6.5.2

Document version	Issue date	Description of changes
1.30	September 6, 2007	General – Document updated for 7750 SR 5.0 R7 and 7450 ESS 5.0 R7
		General – Document updated for 7710 SR 5.0 R7
		General – Document updated for 7750 SR 4.0 R15 and 7450 ESS 4.0 R15
1.31	September 10, 2007	General – Document updated for 5620 SAM 5.0 R6
		General – Document updated for 7750 SR 5.0 R8 and 7450 ESS 5.0 R8
		General – Document updated for 7710 SR 5.0 R8
		General – Document updated for 7750 SR 4.0 R16 and 7450 ESS 4.0 R16
1.32	October 18, 2007	General – Document updated for 5620 SAM 5.0 R7
		General – Document updated for 7750 SR 3.0 R20 and 7450 ESS 3.0 R20
1.33	November 5, 2007	General – Document updated for 7750 SR 5.0 R9 and 7450 ESS 5.0 R9
		General – Document updated for 7710 SR 5.0 R9
		General – Document updated for 7750 SR 4.0 R17 and 7450 ESS 4.0 R17
		General – Document updated for 7710 SR 3.0 R15
1.34	November 22, 2007	General – Document updated for 5620 SAM 5.0 R8
1.35	December 14, 2007	General – Document updated for 7750 SR 5.0 R10 and 7450 ESS 5.0 R10
		General – Document updated for 7710 SR 5.0 R10
		General – Document updated for 7750 SR 4.0 R18 and 7450 ESS 4.0 R18
1.36	December 20, 2007	General – Document updated for 5620 SAM 4.0 R12
		General – Document updated for 7250 SAS 2.0 R7.1
		General – Document updated for Telco 6.5.5
1.37	February 1, 2008	General – Document updated for 5620 SAM 5.0 R9
1.38	February 13, 2008	General – Document updated for 7750 SR 5.0 R11 and 7450 ESS 5.0 R11
		General – Document updated for 7710 SR 5.0 R11
		Correction – Update made for OAM tests ranges for 7xx0 5.0 routers

Document version	Issue date	Description of changes
1.39	February 25, 2008	General – Document updated for 7750 SR 5.0 R12 and 7450 ESS 5.0 R12
		General – Document updated for 7710 SR 5.0 R12
		General – Document updated for 7750 SR 4.0 R19 and 7450 ESS 4.0 R19
		General – Document updated for 7250 SAS 2.0 R8
		General – Document updated for 7250 SAS 2.0 R8.1
		Correction – Update made for OAM tests ranges for 7x50 4.0 routers
1.40	March 24, 2008	General – Document updated for 7750 SR 5.0 R13 and 7450 ESS 5.0 R13
		General – Document updated for 7710 SR 5.0 R13
1.41	April 14, 2008	General – Document updated for 5620 SAM 5.0 R10
1.42	April 25, 2008	General – Document updated for 5620 SAM 6.0 R1
		General – Document updated for 7750 SR 6.0 R2 and 7450 ESS 6.0 R2
		General – Document updated for 7710 SR 6.0 R2
		General – Document updated for 7750 SR 6.0 R1 and 7450 ESS 6.0 R1
		General – Document updated for 7710 SR 6.0 R1
		General – Document updated for 7750 SR 5.0 R14 and 7450 ESS 5.0 R14
		General – Document updated for 7710 SR 5.0 R14
		General – Document updated for 7250 SAS 3.0 R3 (Pending official release)
		General – Document updated for OmniSwitch 6850 Series 6.3.1 R01
1.43	May 5, 2008	General – Document updated for 7750 SR 6.0 R3 and 7450 ESS 6.0 R3
		General – Document updated for 7710 SR 6.0 R3
		General – Document updated for 7250 SAS 3.0 R3 (official release)
1.44	May 9, 2008	General – Document updated for 7250 SAS 3.0 R3.1
1.45	May 20, 2008	General – Document updated for 5620 SAM 6.0 R2
		General – Document updated for 7705 SAR 1.0 R1

Document version	Issue date	Description of changes
1.46	May 29, 2008	General – Document updated for 7750 SR 6.0 R4 and 7450 ESS 6.0 R4
		General – Document updated for 7710 SR 6.0 R4
		General – Document updated for 7750 SR 5.0 R15 and 7450 ESS 5.0 R15
		General – Document updated for 7710 SR 5.0 R15
1.47	June 12, 2008	General – Document updated for 7250 SAS 2.0 R9
1.48	June 28, 2008	General – Document updated for 5620 SAM 6.0 R3
		General – Document updated for 7750 SR 5.0 R16 and 7450 ESS 5.0 R16
		General – Document updated for 7710 SR 5.0 R16
		General – Document updated for 7705 SAR 1.0 R2
1.49	July 9, 2008	General – Document updated for 5620 SAM 5.0 R11
1.50	July 29, 2008	General – Document updated for 5620 SAM 6.0 R4
		General – Document updated for 7750 SR 6.0 R5 and 7450 ESS 6.0 R5
		General – Document updated for 7710 SR 6.0 R5
		General – Document updated for 7750 SR 6.0 R6 and 7450 ESS 6.0 R6
		General – Document updated for 7710 SR 6.0 R6
		General – Document updated for 7750 SR 4.0 R20 and 7450 ESS 4.0 R20
1.51	August 27, 2009	General – Document updated for 5620 SAM 6.0 R5
		General – Document updated for 7750 SR 6.0 R7 and 7450 ESS 6.0 R7
		General – Document updated for 7710 SR 6.0 R7
		General – Document updated for 7750 SR 5.0 R18 and 7450 ESS 5.0 R18
		General – Document updated for 7710 SR 5.0 R18
		General – Document updated for 7750 SR 5.0 R17 and 7450 ESS 5.0 R17
		General – Document updated for 7710 SR 5.0 R17
		General – Document updated for 7705 SAR 1.0 R4
		General – Document updated for 7705 SAR 1.0 R3

Document version	Issue date	Description of changes
1.52	September 24, 2008	General – Document updated for 5620 SAM 6.1 R1
		General – Document updated for 7750 SR 6.1 R2 and 7450 ESS 6.1 R2
		General – Document updated for 7710 SR 6.1 R2
		General – Document updated for 7750 SR 6.1 R1 and 7450 ESS 6.1 R1
		General – Document updated for 7710 SR 6.1 R1
		General – Document updated for 7750 SR 6.0 R8 and 7450 ESS 6.0 R8
		General – Document updated for 7710 SR 6.0 R8
		General – Document updated for 7750 SR 5.0 R19 and 7450 ESS 5.0 R19
		General – Document updated for 7710 SR 5.0 R19
		General – Document updated for 7705 SAR 1.0 R5
		General – Document updated for OmniSwitch 6855 Series 6.3.2 R01
		General – Document updated for OmniSwitch 6400 Series 6.3.3 R01
1.53	October 1, 2008	General – Document updated for 7750 SR 6.1 R3 and 7450 ESS 6.1 R3
		General – Document updated for 7710 SR 6.1 R3
1.54	October 23, 2008	General – Document updated for 5620 SAM 6.0 R6
		General – Document updated for 7750 SR 5.0 R20 and 7450 ESS 5.0 R20
		General – Document updated for 7710 SR 5.0 R20
		General – Document updated for 7705 SAR 1.0 R6
		General – Document updated for 7250 SAS 3.0 R4.1
1.55	November 5, 2008	General – Document updated for 5620 SAM 6.1 R2
		General – Document updated for 7750 SR 6.0 R9 and 7450 ESS 6.0 R9
		General – Document updated for 7710 SR 6.0 R9
		General – Document updated for 7750 SR 6.1 R4 and 7450 ESS 6.1 R4
		General – Document updated for 7710 SR 6.1 R4
1.56	November 6, 2008	Correction – Document corrected for IOM Soft Reset support

Document version	Issue date	Description of changes
1.57	November 23, 2008	General – Document updated for 5620 SAM 6.1 R3
		General – Document updated for 7705 SAR 1.1 R1
1.58	December 4, 2008	General – Document updated for 5620 SAM 6.0 R7
		General – Document updated for 7750 SR 5.0 R21 and 7450 ESS 5.0 R21
		General – Document updated for 7710 SR 5.0 R21
		Correction – Document correction/update for 7450 ESS 6.0 R9
1.59	December 19, 2008	General – Document updated for 7750 SR / 7450 ESS / 7710 SR 6.1 R5
		General – Document updated for 7750 SR / 7450 ESS / 7710 SR 6.0 R10
		General – Document updated for 7705 SAR 1.0 R7
		General – Document updated for 7250 SAS 3.0 R5
1.60	December 22, 2008	General – Document updated for 7750 SR / 7450 ESS / 7710 SR 5.0 R22
1.61	January 29, 2009	General – Document updated for 5620 SAM 6.1 R4
		General – Document updated for 7750 SR / 7450 ESS / 7710 SR 6.1 R6
		General – Document updated for 7750 SR / 7450 ESS 4.0 R21
		General – Document updated for 7705 SAR 1.1 R2
		General – Document updated for 7250 SAS 2.0 R11
1.62	March 9, 2009	General – Document updated for 5620 SAM 6.0 R8
		General – Document updated for 7750 SR / 7450 ESS / 7710 SR 6.0 R11
		General – Document updated for 7250 SAS 3.0 R6
1.63	March 20, 2009	General – Document updated for 5620 SAM 6.1 R5
		General – Document updated for 7705 SAR 1.1 R3
1.64	April 16, 2009	General – Document updated for 7750 SR / 7450 ESS / 7710 SR 6.1 R7
		General – Document updated for 7750 SR / 7450 ESS / 7710 SR 6.1 R8
		General – Document updated for 7250 SAS 2.0 R12

Document version	Issue date	Description of changes
1.65	April 22, 2009	General – Document updated for 5620 SAM 7.0 R1
		General – Document updated for 7750 SR / 7450 ESS / 7710 SR 7.0 R2
		General – Document updated for 7750 SR / 7450 ESS / 7710 SR 7.0 R1
		General – Document updated for 7705 SAR 2.0 R2
		General – Document updated for 7705 SAR 2.0 R1
		General – Document updated for 7210 SAS-E 1.0 R3
		General – Document updated for 7250 SAS 2.0 R13
		General – Document updated for OmniSwitch 9600 Series 6.3.1 R01
		General – Document updated for OmniSwitch 9700 Series 6.3.1 R01
		General – Document updated for OmniSwitch 9800 Series 6.3.1 R01
1.66	May 1, 2009	General – Document updated for 7750 SR / 7450 ESS / 7710 SR 6.0 R12
		General – Document updated for 7750 SR / 7450 ESS / 7710 SR 5.0 R23
1.67	May 6, 2009	General – Document updated for OmniSwitch 6850 Series 6.3.1.1085 R01
		General – Document updated for OmniSwitch 6400 Series 6.3.3.305 R01
1.68	May 8, 2009	General – Document updated for 5620 SAM 6.1 R6
1.69	May 22, 2009	General – Document updated for 5620 SAM 7.0 R2
		General – Document updated for 7750 SR / 7450 ESS / 7710 SR 6.1 R9
		General – Document updated for 7705 SAR 2.0 R3
1.70	June 4, 2009	General – Document updated for 7750 SR / 7450 ESS / 7710 SR 7.0 R3
		General – Document updated for 7210 SAS-E 1.0 R4
		General – Document updated for 7250 SAS 3.0 R7
1.71	June 24, 2009	General – Document updated for 5620 SAM 7.0 R3
		General – Document updated for 9500 MPR 1.2.0

Document version	Issue date	Description of changes
1.72	July 23, 2009	General – Document updated for 5620 SAM 6.1 R7
		General – Document updated for 7750 SR / 7450 ESS / 7710 SR 6.0 R13

5 Obtaining technical support

Technical Support Engineers are available to assist you 24 hours a day, 7 days a week.
For the list of regional contact telephone and fax numbers, visit: http://support.alcatel-lucent.com/ and click on the Alcatel-Lucent Global Support link.

6 Glossary

Term	Description
1830 PSS	Alcatel-Lucent 1830 Photonic Service Switch The Alcatel-Lucent 1830 Photonic Service Switch (PSS) is a multi-reach photonic platform, providing the first commercially available support for best in class, single carrier 100G Next Generation Coherent technology.
5620 SAM	5620 Service Aware Manager A single management platform offering element, network and service management for advanced Layer 2 and Layer 3 network solutions and services based on Alcatel-Lucent's Carrier Ethernet and IP/MPLS Service Routing portfolio.
5620 SAM client	The 5620 SAM client provides a GUI to configure IP network elements.
5620 SAM-O client	A 5620 SAM-O client is an application that uses the 5620 SAM-O interface to perform functions such as inventory management or alarm monitoring.
5620 SAM database	The 5620 SAM database stores network objects and configurations.
5620 SAM server	The 5620 SAM server mediates between the 5620 SAM database, 5620 SAM client, and the network.
5780 DSC	Alcatel-Lucent 5780 Dynamic Services Controller The 5780 DSC provides the Policy and Charging Rules Function (PCRF) as defined by the 3GPP, and is an integral component of the Alcatel-Lucent Ultimate Wireless Packet Core (UWPC) and Long Term Evolution (LTE) solutions while also supporting 3G deployments. The PCRF allow providers to manage and control network behavior based on specific business rules, application requirements, network status, and subscriber entitlement and preferences.
7250 SAS	Alcatel-Lucent 7250 Service Access Switch A feature-rich customer premises device purpose-built to deliver a complete portfolio of voice, video and data services to enterprise customers.
7210 SAS	Alcatel-Lucent 7210 Service Access Switch Available in MPLS and Ethernet variants, the 7210 SAS is built to enable cost effective and highly scalable Carrier Ethernet services delivery.
7450 ESS	Alcatel-Lucent 7450 Ethernet Service Switch Enables the delivery of profitable metro Ethernet services and high density service-aware Ethernet aggregation over IP/MPLS-based networks
7705 SAR	Alcatel-Lucent 7705 Service Aggregation Router Delivers industry-leading IP/MPLS and pseudo-wire capabilities in a compact platform that has the ability to groom and aggregate multiple media, service and transport protocols onto a normalized, economical packet transport infrastructure.

7710 SR	Alcatel-Lucent 7710 Service Router Ensures the delivery of high-performance carrier-grade data, voice and video services and brings carrier-grade reliability to smaller Points of Presence (POP) and offices.
7750 MG	Alcatel-Lucent 7750 Mobile Gateway The 7750 MG is an SR-based node which fulfills the role of the Serving Gateway (SGW) and Packet Data Network Gateway (PGW) in a 3GPP compliant architecture for an LTE network. The SGW is positioned at the edge of eUTRAN and terminates the connection from the eNodeB. The PGW acts as the transit point between the Evolved Packet Solution network and other networks (internet, IMS etc.).
7750 SR	Alcatel-Lucent 7750 Service Router A superior multi-service edge router - purpose built for service providers who are looking to deliver a new wave of residential and business services on a single IP/MPLS network.
9471 MME	Alcatel-Lucent 9471 Mobility Management Entity The 9471 Mobility Management Entity fulfills the role of the MME in a 3GPP compliant architecture for an LTE network. The MME is responsible for user equipment (UE) to access the network services by performing authorization and authentication of the UE. The MME is also responsible for bearer activation and deactivation and for selecting an SGW and PGW for the UE at the time of initial attachment.
9500 MPR	Alcatel-Lucent 9500 Microwave Packet Radio The Alcatel-Lucent 9500 Microwave Packet Radio (MPR) enables smooth transformation of backhaul networks from TDM to IP - and provides efficient transport of multimedia traffic, while still supporting legacy TDM. It improves packet aggregation, increases bandwidth, optimizes Ethernet connectivity and delivers the quality of service needed to satisfy end users.
OmniSwitch 6250	Alcatel-Lucent OmniSwitch 6250 The Alcatel-Lucent OmniSwitch 6250 Series is a family of fixed configuration, Gigabit Ethernet, stackable LAN switches with advanced Layer 2 and basic routing capabilities designed for both the Enterprise and Metro markets.
OmniSwitch 6400	Alcatel-Lucent OmniSwitch 6400 (OS6400) Series A set of compact, low-power, stackable layer 2+ Gigabit Ethernet local area network (LAN) switches. Ideal for small and medium-sized campus, branch offices and residential or business services as an Ethernet demarcation device (EDD).
OmniSwitch 6850	Alcatel-Lucent OmniSwitch 6850 (OS6850) Series Layer-3 Gigabit Ethernet fixed configuration switches that address the needs of modern enterprise and triple-play networking with flexible, stackable configurations; power-over-Ethernet, high availability, first-packet wire-speed performance, and dramatically improved network response time over past models.

OmniSwitch 6855	Alcatel-Lucent OmniSwitch 6855 (OS6855) Series Industrial grade, managed, Gigabit Ethernet switches designed to operate reliably in harsh electrical and severe temperature environments. Ideal for industrial and mission-critical applications that require wider operating temperatures, more stringent EMC/EMI requirements and optimized features set for high security, reliability, performance and easy management.
OmniSwitch 9600	Alcatel-Lucent OmniSwitch 9600 (OS9600) Series The Omni 9600 is a high performance switch offering four slots for Gigabit Ethernet and/or 10 gigabit Ethernet Network Interface (NI) modules. An additional one slot is reserved for the primary Chassis Management Module (CMM). The Omni 9600 supports a maximum of two load sharing power supplies.
OmniSwitch 9700	Alcatel-Lucent OmniSwitch 9700 (OS9700) Series The Omni 9700 is a high performance switch offering eight slots for Gigabit Ethernet and/or 10-gigabit Ethernet Network Interface (NI) modules. Additional two slots are reserved for primary and redundant Chassis Management Modules (CMMs). The Omni 9700 supports a maximum of three power supplies.
OmniSwitch 9800	Alcatel-Lucent OmniSwitch 9800 (OS9800) Series The Omni 9800 is a high performance switch offering 16 slots for Gigabit Ethernet and/or 10-Gigabit Ethernet Network Interface (NI) modules. An additional two slots are reserved for primary and redundant Chassis Management Modules (CMMs). The Omni 9800 supports a maximum of four power supplies.
Telco T5C	Telco Systems T5 Compact Service Extension Node Enables the delivery of high-performance and media-rich metro Ethernet services. The unique flexibility, efficiency, service, and high-availability characteristics of the Telco Systems T5C provide seamless service extension capabilities to the Alcatel-Lucent 7450 Ethernet Service Switch (ESS) and the Alcatel-Lucent 7750 Service Router (SR) product portfolios in the Metro Core, Metro Edge, Metro Access, and at the customer premises' boundary.
