7710 SR	Alcatel-Lucent 7710 Service Router
	Ensures the delivery of high-performance carrier-grade data, voice and video services and brings carrier-grade reliability to smaller Points of Presence (POP) and offices.
7750 MG	Alcatel-Lucent 7750 Mobile Gateway
	The 7750 MG is an SR-based node which fulfills the role of the Serving Gateway (SGW) and Packet Data Network Gateway (PGW) in a 3GPP compliant architecture for an LTE network. The SGW is positioned at the edge of eUTRAN and terminates the connection from the eNodeB. The PGW acts as the transit point between the Evolved Packet Solution network and other networks (internet, IMS etc.).
7750 SR	Alcatel-Lucent 7750 Service Router
	A superior multi-service edge router - purpose built for service providers who are looking to deliver a new wave of residential and business services on a single IP/MPLS network.
9471 MME	Alcatel-Lucent 9471 Mobility Management Entity
	The 9471 Mobility Management Entity fulfills the role of the MME in a 3GPP compliant architecture for an LTE network. The MME is responsible for user equipment (UE) to access the network services by performing authorization and authentication of the UE. The MME is also responsible for bearer activation and deactivation and for selecting an SGW and PGW for the UE at the time of initial attachment.
9500 MPR	Alcatel-Lucent 9500 Microwave Packet Radio
	The Alcatel-Lucent 9500 Microwave Packet Radio (MPR) enables smooth transformation of backhaul networks from TDM to IP - and provides efficient transport of multimedia traffic, while still supporting legacy TDM. It improves packet aggregation, increases bandwidth, optimizes Ethernet connectivity and delivers the quality of service needed to satisfy end users.
